First Forecast of the Jute crop in Bengal for season 1896, issued by the Director of the Department of Land Records and Agriculture.

Division.	District.	Approximate normal area under jute.	Approximate area sown last year (1895).	Estimated area sown this year (1896).	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1895)?	Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1896)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9
		Acres.	Acres.	Acres.	Annas	Annas.		
Burdwan ...	Burdwan ..	11,100	10,900	10,700	11½	15½	In the Sadar and Raniganj subdivisions, the area sown this year will be less than that sown last year, for want of timely and sufficient rain from March to May.	
	Midnapore .	20,000	11,100	8,900	12½	14½	The diminution in area is due to want of rain at the time of sowing. The outturn is likely to be better than that of last year.	
	Hooghly ..	14,300	12,000	7,000	8	14	The area shown in column 5 has been obtained from the reports of the four subdivisions of this district, but the Subdivisional Officer of Serampore thinks, and I endorse his opinion, that the approximate normal area under jute shown in column 3 has actually been sown this year.	
Presidency ...	24-Parganas ..	42,000	35,300	36,200	12½	13½	The late rains have done much good to the jute crop, and the outturn is expected to be better than that of last year.	
	Nadia ..	47,000	44,000	46,400	13	15	Owing to timely rainfall in May last, a larger area has been sown with jute this year than last year. The recent rain has also proved generally beneficial to the crop. A better outturn is expected this year than that of last year.	

Division.	District.	Approximate normal area under jute.	Approximate area sown last year (1895).	Estimated area sown this year (1896).	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1895)?	Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1896)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9
		Acres.	Acres.	Acres.	Annas.	Annas.		
Presidency—*concld.*	Murshidabad	30,600	20,300	19,300	11	11	The decrease in the area sown this year as compared with the normal area and with the area sown last year is due to the want of timely rain. For the same reason, the seeds have not germinated in some places. The crop is rather late and the outturn has in consequence been estimated at 11 annas.	
	Jessore	41,500	34,100	41,000	14	16	The increase in area is due to timely rainfall at the sowing season, and to the high price at which jute was sold last year. The outturn is expected to be better than that of last year owing to favourable rainfall since the sowing season.	
	Khulna ...	22,500	21,600	20,700	15½	14	The decrease in the area sown is at Satkhira alone, and is due to the want of rain in the latter part of April and beginning of May. Decrease in the outturn is expected at the Sadar and Satkhira subdivisions, owing to the want of timely rainfall.	
Rajshahi	Rajshahi ...	104,500	103,300	104,000	16	16	The area sown is estimated to be nearly equal to the normal. An average outturn is expected.	
	Dinajpur ...	99,500	107,500	107,500	18	12	The heavy rains during the month of May last have damaged the seedlings. Hence a smaller outturn is expected.	
	Jalpaiguri ...	64,000	64,900	65,400	10½	13½	The increase in area sown this year is due to the extension of jute cultivation in the Duars, and also to the growing demand for jute. Frequent falls of rain after sowing are interfering with the work of weeding.	
	Darjeeling (plains).	13,800	13,800	13,800	10	12	Owing to seasonable rainfall, a larger outturn is expected this year than last year.	

	Rangpur	278,500	278,000	267,300	16	13	The normal area has been sown in the Sadar, Kurigram and Nilphamari subdivisions. The area sown in Gaibanda is 11,200 acres less than the normal. This, the Subdivisional Officer explains, is due to want of rain during March and April. Want of rain at the beginning retarded the sowing, and excessive rainfall afterwards is said to have interfered with weeding operations. The figure in column 7 represents the average of the outturns for the four subdivisions. My own opinion is, that at present the crop promises to be a normal one of 16 annas.
	Bogra	76,000	100,000	100,000	13	10	Excessive rainfall at the time of sowing flooded the seedlings, and the prospects of the crop have been damaged.
	Pabna ...	180,900	175,500	158,300	17	16	Want of early rainfall caused the sowing of the crop to be very late; and hence the decrease in the area sown. If the rivers do not rise too quickly, an average crop may be reaped.
	Dacca	219,300	178,300	176,400	14	11	The decrease in the area sown, as well as in the estimate of the outturn of the crop, is due to the want of timely rainfall.
	Mymensingh	570,800	558,000	558,700	15¾	13⅝	The increase in the area under cultivation is reported to be due to the great demand for, and the high price of jute last year. The outturn is expected to be less for want of rain in the sowing season, and heavy showers in May, which retarded the growth of the plants.
Dacca ...	Faridpur ...	86,000	86,000	86,000	14	14	An 18-anna crop would have been estimated, had not the crop in thanas Bhushn, Faridpur, and Balakandi suffered for want of timely rain during the sowing season and too much rain later on.
	Backergunge	6,400	6,400	6,400	11	16	The present rainfall is benefiting the jute crop. The general impression, which I have got from my recent tours in Bhola and in the north of the Sadar Subdivision, is that we may expect an average outturn.
	Tippera ...	225,000	231,200	235,800	18	17	The increase in area is in the Brahmanbaria subdivision, and is due to the demand for jute towards the close of last year. The decrease in outturn, as compared with that of last year, is due to want of timely rainfall.
Chittagong ...	Noakhali ...	9,500	9,500	9,500	14	11	The outturn is expected to be less than that of the previous year, owing to insufficiency of rainfall in the sowing season.

Division.	District.	Approximate normal area under jute.	Approximate area sown last year (1895)	Estimated area sown this year (1896).	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1895)?	Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1896)?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	
		Acres.	Acres.	Acres.	Annas.	Annas.		
Bhagalpur ...	Bhagalpur ...	22,400	22,400	22,400	16	13	Unfavourable rainfall during the sowing season considerably retarded the sowing of the crop this year. The outturn has, therefore, been estimated below the average.	
	Purnea ...	62,200	75,500	75,500	15	16	The increase of one anna over last year's outturn is due to the better distribution of rainfall this year. The increase in the area sown this year over the normal area is due to the great demand for, and high price of jute. The opening of branch firms by Messrs. Ralli Brothers, of Calcutta, at Araria and Forbesganj has also given an impetus to the cultivation of this crop.	
	Malda ...	45,000	35,500	35,000	12	8	On account of prolonged drought, the area sown this year is less than the normal area. For the same reason, the outturn this year will be half of the average outturn.	
Orissa ...	Cuttack ...	5,500	4,900	3,000	13	13	Prolonged drought at the beginning of the season is the cause of the decrease in area, shown in column 5.	
	Balasore ...	3,600	2,700	2,600	12	12	The decrease in the area sown this year as compared with the normal and last year's area, is due to want of rain at the time of sowing.	
	Total ...	2,302,800	2,242,700	2,217,500	17*	14*		* Estimated by the Department of Land Records and Agriculture, Bengal.

N B.—Twenty annas represent a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

ADMINISTRATION REPORT OF THE BENGAL METEOROLOGICAL DEPARTMENT FOR THE TRIENNIAL PERIOD ENDING WITH THE YEAR 1895-96.

THE following is published for general information.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

The 30th June 1896. *Offg. Secy. to the Govt. of Bengal.*

ACCORDING to the standing orders of the Government of Bengal, the present report is for the triennial period ending with the year 1895-96. The last full report was for the period 1890—93, and two brief reports have since been submitted to the Government of Bengal in 1894 and 1895. This report will hence deal not only with the facts of the past year, but also with the full details of the years 1893-94 and 1894-95.

2. During the greater part of the year just closed the Bengal Meteorological Department was under my control, Mr. Pedler, the permanent incumbent, having been absent on furlough from 12th April 1895 to 20th November 1895. As stated in the previous two reports, I also officiated for Mr. Pedler from 27th April to 17th July 1893, when he was absent on privilege leave, and again from 5th August to 8th November 1893, when his services were placed at the disposal of the Government of India to officiate as Meteorological Reporter to that Government.

3. The changes in the administration of the Department during the past year have been of minor importance. The principles of the working of the Department, explained in previous Administration Reports, have been steadily maintained, and no changes of importance have been introduced throughout the triennial period.

4. The number of meteorological observatories submitting reports to the Bengal Meteorological Office on the 31st of March 1896 was 71, or one less than that on the corresponding date of last year. The decrease was due to the fact that the voluntary observatory at Kalimpong, which was re-opened during the year 1894-95, after having been in abeyance during 1892 and 1893, had to be closed, as Mr. Sutherland, at whose instance the observatory was started, could not arrange to keep it up.

5. It was mentioned in last year's report that arrangements were made to start a voluntary observatory at the Dapoota tea estate in Tezpore (Assam). The observatory was fully equipped with the meteorological instruments necessary for a third-class observatory, and it was started on the 1st of April 1895. Mr. Welsh, the manager of the tea estate, continued to send in accurate observations until September 1895, when he declined to record observations any longer, and the observatory had to be closed.

6. The following table will show the number of observatories as it stood on the 31st of March 1894, 1895, and 1896:—

	1893-94.	1894-95.	1895-96.
1	2	3	4
1st-class observatory ...	1	1	1
2nd-class observatory ...	16	16	16
3rd-class observatory ...	38	37	37
Voluntary observatory ...	7	8	7
Other stations reporting for the Bay of Bengal storm signal service.	8	10	10
Total ...	70	72	71

7. The following table will show the names and distribution of the 71 observatories sending in reports to the Bengal Meteorological Office at the close of the year 1895-96:—

First-class observatory.	Second-class observatories.	Third-class observatories.	Voluntary observatories.	Other observatories reporting to the Meteorological Department but not under the control of the Meteorological Reporter to the Government of Bengal.
1	2	3	4	5
Bengal. Alipore.	Assam. Dhubri. Sibsagar. Silchar. Bengal. Berhampore. Burdwan. Chittagong. Cuttack. Darbhanga. Darjeeling. False Point. Hazaribagh. Narayanganj. Patna. Saugor Island. Burma. Akyab. Madras. Coconada.	Bengal. Arrah. Balasore. Bankura. Barisal. Bhagalpur. Bogra. Buxar. Chaibassa. Chapra. Comilla. Dehri. Dinajpur. Faridpur. Gaya. Gnateng. Jalpaiguri. Jessore. Krishnagar. Malda. Midnapore. Motihari. Bengal—*concld.* Muzaffarpur. Mymensingh. Naya Dumka. Noakhali. Puri. Purnea. Rampur Boalia. Ranchi. Raniganj. Rangpur. Sirajganj. Burma. Tavoy. Madras. Cuddalore. Gopalpur. Nellore. Pamban.	Bengal. Daltonganj. Demagiri. Lungleh. Shortt's Island. Assam. Tura. Sikkim. Gantak. Tibet. Yatung	Burma. Bassein. Diamond Island. Moulmein. Rangoon. Ceylon. Galle. Trincomallee. Madras. Masulipatam. Negapatam. Madras. Vizagapatam.

8. With reference to the above table, it should be noted that the observatory at Alipore is under the direct control of the Meteorological Reporter to the Government of India. The Daltonganj Observatory is in no way connected with the Imperial Meteorological Department, except that the Bengal Meteorological Office receives the observations recorded there. It is hence classed as a "Voluntary" observatory. The observer is paid for by the Government of Bengal, which also bears the cost of its up-keep. The Vizagapatam Observatory, which had for many years been under the direction of Mr. Nursing Row, and on his death under the direction of Mrs. Nursing Row, was made over to the Government of India in the year 1895. It is now under the control of a Committee of which the Meteorological Reporter to the Government of India is the executive head and the Meteorological Reporter to the Government of Bengal one of its members.

Work at observatories in 1895-96.

9. The work at the observatories throughout the past year has, with a few exceptions enumerated below, been satisfactory. For instance, Ranchi, Daltonganj, and Muzaffarpur submitted observations of very doubtful value, while the observations submitted by the observers at Silchar, False Point, Jessore, Faridpur, Jalpaiguri, and Purnea were not of that standard of accuracy which might be expected from the observers. The details given later on of the working of these observatories, as well as of all the observatories under the control of this office, are based on the results of inspections made during the past three years, as also on the character of the observations submitted. The results of the inspections during the past year are also separately described.

10. *First-class observatory.*—The only observatory of this class is at *Alipore* (Calcutta). It is under the control of the Imperial Reporter, and is under the direct charge of the Second Assistant to the Meteorological Reporter to the Government of India, who is stationed at Calcutta throughout the year. The daily observations are sent for publication in the Bengal Weather Report, and occasional extra reports during stormy weather. These observations have been submitted with the usual accuracy and punctuality.

11. *Second-class observatories.*—There are 16 observatories of this class under the Bengal Reporter (of these, 3 are in Assam, 11 in Bengal, 1 in Madras, and 1 in Burma). Out of these 16, 12 observatories were inspected during the past three years. Hence the work at these observatories can be judged by both the tests described above.

When inspected, the observatories at *Akyab*, *Bankipore*, *Berhampore*, *Burdwan*, *Chittagong*, *Cuttack*, *Darjeeling*, *Dhubri*, and *Hazaribagh* were found to be in good condition, and the observers appeared to know their work well. The observations have also been good throughout the past three years. The *Darbhanga* Observatory when inspected was found to be in much better condition than on two former visits, while the observations submitted have been correct. The *Dacca* Observatory was transferred to *Narayanganj* owing to the abolition of the Government Telegraph Office at the former station. The inspection was made when the observatory was in abeyance, and was about to be transferred to Narayanganj. Previous to the visit of inspection, the observations were satisfactory, and the instruments were found to be in good condition. The *Sibsagar* Observatory when inspected was very unsatisfactory. Since the inspection, the reports, though still at times of doubtful value, have shown considerable improvement.

The remaining four second-class observatories, viz., *Silchar* in Assam, *Coconada* in Madras, and *False Point* and *Saugor Island* in Bengal, could not be inspected during the past three years. Their condition can hence be judged only by the character of the observations submitted. In the case of *Silchar* no improvement seems to have been made by the observer in the accuracy of his observations. But as the observatory has not been inspected for many years, it cannot be said with certainty whether the doubtful observations are due to the change of corrections of the instruments or to the carelessness of the observer. The observer at *Coconada*, Mr. Gaëtane, continued to submit very accurate observations. The extra observations during stormy weather are also submitted with great promptness. *Saugor Island* and *False Point* are two of the most important stations in connection with the storm-warning system, and reports received from them are of the greatest value in determining the probable paths of cyclonic storms. It is much to be regretted that for some time observations taken at both of these places cannot be relied on as certain to be correct, and I have hesitation in acting on them without support from neighbouring stations.

12. *Third-class observatories.*—There are 37 observatories of this class under the Bengal Reporter (of which 1 is in Burma, 4 in Madras, and 32 in Bengal). Out of these 37 observatories, 30 were inspected during the triennial period in question.

Arrah was found to be in good condition on both the inspections, and the observations have been trustworthy with the exception of those of the barometer, which have at times been carelessly taken. *Balasore*, *Bankura*, *Bogra*, *Buxar*, *Chaibassa*, *Chapra*, *Krishnagar*, *Matihari*, *Dumka*, *Noakhali*, *Puri*, *Rampur Boalia*, *Sirajganj*, and *Tavoy* when inspected were found to be in good condition. The observations submitted have also been generally accurate. *Barisal* was inspected during each of the past three years. On the first and third occasions it was in an unsatisfactory condition. On the second occasion the condition was satisfactory. The observer is careless, and his observations are tainted by numerous errors. *Bhagalpur* was found to be in good condition on both inspections. Judging from the observations submitted, the observer seems to know his work well. *Dehri* was for some time past in an exceedingly bad condition. When visited in September 1893 it was not satisfactory, and inaccurate observations continued to be submitted even after the inspection. Shortly after that there was a change of observer, and when the observatory was inspected again in March 1895, it was found to be in good condition. The observations submitted since the time of the second inspection have been fairly accurate. *Dinajpur* was inspected in August 1894, when the observer was late in attendance and the condition of the observatory was bad. The observer was fined Rs. 10. On the second inspection in September 1895 the observer was punctual in attendance, and the condition of the observatory much better. The general character of his observations is fair. *Faridpur*, when inspected in August 1893, was found to be in a most unsatisfactory condition. The instruments had been neglected, and the observer was extremely careless in his work. The observations are of very doubtful value. Babu Mukund Lal, the observer at *Gaya*, in spite of the repeated warnings, continued to be a most careless observer. The observatory was inspected in July 1894, when it was far from being in a satisfactory condition. The observer was, however, given another chance, and

the observatory was again inspected in March 1895. As there did not appear to be any improvement in the condition of the observatory or in the value of the observations taken, the observer was dismissed, and, with the permission of the Government of Bengal, the Civil Hospital Assistant attached to the cholera hospital was appointed observer. *Jalpaiguri*, when inspected in April 1894, was found to be in good condition, but on the second visit in March 1895 it was in a disgraceful condition. The observer was dismissed, and the matter reported to the Government of Bengal and the postal authorities. It was again visited in August 1895, when everything was found to be in good order. The observations submitted during December 1894 and the early part of 1895 were worthless, but since the arrangement made by the Postmaster-General, Bengal, regarding the performance of the meteorological work by the head-clerk of the Superintendent of Post Offices, Jalpaiguri Division, came into force, there has been great improvement. *Jessore*, when inspected in November 1894, was found to be in charge of a temporary observer, who appeared not to have been properly trained and who allowed the instruments to get out of order. He was fined for carelessness. In August last the observatory was again visited, when the condition of the observatory was found to have improved. The old observer has returned from leave and taken up his meteorological duties. This observer (Babu Paresh Nath Roy Chowdhury) has served in this Department with credit for a long time. Hence it is much to be regretted that during the past cold season he submitted erroneous observations of the dry minimum thermometer for days together. *Malda*, when inspected in November last, was found to be in an extremely bad condition. The details of the inspection will be given later on. The observations submitted have always been of doubtful value. The observatory at *Midnapore* was inspected in February 1895, when the minimum thermometer was found to have a deposit of spirit in the upper part of the tube. The stem of the wet bulb hygrometer just above the bulb was encrusted, and all the instruments were dusty. The observatory, on the whole, was in a very unsatisfactory condition at the time of inspection. The observations submitted have, however, been fairly accurate. The *Muzaffarpur* Observatory was inspected in July 1894, when almost all the instruments were found to have been very much neglected, more especially the anemometer and the windvane. The observer was fined Rs. 5. The observatory was again inspected in November last, when it was still in an unsatisfactory condition. Details of inspection will be given later on. This station has always been unsatisfactory. *Purnea* was inspected in August 1894. The bulbs of the wet thermometers were found encrusted, and there was a deposit of spirit in the upper part of the tube of the wet minimum thermometer. The observer at the time of inspection was a new man, and his method of taking observations was in some respects defective. In February 1896 the observer went away on leave, and the observations submitted by the officiating observer for some time were erroneous. *Ranchi* was twice inspected during the past three years. On both these occasions it was found in an unsatisfactory condition, chiefly owing to frequent change of observers. It is at the present time one of the worst stations in Bengal. *Rangpur*, when inspected in March 1894, was unsatisfactory, and the observer was fined for neglecting the instruments. It was again inspected in September 1895, when it was in a fairly satisfactory condition. *Raniganj* was visited four times during the past three years. It appears that since the transfer of Babu Baburam Ash, the Nazir of the subdivisional office at Raniganj, who acted as observer, the observatory is gradually improving. On the first occasion of inspection in September 1893, the observatory was in an unsatisfactory condition; on the second occasion in July 1894 the condition was fair, and on the third and fourth occasions (June and November 1895) the condition was satisfactory.

The seven remaining third class observatories, viz., *Comilla*, *Gnatong*, and *Mymensingh* in Bengal and *Cuddalore*, *Gopalpur*, *Nellore*, and *Pamban* in Madras could not be visited during the past triennial period. *Comilla*, *Gnatong*, and *Mymensingh* submitted fairly accurate observations, but the observers at the two first named observatories have been careless in respect of framing the weather telegrams.

The Observers at *Gopalpur*, *Nellore*, and *Pamban* have submitted fairly accurate observations. *Cuddalore*, however, submitted inaccurate barometric

observations every now and then, and the observer does not seem to be careful in his work.

13. *Voluntary observatories.*—Mr. Tasker, Lighthouse-keeper, *Shortt's Island*, has continued to supply the Department with the daily observations taken by him, and has taken valuable extra observation during stormy weather. These observations proved of great value, being chiefly utilised in the discussion of the history of storms which visited that part of the Bay of Bengal. As a slight recompense for his trouble, Mr. Tasker was awarded a grant of Rs. 80 by the Meteorological Reporter to the Government of India out of the Special Storm Observation Fund.

The observations received from *Daltonganj*, especially those of the barometer, are worthless. This station being not easily accessible, could not be inspected, but arrangements are being made for the Instructor to visit this observatory shortly, when it is hoped the cause of the unsatisfactory nature the observations will be brought to light.

The observations received from the *Gantak* Observatory have been accurate, as also those received from *Yatung*. The latter observatory is now in charge of Mr. Hobson, who, like Mr. Taylor, now on leave, has readily helped the Department with his observations. The thanks of the Department are therefore due to Mr. White, Political Officer at Sikkim, at whose instance these two observatories were started, and to Mr. Taylor and Mr. Hobson for their assistance.

The observations from *Tura* and *Demagiri* are still being received, but they are not utilised in any way by this Department. These two observatories will not be closed until the wishes of the Imperal Reporter are known regarding them.

Lunglch has continued to submit observations of doubtful value. From the repeated applications received in this office for some remuneration for the observer at that station, which this office had to refuse for want of funds, it is evident that the observer there does not take much interest in his work while not paid for.

14. The thanks of the Department are also due to the Surveyor-General, Ceylon, for supplying this office with the daily observations taken at Galle and Trincomallee throughout the year and to Mr. Michie Smith, the Government Astronomer at Madras, for supplying the observations taken at the Madras Astronomical Observatory daily, as also extra observations during stormy weather whenever required.

15. *Awards for storm and special observations.*—The following observers under the Bengal Reporter have received awards for storm or other special o ons taken during the past year from the Meteorological Reporter to the G ent of India. The amounts depend chiefly upon the value of the o ons taken, and not on the number of storm observations submitted by tl rers:—

Station.	Amount.	Station.	Amount.
1	2	1	2
	Rs.		Rs.
Balasore	2	Gopalpur	8
Barisal	1	Jessore	1
Burdwan	1	Mymensingh ...	3
Chittagong	8	Patna ...	15
Coconada	20	Puri	8
Comilla	4	Rangpur	4
Dhubri	1	Saugor Island ...	20
False Point	8	Shortt's Island ...	80
Faridpur	3		

Observatory establishment.

16. The following table shows the names of the observers at all the observatories under the Bengal Reporter, and for the sake of comparison the table has been completed for the

triennial period. From the last column of the table can be seen the exact nature of observations taken at each observatory :—

Personnel of Observatories in Bengal, Assam, and Burma during the year 1893-94, 1894-95, 1895-96.

C,	Ditto	extra observations for storm-forecasting with an allowance of ..	5
D,	Ditto	who are in charge of anemographs with an allowance of	4

NOTE.—The Daltonganj Observatory, as stated before, is in no way connected with the Imperial Meteorological Department: hence it has been omitted from the above list.

17. In connection with the foregoing table it may be mentioned that the allowance of Rs. 5 per month hitherto granted to the observers at Barisal, Cuddalore, Nellore, Pamban, and Tavoy for taking extra observations during stormy weather has been withdrawn from 1st April 1895 under orders of the Meteorological Reporter to the Government of India. It has, however, been arranged that at the end of each year the observers at these stations will receive from the Storm and Special Investigation Fund one rupee for each telegram sent to the Bengal Reporter at his call.

Inspection of observatories.

18. The following observatories were inspected during the year 1895-96:—

Balasore.	Dhubri.	Motihari.
Bankura.	Dinajpur.	Muzaffarpur.
Barisal.	Hazaribagh.	Ranchi.
Bhagalpur.	Jalpaiguri.	Rangpur.
Bogra.	Jessore.	Raniganj (twice).
Burdwan.	Krishnagar.	Sirajganj.
Chapra.	Malda.	

With the exception of Jessore, they were all inspected by Babu Jati Lal De. Jessore was inspected by Mr. Eliot, Meteorological Reporter to the Government of India.

The number of observatories inspected last year was 20, Raniganj being inspected twice. Altogether 21 visits of inspection were made.

19. The following is the result of inspection of the observatories. They are arranged according to the class, *i.e.*, second and third, and also alphabetically:—

20. *Second class.*—*Burdwan* was visited on 22nd June 1895. The instruments were all clean and in good condition. The observer was punctual in attendance. Babu Mokhoda Prosad Chowdhury, the observer, has served the Department for a long time, and has kept up the reputation of a good and careful observer.

Dhubri was inspected from 4th to 6th September 1895. The chief object of the visit was to leave a new barometer in place of one whose cistern was reported to have been cracked. With the exception of the wet minimum thermometer, whose bulb was encrusted and of the wind-vane, which was in want of oil, all other instruments were clean and in good condition. The anemometer was rather shaky. An iron bed plate has since been supplied to make it steady. A new barometer was brought into use, and the old one was taken away. On the whole, the observatory at the time of inspection was in a satisfactory condition.

Hazaribagh was inspected on the 17th and 18th June 1895. All the instruments were clean, and almost all of them in good condition. There was a slight deposit of spirit in the upper part of the tube of the wet minimum thermometer. The anemometer was well oiled, but it showed signs of wearing out. The wind-vane and rain-gauge required slight repairs, which the Civil Surgeon kindly undertook to have effected. Babu Nathu Lal, Civil Surgeon's clerk, continues to be the observer. He also is one of the oldest observers. At the time of inspection the observatory was in a satisfactory condition.

21. *Third class.*—*Balasore* was inspected from 23rd to 26th October 1895. For some time past the barometric readings appeared to be high as compared with those of the neighbouring stations. The Instructor was deputed to see if he could find out the cause of the apparently high readings. He reported:—"I have examined the observer thoroughly, but did not find anything wrong about him. The barometer was tested, and was found to be in excellent condition, indeed, even better than those used as standards. The correction of the barometer has changed from + ·010 to + ·005. The 8 A.M. readings on the 23rd, 24th, 25th, and 26th were taken by me personally. I cannot explain the cause of the high readings complained of, unless there be something wrong with the sea-level elevation. There is a G. T. S. bench-mark in the circuit-house, and orders have been issued by the Executive Engineer, Balasore Division, to redetermine the height above mean sea-level." The redetermined height above mean sea-level was reported to be 48 feet. Formerly it was taken to be 56 feet. Hence the present height is 8 feet less than the previous height. This added to ·005, the difference between the old and new corrections of the barometer makes ·013". The application of the newly-determined corrections now makes the barometric readings comparable with others. At the time of the inspection the observatory was in a fairly satisfactory condition.

Bankura was visited on the 6th and 7th November 1895. The bulb of the wet bulb hygrometer was thickly encrusted. The wind-vane was in want of oil, and was found working with a great deal of friction. The rain-gauge too was not perfectly level. These defects have been remedied. The observatory at the time of inspection was in a fair condition only.

Barisal was inspected on the 12th and 13th October 1895. The rain-gauge has been removed to a site close to the shed. This removal of the rain-gauge from its former site has resulted in the meteorological instruments being closer to each other than before. The anemometer and wind-vane were in want of oil, and on comparison the barometer was found to have changed its correction. As the instrument did not appear to be in very good condition, it was replaced by a better one. At the time of the inspection the observatory was in charge of a temporary observer.

Bhagalpur was inspected on the 19th and 20th November 1895. The observatory was in a fairly satisfactory condition. The shed was in a very bad state of repair, and the fencing round the rain-gauge required renewal. These repairs, though urgently needed, could not be carried out owing to the receipt of the estimate of cost of repairs too late, when there were no funds available.

Bogra was inspected from the 26th to 28th August 1895. The observatory was in a satisfactory condition, but the shed required repairs. This has since been carried out. Babu Gangadhar Barik, Civil Surgeon's clerk, continues to be the observer. He seemed well qualified to do the work.

Chapra was visited from 15th to 17th November 1895. The observatory was in a satisfactory condition. The fencing round the rain-gauge has since been repaired. The only defect in this observatory is the distance between the Telegraph office, where the thermometer shed is erected, and the District Board's office, where the wind instruments are exposed. Unfortunately, the site of the Telegraph office is not so open, and hence the wind instruments cannot be removed from the District Board's office.

Dinajpur was visited from 31st August to 2nd September 1895. A new thermometer shed had to be built, owing to the old one having fallen during a storm. When building the new shed the observer, without reference to this Office, erected a bamboo *jaffrey* fencing all round the shed, which extended from the ground to the top of the roof of the shed. This resulted in the external air being prevented from freely entering the shed. This was immediately removed, and a fence of wire netting erected in its place. The anemometer was found defective, and had to be replaced by another. The observatory was in a much better condition than that in which it was found on the previous inspection in August 1894.

Jessore was inspected on the 11th August 1895. It was a passing visit paid by the Meteorological Reporter to the Government of India, who was accompanied by Babu Jati Lal De. The bulb of the wet bulb hygrometer was slightly encrusted, and the anemometer required cleaning. These defects were remedied. The observer was reading the barometer about ·004″ to ·006″ low owing to his defective eyesight. He was supplied with a lens. The Civil Surgeon's clerk, Babu Paresh Nath Roy Chowdhury, continues to be the observer.

Jalpaiguri was inspected on the 29th and 30th August 1895. The instruments were slightly dusty, and the bulb of the wet bulb hygrometer slightly encrusted. The anemometer and wind-vane were exceedingly dirty, and had to be thoroughly cleaned. The observer, who is the Head Clerk of the Superintendent of Post Offices, Jalpaiguri Division, was reading the barometer ·006″ low owing to incorrect adjustment of the vernier. He read the thermometers correctly. The observer was new to the work, and had not been properly trained by the late observer, but he was found to be eager to learn the work. This observatory has been in a most unsatisfactory condition for some time.

Krishnagar was visited on the 23rd and 24th August 1895. Everything was found to be in a satisfactory condition. Babu Piyari Lal Ghosh, Civil Surgeon's clerk, continues to be the observer. The correction of the barometer was found to have changed from—·010 to—·002.

Malda was inspected on the 23rd and 24th November 1895. The chief object of the visit was to leave a new barometer in place of the one which had gone out of order. The bulb of the wet bulb hygrometer was slightly encrusted. The rain-gauge, which is placed in the hollow of a masonry pillar 3½ feet high, was not level. The fencing round the shed required renewal, as it was entirely eaten up by white-ants. The following is a report of the Instructor:—"I reached the observatory at 7-55 A.M. on the 23rd. I waited till 8 A.M., but the observer not turning up till then, I took the observations myself. The observer came at 9 A.M. On the 24th I attended the observatory at 8 A.M., but the observer was absent. I took all the observations myself except that of the barometer, which was in the office-room of the Civil Surgeon's office under lock and key. He came at 8-20. He could read the instruments correctly if he liked, but he showed such a want of interest in his work that I doubt if he ever took his observations with any amount of care." The matter was reported to the Government of Bengal, and with their permission the observatory was transferred to the charge of the Postmaster with effect from 1st April 1896.

Muzaffarpur was visited from the 9th to 12th November 1895. The observatory was found to be in an extremely bad condition. The observer having neglected the instruments placed in his charge, more especially the wet thermometers and the wind instruments, the matter was reported to the Magistrate of

the district, who is also the Superintendent of the observatory. Having had occasion to go to Muzaffarpur, I, at the request of Mr. Pedler, consulted the Magistrate about the future working of the observatory. He suggested that the observership might be given to a probationer of his office who was reported to be intelligent and willing to do the work. Subsequently, however, it was reported that as the probationer could not learn the work, the old observer was allowed to remain.

Motihari was inspected on the 13th and 14th November 1895. With the exception of the wind-vane, which was a heavy instrument and was not working freely, all other instruments were clean and in good condition. The observatory at the time of the inspection was in a very satisfactory condition.

Ranchi was inspected from 12th to 14th June 1895. The barometric readings were very unsatisfactory for some time, and the chief object of the visit was to ascertain the cause of the incorrect readings. On examination of the barometer it was found that air had penetrated into the upper part of the tube of the instrument. The room in which the barometer is placed was repaired, and the barometer had to be removed from the position in which it was fixed by the Instructor in December 1894. The instrument, which was new when brought into use towards the end of 1894, must have been handled very roughly. It was removed without any reference to this office, in direct contravention of the rules of this Department. The condition of the observatory at the time of the inspection was unsatisfactory.

Rangpur was visited on the 3rd September. The station was on the way to Dhubri, and hence it too was inspected. With the exception of the anemometer, which was much in want of oil, all other instruments were clean and in good order. The shed was in a dilapidated condition, and has since been repaired. The condition of the observatory was fairly satisfactory.

Raniganj was visited on 21st June 1895. It was only a passing visit. The bulb of the wet bulb hygrometer was slightly encrusted, and the wind-vane, which was too heavy, was not working properly. It has since been replaced by a lighter instrument. The observatory was again inspected on 5th and 8th November 1895. The permanent observer was absent on leave, and the officiating observer, not knowing how to open the anemometer, could not clean the instrument. All other instruments were clean and in good condition. On both occasions the observatory was in a satisfactory condition.

Sirajganj was visited from 9th to 11th September 1895. The marine K. P. barometer in use had not been giving satisfaction for some time. The chief object of the visit was to leave a new barometer, as well as to examine the condition of the exposure of the several instruments which had to be removed from their previous position owing to the Telegraph office (attached to which is the observatory) having been removed to a new building. The following extracts from the inspection report will show the present condition of exposure of the instruments:—

"The present shed has been recently constructed. The old shed was on a site about two minutes' walk from the present site, the latter being almost alike to the former site as regards its surroundings. In the rainy season the whole of the low-lying lands is submerged under water. But the present site of the Telegraph office is a little elevated. There is a long row of yew and palm trees towards the south and east of the shed. The nearest tree towards the east is 21 feet off, and that towards the south 36 feet off. There are also trees to the north and the west, but they are too far off. The trees are tall, and the trunks are bare of branches up to a height of about 20 feet. The wind instruments are exposed on the roof of the Munsif's cutcherry. The south, west, and north are entirely open. To the east there are some trees more than 100 feet off. To the east-north-east there are some tall over-spreading trees, which very seriously interfere with the free exposure of the anemometer. The nearest tree in this direction is 90 feet off."

The wind-vane was one of the Roorkee pattern, and was too heavy to work in light winds. This has since been replaced. The old K. P. barometer was taken away, and a new Fortin instrument brought into use. The instruments were all clean, and seemed to have been well looked after. The observer, Babu G. C. Banerjee, who is a signaller of the Local Government Telegraph office, knows his work thoroughly. The observatory was in a satisfactory condition at the time of the inspection.

22. The following table will show the observatories which have been inspected in each of the three years 1893—96. Twelve observatories only were inspected in the year 1893-94. The reason for this small number of inspection visits has been given in the Administration Report of that year. In the year 1894-95, 32 observatories were inspected. In the year just closed 21 visits were paid to the different observatories. Under the arrangements sanctioned by the Government of India, the services of the Instructor were chiefly utilized in inspecting the observatories. For easy reference, the table has been so arranged as to show the condition in which each observatory was found at the time of the inspection during each year of the triennial period :—

Stations inspected.	1893-94.		1894-95.		1895-96.

23. The following departmental observatories could not be inspected during any of the past three years :—

1. Coconada.
2. Comilla.
3. Cuddalore.
4. False Point.
5. Gnatong.
6. Gopalpur.
7. Mymensingh.
8. Nellore.
9. Pamban.
10. Saugor Island.
11. Silchar.

Instruments issued.

24. The number of instruments broken or allowed to get out of order may be looked on as a test of the care with which an observer does his work. Hence a table is appended below, showing the various instruments which have been issued to

all the observatories under the control of the Bengal Reporter during the past three years, including the voluntary observatories:—

List of Instruments issued to the Observatories in Bengal, Burma, and Assam during 1893-94, 1894-95, and 1895-96.

* In store.
† Returned after repair.
‡ Equipment of the new observatory.
§ Spare glass.
(1) It was issued in March 1893, but arrived at Cuttack in April 1893.
(2) Instruments were issued from Calcutta on the 14th March 1893, but the observatory was started in April 1893.
(3) Observatory was started in March 1893. Instruments were transferred from Pedong, with the exception of anemometer and wind-vane which were supplied from Calcutta.
(4) This barometer was issued in March 1893 for taking comparative observations. It was brought into regular use from May 1893.
(5) Wet minimum thermometer was issued in February 1893. It was brought into use in April 1893.
(6) Barometer was issued in October 1894 for comparative observations, and has now been kept in store.

25. The foregoing list shows that the instruments have on the whole been carefully looked after, and there have been very few breakages due to neglect on the part of the observers.

Work at and inspection of rain-gauge stations.

26. Considering the various classes of officers who are employed in the work of rainfall registration in Bengal (such as sub-postmasters, writer-constables, civil hospital assistants, &c.), it is only fair to say that the work

has been done satisfactorily on the whole. There have, of course, been cases where the reverse has been the result, but they are few in number. Delays have occurred in the submission of returns to this Office, and in all cases where this has continued for some time, the matter was reported to the district officer with a view to make the rain-registering officers punctual. The Department continues to be indebted to several gentlemen, chiefly tea and indigo planters, who regularly send copies of their rainfall records.

27. Last year the Civil Hospital Assistant of Dewanganj in the district of Mymensingh refused to do the rainfall work, which he has been doing for a long time past, unless he was specially paid for it. The matter was brought to the notice of the Government of Bengal with a view to issue general orders about the duties of the rain-registering officers in the Province. The Government of Bengal in their circular No. 5T.—R. of 25th September 1895 (addressed to all district officers) have ruled "that the duty of reporting the rainfall at each place where a rain-gauge is kept should be made over by the district officer to some official who is in a suitable position to carry it out. He should be given to understand that the work forms part of his regular duty, but will not entitle him to any additional remuneration, and that neglect to report accurately and punctually will be punished."

28. The number of rainfall stations at the close of the past year was 327, or two more than the number in 1894-95 and seven more than that in 1893-94. The two new stations that have been started are—Khargpur, in the district of Monghyr, and Dhumcole in Murshidabad.

29. The Government of Bengal in their circular No. 3187Agri., dated 8th July 1895, again drew the attention of the district officers to the necessity of frequent inspection of rain-gauges. But it appears from the reports received in this office that only 101 rain-gauges out of a total of 327 were inspected during the past year as against 120 inspected during 1894-95. Some of the rain-gauges were inspected twice, three times, or even four times during the year. In this way 141 inspection visits were made, against 174 in 1894-95. Both the number, (*i.e.*, the number of rain-gauges inspected and the number of inspection visits paid) were less than those shown in last year's Administration Report. The following table shows the number of rain-gauge stations inspected during the past three years:—

Official year.	Number of rain-gauge stations.	Number of rain-gauge stations inspected.
1	2	3
1893-94 ...	320	19
1894-95 ...	325	120
1895-96 ...	327	100

30. The distribution of the 327 rainfall stations in the various districts, &c., is shown in the table below. The table also shows the number of rain-gauge stations inspected in each district during the past year:—

District.	Number of rain-gauge stations.	Number of rain-gauge stations inspected.	District.	Number of rain-gauge stations.	Number of rain-gauge stations inspected.	District.	Number of rain-gauge stations.	Number of rain-gauge stations inspected.
1	2	3	1	2	3	1	2	3
Burdwan	5	1	Bogra	4	Nil	Darbhanga	5	1
Birbhum	6	5	Pabna	2	1	Monghyr	10	6
Bankura	10	1	Dacca	5	1	Bhagalpur	8	3
Midnapore	8	4	Mymensingh	9	7	Purnea	7	2
Hooghly	3	Nil	Faridpur	3	2	Malda	4	3
Howrah	3	Nil	Backergunge	7	5	Sonthal Parganas ...	17	8
24-Parganas	8	4	Hill Tippera	1	Nil	Cuttack	9	3
Nadia	5	5	Tippera	8	2	Balasore	7	Nil
Murshidabad	9	2	Noakhali	4	1	Puri	9	1
Jessore	5	4	Chittagong	8	Nil	Hazaribagh	9	Nil
Khulna	5	1	Lushai Hills	3	1	Lohardaga	9	Nil
Rajshahi	5	Nil	Patna	6	Nil	Palamau	4	2
Dinajpur	7	2	Gaya	9	5	Manbhum	7	4
Jalpaiguri	5	1	Shahabad	13	2	Singhbhum	7	3
Darjeeling	7	1	Saran	7	Nil	Orissa Tributary Mahals	9	Nil
Kuch Behar	5	Nil	Champaran	4	2	Tibet	1	Nil
Rangpur	8	1	Muzaffarpur	7	4	British Bhutan	1	Nil

31. From the above table it will be seen that not a single rain-gauge was inspected in the districts of Hooghly, Howrah, Rajshahi, Kuch Bihar, Bogra, Chittagong, Patna, Saran, Balasore, Hazaribagh, and Lohardaga.

32. Dr. Kelly, Civil Medical Officer of Sonthal Parganas, Dr. Crawford, Civil Surgeon of Monghyr, and Mr. Macpherson, Collector of Gaya, were especially active in inspecting the rain-gauges in their respective districts.

Departmental reports.

33. The short annual report on the meteorology of Bengal in the year 1894, with two maps illustrating the actual and percentage rainfall, was prepared and submitted to the Government of Bengal on the 20th June 1895 for incorporation in the Annual Administration Report of that Government.

34. The report on the meteorology of Bengal for the monsoon season of 1895 was prepared and submitted to the Government with the usual number of illustrative maps prepared by hand. The report was submitted to the Government of Bengal on the 7th January 1896, and was published in the *Calcutta Gazette* of the 15th January 1896.

35. The weekly and monthly meteorological and rainfall reports for Bengal and Assam continued to be published in the *Calcutta Gazette*. There has been no change in these reports.

36. It appears that the Weekly Rainfall and Meteorological Report has not been of much value to the public. The reason probably is that the detailed information is given in the monthly reports, which are issued in the Gazette generally in the second week of the month next to that to which it refers. Mr. Pedler has submitted a scheme to the Government of Bengal in which he has proposed to discontinue the printing of the weekly report in the *Calcutta Gazette* from 1st May 1896.

37. During the monsoon season the usual three sets of rainfall charts showing the actual rainfall, the variation from the normal, and the percentage rainfall, were prepared by hand each month from May to October 1896, and submitted to the Government of Bengal and the Sanitary Commissioner, Bengal.

38. The Bay of Bengal Daily Weather Report with chart was issued daily throughout the year without any exception. No change was made in this report. It was issued to the subscribers in Calcutta generally not later than 11 A.M. This report was supplied to 50 Government officials free of charge, and to 30 subscribers at the rate of Rs. 2 per month. The receipts from subscribers during the year have been sufficient to cover the cost of the lithographic establishment consisting of three pressmen, and two peons. At the close of the year there was a considerable balance in hand, which is kept to provide repairs to presses, &c., when required.

39. The Bengal Daily Weather Report, dealing with the provinces of Bengal and Assam, was published last year from 29th April to 31st October. No change whatever was made in this report. The report was issued to 104 Government officials free of charge, and to 18 subscribers at the rate of Rs. 2-8 per month. It was printed at the Bengal Secretariat Press and issued from the Press.

40. It will be remembered that a few years ago, at the request of the Bengal Chamber of Commerce, a scheme was submitted to that body for improving the daily report issued by this Office, but as they took no further action in the matter, the subject was allowed to drop. The question of amalgamating the two reports and issuing one report only dealing with the observations taken at the coast stations, as well as at inland stations, during the monsoon period, *i.e.*, from May to October every year, was again taken up during the year. Mr. Pedler drew up a scheme showing the advantages that will be gained if the two reports were amalgamated during the monsoon period, and submitted it to the Government of Bengal on the 17th March 1896.

41. The change of class of the weather telegrams from "ordinary" to "urgent" in the case of the Bengal stations, which send weather telegrams for the second report (Bengal Daily Weather Report) issued during the monsoon period every year, was one of the chief reasons which led to the proposal by Mr. Pedler of the amalgamation of the two reports noticed above. The telegrams being classed "urgent" are received in the Office before 11 o'clock, and hence Mr. Pedler suggested the publication of a report containing the observations of the stations round the Bay of Bengal (which now report for the Bay of Bengal Report) and of the inland stations (which had hitherto reported only

for the Bengal Report). This report can be issued about midday, and takes the place of one report issued about 11 in the morning and the second about 5 o'clock in the afternoon.

42. The code introduced in the year 1892 for telegraphing weather conditions in the Bay of Bengal to outward-bound vessels passing Saugor Island Light-house and to vessels at certain ports on the Madras and Burma coasts was revised during the past year. The code was modified to some extent, and arrangements have been made to issue additional information for later periods than 8 A.M. (the time to which the four-flag-signal telegrams had hitherto referred). A fifth flag (Pilot Jack, *i.e.*, the Union Jack with the border of white one-fifth the breadth of the Jack) has been added, and it will be hoisted only when information for hours other than 8 A. M. are telegraphed to Saugor Island and other places where the flags are hoisted. The position of the fifth flag will indicate the hour to which the weather information refers. The revised code was brought into use on the 1st March 1896.

43. The daily 8-word telegrams to the port authorities at Madras, Akyab, Rangoon, Negapatam, and Coconada were continued throughout the year. In the case of the port of Chittagong the telegram was sent, as sanctioned by the Government of Bengal, only during the period 16th May to 15th October. During stormy weather, however, these code messages were replaced by messages in ordinary language, giving detailed accounts of the intensity, direction of movement, &c., of the storms.

44. The system of forwarding meteorological information from the pilot-brigs at the Sandheads by flag-hoists by the pilots of inward-bound vessels when passing Saugor Island has been continued, and 323 telegrams and post-cards were received in this way during the year.

45. The system of telegraphing a summary of the weather (by means of a code specially devised for the purpose) experienced by the Commanders of the steamers of the British India Steam Navigation Company during their voyages from Madras to Rangoon, Calcutta to Rangoon, &c., has been continued.

46. A small establishment of six temporary clerks was sanctioned by the Government of Bengal during the year for a period of five months from 1st November 1895 to 31st March 1896. They were employed in calculating mean meteorological values from the available data up to the year 1895, which work was required in connection with the variation columns of the Bengal Daily Weather Report. The means hitherto given in this report were the same as those which have been used for the past seven years. It was hence desirable to bring them up to date by recalculating the values, using the observations recorded during these last seven years.

47. The working of the system of storm signals has remained unaltered.

Storm signals.

The work of informing local authorities of the formation or existence of storms is steadily on the increase. The Deputy Conservator of the Calcutta Port, the Collector of Cuttack, and the Executive Engineer, Balasore Division, have been added to the list of officers who receive warning telegrams from this Office.

48. The dates of the principal storms and barometric depressions occurring during the past year are given in the first of the two following tables, and the action taken in the matter of issuing storm warnings and hoisting storm signals is indicated in the second of these tables :—

Table giving a brief statement of the Storms which affected the Bay of Bengal Coasts during the year 1895.

Number of storm.	Period of depression or storm.	Character of storm.	Coast affected.
1			
1	April 22nd to 25th ...	Small cyclonic storm formed in the south or south-west of the Bay on about the 22nd of April, which gradually drifted northwards or north-eastwards, intensifying in its advance, and finally crossed the coast near Akyab on the night of the 25th. It gave squally unsettled weather with rain at the head of the Bay and in Lower Bengal, and also caused heavy rain in East Bengal.	Burma coast.

Number of storm.	Period of depression or storm.	Character of storm.	Coast affected.
1	2	3	4
2	June 17th to 19th ..	Barometric depression originating in the east of the Bay and advancing in a north-westerly direction across the Bay, became well defined near the Orissa coast about the 17th. It remained off the Orissa coast for two days, and the centre crossed between False Point and Puri, moving in a westerly direction, about noon on the 19th.	Orissa coast.
3	June 26th to 28th ...	Barometric depression formed in the east of the Bay on the 26th, which advanced slowly north-westward, and crossed the coast between Saugor Island and Balasore on the 28th, giving decidedly heavy rain over the extreme south-west of the province.	Orissa and Bengal coasts.
4	July 17th to 19th ..	Feeble barometric depression generated off Circars coast on the 17th, and developing off Ganjam coast on the 18th, passed inland north of Gopalpur on the 19th.	Ganjam coast.
5	July 30th and 31st ...	Feeble barometric depression formed in the north-west angle of the Bay on the 30th, the centre of which crossed the coast and moved into the east of Chota Nagpur on the 31st.	Orissa coast.
6	August 11th to 13th ..	Diffused barometric depression, which developed in the south of Burma about the 10th, and after passing from the north-west of the Bay across Orissa, turned north over Chota Nagpur, and broke up against the Himalayas.	Bengal and Orissa coasts.
7	September 2nd to 5th .	Small cyclonic storm formed in the centre or east of the Bay about the 1st and moved in a westerly direction, passing over the Circars about the 5th.	Circars and Ganjam coasts.
8	September 17th to 19th	Small cyclonic storm, which began to develop about the 17th, and whose centre was on the 18th in the north-west angle of the Bay. It crossed the coast between Saugor Island and Balasore between the 18th and 19th.	Orissa coast.
9	September 28th to October 2nd.	Small cyclonic storm, which had generated in the west of the Bay at the end of September. At first it moved in a westerly direction towards the Madras coast, and then recurved and advanced in a north and north-easterly direction. On 1st of October the centre was to the south-east of False Point, and on the evening of that day it was near to Saugor Island, and on the morning of the 2nd close to Narayanganj.	Orissa and Bengal coasts.
10	October 24th to 26th ..	Barometric depression formed off the Madras coast on the 24th; on the 25th the centre was about east of Madras, and by the 26th it had passed inland between Masulipatam and Nellore.	Coromandel coast.
11	November 5th to 9th ..	Barometric depression formed near Diamond Island about the 5th, and moving towards Orissa coast became diffused, and disappeared about the 9th.	Burma coast.
12	December 11th and 12th	Small cyclonic storm formed with centre south-east of Gopalpur about the 11th. At 2 P.M. on the 11th the storm centre had moved near to Gopalpur and was to the east-south-east of that station, and had therefore continued its north-westerly advance. The storm then ceased to advance towards the coast, rapidly recurved, and immediately commenced to advance with greatly increased velocity in a north-easterly direction. At 8 P.M. of the 11th, the centre was to the south-south-east of Saugor Island, and at 2 A.M. of the 12th it was some little distance to the south-west of Chittagong. Between 5 A.M. and 8 A.M. the centre had passed inland, apparently between Chittagong and Noakhali.	Orissa and Bengal coasts.
13	December 28th and 29th	Cyclonic storm formed in the extreme south-west of the Bay on the 28th, and afterwards drifted in a westerly direction across the extreme south of the Peninsula and over Ceylon. The storm on the morning of the 29th was apparently more to the westward than on the 28th, and it was to the south of the Peninsula, while on the 30th it had again advanced westwards, and was probably in the Arabian Sea.	Coromandel coast

Table showing the action taken by the Calcutta Meteorological Office in warning the coasts affected by the storms enumerated in the previous table.

Storm number.	Hoisting of Storm Signals.			Warning of Ports by cautionary telegrams.	
	Ports ordered to hoist signals.	When hoisted.	When lowered.	Ports warned by cautionary telegrams.	Time and date of despatch of cautionary telegrams.

journey. The Protector should report to what extent he has awarded compensation under that section, and what amounts have been paid for the expenses of sending the rejected recruits back to their homes.

Sanitation and management of the depôts.

7. The total admissions into hospital amounted to 582 and the total mortality to 41, as against 824 and 109, respectively, in the previous year. The following table shows the admissions into hospital as compared with the three previous years:—

Year.	Total strength.	Admission into hospital.	Percentage to total.	Number of deaths.	Percentage to strength.
1	2	3	4	5	6
1892 ...	15,055	669	4·44	56	0·37
1893 ...	13,220	359	2·71	14	0·10
1894 ...	21,181	824	3·89	109	0·51
1895 ...	14,584	582	3·99	41	0·28

This shows a considerable improvement over the death-rate in the previous year. The chief causes of sickness during the year were (*a*) malarial fevers, 157 cases with 6 deaths; (*b*) chest affections, 115 cases with 16 deaths; and (*c*) dysentery, 65 cases with 6 deaths. It is satisfactory to learn that there were only three cases of cholera in the depôts, of which two proved fatal.

Embarkation of emigrants.

8. The number of emigrants embarked was 10,688 against 15,924 in 1894. Of this number, 9,071 were conveyed to British Colonies and 1,617 to the Dutch Colony of Surinam. The emigrants were conveyed in 11 sailing vessels and eight steamers, the average number of emigrants carried in each vessel being 562, and is practically the same as in the previous year. The longest duration of a voyage was 105 days against 120 days in 1894, the average duration being 69 days as against 77. The aggregate mortality on the 19 voyages amounted to 119 against 336 on the 28 voyages of 1894, a satisfactory improvement. Measles in an epidemic form broke out in the sailing vessels *Jura* and *Ems*, resulting in 23 deaths in the former and 14 in the latter, but no vessel had to be detained on account of epidemic disease during the year under review.

Returned emigrants.

9. The number of emigrants returned in 1895 was 6,514 against 3,804 in 1894 There were 8 sailing ships and 10 steamers employed to convey them against 5 sailing ships and 10 steamers in 1894, the average number carried in each vessel being 361 against 253 in the previous year. The longest duration of a voyage was 164 days from Demerara and the shortest 17 days from Mauritius.

The aggregate number of deaths was 127, or 1·88 per cent. of the number of returned emigrants, against 2·15 in 1894. Besides these, of 28 children born on the voyage, 7 died. Among the emigrants who returned from the colonies, there were 27 lepers, of whom 12 came from Demerara, 7 from Mauritius, 4 from Fiji, 2 from Natal, 1 from Trinidad, and 1 from Grenada. It is said that during the past year no case of the disease in a sufficiently developed condition to be recognizable was allowed to leave this country for the colonies.

In 1895 there were 10 colonies that returned emigrants to India against 6 in 1894, and the aggregate ascertained savings amounted to Rs. 13,38,683-4 against Rs. 5,94,965-4-1 in the previous year, giving an average of Rs. 205-8-1 per emigrant embarked, against Rs. 156-6-5 in the previous year. The largest average savings per head, taking each colony separately, were again, as in the preceding year, those of the returned emigrants from Natal, and amounted to Rs. 337-10, and the smallest were those of the returned emigrants from the French colonies, and amounted to Rs. 3-13-8.

Administration of estates.

10. The aggregate number of estates under administration was 434, valued at Rs. 84,028-8-4, against 498, valued at Rs. 83,093-2-10, in 1894. Of the number under administration, 209, valued at Rs. 31,824-14, were finally administered, the sum of Rs. 26,884-4-11 having been paid to the heirs traced in respect of 149

estates, and Rs. 4,949-9-1 standing at the credit of the remaining 60 estates having lapsed to the Indian and Colonial Governments concerned, owing to absence of heirs in some cases, and the impossibility of finding them in others. Besides these, heirs were traced in respect of 58 estates, valued at Rs. 25,008-1-6, which sum was in course of payment at the close of the year. So that enquiries for heirs were completed in 267 estates, or 61·52 per cent., against 310 estates, or 62·2 per cent., in 1894. The remaining 167 estates, valued at Rs. 27,195-8-10, were still under enquiry.

The attention of the Government of the North-Western Provinces and Oudh will again be invited to the Protector's remarks on the want of village directories for the nine districts in Oudh, which still remain to be published.

Financial.

11. The year closed with a credit balance of Rs. 1,066-13-9 against Rs. 16,661-2 in the previous year. Owing to a smaller number of recruits despatched, the receipts derived from the consolidated fee of Rs. 3 per head on each cooly embarked fell from Rs. 48,456 to Rs. 31,101, plus Rs. 10 on account of miscellaneous receipts, or Rs. 17,345 less than in 1894. A decrease of Rs. 1,750-11-9 is also noticed in the charges which, in the previous year, amounted to Rs. 31,794-14.

The Lieutenant-Governor is pleased to express his approval generally of the satisfactory character of the report under review, but hopes that effective measures will be taken during the present year to put a stop to the abuse mentioned in paragraph 6 above.

ORDER.—Ordered that a copy of the report and of this Resolution be submitted to the Government of India, Revenue and Agricultural Department, for information.

Ordered also that a copy be forwarded to the Protector of Emigrants, Calcutta, for information, and to all Commissioners of Divisions for information and circulation to all District Officers subordinate to them.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE SANITARY COMMISSIONER, BENGAL, FOR THE YEAR 1895.

MUNICIPAL DEPARTMENT—SANITATION.

Darjeeling, the 30th June 1896.

RESOLUTION—No. 405T—M.

READ—

The Report of the Sanitary Commissioner, Bengal, for the year 1895.

Read again—

The Report of the Sanitary Commissioner, Bengal, for the year 1894, with the Resolution of Government recorded thereon.

The report is submitted by Surgeon-Captain Dyson, who took charge of the duties of Sanitary Commissioner on the 26th August 1895, in succession to Brigade-Surgeon Lieutenant-Colonel Gregg, whose term of office had expired. Owing to delays in the offices of some Civil Surgeons, the report was received a month after it was due, and two of the appendices are still incomplete. The reasons for this should be separately reported. Taking the Province as a whole, the past year appears to have been distinctly healthier than 1894. There was a marked decrease in the mortality from cholera and fever in Bihar, accompanied by a slight increase in these diseases in Bengal Proper. In Orissa the mortality from all causes declined, and the same may be said of Chota Nagpur. At the same time, the birth-rate rose everywhere except in the Patna Division; but the registration of births is admitted to be defective, and it is impossible to say how far the variations in the rate are due to physical causes, or how far they depend upon the vigilance and activity of the registering agency. The question of improving this agency is now under consideration in connection with a general scheme for reorganizing the Sanitary Department in Bengal.

Birth-rate.

2. The number of births registered in Bengal rose from 23,32,247 in 1894, representing a birth-rate of 32·81 per thousand of population, to 24,58,623, or a birth-rate of 34·59 per thousand in 1895. The rate varied from 31·23 in the Presidency Division to 41·06 in Chittagong, where a considerable improvement has taken place in the registration of births. Among districts, Noakhali and Backergunge stood highest with birth-rates of 46·61 and 45·92, while Calcutta recorded only 16·05, and the 24-Parganas stood next lowest with a birth-rate of 25·73. In 147 towns where births were registered, the rate rose from 22·77 to 23·91, and in 554 rural areas the birth-rate was 35·13 as against 33·32 in the preceding year. Only four towns—Jamalpur in Monghyr, Chatra in Hazaribagh, Jamui in Monghyr, and Roserah in Darbhanga—show a birth-rate in excess of 40 per thousand, and the rate varied from 44·17 in Jamalpur to 5·49 in Jhalakati in Backergunge. On the other hand, no less than 42 rural areas returned rates of 45 per thousand and over; and after full allowance has been made for the excess of males over females in some towns, and for the fact that many women who live in towns return to their homes in rural areas for their confinement, the standard of birth registration in rural circles appears to be considerably higher than it is in towns. This conclusion is to some extent borne out by the fact that the rural birth statistics show the normal proportion of 106 male births to every 100 female births, while the town statistics give a proportion of 110 male births to 100 female births, though it is not suggested that men living in towns marry later in life than men living in villages.

Death-rate in towns.

3. The total number of deaths registered during 1895 was 22,31,458, or 31·39 per thousand, as compared with 24,79,096, or 34·88 per thousand, in the preceding year. In

urban areas the rate of mortality declined from 35·34 to 34·46, the figures varying from 59·44 in the small Municipality of Bhadreshwar in Hooghly, to 12·68 in Jhalakati in Backergunge. Only sixteen towns returned a death-rate in excess of 44·8 per thousand, the average rate estimated by Mr. Hardy* for Bengal. On the other hand, no less than 27 towns showed a death-rate of less than 25 per thousand, which in most cases is probably due to defective registration. The general death-rate of Calcutta rose in 1895 from 32·92 to 39·66, or by nearly 7 per thousand. This was due to the fact that the mortality from cholera in the town increased from 2·48 to 3·07, and that from small-pox from ·59 to 3·25; while the fever death-rate rose from 13·15 to 16·64. A comparison of the mortality by sexes shows that the general death-rate of males rose from 28·83 to 34·77, and that of females from 40·70 to 48·95. The increase in either case is remarkable; and if it be true, as was assumed in last year's Resolution, that the death-rate among females more truely represents the mortality caused by the actual conditions of life in Calcutta, the statistics point to a serious falling off in the healthiness of the town.

*Census of India, Volume II, Appendix III.

Death-rate in rural areas.

4. The death-rate in rural areas fell from 34·85 to 31·24; the highest mortality for such areas being recorded in Jessore (41·52), Nadia (38·85), Darjeeling (38·41), Pabna (37·78), Rajshahi (37·71), Hooghly (37·15), Jalpaiguri (36·08), and Dinajpur (35·95). This accords fairly well with popular impressions as to the comparative healthiness of different districts, and is in marked contrast with the statistics recorded in 1894, when, owing to the prevalence of fever, most of the Bihar districts showed an exceptionally high death-rate. Darjeeling owes its high place in the list to the peculiar unhealthiness of the Terai. In 23 rural areas enumerated by the Sanitary Commissioner in paragraph 17 of the Report, the death-rate varied from 70·50 in Kushtia to 45·17 in Narail. It is hoped that the reorganization of the Sanitary Department and the extension of the powers of Union Committees now under consideration, will render it possible in future to deal more effectively with unhealthy tracts of this kind.

Death-rate by sex and age.

5. The death-rate of males fell from 37·16 to 33·76, and that of females from 32·61 to 29·04. The following table shows the mortality according to age during the last two years:—

	In 1895.		In 1894.	
	Deaths.	Ratio per mille.	Deaths.	Ratio per mille.
1	2	3	4	5
Under 1 year	448,307	195·50	486,640	212·22
1 year and under 5 years ...	325,915	40·81	357,810	44·80
5 to 10 years	182,813	17·05	201,209	18·77
10 „ 15 „	100,879	13·01	111,906	14·43
15 „ 20 „	103,780	17·63	108,605	18·45
20 „ 30 „	222,131	19·13	242,468	20·88
30 „ 40 „	215,623	21·35	238,162	23·59
40 „ 50 „	186,352	27·28	212,684	31·18
50 „ 60 „	165,764	40·77	191,475	47·09
60 years and upwards ...	279,894	72·91	328,137	85·48
Total ...	22,31,458	31·39	24,79,096	34·88

The figures show a decrease of 16·72 in the death-rate among infants under one year. The Sanitary Commissioner discusses at some length the

difference between the mortality of the sexes at different age periods, and observes that the results worked out by him from the Bengal statistics do not agree with those arrived at by Mr. Hardy in the note already referred to. His conclusions, however, are based upon less comprehensive data than those made use of by Mr. Hardy, and do not take into account the special methods employed by the latter to eliminate certain accidental and systematic errors which are found to arise in the reporting of ages in India.

Convictions for non-registration.

6. The number of persons convicted for neglect to register births and deaths rose from 1,923 to 2,049, and the amount of fines imposed from Rs. 2,657 to 3,153. The figures, however, are incomplete, as no return has been received from the district of Dacca. Twenty-six persons were imprisoned, and a number of chaukidars were punished by departmental fines. No cases were instituted in the districts of Singhbhum, Lohardaga and Noakhali.

On the subject of these fines, the Army Sanitary Commission, in their criticism of the Bengal Report for 1893, make the following remarks:—

"No doubt the levy of fines was intended primarily to accustom or educate the people in this important sanitary matter. We have long been struck with the unsatisfactory way in which such fines were inflicted, and were much impressed by the remarks of the Chief Commissioner of the Central Provinces on this subject, in his orders on the Sanitary Report of those Provinces for 1893. After illustrating by the figures for that year the want of method in inflicting such fines, he says:—'The fines range from Rs. 5 a head in Gadarwara to 4 annas a head in Hatta. In place of all this variety of practice, the Chief Commissioner would like to see the experiment tried of making fine the rule for breaches of the municipal bye-laws for the registration of births and deaths, but the fines should be nominal, ranging from one to four annas. Warnings are no good, but a man remembers when he has had to pay a fine, however small. The negligent citizen is not a criminal that he should be heavily punished, and fines that average five rupees a head are outrageous sentences, but it is necessary to bring all citizens to the recollection that their bye-laws do impose upon them a simple duty which they must discharge.' We would commend these remarks to the authorities in all the provinces of India."

The Lieutenant-Governor has no doubt that this is ordinarily a good rule to follow, but there are cases of wilful and persistent recalcitrancy in which a substantial penalty would rightly be inflicted.

Death-rate from various causes.

7. The following table shows the mortality from the principal diseases during the year, compared with 1894 and the average of ten years 1885 to 1894:—

Causes of death.	In 1895.			In 1894.			Average of past ten years, 1885-94.		
	Urban.	Rural.	Combined.	Urban.	Rural.	Combined.	Urban.	Rural.	Combined.
	2	3	4	5	6	7	8	9	10
Cholera	3·64	2·43	2·49	3·88	3·29	3·32	3·50	2·42	2·47
Small-pox	·91	·14	·18	·18	·11	·11	·26	·14	·15
Fever	18·43	23·22	22·89	19·19	25·62	25·32	19·29	18·89	18·90
Dysentery and diarrhœa	3·52	·55	·70	3·84	·67	·82	2·97	·63	·74
Injury	·46	·40	·41	·50	·42	·43	·44	·41	·41
Other causes	7·49	4·46	4·61	7·73	4·70	4·85	6·75	3·35	3·52
All causes	34·46	31·24	31·39	35·34	34·85	34·88	26·24	25·27	25·31

These figures bring out that in respect of all diseases except fever, rural areas are more healthy than urban. Their liability to fever is probably due mainly to defective drainage, impure water, and inadequate conservancy, all of them preventible causes which the people themselves may be expected to remove as soon as the requisite legal machinery has been provided. The following table, which has been prepared in the manner suggested in paragraph 11 of the Resolution on the report for 1894, illustrates the comparative mortality from the chief diseases in each of the main divisions of the province:—

Causes of death.	Divisions.	In 1895.	In 1894.	In 1885—94.	Increase or decrease as compared with 1894.	Increase or decrease as compared with 1885—94.
1	2	3	4	5	6	7
Cholera ...	Bengal ...	3·44	2·35	2·28	1·09 *I*	1·16 *I*

The value of the average for ten years shown in the fifth column is greatly discounted by doubts as to the accuracy of the statistics recorded for the earlier years of the period, nor can it be assumed that the proportion of error has been uniform in different districts or different years. The decline in mortality from fever and cholera in Bihar during the past year is remarkable, and it is to be hoped that this may indicate a cessation of the unhealthy conditions which have prevailed in that part of the Province in recent years. The relatively high death-rate from cholera, dysentery and diarrhœa, and small-pox in Orissa is probably due to the constant movements of pilgrims in that division. The low fever mortality, on the other hand, seems to indicate that the purely local conditions are fairly healthy.

Cholera.

8. The total number of deaths from cholera was 1,77,087, or 2·49 per thousand, as compared with 2,36,150, or 3·32 per thousand, in the preceding year. The districts which suffered most from the disease were Dacca (7·08), Faridpur (6·03), Nadia (5 36), Jessore (5·35), Mymensingh (4·75) and Howrah (4·51). Nearly all the districts which had the highest mortality in 1894 showed comparatively low rates in the past year, while in Palamau the mortality fell from 11·16 to ·52, and in Shahabad from 9·44 to 2·23. An interesting diagram is given at page 20 of the Report, illustrating the seasonal incidence of cholera in the main divisions of the Province, and showing at the same time the monthly rainfall; but, as the Sanitary Commissioner observes, it proves nothing. Even the standard doctrine that cholera is least prevalent when the rainfall is at its highest seems not to hold good in Bihar and Orissa, where high rates of mortality were recorded during the rains; while in Chota Nagpur the death-rate was at its lowest in December, the month of maximum prevalence in Bengal Proper. The Sanitary Commissioner has wisely abstained from discussing any of the current theories of the causation of cholera, and confines himself to the safe observation that the improvement of the local water-supply in small towns and villages, and its protection from outside pollution, will bring its own reward in a reduction of the disease.

Small-pox.

9. The number of deaths from small-pox rose from 8,404, or ·11 per thousand, the lowest mortality on record, to 13,020, or ·18 per thousand. The highest death-rates were recorded in Calcutta (3·25), Faridpur (·72), Cuttack (·66), Howrah (·63), and Midnapore (·58). Mortality was also high in the small municipalities near Calcutta, North Dum-Dum registering 3·65, Barnagore 2·21, South Dum-Dum 1·99, Bally 1·49, and Cossipore-Chitpur 1·14. Among rural areas, Panskura and Daspur in Midnapore registered 5·00 and 3·06 respectively, and Patamundi in Cuttack recorded 2·86. No deaths occurred in Singhbhum, only two in Darjeeling, and three in Lohardaga. The subject will be treated at greater length in reviewing the Vaccination Report.

Commissioner observes, the term is loosely construed by the illiterate agency responsible for reporting deaths, so that pneumonia, phthisis and other diseases attended with a rise of temperature, and practically nearly all diseases except small-pox and cholera, come to be registered as fever. During the past year the deaths reported as due to fever numbered 16,34,254, or 22·99 per thousand, as compared with 17,99,833, or 25·32 per thousand, in 1894. The following statement compares the death-rate of 1895 with that of 1894, and with the average rate for the ten years 1885—94:—

No.	Districts.	Ratio per 1,000 of population in—			Increase or decrease as compared with 1894.	Increase or decrease as compared with 1885—94.
		1895.	1894.	Average of ten years 1885—94.

The conspicuous feature of the similar statement which was published last year was the high mortality recorded in the Bihar districts, which now occupy a place more in accordance with the popular estimate of their comparative healthiness. Jessore (33·43), Dinajpur, (32·83), and Jalpaiguri (32·56) now head the list, while Rajshahi, Purnea, Pabna, Malda, Nadia, Rangpur and Hooghly follow with rates only slightly lower than those quoted. All of these, with the exception of Hooghly, stand high in the column showing the average mortality for the last ten years, and the substantial agreement that exists between these two columns may be taken as a fair test of the normal prevalence of fever in the districts concerned. In all the soil is alluvial and the natural drainage has been more or less obstructed by changes of level and the shifting of the courses of the rivers. At the same time, as the Sanitary Commissioner points out, malarial fever is by no means confined to alluvial areas with defective drainage, but prevails also on the laterite soils of Western Bengal and in the more rocky districts of Chota Nagpur, where surface drainage is rapid and the river channels are not liable to change. Hazaribagh, for example, shows a higher death-rate than Chittagong and Burdwan; while in Lohardaga, where the physical conditions are precisely similar, the fever mortality is far lower than in Hazaribagh.

Death-rates in excess of 40 per thousand were recorded in the following circles:—

District.	Circle.	Death-rate.
1	2	3
Nadia	Kushtia	55·07
Khulna	Chanduria	47·82
Darjeeling	Siliguri	46·28
Pabna	Chatmohar	45 73
Jessore	Salikha	45·13
Jalpaiguri	Falakata	44·33
Mymensingh	Phulbaria	44·25
Pabna	Dulai	43·90
Rajshahi	Burigaon	43·32
Nadia	Kumarkhali	42·49
Malda	Malda	42·18
Nadia	Santipur	41·44
Jalpaiguri	Alipore	41·09
24-Parganas	Khardaha	40·47
Bhagalpur	Kishanganj	40·28

In the divisions of Burdwan, Chittagong, Patna, Orissa, and Chota Nagpur no death-rate in excess of 40 per thousand was registered. The mortality of the Darjeeling Terai (Siliguri Circle) was again the highest (46·28), but was more than 9· per thousand less than in 1894. Another dispensary has been opened in this tract; a special Hospital Assistant has been appointed to travel about and treat the sick in their villages; and attempts are being made to induce peeple to boil all water used for drinking.

Sale of quinine at post-offices.

11. The system of selling quinine by the dose at post-offices continues to make progress, and nearly three millions of pice-packets were sold during the year. The following table shows side by side the number of deaths from fever in each district, and

the quantity of quinine sold, stated in parcels containing 102 pice-packets apiece:—

Number.	Districts.	Number of deaths in from fever each district.	Number of parcels of quinine sold.	Number.	Districts.	Number of deaths from fever in each district.	Number of parcels of quinine sold.	Number.	Districts.	Number of deaths from fever in each district.	Number of parcels of quinine sold.

									Total for the Province	1,622,909	28,530

The varying relations between the two sets of figures are curious, and doubtless depend to a large extent on the intelligence of the people themselves, and their readiness to avail themselves of the facilities afforded for procuring cheap quinine. With few exceptions, which may be explained by local conditions, the sales are largest in the typical fever districts of Bengal; in Bihar, where fever has set in only of late years, the people have been more backward; while in Orissa and Chota Nagpur the sales are comparatively small. Another aspect of the question is illustrated by the following statement which compares the demand for quinine with the fever mortality month by month during the past year:—

Months.	Number of parcels of quinine sold. (Each parcel contains 102 five-grain pice packets.)	Total deaths from fever.
1	2	3
January	1,955	1,48,492
February	1,117	1,09,468
March	1,084	1,13,019
April	1,661	1,49,509
May	1,485	1,18,518
June	1,248	1,03,256
July	2,178	1,15,096
August	2,621	1,12,395
September	2,663	1,27,927
October	4,179	1,45,234
November	4,831	1,59,177
December	3,513	2,20,818
Total ...	28,530	16,22,909

Mortality from other causes.

12. The deaths from dysentery and diarrhœa during 1895 numbered 49,871, or ·70 per thousand of the population, against 58,812, or ·82 per thousand, in the preceding year. Calcutta returned the highest death-rate (4·79), and Howrah (4·65). Darjeeling (3·99), Balasore (3·21) and Puri (3·20) came next in order. The same five

districts have headed the list, though in a different order, for the last three years. In urban areas the death-rate from these causes fell from 3·84 to 3·52, and in rural circles from ·67 to ·55. During the last two years, November, December and January were the months of maximum mortality, the December death-rate being in each case the highest of the three. The number of deaths from injury fell from 30,715, or ·43 per thousand, in 1894, to 29,178, or ·41 per thousand, in 1895. Deaths from causes other than those noticed at length above numbered 3,28,048, or 4·61 per thousand, against 3,45,182, or 4·85 per thousand, in 1894.

Expenditure on urban sanitation.

13. The following table compares the total expenditure incurred by municipalities during the last two official years on sanitary purposes:—

Heads of Expenditure.	Total Expenditure.		Difference.	
	1894-95.	1893-94.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
1. Conservancy, including establishment, road-watering, latrines, &c.	8,79,988	8,39,684	40,304	.....
2. Drainage	2,73,741	2,86,684	.....	12,943
3. Water-supply	7,97,609	1,56,433	6,41,176	.....
4. Disposal of the dead ...	6,180	5,488	692	.....
5. Market and slaughter-house	21,137	18,453	2,684	.....
6. Treatment of sick ...	3,31,052	2,82,189	48,863	.....

8. Other sanitary works ...	16,484	11,268	5,216	.....
Total ...	23,44,835	16,19,027	7,38,935	13,127
Construction and maintenance of roads.	5,17,833	4,95,941	21,892	.....
Total, inculding roads ...	28,62,668	21,14,968	7,60,827	13,127
	Net increase being ...		7,47,700	

The table has been prepared in accordance with the instructions given in the Resolution on last year's report, and includes capital expenditure. The bulk of the increase shown is due to the outlay incurred on the Howrah water-works during 1894-95. The statement given in paragraph 57 of the report, purporting to show the effect on the public health of important works of drainage and water-supply, is for the most part inconclusive owing to the doubtful accuracy of the statistics of mortality. In the town of Calcutta, however, the mortality has fallen from 37·5 to 28·37 since the introduction of drainage and a filter water-supply; the health of Rangpur seems to have been appreciably improved by drainage, and the death-rate of Bhagalpur has fallen from 40·4 to 30·50 since the introduction of filtered water. It is too early yet to draw any conclusions as to the influence of the improved water-supply recently provided in Arrah and Cossipore-Chitpur.

Urban and rural sanitation.

14. The list, given in appendix IV to the report, of improvements carried out in towns and rural areas by Municipalities, District Boards, and private individuals, is incomplete, no statistics having been furnished from ten districts. Among such improvements were included the extension of the water-supply in Burdwan, water-works and drainage survey in Howrah, a filtered water-supply in Cossipore-Chitpur, the extension of a similar supply in Maniktola, the settling tanks and a market in Darjeeling, water-works in Arrah, drainage works in Patna and Muzaffarpur, extension of water-works to the poorer quarters of Bhagalpur, improvement of the water-supply of Purulia, and a variety of minor works of a sanitary nature. The total cost of the urban projects amounted to Rs. 10,10,506 against Rs. 3,59,771 in the previous year. No large works were undertaken by

the District Boards, but a number of wells were sunk and tanks excavated, and in some districts money was spent on the improvement of road-side drainage. The total expenditure was Rs. 1,03,912 against Rs. 1,19,731 in 1894, but as the figures are admittedly incomplete, no useful comparison is possible. The contributions of private individuals declined from Rs. 2,51,453 to Rs. 1,88,875. Rural sanitation can as yet hardly be said to exist. The resources of District Boards and Road Committees are at present unequal to meeting the growing demand for improved communications, and village water-supply and conservancy must await the creation of Union Committees, equipped with the power to raise the necessary funds, and supervised by a staff of trained Sanitary Inspectors working under the orders of the District Board. In the matter of the disposal of night-soil by Municipalities, much has been done by Surgeon-Captain Dyson, since he has been in charge of the office of Sanitary Commissioner, to improve the system of trenching by explaining to local authorities the theory on which the process is based, and by showing that, if properly carried out, a sewage farm may be made a profitable undertaking.

The Sanitary Board.

15. The Sanitary Board dealt with a wide range of subjects during the year, among which the following were the most important:—

(1) The improvement of the Darjeeling water-supply by the construction of settling tanks.

(2) The introduction into Darjeeling of Pasteur-Chamberland germ filters. This project was sanctioned by Sir Charles Elliott, against the advice of the Board, on the ground that the terms offered by the contractors were so favourable that the Municipality could not lose even if the experiment proved a failure.

(3) A scheme for supplying filtered water to the town of Gaya. This is much wanted, and the project prepared promises to give an excellent supply of naturally filtered water at a moderate cost. The Municipality are now considering the question of funds.

(4) The sewerage of the town of Dacca, and the provision of an unfiltered water-supply for flushing drains and watering streets at a cost of Rs. 13,50,000. It is doubtful whether the Municipality will be able to afford so large a sum, unless they improve their financial position by a substantial increase of taxation.

(5) The drainage and sewerage of the town of Howrah. This is a difficult problem, and it is as yet uncertain which of several systems it will be best to adopt. The Municipality will, it is understood, hardly be in a position to deal with the matter effectively until certain questions relating to their water-supply have been disposed of.

(6) The drainage of the town of Krishnagar by the excavation of the Angona khal, a project which has been the subject of much discussion and is now under revision by the Sanitary Board.

(7) The extension of the Bhagalpur water-supply to the poorer quarters of the town at a cost of Rs. 3,14,000. This scheme, which was initiated by Mr. Skrine when Collector of Bhagalpur, was completely revised in the Sanitary Board's office, and was sanctioned during the year.

(8) A scheme which owes its origin to the liberality of the Maharani Surnamoyee, C.I., for supplying Berhampore with filtered water. The Lieutenant-Governor is glad to be able to say that, owing to the wisdom and liberality of the Maharani, certain difficulties which had arisen as to the source of supply, and as to the instalments in which her donation of Rs. 2,21,000 should be paid, have now been overcome, and there is every prospect of work being commenced within the next three months.

Besides these large schemes, a number of minor sanitary works, including schemes for supplying filtered water to Faridpur and Pabna, and surveys for surface drainage in nine municipalities, were dealt with by the Sanitary Board during the year.

Analysis of water.

16. The proceedings of the Sanitary Board also raise incidentally some obscure and difficult questions relating to the examination of water with reference to its fitness for drinking, which it will be convenient to discuss here. In order to relieve the Chemical Examiner to Government of the work which devolved upon him in connection with the analysis of samples of drinking water for municipal and local areas, arrangements were made in January 1894, with Mr. Norman Rudolf, Analytical and Consulting Chemist and Assayer at Sewan in the district of Saran, for the conduct of such analyses, and local bodies were instructed to send samples of water to him for examination on payment of prescribed fees. The Sanitary Board, however, represented that the analysis of water was too important a matter to be left to the accident of a private practitioner, however capable, being willing to carry it on, and that it would be a better and more permanent plan to strengthen the establishment of the Chemical Examiner, and entrust the work to him. Sir Charles Elliott agreed in this view, and as it happened that Mr. Rudolf was giving up his business at the time, the opportunity was taken to adopt the Board's suggestion. Local bodies were instructed to send samples of water for analysis to the Chemical Examiner in future, and that officer's establishment was increased.

In the course of the discussion which ended in this decision, the Sanitary Board were asked to consider, in consultation with the Chemical Examiner, (*a*) what it would cost to make bacteriological analyses of water in selected cases, (*b*) whether the results of the chemical analyses ordinarily made should not be expressed on the system known as Wigner's scale, which assigns arbitrary values to the various component elements and determines the character of the water accordingly.

This inquiry elicited a lucid and valuable opinion by Surgeon-Captain Evans, which is quoted at length in Appendix V to the Sanitary Commissioner's Report. On the general question of the value of bacteriological analyses *per se*, if conducted under the most favourable conditions, Dr. Evans observed:—

"I would point out that the number of pathogenic organisms which can at the present time be identified, either by their morphological characters or micro-chemical reactions, is extremely limited. In the majority of instances inoculation experiment on lower animals is the only means of deciding whether an organism possesses pathogenic properties. Given cases where disease outbreaks are attributed to the water-supply, are thorough and complete investigations to be undertaken? If so, it should be understood that the work requires very considerable time and a well-furnished laboratory. It is enough to form the sole occupation of any one man, and he cannot be even supposed to undertake it at the proposed rate of remuneration, that is to say, if he has to earn his living as well.

"Bacteriological examinations of waters, undertaken in any other spirit than the thorough method which had been indicated, are less valuable than a chemical analysis. For if otherwise undertaken, it is only possible to say that one sample of water contains so many more organisms per cubic centimetre than another, a circumstance which is very trivial indeed in this climate, unless some of the organisms can be shown to possess pathogenic properties. Distilled water in this laboratory after standing a few days contains very many organisms, probably all quite harmless. The most common diseases in this part of India are malaria, dysentery, cholera, and diarrhœa. Cholera has been shown to be associated with, or to proceed from, the entry of a species of comma bacillus into the intestinal tract. The etiology of malaria, dysentery, and diarrhœa is not yet established definitely. Accordingly, I can restrict my remarks to the etiology of cholera. There are apparently many species of comma bacilli, and all have not been proved to possess pathogenic properties. What steps are contemplated, suppose that comma bacilli are found in the cultures obtained from the water of a certain tank? Apart from an outbreak of the disease among persons drinking the tank water, such a result may with some degree of certainty be expected, for comma bacilli will probably be found in a large proportion of the tanks in Lower Bengal, and that, too, without any outbreak of cholera among the people drinking the tank water. It has lately been shown that cholera bacilli are more potent under certain conditions, and that their pathogenic properties can be exaggerated. When their pathogenic properties are not exaggerated, pure cultures have been imbibed without apparent risk.

"Accordingly, it is only fair to ask, before systematic examinations of water are initiated, whether it is contemplated to take any action on the inferences which may be drawn from the results of such examinations. Should cholera be prevalent among a community using a

certain water-supply, probably the use of that water-supply would be prohibited before bacteriological examination could possibly be carried out, as it is a matter of a few days. The examination would then be confirmative only. Should more than one water-supply be in use among a community under such conditions, then bacteriological examination might serve to indicate which water-supply was at fault. Under such circumstances, the individual making the investigation ought, in my opinion, under the conditions which prevail in this country, to visit the infected districts and collect the water samples himself.

"The object of my remarks is not to depreciate the value of bacteriological investigation, but to indicate that it should be seriously, and not lightly, undertaken, nor too much expected from it. It is a science yet in its infancy practically, and hence not exact, nor applicable in many cases where exact results are demanded. Original bacteriological research is one thing, but the application of bacteriology in practical work is another."

He added that such analyses, in order to be of any use either as determining the quality of water for drinking or as indicating the cause of an outbreak of disease, must be made as soon as the sample of water has been drawn. On this point Mr. Hankin, Chemical Examiner to the Government of the North-Western Provinces, writes as follows in his pamphlet on the Bacteriological test of the purity of water :—

"In all cases the water to be examined must be tested as soon after collecting as possible. This is necessary because many microbes can grow and reproduce in water. Consequently if water is tested immedately after taking out of the filter well and then again some hours later, two or three times as many microbes will be found in the latter case. Care must be taken to avoid this source of error, especially in the warm weather, as microbes grow more quickly at a higher temperature. In the hot weather, well water or other waters should be tested within an hour of collection. In the cold weather two hours may elapse without introducing any great error."

It is clear from these opinions that bacteriological analyses of water sent from a distance cannot be usefully conducted by the Chemical Examiner, for the simple reason that the condition of the water when it reaches the laboratory may and probably will be entirely different from his condition when drawn. It is shown, however, in the pamphlet already quoted, that colonies of microbes may, subject to certain precautions which any intelligent layman can readily learn to apply, be collected in sterilized gelatine and counted with the object of ascertaining how many colonies occur in a given quantity of water. This process, which is understood to be in use at the chief London water-works, requires no scientific knowledge to carry it out, and it is intended merely to serve as a test of the condition of the filter-beds. If the number of microbes, whether harmless or the reverse, exceeds a certain standard, it follows that the water is imperfectly filtered, and that the condition of the filter-beds requires to be looked into. The Lieutenant-Governor is of opinion that this system might at any rate be tried in all municipalities which have a filtered water-supply, and he desires the Sanitary Commissioner to make the necessary arrangements in communication with the municipalities concerned. The cost will be small, and the work can, it is anticipated, be done by the Engineer in charge of the water-works.

Dr. Evans's views on the subject of Wigner's scale and on the best means of establishing local, as opposed to general, standards by which to judge of the quality of a given water-supply, are set forth at length in the extract from his report annexed to this Resolution. In the Lieutenant-Governor's opinion, he shows clearly that no chemical test of the purity of water admits of being precisely formulated and universally applied; that varying local standards have been established in England; that these standards are probably not applicable to the water ordinarily in use in Bengal; that no local standards have as yet been arrived at for India; and that it will take a considerable time to establish such standards even for the few places provided with a filtered water-supply, while for the country at large the attainment of such a result is indefinitely remote. All that can at present be done is to encourage local authorities to send water for chemical analysis; and to endeavour by degrees to train up a body of men who shall be capable of carrying out on the spot the initial processes of bacteriological analysis, leaving the later stages to be conducted by an expert in a central laboratory equipped with the necessary appliances. Thus in course of time standards of purity will be worked out, and it will be possible to say whether a given sample of water conforms to the standard accepted as pure for the locality from which the water comes.

17. Brigade-Surgeon-Lieutenant-Colonel Gregg, who was in charge of the Department up to the 25th August 1895, spent 58 days on tour, and inspected 18 municipalities, most of them in the neighbourhood of Calcutta. Surgeon-Captain Dyson was on tour for 45 days, during which time he inspected 8 municipalities, the Sonpur fair, several rural areas, and the Emigration Department at Goalundo. In the Metropolitan and Eastern Bengal Circle, Drs. Oldham, Sinha, and Deare spent 105 days on tour. The officers in charge of the Northern Bengal Circle were out for 146 days, and Dr. Vaughan, in Western Bengal, made a tour of 135 days. The Sanitary Commissioner acknowledges the assistance he has received from District Officers and Civil Surgeons when on visits of inspection; but as regards municipalities, he observes—

Inspections.

"I have also been courteously received by non-official Chairmen and Vice-Chairmen of municipalities, and by those of the Municipal Commissioners whom I have chanced to meet; but although I always gave due notice of my inspections, and expressed a desire to see, converse, and go round the town with the members of the Municipal Committee, I regret to say that, in no case, as yet, have any of them, except the Chairman sometimes, taken advantage of my visit to discuss sanitation, or shown the slightest inclination to go round with me. The Deputy Sanitary Commissioners also complain of the want of interest taken in their inspections by the Municipal Commissioners, whom their visits most concern. This is much to be regretted, as so much practical good might result from advice given and discussed on the spot, which reams of correspondence afterwards would probably fail to effect. To me this lack of interest in Bengal, in connection with the Sanitary Officer's visits, is in remarkable contrast to the eagerness with which he is received in the Punjab, where I was for six years a Deputy Sanitary Commissioner. There, as a rule, most of the members of the Municipal Committee make it a point of accompanying the Sanitary Officer when he inspects a town. The result is a maximum of work with a minimum of correspondence—an example which might very advantageously be followed in Bengal."

The Lieutenant Governor trusts that the Sanitary Commissioner will have no occasion to repeat this complaint. Municipal Commissioners should be the first to realise the advantages which they will derive from personal communication with an expert on the subject of the sanitary improvements of which all towns in Bengal stands so badly in need.

18. The Sanitary Commissioner speaks with approval of the useful inspections made by Dr. Vaughan, and the good work done by Dr. Deare in overcoming the opposition to vaccination offered by the Ferazi Muhammadans of Eastern Bengal, a subject which will be more fully noticed in reviewing the Vaccination Report. Dr. Dyson also mentions the assistance he has derived from his Personal Assistant, Mr. A. A. Price. The Lieutenant-Governor's acknowledgments are due to these officers and to Dr. Dyson himself for the impulse he has given to sanitary improvement in municipalities, especially in the matter of conservancy and the management of trenching grounds. His Honour desires also to thank the President and Members of the Sanitary Board and the Sanitary Engineer for the valuable advice given by them on a variety of difficult questions.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

REPORT ON THE WORKING OF THE LICENSED WAREHOUSE AND FIRE BRIGADE ACT, 1893 IN CALCUTTA DURING THE YEAR 1895-96.

No. 2709M.—The following report is published for general information.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

The 3rd July 1896.

No. 33J., dated Calcutta, the 29th June 1896.

From—H. C. WILLIAMS, Esq., Chairman of the Corporation of Calcutta,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit the following report under section 41 of Act I of 1893 (B.C.) of the Warehouses in Calcutta for the year ended 31st March 1896.

2. The Commissioners, at their ordinary monthly meeting held on the 7th June 1894, fixed the fees leviable under section 10, Act I of 1893 (B.C.) for 1894-95, at the rate of 10 per cent. on the annual valuation of warehouses, and the fees were continued to be levied accordingly during the year under report.

3. The following statement shows the number of applications for licenses received and what happened to them:—

Applications—		Total.	Nature of application.	Number sanctioned.	Number refused.	Number pending.
Pending since last year.	Received during the year.					
1	2	3	4	5	6	7
7	218	225	Hay, wood, &c. ...	216	4	5
5	10	15	Jute ...	12	2	1
12	228	240	.....	228	6	6

4. During the year under review 297 licenses were issued for 1894-95 and 520 for 1895-96, and the following statement shows the aggregate amount of receipts up to the end of the year:—

	Rs.	A.	P.
License fees for 1894-95	6,001	0	0
Ditto for 1895-96	29,792	8	0
Amount of fines	848	0	0
Mutation fees	110	0	0
Total ...	36,751	8	0

5. Of 278 warehouses, which had been licensed in 1894-95, the licenses of 254 were renewed, those of 14 cancelled, as they were reported vacant or unoccupied, or having less than 50 maunds of inflammable material in stock, while the license fees of 10 still remained unrealised when the year came to a close.

6. The following statement shows the receipts and disbursements of the Warehouse Fund during the year 1895-96:—

Receipts.	Amount.	Total.	Disbursements.	Amount.	Total.
1	2	3	4	5	6
	Rs. A. P.	Rs. A. P.		Rs. A. P.	Rs. A. P.
To jute warehouse license fees	35,793 8 0		By contribution to the Fire-brigade (exclusive of Rs. 27,004 paid from General Fund).	27,004 0 0	
„ miscellaneous receipts and fines.	958 0 0				
		36,751 8 0			27,004 0 0
Balance at commencement of the year—			Balance at close of the year—		
Cash in the Bank of Bengal ...	6,364 8 0		Cash in the Bank of Bengal	3,436 0 0	
„ with Treasurer ...	55 8 0		„ with Treasurer ...	424 0 0	
				3,860 0 0	
Due from General Fund ...	95 0 0		Due from General Fund ...	12,402 8 0	
		6,515 0 0			16,262 8 0
Total ...	.....	43,266 8 0	Total ...	.....	43,266 8 0

WEATHER AND CROP REPORT.

For the week ending the 6th July, 1896.

Burdwan.—Rainfall at Sadar 7·48. Weather hot and cloudy. Heavy rain throughout the district. Prospects of crops excellent. Fodder and water ample. Condition of cattle good. Common rice selling as follows:—

	Srs.	
Sadar	11 to 16	per rupee.
Kalna	12 to 13¼	
Katwa	13⅛	
Raniganj	15	

Midnapore.—Rainfall at Sadar 4·71, Contai 3·63, Tamluk 6·94, Ghatal 4·04. Weather seasonable. Transplantation of *aman* paddy is going on. Prospects of indigo, sugarcane jute, and *aus* paddy good. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	16	per rupee.
Contai	18 to 20	
Tamluk	13	
Ghatal	14 to 16	

24-Parganas.—Rainfall at Sadar 4·18. Weather hot and cloudy. *Aus* and jute plants thriving well. Sowing of *aman* continues. Transplantation has commenced in low lands. Fodder and water sufficient. Condition of cattle good. Common rice sells at—

	Srs.	
Sadar	10 to 13	per rupee.
Barasat	11	
Basirhat	12¾	
Diamond Harbour	11½	

Murshidabad.—Rainfall at Sadar 3·15, Jangipur 3·16, Kandi 2·08. Weather hot and cloudy. Transplantation of *aman* has begun. Standing crops doing well. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar 1·89, Bagerhat 4·15, Satkhira 2·04. Weather hot and cloudy with occasional rain. Prospects of crops good. No cattle-disease. Fodder and water sufficient. Prices of common rice:—

	Srs.	c.	
Sadar	11 to 12	0	per rupee.
Bagerhat	11	15	
Satkhira	11	0	

Dinajpur.—Average rainfall 2·58. Weather hot and cloudy. Standing crops doing well. Common rice sells from 13 to 15 seers per rupee. No report of cattle-disease. Fodder and water sufficient.

Rangpur.—Average rainfall 3·06. Harvesting of *aus* going on. Transplantation of *aman* continues. Prospects fair. Common rice selling from 10 to 15 seers per rupee. Fodder and water sufficient.

Pabna.—Rainfall 2·58. Weather hot and cloudy. Prospects of crops favourable. Fodder available. Rice selling from 11 to 14 seers per rupee.

Dacca.—Rainfall ·98. Weather excessively hot. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Chittagong.—Rainfall 2·31. Weather hot. Agricultural operations in progress. Water and fodder sufficient. No cattle-disease. Rice sells at 12 seers per rupee.

Patna.—Rainfall at Sadar 1·41. Paddy and *makai* sowings and *marua* transplantation in progress. Sugarcane doing well. Fodder and water sufficient. Prices slightly rising in Barh. Common rice selling at 17 seers per rupee.

Gaya.—Paddy and maize are being sown, and *marua* being transplanted. Price of common rice at Sadar 14 seers per rupee.

Champaran.—Rainfall at Sadar 1·57. Sowings progressing. Rice being transplanted in places. Price of common rice at Sadar 17 seers, against normal 14 seers per rupee. Fodder and water ample.

Darbhanga.—Rainfall at Sadar 4·39, Madhubani 8·51, Samastipur 1·12. *Bhadoi* cultivation being vigorously pushed on. Sowing of paddy in progress. Sugarcane promising. Common rice selling at 16¼ seers per rupee.

Bhagalpur.—There has been rain all over the district. Prospects of crops fair. More rain wanted, especially in Supaul. Fodder and water sufficient. Cattle-disease is reported to be abating in Banka, while it is prevailing in Supaul and Madhipura.

Purnea.—Rainfall 2·94. Recent rain benefited the standing crops. More rain wanted for winter rice. No cattle-disease. Common rice 15 to 17 seers per rupee.

Cuttack.—Rainfall 5·22. Weather seasonable. Agricultural prospects generally favourable. In Jajpur the *beali* (early rice) has suffered somewhat from floods. No cattle-disease. Fodder sufficient. Common rice sells at—

		Srs.	c.	
Cuttack	... ...	18	14	per rupee.
Jajpur	... ...	22	12	
Kendrapara	... ...	26	4	
Banki	... ...	27	15	

Hazaribagh.—Ploughing and sowing in progress. Prospects of sugarcane good. Rice sells at 11 to 13 seers per rupee.

General Summary.—There has been seasonable rain in all parts of the Province during the week. The general agricultural prospects continue favourable. All standing crops are flourishing, and the cultivation of *bhadoi* crops and winter rice is generally making good progress. In Bhagalpur and Purnea more rain is needed. The supply of fodder and water is generally ample. Cattle are in good condition except in parts of Bhagalpur, where cattle-disease is said to be prevalent. The price of common rice continues high, and in some of the districts of Central and Eastern Ben al it is said to be still rising.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 7th July, 1896.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of June 1896.

	Inches.	Date.	Hour.
The mean pressure of the month	29·529		
The average pressure of June from 24 years' registers ...	29·549		
The highest pressure in the month	29·739	3rd	10
The lowest pressure in the month	28·975	28th	16
The range of pressure	0·764		
	Hours		
The total number of hours of bright sunshine during the month	135·4		
The maximum possible number of hours of sunshine ...	403·4		
	°		
The mean temperature of the month	83·5		
The average temperature of June from 24 years' registers ...	85·0		
The highest temperature in the month	93·9	9th	
The lowest temperature in the month	72·7	1st	
The range of temperature during the month	21·2		
The mean daily range of temperature	12·6		
The greatest range of temperature in one day	18·7	12th	
	Per cent.		
The mean humidity of the month	85		
The average humidity of June from 24 years' registers ...	81		
	Inches.		
The mean vapour tension of the month	0·973		
The average vapour tension of June from 9 years' registers ...	0·998		
The mean cloud proportion of the month ...	6·80		
The average cloud proportion of June from 19 years' registers	7·00		
	Inches.		
The total rainfall of the month	16·42		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	14·94		
The average fall of June from 48 years' registers ...	12·08		
The greatest fall in 24 hours	2·82	26th	
	Days.		
The number of rainy days in the month	20		
The average number of rainy days in June from 24 years' registers	19		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	144·6		
The mean difference of sun and air temperatures	54·9		
The greatest sun temperature	157·3	8th	
The greatest excess of sun over air temperature	63·9	8th and 14th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	75·5		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·1		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·7	18th	
	Miles.		
The mean movement of the wind per day	133·2		
The greatest movement of the wind in one day	422·0	28th	
The greatest movement of the wind in one hour	26·0	28th 2 to 3, A.M., 8 to 9 A.M. and 9 to 10 A.M.	

The number of hours with winds from each of the 8 points—
N. 63, N.E. 42, E. 49, S.E. 74, S. 254, S.W. 165, W. 22, N.W. 27, Calm 24.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·5° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

G. W. KÜCHLER,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 6th July 1896.

Abstract of the Results of the Barometric and Thermometric Observations taken at 10 a.m. at the Meteorological Office, Chowringhee, in the month of June 1896.

	Inches.	Date.
The mean pressure at 10 A.M. during the month	29·568	
	⊖	
The mean temperature at 10 A.M. during the month	86·5	
The highest temperature during the month	96·2	5th.
The lowest temperature during the month	73·3	1st & 3rd.
The absolute range of temperature during the month	22·9	
The mean daily range of temperature during the month ...	14·0	
The greatest range of temperature in one day during the month ...	19·7	11th.
	%	
The mean 10 A.M. humidity during the month	80	
	Inch.	
The mean 10 A.M. vapour tension during the month	1·006	
	Inches.	
The total rainfall of the month	15·21	
The greatest fall in 24 hours	2·34	28th.
	Days.	
The number of rainy days in the month	17	

G. W. KÜCHLER,
For Meteorological Reporter to the Govt. of India.

The average fall of the corresponding period for 24 years, Surveyor-General's Office		3·48
The total fall from 1st January to 4th July 1896		23·22
The average fall of the corresponding period for 24 years, Surveyor-General's Office		23·64

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the ermometers are verified and the readings have been corrected to a standard constructed and verified at the w Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet ove the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, merly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning; squally, ≏ dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 6th July 1896.

G. W. KÜCHLER,
For Meteorological Reporter to the Govt. of India.

APA CHANDRA GHOSHA,

The 5th May 1896. *Registrar of Companies.*

IRRIGATION OPERATIONS OF CANALS IN BENGAL DURING THE RABI SEASON OF 1895-96.

No. 729*I*.

GOVERNMENT OF BENGAL—IRRIGATION DEPARTMENT.

Dated Calcutta, the 13th July 1896.

RESOLUTION.

READ—

Statements Nos. I, II and III showing Irrigation Operations of Canals in Bengal during the rabi season of 1895-96.

OBSERVATIONS.—The area irrigated in the rabi season of 1895-96 was 123,797 acres against 63,070 acres in 1894-95 showing an increase of 60,727 acres or 196·28 per cent.

2. This large increase, which occurred chiefly in the area commanded by the Sone Canals, is readily accounted for by the cessation of the rains in the month of November 1895 in all the Canal districts of Bengal, except Cuttack and Balasore, and the very scanty rainfall in the remaining months of the rabi season.

3. It is noted that in the Balasore and Midnapore districts there was practically no demand for canal water during the season.

4. It is, however, satisfactory to observe that irrigation in the Burdwan and Hooghly districts from the Eden Canal developed considerably during the year; the area having risen from 20 acres in 1894-95 to 1,885 acres in 1895-96. This increase was chiefly in potato and onion crops for which there was no irrigation in 1894-95.

5. The principal crops irrigated from the Sone Canals in the rabi season were sugarcane, wheat, barley and other cereals, gram and various pulses, turmeric, opium, mustard and various other crops included in the class Miscellaneous. Very large increases are apparent in almost all classes of crops. In sugarcane the area irrigated rose from 17,725 acres in 1894-95 to 23,497 acres in 1895-96; in cereals it increased from 16,753 acres to 64,646 acres, and in pulses, mustard and the crops included in the class Miscellaneous it was 15,526, 377 and 8,897 acres in 1895-96 against 3,747, 37 and 1,352 acres respectively in 1894-95.

6. There was no irrigation from the Saran Canals during the year, as they were practically closed on the 31st March 1894.

7. The details of the increase or decrease in the irrigation of the rabi crops from each canal during the year 1895-96 compared with those of the ...ar are given in the following statement:—

Canals.		Areas irrigated in rabi season.		More.	Less.	Remarks.

CALCUTTA,
The 8th July 1896.

A. S. THOMSON,
Under-Secy. to the Govt. of Bengal.

WORKING OF THE ANTHROPOMETRIC SYSTEM FOR THE IDENTIFICATION OF OLD OFFENDERS IN THE LOWER PROVINCES.

No. 10500T., dated Darjeeling, the 24th June 1896.

From—E. R. HENRY, Esq., I.C.S., Inspector-General of Police, L.P.,
To—The Chief Secretary to the Government of Bengal.

IN continuation of the previous reports specified in the margin of this letter, I submit information regarding the progress made during 1895 in this Province in working the Anthropometric system for the identification of old offenders.

Letter No. 25229 of 22nd December 1891, from Inspector-General of Police, L.P., to Chief Secretary, Government of Bengal.
Letter No. 1732 of 25th February 1893, from Inspector-General of Police, L.P., to Chief Secretary, Government of Bengal.
Letter No. 6353 of 1st May 1894, from Inspector-General of Police, L.P., to Chief Secretary, Government of Bengal.
Letter No. 10552A. of 26th June 1895, from Inspector-General of Police, L.P., to Chief Secretary, Government of Bengal.

2. Full details have already been given regarding (1) the persons selected for measurements; (2) the particular measurements adopted; (3) improvements in the measuring instruments; (4) the system of search, including the margin allowed for error due to the "personal equation" of measurers; (5) the arrangements made in all districts for the early registration of unidentified suspects; (6) the means placed at the disposal of the local police for verifying antecedents without reference to the Central Office; and lastly, figures of the criminal record up to the end of 1894, and of the cases worked out through Anthropometry. In this report, therefore, it is only necessary for me to bring the statistical information up to date, and to offer some remarks on the practicability of gradually substituting for Anthropometry a system based upon classified finger-prints not supplemented by measurements.

3. A register is kept at each subdivision (the unit in this Province of police administration) of persons not identified at the time of their arrest. During 1895 1,761 persons were registered as unidentified. Of these, the district police subsequently, by enquiry and by referring to their indexes, succeeded in recognizing 1,120 and ascertaining their antecedents; the number remaining unidentified being 641. These figures exclude statistics for the area under the Commissioner of Police, Calcutta, which will be separately referred to. Of the 641 persons whom the local police failed to recognize, the Central Office succeeded in identifying 162, equivalent to 25·7 per cent., the figures for the preceding year being 536 unidentified, 112 recognized by Central Office, equivalent to a percentage of 21.

The figures for 1895 include 10 females and 31 juveniles who, under our rules, are not liable to measurement, and 90 non-British subjects belonging to Native States, where Anthropometry has not yet been introduced, and who, consequently, cannot have been registered on anthropometric data. If these 131 persons are excluded from the total of unidentified as representing cases not recognizable by Anthropometry, the figure of success rises to 31·6, against 27 in the preceding year.

In addition to the 162 cases from Bengal districts, 44 persons were traced for the Calcutta Police and 1 for Assam, bringing the total of successful cases up to 207, against 143 in the preceding year.

4. In 54 of these the name and residence given by the suspect proved to be correct. But as criminals, in order to defeat enquiries, sometimes give the correct name and address of persons other than themselves, this information, until verified, was of no value. Unless witnesses had been called, it would not, without the assistance of Anthropometry, have been possible to ascertain whether the name given was the real name of the suspect or of some other person. This information might, of course, have been verified by calling witnesses, but this would have entailed delay, and the Courts are averse to granting remands unless there are grounds for believing that the police have a good clue. In all cases unidentified suspects give names and residences which three times out of four prove to be wrong, and much labour, expense and delay is avoided by calling in the aid of Anthropometry, and up to the present time it has in no instance caused the wrong person to be identified. The

Central Office is in a position to state with absolute certainty that the measurements and thumb-impressions sent for examination belong to a person who, under the name they specify, was convicted in a certain place on a certain date. All, then, that is necessary is to get this information verified to the satisfaction of the Courts in the manner prescribed by law, viz., by obtaining an extract from the records of the Court where the conviction was had, or by producing a certificate from the officer in charge of the jail where the punishment was inflicted, together with evidence as to the identity of the accused with the person so convicted.

5. A specially interesting instance of the effectiveness of the system occurred during the year. Two cases of professional robbery by poisoning were reported within a couple of days of each other in the Darbhanga district. The detective entrusted with the enquiry had no difficulty in ascertaining that the culprit was one Runjit Dusadh *alias* Kokil Dusadh, registered poisoner and ex-convict, a resident of the adjoining district, Muzaffarpur. He was not to be found, having absconded, and there was in consequence no further clue. Weeks afterwards some travellers were taken out of the train at Dacca, apparently so helplessly drunk that it was deemed necessary to send them to the hospital. There the drunkenness was ascertained to be *dhatura* poisoning. The district police, who took up the enquiry, could get little assistance from the victims, who continued for some time in a condition of incoherency; but, on chance, they arrested a stranger to the place, who had been seen in company with the drugged men. He stoutly protested his innocence and disclaimed any acquaintance with them, giving his name as Ram Saran Singh, and an address up country. Being at fault, the local police measured him and took his thumb-impression, which they forwarded to the Central Office, where he was at once recognized as the missing Runjit *alias* Kokil Dusadh, wanted in the Darbhanga cases—a man who, under various *aliases*, had been convicted in several districts, having passed 12½ years in jail. Upon being confronted with accurate details of his past life he admitted his identity and his guilt in the Dacca cases, and was sentenced at the Sessions there to eight years' imprisonment, and has now been forwarded for trial in the Darbhanga cases. Had it not been for the clue given by Anthropometry, this dangerous criminal might have escaped, for without his admission of guilt he might not have been convicted, owing to the difficulty of proving the administration of the poison. Dacca is some five hundred miles or more from Muzaffarpur, and the identity of Ram Saran Singh with the missing Runjit *alias* Kokil Dusadh would not even have been suspected.

6. Considering the comparatively short time the system has been working in Bengal, the results obtained must be considered satisfactory, as about 1 in 3 of possible cases are being recognized, while it is not improbable that amongst those remaining unidentified are persons not previously convicted, and whose measurements consequently could not have been taken for record

7. But although the success achieved is as great as could have been expected, experience has brought into relief some inherent defects of the system which detract from its value. Notwithstanding the improvements effected in the instruments, both of which are automatic in their working, one being self-registering, the error due to the "personal equation" of measurers cannot be eliminated or even reduced to a negligable quantity. The measurer may take incorrect measurements through inattention to rules; or, having obtained accurate results, may read them incorrectly; or, having read them correctly, they may be incorrectly transcribed; or the measurements of *A* may be transcribed as *B's* measurements. Every check that experience can dictate has been adopted, and that these checks are fairly effective our results demonstrate. Still, the margin for error is considerable, and if the sustained attention now given to this subject be relaxed at any time, results will certainly fall off.

8. It has been claimed for the Anthropometric system that the probability of all six measurements of any two persons coinciding is so small that a fraction with a denominator of five figures is required to represent it arithmetically. The assertion would be correct if no allowance had to be made for the "personal equation" error. But, in practice, such allowance, and a considerable

allowance, has to be made, the result being that coincidences in measurements are not unfrequent. In the Central Office no positive deduction as to identity from measurements is considered safe or is made, reliance being placed exclusively in determining identity upon similarity in the innumerable details which make up the pattern of the thumb-impression.

9. A system of identification by means of finger impressions would have the following amongst other advantages over Anthropometry. The assessories, a piece of tin and some printers' ink, are inexpensive and procurable everywhere; the impressions are self-signatures, free from possible errors of observation and transcription; any person of ordinary intelligence can learn to take them with a little practice after a few minutes' instruction; no objection can be raised on the score of religion or caste, or rank in society or even sex; their characteristics being persistent throughout life, the finger impressions of a child could be used to identify the same person when he had reached middle or old age; the patterns which appear on these impressions are easily recognizable, and are susceptible of such succinct and exact definition (under the system explained in the Police Circular, copies of which accompany this report), that the most complicated pattern can be described in four or five words with sufficient completeness for purposes of comparison; and lastly, the evidential value of identity obtainable from the scrutiny of the prints of two or three fingers is so great that no person capable of weighing it would deem it necessary to seek for confirmation elsewhere.

10. The problem which remains to be solved is whether it is possible to devise a system of classification based solely upon finger impressions, which will give sufficient power of differentiation to enable duplicates to be unerringly traced in a collection of the finger impressions, say, of 20,000 persons. This problem is now being worked at, and so far, results are not unpromising, serious difficulty being experienced in respect of only two combinations. With extended experience these difficulties may be overcome; but as, up to the present, the impressions of only about 5,000 persons have been classified, it would be premature to express an opinion as to whether a solution is probable.

11. Being impressed with the advantages which a system of identification by finger impressions would possess over Anthropometry, I have endeavoured to popularise amongst police officers a knowledge of the subject by issuing a circular which explains by means of diagrams the details of patterns, their classification, and the points to be kept in view when attempting to decipher them. I forward some copies of this circular for the information of Government, as it may prove of use in the Registration and other Departments. A number of police officers have acquired a good working knowledge of the details of finger-print decipherment, and their number is being added to, as it is one of the subjects of the Training School curriculum.

WEATHER AND CROP REPORT.

For the week ending the 13th July, 1896.

Burdwan.—Rainfall at Sadar ·27. Weather hot and cloudy. Prospects of crops good, but more rain wanted. Fodder and water sufficient. Condition of cattle good. Common rice selling as follows:—

	Srs.	
Sadar	11 to 16	per rupee.
Kalna	12 to 13 1/8	
Katwa	13 1/8	
Raniganj	14 1/2	

Midnapore.—Rainfall at Sadar 1·93, Tamluk 2·49, Ghatal 5·00. Weather seasonable. Transplantation of *aman* going on. Prospects of indigo, sugarcane, and *aus* good. Water and fodder sufficient. Cattle-disease reported from Garhbeta police-station. Common rice selling as follows:—

	Srs.	
Sadar	16	per rupee.
Tamluk	13	
Ghatal	13 to 14	

24-Parganas.—Rainfall at Sadar ·98. Weather hot and showery. Prospects of jute and *aus* favourable. Transplantation of *aman* has commenced Fodder and water sufficient. Condition of cattle good. Common rice selling as follows:—

	Srs.	
Sadar	10 to 13	per rupee.
Barasat	11	
Basirhat	12 3/4	
Diamond Harbour	11 1/16	

Murshidabad.—Rainfall at Sadar 2·62, Jangipur 5·36, Kandi 2·82. Weather hot and at times cloudy. Transplantation of *aman* continues. Standing crops doing well. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar 3·15, Bagerhat 3·14, Satkhira 1·95. Weather hot and cloudy. Transplantation of *aman* has commenced. Prospects of standing crops good. No cattle-disease. Fodder and water sufficient. Prices of common rice:—

	Srs.	c.	
Sadar	11 to 12	0	per rupee.
Bagerhat	11	15	
Satkhira	11	0	

Dinajpur.—Average rainfall 6·24. Prospects of jute and *aus* good. More rain is wanted for the cultivation of *aman*. No cattle-disease. Fodder and water sufficient. Common rice sells from 11 to 14 seers per rupee.

Rangpur.—Average rainfall 6·87. *Aus* and jute being harvested. Transplantation of *aman* going on. Prospects fair. Fodder and water sufficient. Common rice selling from 10 to 15 seers per rupee.

Pabna.—Rainfall 1·61. Weather seasonable and prospects favourable. *Aus* paddy is being reaped. Fodder available.

Dacca.—Rainfall 1·68. Weather excessively hot. Harvesting of *aus* paddy and jute going on. Prospects appear good. Fodder available. No cattle-disease. Common rice 11 seers per rupee.

Chittagong.—Rainfall 8·34. Weather hot. Harvesting of *aus* crop has begun in some places. Cultivation of *aman* in progress. Prospects fair. Water and fodder sufficient. Commonest rice selling at 12 seers per rupee.

Patna.—Rainfall at Sadar 6·50. Sowing of *bhadoi* and paddy in progress. Prospects favourable. Fodder and water sufficient. Common rice selling at 17 seers per rupee.

Gaya.—Transplantation of *marua* and sowing of maize and paddy continue. Price of common rice at Sadar 14 seers, against average of 13 1/4 seers per rupee.

Champaran.—Rainfall at Sadar 5·26. Sowing and in places transplanting of rice continue. Fodder and water ample. Price of common rice at Sadar 17 seers, against normal 14 seers per rupee.

Darbhanga.—Rainfall at Sadar 4·77, Samastipur 9·23, Madhubani 2·66. Prospects of standing crops good. Transplanting of *marua* being pushed on. Fodder for cattle sufficient. Prices stationary.

Bhagalpur.—Rain all over the district, more especially at Banka. Weather hot. Paddy, indigo, sugarcane, and Indian-corn are doing well. Transplantation is in progress. Cattle-disease still prevalent in the interior. Fodder and water sufficient. Common rice selling at Sadar 15 seers 2 chitaks per rupee.

Purnea.—Rainfall 3·15. Transplantation of *aghani* rice in progress. Prospects of *bhadoi* and jute favourable. No cattle-disease. Common rice 14 to 18 seers per rupee.

Cuttack.—Rainfall ·96. Weather seasonable. More rain wanted for transplantation. Agricultural prospects generally good. Rice damaged to some extent by flood in Jajpur and Kendrapara. No cattle-disease. Fodder sufficient. Common rice sells at—

		Srs.	c.	
Cuttack	... ...	18	6	per rupee.
Jajpur	... ...	25	0	
Kendrapara	... ...	25	0	
Banki	... ...	27	14	

Hazaribagh.—Rice and *bhadoi* crops sown. *Marua* being transplanted. *Makai* fields are being dug. Rice sells at 11 to 13 seers per rupee.

General Summary.—Weather has been of ordinary monsoon character, with rain in all parts of the Province during the week. Agricultural prospects continue generally favourable, but more rain is wanted in some districts; in parts of Cuttack damage is said to have been caused to crops by flood. Transplanting of winter rice is going on, and *bhadoi* crops in Bihar are being sown. Early rice, jute, indigo, and sugarcane are promising. In North and East Bengal the harvesting of early rice and jute has begun. The supply of fodder and water is generally sufficient. Cattle-disease is still prevalent in parts of Bhagalpur, and is reported from one thana in Midnapore. The price of common rice continues high, but is generally stationary.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT, M. FINUCANE,

The 14th July, 1896. *Offg. Secy. to the Govt. of Bengal.*

The total fall of rain from 5th to 11th July 1896		0·88
The average fall of the corresponding period for 24 years, Surveyor-General's Office		2·13
The total fall from 1st January to 11th July 1896		24·10
The average fall of the corresponding period for 24 years, Surveyor-General's Office		25·77

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The month of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; t, thunder; p, passing temporary showers; ≏ dew.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JUNE 1896.

As the approach of the monsoon current takes place about the middle of June, weather during the early half of the month is usually very different from what obtains later, and the two periods require separate discussion. A comparison of the mean values of pressure temperature and rainfall for the whole of the past month shows a very close resemblance to the corresponding quantities for June of last year. In both years pressure was above the normal in the north as compared with the south of the province. This gave rise to winds more easterly than they should be, and led to the moist current from the Bay being deflected westwards across the north of the Bay towards the Orissa Coast. The distribution of the rainfall was consequently more unequal than it would be in an average year. Orissa and the south-western districts of Bengal and Chota Nagpur received from 30 to 60 per cent. more than their normal amounts, and the northern districts less, especially North Bengal, where less than half the normal for the month was received. In June 1895 the difference was very marked, there being in Orissa excess of 10 inches and in North Bengal defect of 10 inches. During the present year it was not so great, Orissa receiving about 6 inches excess and the defect in North Bengal being under 9 inches.

During the first-half of the month the moist current gives much more rain to East and North Bengal than to other parts of the province, and it is only after the monsoon commences with a cyclonic storm that heavy rain falls in the south-west. In the present year pressure was almost uniformly high in Bengal for the two first weeks, and this arrangement prevented the northerly movement of the moist air over East and North Bengal. As it was deflected towards the west, rainfall was more frequent in Lower Bengal and Orissa, being caused by thunderstorms. These thunderstorms occurred simultaneously with slight variations in the wind system, variations that were too local to affect the general movement of the air towards the west. As the air was more heavily charged with moisture than usual, precipitation was readily produced, and local showers were of almost daily occurrence in Lower Bengal.

As the sky was more cloudy in the south of the province, and comparatively clear in the northern districts, while the cooling effect of thunderstorms was of frequent occurrence in Lower Bengal, temperature was unusually low in the first-half of the month at stations in the south and more especially in the central districts.

Soon after the middle of the month the first storm of the season advanced from the south of the Bay almost due north till the centre was near Calcutta. After remaining stationary there for several hours it moved away to the west, and the heavy rain which it caused was confined to the south of the province.

After an interval of only a few days a second depression began to develop in the north-east of the Bay. It attained much greater depth than is usual during the monsoon season even before it began to show signs of changing its position. It then moved to the west-north-west passing over South-West Bengal and Chota Nagpur.

After these depressions moved out of the province and the pressure distribution had become normal rainfall became more general in the northern districts, but it will be seen from what has been written above that conditions were unfavourable for heavy rain in the north for the first-half of the month, and that the westerly movement of the disturbances during the latter half left little chance of the deficiency being made up.

At the beginning of June pressure was in excess over the whole of the province and the Bay, but excess was greatest in North Bengal, Bihar and Assam. Winds were almost due east at all the inland stations and temperature was from 1° to 10° below the normal, the greatest defect being at Bogra, Rampur Boalia and Serajganj. As stated above, this arrangement was favourable for rain in the south of the province, and it remained almost unchanged till the 7th, except that temperature gradually rose and became very nearly normal. On the 6th pressure began to fall slowly and continued to fall, but with increasing rapidity, till the 9th, when the distribution was nearly normal. There was still, however, excess in the west and centre of the Bay. Westerly winds became general over the south-west and centre of the province, and rainfall became more frequent and at times heavy in East and North Bengal. Conditions were practically normal over the whole province from the 8th to the 10th.

On the latter date pressure again began to rise over Bengal and a brisk fall set in over the south-west of the Bay, the double change having a marked effect on the distribution. The winds again became easterly, and as the pressure continued to rise in the north till there was again a large excess, conditions similar to those of the early part of the month became established for several days.

During the days from the 10th to the 14th important changes were occurring in the extreme south of the Bay. Pressure was steadily falling and a considerable defect had accumulated at Colombo. The variation from the normal on the 14th ranged from excess of ·15 inch at Faridpur to defect of ·113 inch at Colombo, so that the gradient on that date was a quarter of an inch less steep than it should have been.

A decided change set in on the 15th. Pressure fell rapidly in the north-east of the Bay and in Bengal, and the gradient became much steeper in the south of the Bay, showing that the depression was moving northwards. Heavy rain began at Tavoy and Moulmein, and considerable amounts fell as far north as Akyab. On the 16th the depression was to the east of the centre of the Bay and had most effect on Diamond Island and Bassein, where there was a rapid fall of pressure. The gradient steadily became steeper, and the centre of

the depression was daily more to the north. On the 18th it was close to the Bengal coast and on the morning of the 19th the centre was at no great distance from Calcutta.

While the centre was still over the sea, there was nothing to show that the depression had attained to any great depth except the steady steepening of the gradient to the south. The wind velocity was not very high at Diamond Island, the highest average for twenty-four hours being 21 miles an hour. It is probable therefore that it deepened quickly while close to the Bengal coast, as pressure fell a quarter of an inch on the 19th at Calcutta and a fifth at Saugor Island to the east of which the centre passed inland. Though the gradient was then steep over the whole of the province and the Bay, unusually calm weather prevailed in Lower Bengal. Winds, however, strengthened considerably at a distance from the centre both to the south and the north. In the north-west angle wind velocity rose to 42 miles an hour.

After remaining almost stationary for some hours with the centre near Calcutta, the depression moved rapidly towards the west, was near Chaibassa on the morning of the 20th, and had left the province on the 21st, when pressure was recovering rapidly in all districts.

On the 22nd the pressure distribution was normal, and on the 23rd readings were relatively higher in the west than in the east of the province. Consequently westerly winds set in and penetrated to the extreme east, causing an almost entire cessation of rainfall. But the fall of pressure in the east extended southwards to the Bay, and almost immediately another depression began to form. On the 25th the indications were not very decided—only an irregular cyclonic circulation of the winds and a rather large defect in pressure over the north-east of the Bay. On the 26th and 27th the depression deepened rapidly without changing its position to any great extent, but its movement was evidently towards the north-west. It crossed the coast of the Sunderbuns on the night of the 27th, and at 8 A.M. of the 28th the centre was near Calcutta, where there was defect of more than half an inch.

The depression was much deeper than is usual at the end of June, the lowest reading observed being under 29 inches.

During the three days while the centre was practically stationary in the north-east of the Bay, weather became very stormy, and after the centre moved inland strong winds were felt as far west as Saugor Island, but on the Orissa coast the wind never was more than moderately strong.

On the 29th the area of lowest pressure was over the north of Chota Nagpur and the west of Bihar. Pressure had risen very rapidly over Lower Bengal, and the distribution was normal except in the extreme west, where there was defect of a fifth of an inch. On the 30th all trace of it had disappeared.

Stormy weather with general rain prevailed over the province on the 28th and 29th, but on the 30th rainfall had to a large extent ceased, and ordinary monsoon weather obtained over the Bay.

Pressure.—As stated above, pressure was steadily above the normal during the early part of the month, excess at times being nearly a fifth of an inch. During the latter half the influence of the two depressions was the chief feature, and readings at times were very low. The greatest defect for the first depression was ·35 inch and for the second ·53 inch. Mean pressure for the whole month differs by only small amounts in North Bengal and Bihar. In the south of the province the difference was somewhat greater, but generally under ·03 inch.

Temperature.—The month began with very cool weather over the whole province, more especially in the central districts. The defect gradually disappeared, but was again restored for a time before the middle of the month. In the latter part temperature was low in the southern districts during the periods of unsettled weather caused by the depressions. Owing to the rather frequent occurrence of low daily temperature the mean temperature for the month is below the normal by 2° in Orissa, 1°·7 in Chota Nagpur and 1°·6 in South-West Bengal. In North and East Bengal and Bihar the difference is small, and in Assam there is a mean excess of 1°·6.

The mean difference from the normal in day temperature varies from excess of 3° at Jalpaiguri to defect of 4° at Cuttack. In night temperature it varies from excess of 2° at Rangpur and Dhubri to defect of 2° in Orissa.

Rainfall.—The rainfall, as in June of last year, has been, compared with the normal, much more copious in the south of the province than in the north. The average fall in Orissa was 14·91 inches, with excess of 5·71 inches; in East Bengal 16·69 inches, practically the normal amount; in North Bengal 17·28 inches, with defect of 8·76 inches. In Chota Nagpur and South-West Bengal there was defect of about 3 inches, and in Bihar defect of 1·25 inches. Over a great part of the centre of the province very nearly the normal amount has been received. The line dividing the area of deficient amounts from that where they are in excess runs almost from west to east, following the line of the Ganges, except in East Bengal, where it tends more to the east instead of to the south. Over the area to the south of this line excess amounts increase slowly towards the south, but are never more than 5 inches except in Orissa and part of South-West Bengal. In Orissa excess is almost always over 5 inches, and in places near the coast it is as much as 10 inches. At the mouth of the Dhamra over a small area it is more than 15 inches. Northwards defect increases to 5 inches in the north of Bihar, and in North Bengal it increases very rapidly, being more than 6 inches over a great part of the division, and from 15 to 25 inches in the Darjeeling, Jalpaiguri and Cooch Bihar districts, with the exception of the station of Darjeeling, where there is excess of 10 inches.

The heavy rainfall in the southern districts, being caused chiefly by the cyclonic storms in the latter half of the month, is in the area over which the centres of the disturbances

passed. In a tract of country extending westward from the Balasore and Midnapore districts, the falls are between 15 and 20 inches. In Orissa they are between 10 and 15 inches, except in the Kendrapara, Jajpur and Cuttack districts, where they are from 15 to 20 inches. Over a great part of Lower Bengal the falls vary from 10 to 15, but in places as in the neighbourhood of Calcutta they are more than 15 inches. In the north of the province falls are generally under 10 and in parts of Bihar under 5 inches. In North Bengal the only fall of more than 20 inches is at Darjeeling, where it is 32·7 inches.

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	Actual rainfall of first six months of 1896 expressed as a percentage of the normal fall for the period.

(a) Decrease as compared with last year is due to an adjustment of 136,948 maunds on account of ballast trains having been included in the corresponding period of last year.
(b) Increase as compared with last year is due to adjustment of Rs. 14,000 transferred from Goods to Sundries in last half-year.
(c) Decrease is due to above (b).
(d) Increase is due to two days' earnings more included in this period than in the corresponding period of last year.
(e) Includes 550 ballast train miles run on open section during this period.
(f) Includes audited figures up to week ending 9th May 1896.
(g) 6,053 ballast train miles for unopened sections of line under construction previously included now excluded.
(h) Includes 1,654 ballast train miles run on open section during the period.

Working of the Fire Brigade in the Town and Suburbs of Calcutta and in the Municipality of Howrah during the year 1895-96	1280
Weather and Crop Report for the week ending the 20th July 1896	1283
PRICES-CURRENT (retail) of Food-grains, Fire-wood and Salt in the Head-quarters Station Bazars of the Districts of Bengal on the 18th July 1896	1288
Results of the Meteorological Observations taken at the Alipore Observatory from 12th to 18th July 1896	1294
Results of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Chowringhee from 12th to 18th July 1896	1296
Abstract statement showing Tolls on Canals in Bengal classed as Major and Minor works for the month of May 1896	1296
Circular and Eastern Canals for the week ending Saturday, the 18th July 1896	1297
Weekly return of Traffic Receipts on Indian Railways ...	1298

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met at the Council Chamber on Saturday, the 11th July, 1896.

Present:

The Hon'ble W. H. GRIMLEY, *presiding*.
The Hon'ble J. PRATT.
The Hon'ble C. E. BUCKLAND, C.I.E.
The Hon'ble H. H. RISLEY, C.I.E.
The Hon'ble M. FINUCANE.
The Hon'ble J. G. H. GLASS, C.I.E.
The Hon'ble RAI DURGA GATI BANERJEA BAHADUR, C.I.E.
The Hon'ble NAWAB SYUD [illegible] HOSSEIN, C.I.E.
The Hon'ble SURENDRANATH [illegible].
The Hon'ble MAULVI MUHAMMAD [illegible] KHAN BAHADUR.
The Hon'ble A. M. BOSE.
The Hon'ble RAI ESHAN CHANDRA MITTRA BAHADUR.
The Hon'ble GURU PROSHAD SEN.
The Hon'ble W. B. GLADSTONE.
The Hon'ble M. S. DAS.

NEW MEMBERS.

The Hon'ble MR. J. PRATT and the Hon'ble MR. J. G. H. GLASS took their seats in Council.

STATEMENT OF BUSINESS.

The Hon'ble THE PRESIDENT said:—"Gentlemen, the list of business that demands the exercise of your legislative faculties to-day is certainly not large, and, whether judged by its length or the importance of the subjects, it seems *à priori* hardly sufficient to justify the summons which has drawn you away from your ordinary pursuits to this Council Chamber. It consists, as you will perceive, of mere formalities; but though the motions to be brought forward are of a purely formal nature, they are absolutely necessary by the rules which guide our proceedings, in order to smooth the way for the enactment, later on, of those measures to which they refer. It is a fortunate circumstance that the work before us is of this light description, seeing that His Honour the Lieutenant-Governor, who presides over our debates, is unable to be present on this occasion, and that we are also deprived of the assistance of several other members of this Council, including the Hon'ble the Advocate-General, who watches over our proceedings and keeps them from wandering off the legal track. It is perhaps well, then, that all disputatious points, all contentious questions, and all that is comprehended under the term 'the weightier matters of the law,' should be reserved for the forensic skill of the learned Advocate-General, while we ourselves should accept with a thankful heart the small measure of anise and cummin that forms our frugal portion to-day. It is a different story when we come to the formidable array of questions prepared for us. They are of wide range, varying interest, and of greater or less importance, and I rejoice that it does not devolve on me to frame replies, though the first question relating to river sanitation is one that would naturally interest me as a former magistrate of the riparian districts concerned, and I have a presentiment that it is a sort of question that may at any time come home to me as Chairman of the Sanitary Board. At any rate it is a question of extreme difficulty, and involves important issues. The rest of the paper consists of no less than seventeen problems, with many riders attached, and were I to attempt to solve them I should most assuredly be plucked; but I have no doubt that my hon'ble friends Mr. Risley and Mr. Finucane, upon whom all difficulties sit so lightly, will be able to completely satisfy the examiners."

POLLUTION OF THE RIVER-WATER.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

(*a*) Whether the attention of the Government has been called to the complaints which have appeared in the Newspapers regarding the pollution of the river-water by the discharge of objectionable matter into the river by the Mills on both banks of the river?

(*b*) Is the Government aware that Dr. Simpson, the Health Officer of Calcutta, reported on the 12th June, 1894:—"This is a matter I think that should be taken up by the Bengal Government or the Sanitary Commissioner who should prevent pollution of the river. The drainage of such objectionable matter ought not to be allowed": and that again on the 12th September, 1894, Dr. Simpson reported as follows:—

"I take it that the river is used, because it is a simpler and cheaper mode of disposal of the waste matter of the Mills than the construction of proper drains and the purification of lands in their own districts; and if one or two Mills are to be allowed this privilege, it is difficult to know on what grounds other Mills may be disallowed, and there can be no doubt that such a multiplication would be at the expense of the public health of all the inhabitants who may have to take their drinking water from what must ultimately become, notwithstanding the volume of the water, a most potent cause of ill-health."

(*c*) Whether in view of this expression of opinion by the Health Officer of Calcutta, and of a similar expression of opinion by Dr. Mahendralal Sircar on the *Calcutta Journal of Medicine* for March, 1896, and having regard to the fact that the riparian municipalities on both sides of the river, which largely make use of the river water for drinking purposes, suffered severely from the recent outbreak of cholera, the Government will be pleased to consider the propriety of taking necessary steps to prevent the pollution of the river by the discharge of sewage into it from the Mills.

(*d*) Will the Government be pleased to lay on the table a statement showing the factories lying on both banks of the river, the factories which have been built since September, 1894, the date of the last report of the Health Officer quoted above, the industry carried on in each, the arrangements existing in each factory for the disposal of its refuse, both liquid and solid, and complaints, if any, that have been made in regard to them.

The Hon'ble RAI ESHAN CHANDRA MITTRA BAHADUR asked—

Will the Government be pleased to lay on the table all the papers in connection with the abandonment of the proposal for a special legislation to put an end to the pollution of the water of the river Hooghly by the discharge of noxious matter from certain Mills (*vide* page 18 of the Administration Report of Bengal for the year 1894-95).

(*a*) Will the Government be pleased to state if the opinion of the Sanitary Commissioners or of other competent medical authorities was taken on the subject?

(*b*) If that was not done, will the Government, in view of the general alarm caused by the recurrence of cholera year after year in the riparian municipalities of Calcutta, Howrah, Serampore, Hooghly and Naihaty, &c., and attributed as due, in a great measure, to the aforesaid pollution of the water, appoint a Commission consisting of competent official and non-official medical authorities to enquire and report on the matter?

The Hon'ble MR. RISLEY replied:—

"In reply to the questions asked by the Hon'ble Babu Surendranat Banerjee and the Hon'ble Babu Eshan Chandra Mittra regarding the pollution of the river Hooghly, I have the honour to lay on the table a collection of the correspondence on the subject which is still proceeding, and to say that the question, which is one of considerable difficulty, particularly in view of the provisions of the English law in regard to the pollution of rivers, will be referred to the Sanitary Board for opinion."

INSPECTOR-GENERALSHIP OF REGISTRATION.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to a statement which has appeared in the public press, to the effect that it is under contemplation to abolish the office of Inspector-General of Registration on the retirement of the present incumbent, and to amalgamate it with the office of Director of Land Records, which is held by a covenanted officer, the pay of the latter office being raised, upon the amalgamation taking place, from Rs. 1,800 a month to Rs. 2,250 a month, the pay of a first grade Magistrate-Collector? Is there any foundation for this statement?

The Hon'ble MR. FINUCANE replied:—

"No such step is in contemplation."

FLOGGING OF TWO YOUNG CHIEFS OF ORISSA.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to a statement which has appeared in the public press, to the effect that Mr. Hallward, the Principal of the Cuttack College, caused two young Chiefs of Orissa, the Rajkumars of Narsingpur and Pal Lehara, to be flogged, because on the preceding evening they had neglected to *salaam* him when the Principal was playing golf at the Cuttack maidan? Is there any truth in this allegation? If so, what

orders have been passed by the Government regarding the conduct of the Principal? If the above allegation is true, does the Government consider Mr. Hallward to be a fit person to remain in charge of a College like the Cuttack College? Will the Government be pleased to lay on the table all the papers in connection with this matter.

The Hon'ble MR. A. M. BOSE asked—

Has the attention of the Government been drawn to the statements in the Newspapers about the flogging of two young Chiefs, who were students in the Ravenshaw Collegiate School, under the orders of the Principal for the alleged offence of not having *salaamed* him when they were out riding the previous afternoon? Is it the fact that no enquiry of any description was held previous to the flogging being inflicted, and that it was of a severe character and not administered in the way of school discipline? Is there any truth in the statement that, with the sanction of the Commissioner of the Division, almost all the minor Chiefs of the Tributary State, including the two Chiefs referred to above, have been withdrawn from the school in consequence of this proceeding on the part of the Principal? Will the Government be pleased to communicate the result of any enquiry which it may have held into the matter, or to order one if none has been held? Does it approve of the conduct of the Principal, and if not, what notice does the Government propose to take of it?

The Hon'ble MR. FINUCANE replied:—

"The Lieutenant-Governor has already dealt adequately with the case as a matter of departmental discipline, and declines to lay the papers on the table."

SUBJECTS FOR GOVERNMENT AND UNIVERSITY EXAMINATIONS.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Will the Government be pleased to lay on the table a list of subjects prescribed for the various examinations from the Lower Primary to the B. A. Examination with the books prescribed for each in 1895-96, together with the prices of these books, the number of pages which each book contains, and the number of pages which the students are required to read. Having regard to the multiplicity of books and subjects, does not the Government consider that quality is being sacrificed to quantity with serious injury to the best interests of the rising generation? If so, will the Government be pleased to take such steps as to the Government may seem fit with a view to reduce the number of subjects and books, and fix them for a definite period at least, as the frequent change of books is a serious hardship to poor students in this country.

The Hon'ble MR. FINUCANE replied:—

"The Statement asked for by the Hon'ble Member is laid on the table.

"The courses and standards for the higher examinations named in the question, namely, those from the Entrance to the B. A., are settled by the University, and are in no way under the control of this Government.

"As regards those examinations which are under the Lieutenant-Governor's control, the standards fixed for them have been before the public for many years; and no complaint has reached the Government that they are open to objection either in the extent of the course or in the cost of the necessary books. The number of pupils in all classes of schools, from the lower primary to the middle, goes on steadily increasing. Having regard especially to the reductions that have recently been made in the middle scholarship course, the Lieutenant-Governor, from the information at his command, is not prepared to say that, in the prescribed courses, quality is being sacrificed to quantity with serious injury to the best interests of the rising generation.

"The books are read during a two years' course; and, in so far as they are fixed by the Department, they are changed, either wholly or partially, from year to year, so as to encourage meritorious authors and text-books, and to avoid anything like a monopoly. The frequent change of books involves no hardship to students, unless they happen to fail at a particular examination, and have to take up a new text-book in literature for the following year."

STATEMENT in connection with the Answer to the last preceding Question of the Hon'ble BABU SURENDRANATH BANERJEE.

[*Unless otherwise stated, the whole of the prescribed text-book is to be read.*]

I.—For the Lower Primary Examination the only text-books prescribed are (1) *Nutan Path* (the new Reader substituted for *Bodhoday*), 75 pages, price 3 annas; and (2) one of two alternative books on Sanitation, 40-42 pages, price 1 anna each. The remaining subjects of the course are—

Arithmetic (first four rules).
Subhankari.
Mental Arithmetic, European and Native.
Zamindari accounts and easy mensuration.
Hand-writing, and reading of manuscript.

These are the subjects of the old pathsala course. There are many cheap text-books covering the whole ground; but the teachers are generally enjoined to teach the subjects without putting text-books into the hands of the boys.

II.—For the Upper Primary Examination each Inspector used to select for his own circle the text-books in language, and sometimes in other subjects; with the exception of certain text-books in History and Sanitation, which were fixed by the Government. The subjects and text-books for the Presidency Division in 1895-96 were the following:—

Bengali Language—
Charitastak, 100 pages, 6 annas, *or*
Pratham Niti Pustak, 87 pages, 4 annas, *or*
Suniti Sandarbha, 111 pages, 6 annas, and
Kabitamanjari, 67 pages, 4 annas.

Bengali Grammar—
Pratham Siksha, 32 pages, 1½ annas, or similar books, price 2 to 3 annas.

History of Bengal.—(Permanent) 96 pages, 4 annas.

Geography of Bengal—
Dinanath Sen's book, 65 pages, 6 annas, *or*
Pratham Siksha Bhugol, 32 pages, 1½ annas, *or*
Bhugol Sutra, 56 pages, 2½ annas.

Arithmetic.—Any one of six books named, price from 8 annas to Re. 1-4.
Subhankari.—Any one of six books named, price 4 to 8 annas each.
Geometry.—Euclid, Book I, to 26th proposition, price 6 annas.
Mensuration.—Any one of six books named, price 2 to 6 annas each.
Physics.—Any one of three books, price 3 to 4 annas, *or*
Agriculture.—Any one of three books, price 4 to 6 annas.

Sanitation—
(Permanent.)
The Way to Health, 102 pages, 1 anna.
Swasthya Siksha, 92 pages, 4 annas.

For 1896-97 no text-books are named, except those in the Bengali language, the History of Bengal and Sanitation.

III.—For the Middle Vernacular Examination no text-books are prescribed, except in Vernacular language (by the Department) and in Sanitation (by the Government). In selecting text-books in the Vernacular language, Bengal

Proper is divided into two portions, with different text-books for each. Those prescribed in 1895-96 for the Presidency Circle and the Burdwan Division were—

Charupath, Part III, 170 pages, 10 annas.
Padyaprakash, Part III, 132 pages, 6 annas.

In Sanitation there is one permanent text-book, 147 pages, 6 annas.

The other subjects were—

History, Indian and Foreign.
Geography, General and Physical.
Arithmetic, Native and European.
Euclid, Book I.
Mensuration.
Physics, *or* Botany or Chemistry.

No text-books were prescribed in these subjects; but managers of schools were at liberty to choose their own books from the authorised list of text-books for middle schools.

IV.—The course for the Middle English is the same as that for the Middle Vernacular Examination, with the addition of English as a language. The text-book in English for 1895-96 was—

Lethbridge's Easy Selections, 303 pages (103 read), Re. 1-2.
English Grammar—No text-book prescribed.

For the examinations (Middle English and Middle Vernacular) of 1897 and subsequent years, the course has been considerably reduced by lessening the amount of literature; by the omission of foreign history, of one of the books on sanitation, and of botany and chemistry; and by reductions in other subjects.

PUBLIC ENDOWMENTS IN BENGAL.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Will the Government be pleased to lay the following information on the table in connection with endowments of a public character, religious or otherwise, in these Provinces, after making such enquiries as the Government may think fit:—

(1) Names of the endowments and shrines; (2) their character; (3) the districts in which they are situated; (4) the average income of each from invested property during the last three years; (5) the average income of each from offerings and other sources during the same period; (6) total income; (7) average expenditure during the last three years in the *bonâ fide* service of the shrine or in fulfilment of the objects of the endowment; (8) average personal expenditure during the same period of the trustee; (9) savings up to date to the credit of the trust fund; (10) character, qualifications, and mode of living of his predecessors; (12) original strength of the Committee constituted under section VII of Act XX of 1863; (13) their present strength; (14) number of meetings held by them during the last five years; (15) how often the accounts and receipts of disbursements of the trustee were inspected by them during that period, under section 13 of the Act; (16) how many years accounts of such receipts and disbursements can now be produced by them; (17) whether in the opinion of the District Officer the trustee is making a proper use of the trust funds, and is fit for his place.

The Hon'ble MR. FINUCANE replied:—

"The Government cannot undertake to collect the information or make the enquiries desired by the Hon'ble Member."

CIRCULAR ORDER REGARDING EXCISE CASES IN SARAN.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to a statement which has appeared in the *Behar Herald* of the 27th June last, to the effect that a Circular Order has been issued by the Magistrate of Saran, addressed to all Deputy Magistrates under him, drawing their attention to the leniency with which excise cases are treated by them and urging them to inflict exemplary punishment on the parties concerned? Is there any truth in this statement? If so, whether the Government will be pleased to direct the withdrawal of the Circular as interfering with the Judicial discretion of Magistrates subordinate to the District Magistrate of Saran?

Is it the case that this officer, who has been placed in charge of such an important district as Saran, is only of four years' standing? If so, will the Government be pleased to devise measures to prevent comparatively young officers being placed in responsible charge of important districts?

The Hon'ble MR. RISLEY replied:—

"The reply will be given hereafter when the result of certain enquiries now being made is known."

JURY COMMISSIONERS' REPORT.

The Hon'ble RAI ESHAN CHANDRA MITTRA BAHADUR asked—

With reference to the Report of the Jury Commission, paragraphs 39 and 40, Supplement to the *Calcutta Gazette*, page 686 of the year 1893, will the Government be pleased to state what enquiries, if any, have been made on the representation made to the Jury Commissioners, that sufficient attention is not paid to the convenience and comforts of those summoned as jurors, and which was left to Government for settlement after due enquiry? If nothing has been done in this connection, will the Government be pleased to cause an enquiry to be made, and take steps for providing proper accommodation to jurors.

The Hon'ble MR. RISLEY replied:—

"The question of accommodation for Jurors was not taken up after the Jury Commissioners' report, but the Lieutenant-Governor will now cause enquiry to be made, with the view of deciding on the action which should be taken in the matter."

MAINTENANCE OF ROADS OUT OF PROVINCIAL REVENUES.

The Hon'ble BABU GURU PROSHAD SEN asked—

Will the Government be pleased to state how many miles of roads, metalled and unmetalled, existed in each district, the maintenance of which was a charge on the Provincial Revenues when the Road Cess Act came into operation, and how many miles of these roads, metalled and unmetalled, are now maintained out of the Provincial Revenues?

The Hon'ble MR. RISLEY replied:—

"Owing to the form in which the accounts relating to these roads wer kept by the Public Works Department, the statistics required for the reply t this question are still incomplete."

SUPPLY OF *RUSSADS* FOR ARMY MARCHES.

The Hon'ble BABU GURU PROSHAD SEN asked—

Is the Government aware that the present practice is to issue requisitions for the supply of the aggregate quantity of *russads* on the occasion of army marches to each one of the proprietors in one estate or estates in the line of army marches, calling on them individually to supply the whole quantity, thus if there are 20 proprietors in an estate or estates through which the army marches, and all were to comply with the requisition, the supply would be 20 times over? Will it be pleased to direct that an apportionment of the quantity be made in such cases, in proportion to the shares in the estate or state of those who are required to make the supply.

The Hon'ble MR. FINUCANE replied:—

"Reports have been received from the Officers in charge of Districts through which troops ordinarily march, and it appears that in some of these Districts the practice described by the Hon'ble Member is in force. Although where several zamindars are liable to provide supplies, the whole amount needed is requisitioned from each of them, practically it is not found that much more than the amount needed is supplied, though a margin is allowed to meet emergencies. It must obviously be difficult to proportion each zamindar's contribution to the share he holds in the estate, and all attempts at such apportionment have failed. In certain of the districts most often traversed by troops, the zamindars have co-operated amongst themselves, and the existing system has been found to work satisfactorily. The Lieutenant-Governor is advised that no change in that system is necessary. The zamindars understand that they are jointly and severally liable for the whole quantity of *russad* required, and they arrange for the apportionment of it among themselves. No instance has ever occurred where each and every one of a number of co-sharer zamindars separately supplied the whole quantity required."

ROAD AND PUBLIC WORKS CESSES.

The Hon'ble BABU GURU PROSHAD SEN asked—

Will the Government be pleased to state what amount was expended during the year 1894-95 for collecting the Road cess, and what amount was contributed to the District Road Fund out of the proceeds of the Public Works cess collected jointly with the Road cess by establishment paid from the District Road Fund, under section 10, clause 1, of the Cess Act, IX of 1880 (B.C.)

The Hon'ble MR. A. M. BOSE asked—

Will the Government be pleased to state what are the total charges for collecting the Road cess and the Public Works cess incurred by the District Boards, and how much out of this amount is paid by the Government for the collection of the Public Works cess?

The Hon'ble MR. RISLEY replied:—

"The cost of collecting the Road and Public Work Cess in Board districts in the last year, for which final accounts are available, amounted to Rs. 2,87,186, of which Rs. 2,42,686 were charged to the District Funds and Rs. 44,500 to Provincial Revenues. The latter amount was fixed once for all in 1879 in relation to the collection charges as they then stood, and has remained unaltered in view of the fact that Government pays for all the superior establishment concerned in the supervision and control of the collection of both cesses."

RESERVE FUND FOR PREVENTION OF FAMINE.

The Hon'ble BABU GURU PROSHAD SEN asked—

In introducing the Public Works Cess Bill, the Hon'ble Mr. Reynolds stated:—"It was necessary for the Government of Bengal to do something more than this (payment of interest on Irrigation and Railway works), and to have a surplus and a reserve fund in hand. It had been laid down by the Government of India that it was necessary to introduce a system of Provincial and Local responsibility, for the provision of local relief in the event of a famine." (*Vide* Proceedings of the Council of the Lieutenant-Governor of Bengal, Volume X, Part I, page 28).

Is there any such surplus and reserve fund in hand for the prevention of famine? Is not this reserve fund available for the prevention of scarcity of water?

APPLICATION OF PUBLIC WORKS CESS.

The Hon'ble BABU GURU PROSHAD SEN asked—

Will it please the Government to state how is the Public Works cess applied, under clause 2, section 10, of the Cess Act? Is any separate account now kept of the receipts and expenditure of the Cess?

The Hon'ble MR. RISLEY replied:—

"A reply to the Hon'ble Member's questions will be found in my speech reported at pages 469-472 of the Proceedings of the Meeting of the Council held on the 3rd August, 1895."

TREATMENT OF DISEASES OF BOVINE SPECIES IN VETERINARY SCHOOLS.

The Hon'ble BABU GURU PROSHAD SEN asked—

Will the Government be pleased to state whether the present curriculum of studies in the Veterinary School of Bengal includes the treatment of the diseases of the bovine species?

The Hon'ble MR. FINUCANE replied:—

"The answer to the Hon'ble Member's question is Yes. The treatment of diseases of cattle is an important part of the curriculum of studies in the Bengal Veterinary School."

COMMISSION'S OPINION OF CATTLE DISEASES IN BENGAL.

The Hon'ble BABU GURU PROSHAD SEN asked—

Whether there was not a Commission appointed some years ago to examine the question of cattle diseases and the improvement of the breed of cattle in the territories then comprised under the Lieutenant-Governorship of Bengal? What, in the opinion of the Commission, were the causes for the decay and diseases of cattle in Bengal, and what were the remedies suggested?

The Hon'ble MR. FINUCANE replied:—

"A Commission was appointed to enquire into cattle diseases, known as Indian Cattle Plagues Commission, which submitted its Report in 1871. This

Commission did not deal exclusively with Bengal; nor, except cursorily, with the subject of the improvement of the breeds of cattle.

"The causes of cattle diseases were summarized by the Commissioners on pages IX to XII of their Report; of these the chief in their opinion were improper feeding, improper watering, promiscuous herding, and overcrowding. The remedies suggested are summarized in paragraph 47 of their Report. An extract containing that paragraph is laid on the table. Among the recommendations of the Commission were the opening of veterinary schools for training a skilled native veterinary agency and the attachment of skilled veterinary agents to municipalities and collectorates."

[*Extract para. 47.* It will be convenient, before closing this general sketch of the results of our inquiry, to recapitulate the principal recommendations which we have been induced to make. They are as follows:—

I.—Whenever murrain breaks out, it should be made a subject of special local inquiry by committees or skilled agents.

II.—In order to test the effect of epizootics upon stock, an accurate census before and after the outbreak is absolutely necessary; or, if this be not attainable, an approximate census of the cattle of districts should be made to serve as a basis upon which the extent of loss from any outbreak may be estimated.

III.—As a means of exhibiting the fluctuations of value of stock, market prices of different kinds of stock should be periodically published in local Gazettes.

IV.—The systematic storing of fodder and jealous preservation of pasture land, where it exists, and its provision where it does not exist, are important considerations as regards the welfare of stock generally.

V.—Herding and droving cattle should be watched and regulated, especially in times of murrain.

VI.—Large fairs should be subject to skilled inspection and sanitary precaution, and smaller fairs carefully watched, especially in murrain times.

VII.—The hide trade is a source of danger, and should be watched and regulated. In times of murrain, hides should be destroyed or thoroughly disinfected.

VIII.—A law should be enacted for India regulating and restricting the sale of poisons.

IX.—Slaughter-houses should be under skilled supervision.

X.—Government cattle should, if possible, be placed under the veterinary charge of skilled men.

XI.—A law should be enacted embodying rules for the repression and prevention of spread of murrain, and capable of ready application to any locality when the necessity arises.

XII.—A veterinary school for the training of a native skilled agency should be organized.

XIII.—Such skilled agents should be attached to municipalities and collectorates to investigate and report on murrains, and apply preventive and remedial measures.

XIV.—A yearly summary of all the information which has been collected during the year regarding cattle murrains should be prepared and published, and the subject should constitute a point of attention in administration reports of provinces.

XV.—The collection of such information and preparation of such reports should be assigned as a duty to some particular individual, office or department.]

FEES PAYABLE BY PLUCKED MEDICAL STUDENTS.

The Hon'ble MR. A. M. BOSE asked—

Is the Government aware that the sanction of the Senate to the rule requiring further attendance at lectures on the part of students who had failed

at the medical examinations of the University, was obtained on an assurance given by the authorities of the Medical College that such students would be allowed to attend the additional courses at the College without payment of fees, and that this promise has been hitherto carried out (*vide* pages 2 and 3 of the University Minutes for 1891-92—Statement of Dr. MacLeod, President of the Medical Faculty) ?

Has the attention of the Government been drawn to the fact that under the rules of the Medical College recently promulgated, students who have failed at the University Examination are now required, except in special cases, to pay fees for attendance at the additional courses prescribed by the regulations of the University (*vide* Rule 16 of the Medical College Prospectus, page 642, Part I, *Calcutta Gazette* of 3rd June, 1896) ?

Will the Government be pleased to consider the propriety of altering this rule in accordance with the promise referred to in the first paragraph of this question.

The Hon'ble MR. RISLEY replied:—

"In sanctioning the new rules for the Medical College, the attention of the Government was not drawn to the statement made by Dr. MacLeod at the meeting of the Senate of the Calcutta University on the 25th April, 1891 (Minutes for 1891-92, pages 2-3), to the effect that 'this matter had been considered by the College Council, which had decided that students should not, under the circumstances, be required to pay a fresh fee for additional courses.' It now appears on inquiry that Dr. MacLeod had not full authority for making this statement. The Resolution of the Council, passed on the 9th April, 1891, declared that students who had failed at the final examination should not be called upon to pay additional fees for extra courses; but no mention is made of any other examination. Nor does it appear that this Resolution was ever communicated to, or received the sanction of, Government. It cannot, in any case, be admitted that the proposed concession was a condition precedent to the passing of the rule by the Senate. The recent decision by the Government was based on the unanimous recommendation of the College Council in August, 1895, that re-admitted students should be required to pay fees. As, however, the College Council and the Director of Public Instruction then recommended that only half fees should be charged to such students, the Lieutenant-Governor is prepared, on reconsideration, to modify the rule to that extent."

MAXIMUM NUMBER OF ADMISSION TO FIRST YEAR CLASS OF MEDICAL COLLEGE.

The Hon'ble MR. A. M. BOSE asked—

Will the Government be pleased to state what is the maximum number which has been fixed for admission to the first-year class of the Calcutta Medical College under the new rules for the present session; and how many out of these admissions are cases of re-admission of students who have failed to satisfy the College test at the end of their first-year's course? In case the number of applications should exceed the limit so fixed, have any rules been laid down in accordance with which the Principal is to proceed in selecting those who are to be refused admission?

Having regard to the fact that the Calcutta Medical College is the only institution of its kind in these provinces for imparting superior medical instruction to the people of the country, will the Government be pleased to consider the propriety of removing the restriction to the number of admissions now for the first time introduced? Has the Government considered the hardship of practically shutting out all possibility of a medical career, at least in the superior grade, to a young man whose capacity or fitness for that career has not at all been tested?

Should the Government not be pleased to remove the limitation referred to, will it lay down for the information of the public the principles on which candidates for admission will be selected when their number exceeds the prescribed maximum, and also to announce beforehand the maximum so fixed from year to year?

The Hon'ble MR. RISLEY replied:—

"The number of students to be admitted annually to the Medical College is determined by the capacity of the class-rooms, in some of which all students of the first and second years (with some failed students of the third year) are taught together. The number admitted to the first-year class at the beginning of the present session was provisionally fixed at 100, including 20 students re-admitted after failure at the test examination of the previous session. Eighty-seven new students applied for admission, in accordance with the rules, at the beginning of the present session, and though the number was thus raised to 107, all were admitted. Should the number of applicants for admission at any time largely exceed the prescribed maximum, preference will be given in accordance with their previous University qualifications, as determined by the results of the Arts Examinations which they have passed.

"The Chemistry class now consists of 244 students, which is fully up to, if not beyond, the capacity of the class-room. The Lieutenant-Governor is not prepared to remove the restriction on the number of admissions, as overcrowded class-rooms are not conducive to efficient study."

BENGAL MUNICIPAL ACT, 1884, AMENDMENT BILL AND BENGAL LOCAL SELF-GOVERNMENT ACT OF 1885, AMENDMENT BILL.

The Hon'ble MR. RISLEY moved that the Hon'ble MR. PRATT be added to the Select Committees on the Bill to further amend the Bengal Municipal Act, 1884, and the Bill to amend the Bengal Local Self-Government Act of 1885.

The Motion was put and agreed to.

The Hon'ble MR. RISLEY also moved that the time for the Select Committee to present their report on the Bill to further amend the Bengal Municipal Act, 1884, be extended to the 18th of July next. He said:—

"It will be remembered that this Committee was appointed on the 11th of April last with instructions to report within three months. It only commenced its sittings in the beginning of the present month and has unfortunately not been able to complete the consideration of this Bill. I have mentioned the matter to my colleagues on the Committee, and I trust there will be no difficulty in having their Report ready for presentation on Saturday next, the 18th instant. I take this opportunity of stating that it is not proposed to proceed with the Bill to amend the Local Self-Government Act during the present session of the Council. Hon'ble Members will remember that this Bill, like the Bill of which I have been speaking, was referred to a Select Committee on the 11th of April last, with instructions to report within three months. Since then the imperative necessity of providing ways and means for the improvement of the water-supply of rural villages throughout Bengal has been urged upon the Government by all classes of society and all organs of public opinion. In response to these pressing demands, a scheme has been prepared for greatly extending the sphere of Local Self-Government through the agency of Union Committees invested with enlarged powers, including the power of permissive local rating for local purposes, and more especially for the provision of wholesome drinking water. A Bill embodying the provisions necessary to give legal effect to this scheme has been prepared and submitted to the Government of India, and has been circulated for the opinion of District Officers,

District Boards, and Public Associations. It is not proposed to take any further action until the orders of the Government of India on the subject have been received and the local opinions have been considered. I hope to be in a position to bring the matter before the Council during the next cold weather."

The Motion was put and agreed to.

PUBLIC DEMANDS RECOVERY ACT, 1895, AMENDMENT BILL.

The Hon'ble MR. FINUCANE moved for leave to introduce a Bill to amend the Public Demands Recovery Act, 1895.

The Motion was put and agreed to.

The Hon'ble MR. FINUCANE also applied to the President to suspend the Rules of Business for the purpose of introducing the Bill.

The Hon'ble THE PRESIDENT having declared the Rules suspended—

The Hon'ble MR. FINUCANE introduced the Bill, and moved that it be read in Council. He said:—

"This is a small and, it is hoped, a non-contentious Bill. The object of it is to correct some mistakes of a clerical nature, and to supply some omissions which by oversight were made in Act I of 1895. It will be in the recollection of Hon'ble Members who were in the Council in that year that a Bill was passed towards the close of the winter session to amend the law relating to the recovery of public demands. Certain errors and omissions were made in that Act which it is now proposed to rectify. They occurred in this wise. The Bill of 1895, as it came from the Select Committee, contained two sections relating to appeals which were numbered 19 and 20. Just as the Bill was about to be passed an Hon'ble Member (Maulvi Seraj-ul Islam) proposed, without previous notice, that these sections be placed at the end of the Bill, where they would, it was thought, come in more appropriately. The motion was accepted, the sections were transposed and numbered 32 and 33, and the Bill was passed at that meeting of Council. But the fact was overlooked that one of these sections, 19, was referred to in other sections of the Bill, and that its transposition entailed changes in the numerical references made to it in these other sections. It is now proposed to correct this mistake by providing that for the word 'nineteen', wherever it occurs, in sub-section (*2*) of section 6, and in section 15, the figures 32 shall be deemed to have been always substituted. Another mistake of a clerical character was made in section 16. This section in the Bill as amended by the Select Committee made reference to section 13. On the day the Bill was brought before the Council to be passed, the Hon'ble Mr. R. C. Dutt moved an amendment in section 13. That amendment necessitated a consequential amendment in section 16, but the fact was not observed at the time. Another mistake in the Act which requires correction occurred in respect of requisitions for, and the realisation of, demands by local authorities. It will be remembered that at a late stage in the discussions connected with the Bill of 1895, it was suggested that Local Authorities should be empowered to recover, under the certificate procedure, certain demands of a public nature in respect of which the persons liable to pay the same had agreed by a duly registered instrument that they should be recoverable under the Public Demands Recovery Act. The suggestion was accepted, and the words 'Local Authority' were accordingly introduced by the Select Committee in section 7(*g*) of the Bill, the intended effect of their introduction being to empower Local Authorities to apply to the certificate officer for the issue of certificates in the cases mentioned. But it was overlooked that the introduction of these words in that section necessitated their introduction in certain other sections

also. It is now proposed to supply the omission by introducing these words in the appropriate sections from which they were omitted by oversight. The effect of the omission of them is that, under the Act as worded, Local Authorities cannot make a requisition for a certificate, and the various provisions of the Act relating to the procedure in connection with these certificates have no effect in the case of Local Authorities, although the right to obtain a certificate is given to them by section 7. The case of private individuals in whose favour a certificate may be issued under the Act stands in the same position. The introduction of the words 'Local Authority' and 'private individual' in the sections from which they were inadvertently omitted are intended to remedy these defects, and to carry out what was the intention of the Council when it passed the Act. Section 9 (*2*) of the Act is so drawn as to make Government officers liable to pay court-fees on requisitions for a certificate. But it is quite unnecessary that they should pay such fees, since their doing so would merely result in the transfer of money from one Government Department to another. Section 19 of the Act introduced for the first time into the law for recovery of Public Demands the principle of redemption. That section gives to a debtor whose property has been sold a right of redemption on payment of the demand with a penalty and interest analogous to the right which is given to judgment-debtors by section 174 of the Tenancy Act. The section is so worded, however, that difficulty has been felt in the construction of it. Sub-section (*c*) of that section, as it stands, requires the judgment-debtor, before the sale is annulled, to pay up all outstanding charges that are payable to the District Collector under any Act for the time being in force. This sub-section is so wide that it may render the privilege of redemption a nullity. The owner of the property sold may have other properties in the same district or in other districts, and it would appear that the annulment of the sale might be voided unless he had, before such annulment, paid up all outstanding charges of every sort and description, not alone in respect of the property sold, but in respect of all other properties of which he may be the owner. Again, the owner of the property sold may not himself know of all the outstanding charges against him, and though he may have paid up all such outstanding charges as are known to him, he may still find that the annulment of the sale is void. To obviate this it is proposed to restrict and specify the charges which must be paid, by providing that they are charges in respect of the property sold, and that they must be certified by the Collector to be due. I should mention that clause (*c*) of section 7 of the Act was an attempt to get rid of the long list of enactments which is contained in section 7(3) of Act VII of 1880. But the clause as it now stands has left the law in a confused and imperfect state, in consequence of its framers having overlooked the fact that the references in those several enactments to Act VII of 1868 were all repealed by the Act of 1880. The clause has been redrafted so as to cover all the demands which its framers intended it to cover.

"I think I have now enumerated all or nearly all the changes in the Act of 1895 which it is proposed to make by this Bill. It will be seen that they are of a formal character, involving no question of principle, and that their object is merely to give effect to what was the intention of this Council when it passed Act I of 1895. I ought perhaps, in conclusion, to explain that in the edition of the Act published by the Board of Revenue the erroneous numerical references to sections have been corrected, so as to make the Act more easily intelligible to officers who have had to work it, but such corrections are technically unauthorised till this Bill is passed into law. I now beg leave to introduce this Bill."

The Motion was put and agreed to.

The Bill was read accordingly.

The Council adjourned to Saturday, the 18th instant.

CALCUTTA;
The 21st July, 1896.

F. G. WIGLEY,
Offg. Assistant Secretary to the Govt. of Bengal,
Legislative Department.

RESOLUTION ON THE REPORT ON THE LUNATIC ASYLUMS IN BENGAL FOR THE YEAR 1895.

MUNICIPAL DEPARTMENT—MEDICAL.

Calcutta, the 17th July 1896.

RESOLUTION—No. 2960Medl.

READ—

The Report on the Lunatic Asylums in Bengal for the year 1895.

Read also—

The Report for the year 1894, and the Resolution recorded by Government upon it.

The Report, which was due to Government on the 1st May, was not received till the 15th June, the delay being caused by the absence on privilege leave for three months, from the 8th February, of the Inspector-General of Civil Hospitals, Surgeon-Colonel G. C. Ross.

2. The following statement compares the number of patients in the five native asylums during the past two years, and gives a summary of the main facts regarding them:—

	1894.	1895.
Remaining on the 1st January	916	923
Admitted and re-admitted	200	184
Total ...	1,116	1,107
Discharged cured	80	81
„ improved	29	22
„ not improved	3	...
„ otherwise	6	8
Died	75	75
Total ...	193	186
Remaining on 31st December	923	921
Daily average strength	915	919

3. The total number of admissions was 162 against 180 in the previous year, a decrease occurring in all the asylums except Dullunda, where the number of admissions rose from 49 to 61. The number of re-admissions rose from 20 in 1894 to 22 in 1895. Thirteen of these occurred in Dacca, and included ten criminals, eight of whom were sent back after trial, and two re-admitted from jail, and three non-criminals, two of whom had been discharged from the asylum after temporary recovery, while one had been made over to his friends as harmless, and had been found by them unmanageable. Of the 184 lunatics admitted and re-admitted in the five native asylums during the year, 102 were criminal and 82 non-criminal, against 108 and 92 respectively in the previous year. The number of criminal lunatics remaining in confinement on the 31st December 1895 wa 470, against 463 at the end of the previous year, the number of non-crimina lunatics being 451 against 460. Of the total number of criminal lunatics i confinement, 185 had been tried and acquitted on the ground of insanity, 25 were detained as incapable of making a defence, and 30 were persons who, whil undergoing imprisonment in jail, had become insane and had been transferred t an asylum. The numbers under each of these categories in 1894 were 185 252 and 26, respectively. The statistics of the last eleven years, which ar given in the report, show that the daily average strength of criminal lunatic has risen since 1885 from 372 to 463.

4. The number of patients discharged from the asylums was 111 against 118 in the previous year, Patna and Berhampore alone showing an increase under this head. At Dullunda the number discharged fell from 43 to 36, and it is explained that in several cases where lunatics might have been discharged their friends could not be found or were unwilling to take charge of them.

5. No change was made in the capacity of the asylums during the year, and the accommodation was found sufficient in all asylums except that at Dacca,

where, notwithstanding the four new cells which have been constructed, the female wards were occasionally slightly overcrowded. Accommodation is provided on the standard scale for 1,137 patients, and the maximum number confined on any one night was 945.

6. In statement VII, which shows the alleged causes of insanity, 21 cases out of the 184 admitted are entered as due to ganja-smoking, 1 to bhang, 5 to alcohol, 1 to other intoxicants (including dhatura), 8 to heredity, 3 to epilepsy, and 9 to other physical causes. Twenty-two are ascribed to moral causes, and 114 are included in the column "Unknown." The reduction of 19 in the number of cases attributed to ganja-smoking is said to be the result of the more careful enquiries and diagnosis suggested by the Hemp Drugs Commission. Only those cases are now put down to ganja in which indulgence in this drug is found to be the predominant factor, and not merely one among several possible causes of insanity. The descriptive rolls of lunatics are also, it is stated, prepared with greater care.

7. The average daily number of sick rose during the year from 55·41 to 58·81, and the number of admissions to hospital increased by 276. The number of deaths, however, was no higher (75) than in the previous year, the death-rate being 8·15 against 8·19 in 1894. This proportion, as the Inspector-General points out, is not only less than in any other province of India, but even compares favourably with that of the borough and county asylums of England. Sickness was most prevalent in the Dullunda Asylum, where the number of admissions to hospital rose from 238 to 540, the chief causes being malarial fever and influenza. It is satisfactory to note that, with the exception of a single case in each of the asylums of Dullunda and Patna, cholera, though prevalent in the surrounding areas, was practically absent from the asylums, and that no case of small-pox occurred. Reference is made in the report to an opinion expressed by Surgeon-Colonel Hutcheson, while officiating as Inspector-General, as to "the unsuitability of certain kinds of labour exacted from the insane in Bengal." This opinion does not appear to have been communicated to Government, and the Lieutenant-Governor desires that the subject may now be dealt with in a special report. Lunatics should certainly not be called upon to do anything that can be properly described as penal labour, and the chief, if not the only object of requiring them to work at all, is to provide them with some sort of occupation which will keep them from moping. In order to meet the case of lunatics of filthy habits, the system of spreading a thick layer of dry earth over the entire floor of all sleeping wards was introduced at Patna and Dullunda. At the former place, where the climate is dry, it appears to have worked well; at the latter the visitors raised objections, and the practice has been discontinued, pending consideration of an alternative proposal for levelling the asphalt of the floors and pointing the walls so as to enable the wards to be properly cleansed with water, which was laid on for this purpose some years ago.

8. The number of injuries and accidents rose from 17 to 22, eighteen of which occurred at Dullunda. At this asylum one lunatic was drowned and another died from rupture of the spleen caused by ill-treatment by a warder assisted by two lunatics. The warder was convicted by the Sessions Court, and sentenced to rigorous imprisonment for four years. One case of suicide occurred at Dacca and another at Patna; and in each the warders on duty were punished for carelessness. Towards the end of the year two criminal lunatics escaped, one from Dacca and the other from Berhampore, and had not been recaptured. One warder was dismissed and several others fined.

9. The income and expenditure of the asylums for the last two years are shown below:—

INCOME.

	1894. Rs. A. P.	1895. Rs. A. P.
Received from the Treasury ...	66,883 14 5	75,174 13 3
Ditto from paying patients ...	2,042 0 8	2,030 7 0

Total ...	95,788 12 3	91,378 10 11

The increase in the amount drawn from the treasury and the decrease in the value of the articles received from the manufacturing department are due mainly to a change in the system of accounts, by which the cost of raw material used in manufactures is included in the sums drawn from the treasury, and excluded from the value of the articles manufactured as shown above. Apart from this, however, the net profits of manufacture show a decline of Rs. 1,648, which occurred chiefly at Dullunda. The total expenditure decreased by Rs. 4,410, mainly under rates and taxes and public works.

10. The following table compares the gross cost of each lunatic at the different asylums, and the cost per head of average strength, for the past two years, taking all charges into account:—

	1894. Rs. A. P.	1895 Rs. A. P.
Dullunda	139 7 8	117 0 1
Dacca	104 12 0	102 7 4

Rates and Taxes	6 0 9	4 7 5
Forms and Stationery ...	0 2 2	0 1 9
	104 10 4	99 6 7

11. The dairy farm at the Dullunda Asylum is reported to have yielded a net profit of Rs. 1,092-4-9 against Rs. 1,108-6-1 in 1894, and a similar dairy at Dacca, besides affording a sufficient supply of milk to the inmates of the asylum, realized Rs. 550-10-9 from the sale of milk to the public. The calves were also used for the supply of vaccine lymph to the asylum, the jail, and the outside population. The proposed dairy at Berhampore was not opened during the year, while the dairy at Cuttack, which had been working at a loss, was closed.

12. The number of patients in the European Asylum at Bhowanipur was 54 against 64 in 1894. Of these, 39 were old patients and 15 were admitted during the year. Three of the latter were criminal lunatics. During the year ten persons were discharged as cured, compared with four in the previous year, two were deported to Europe under the Merchant Shipping Act, five were made over to the care of friends, one was despatched to Europe as a civil pauper lunatic, and four died, leaving 32 under confinement at the close of the year. The daily average strength was 37·63 against 40·37 in 1894. There was no overcrowding in the asylum, the accommodation being just sufficient for

hospital during the year. The total expenditure was Rs. 22,838 against Rs. 23,350, but owing to the decrease in the number of patients and also in the receipts from paying patients, the net cost of each lunatic was Rs. 313 against Rs. 240 in the previous year. The amount contributed by Government was Rs. 11,901 against Rs. 9,624. The unusually large sum of Rs. 1,391 remained outstanding on account of paying patients at the close of the year, and of this amount Rs. 945, due in a single case, is irrecoverable. In cases of this kind the Superintendent should see that formal bonds are taken, and should satisfy himself that the persons executing them are in a position to fulfil their obligations. When default is made the patients should, after due warning to their relatives, be transferred to the pauper ward.

13. The question of amalgamating the asylums and of forming a single Central Asylum for all lunatics in Bengal, under the management of a specially qualified officer, is at present under the consideration of Government. In such an institution more attention could be given to the systematic treatment of mental disease than is possible under the present system, and the Lieutenant-Governor hopes that a practicable scheme will soon be drawn up.

14. All the asylums were visited by the Inspector-General of Civil Hospitals during the year, and the inspection notes recorded by him have done much to improve the management of these institutions. The thanks of the Lieutenant-Governor are due to Surgeon-Colonel G. C. Ross and to the Superintendents of the several asylums for the efficient and economical manner in which these institutions have been managed during the year.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

CONTRIBUTION BY LOCAL BODIES FOR THE SERVICES OF MEDICAL SUBORDINATES OF THE GOVERNMENT ESTABLISHMENT FOR EMPLOYMENT IN CLASS II DISPENSARIES.

MUNICIPAL DEPARTMENT—MEDICAL.

Calcutta, the 18th July 1896.

RESOLUTION—No. 2977Medl.

READ—

Paragrahps 10—14 of the Report of the Committee appointed to consider the questions of the pay, position and prospects of Assistant Surgeons, dated 19th December 1893.

Read also—

Paragraph 5 of the letter from the Government of India, in the Home Deparatment, No. 671, dated the 20th September 1895.

Rule 9 of the Dispensary Manual permits local authorities to appoint medical subordinates of the Government establishment to dispensaries in Class II, and requires them to do so in the case of dispensaries situated at the head-quarters of districts or subdivisions. Under the existing rules these subordinates, whether Assistant Surgeons or Civil Hospital Assistants, are entitled to promotion after seven years' service in their grade, on passing a professional examination. When such promotions occur, local authorities are usually unwilling to accept the increased charge for salary, and Government is asked either to replace the medical officer by one of a lower grade, or to meet the difference in pay from Provincial Funds. The transfer of officers on promotion causes, however, much hardship to them, and more especially affects those in the higher grades, while at the same time it interferes greatly with the efficient management of dispensaries.

2. In order to avoid these disadvantages, it was decided in 1893 that the increased pay to which a medical subordinate in charge of a local fund

dispensary becomes entitled on promotion to a higher grade, would be met from Provincial revenues, if the local body could show to the satisfaction of Government that they were really unable, owing to financial pressure, to bear the increased charge. This policy is still pursued in dealing with such cases, but experience has shown it to be wanting in finality, and to cause much inconvenience to Government, the local bodies, and the officers concerned. The Government of India have now expressed their approval of the introduction of a system which is in force in the North-Western Provinces, and under which the contribution by a local body of a fixed sum calculated on the average pay of a particular class of medical officer entitles it to the services of an officer of that class without reference to grade. This system was also recommended by the Committee appointed to report on the questions of the pay, position and prospects of Assistant Surgeons, and the Lieutenant-Governor, after carefully considering the subject, is of opinion that it promises to work more smoothly than the one already in force in Bengal. It will equalise the demands on local authorities, and will secure them from those frequent changes which are unpopular in themselves and disastrous in their effect on dispensary administration. At the same time it will enable Government to provide permanent appointments for senior officers of the service, and thus to remove a long felt grievance of the subordinate medical services. His Honour accordingly directs that the following clause be added after clause 2 of rule 9 of the Dispensary Manual:—

"For the purposes of this rule the mean pay of an Assistant Surgeon will be assumed to be Rs. 150 per mensem, and that of a Civil Hospital Assistant Rs. 38, and local authorities will be required to pay these sums into the treasury half-yearly in June and December irrespective of the actual pay of the officer appointed."

3. This rule will come into force from the 1st April 1897, and District Boards and Municipalities should frame their budgets accordingly. The actual pay and leave allowances of these officers will be a direct charge against the Provincial Revenues in the first instance, and as the allowances of such officers during privilege leave are payable by the local bodies, these should also be calculated for the periods of such leave on the average rate now fixed. Cases where the application of this rule will cause hardship or inconvenience, or will conflict with pledges already given, will be specially considered. The sums annually due on account of the pay and privilege leave allowances of medical subordinates should be paid into the local treasury half yearly.

4. In view of these orders, Rule 17 of the Dispensary Manual will be cancelled.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

WORKS OF PUBLIC UTILITY CONSTRUCTED DURING THE YEAR 1895 FROM PRIVATE CONTRIBUTIONS.

No. 329M.P.I.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Mis. Pub. Improvements.

Calcutta, the 16th July 1896.

RESOLUTION.

READ—

Statement of works of public utility constructed by private individuals in the several districts in Bengal during the year 1895, and statement of similar works constructed during the year 1894 and the Resolution thereon.

REMARKS.—The following is a distribution of works of public utility, which were constructed during the year 1895 at a cost of Rs. 4,81,982-6-0.

		No. of works.	Cost. Rs. A. P.	Rs. A. P.
I.—Works costing Rs. 500 each and upwards.	Public buildings	15	59,133 13 3	
	Roads	7	1,07,400 0 0	
	Bridges	4	4,500 0 0	
	Tanks	172	1,83,038 0 0	
	Wells	5	2,898 0 0	
	Bunds	6	11,950 0 0	
	.....		.....	3,68,919 13 3
II.—Works costing less than Rs. 500 each.	.....	...	1,13,062 8 9	1,13,062 8 9
	Total ...	209	.....	4,81,982 6 0

2. The amounts contributed during the year under review for the two classes of works, as compared with those of the two preceding years, are given in the subjoined statement, and show that the outlay on the operations of 1895 exceeds that of 1894 and 1893 by Rs. 1,35,558 and Rs. 86,362 respectively:—

Class of works.	1895.	1894.	1893.
1	2	3	4
	Rs. A. P.	Rs. A. P.	Rs. A. P.
I.—Works costing less than Rs. 500 each.	1,13,062 8 9	1,10,747 0 0	1,09,158 6 0
II.—Works costing Rs. 500 each and upwards.	3,68,919 13 3	2,35,677 3 0	2,86,462 0 0
Total ...	4,81,982 6 0	3,46,424 3 0	3,95,620 6 0

3. The following works deserve special notice:—

Public buildings.—The contributions under this head amount to Rs. 59,133-13-3 and show a considerable increase over the figures of last year. Of this sum the late Dr. Bholanath Bose gave Rs. 23,658 for a charitable dispensary at Barrackpore with free accommodation for 9 in-door male and 4 female patients. His Highness the Maharaja of Kuch Bihar contributed Rs. 5,360 for pucka buildings, viz. staging bungalow and bench room at Debiganj; Dr. Mohendro Lal Sirkar of Calcutta Rs. 5,000 for a Leper Asylum just beyond Deoghar Municipal limits; Raja Sitesh Chandra Pandey of Pakour Rs. 4,952-13-3 for the Pakour Jubilee Institution; Newlram Marwari and others Rs. 3,500 for a building for use of pilgrims and travellers, Bankura district; Babu Anandi Lal Rs. 3,000 for a Dharamsala at Jamunagurkinath, Patna district; Babu Nanda Lal Sen Rs. 2,597-0-0 for a charitable dispensary at Baldhara,

Dacca district; Babu Hari Charan Bose Rs. 2,000 for a masonry building for the school house at Sakpukuria, district Jessore; Babu Mathura Lal Bhagat, Rs. 2,000 for a Dharmsala at Berboi, district Puri; Raja Srinath Roy Rs. 1,626 for restoration of a *matt* at Rajabari, district Dacca; Rai Budh Sing Dudhuria Bahadur and his nephew, Babu Bejoy Sing Dudhuria, of Azimganj, Rs. 1,490 for building a female ward in addition to the Jangipur Charitable Hospital and Dispensary, district Murshidabad; Dianet Mandal Rs. 1,250 for a Masjid at Bishanpur in the Mymensingh district; Babu Shyama Charan Poddar Rs. 1,000 for a masonry building for Garapota school at Garapota, district Jessore; Kandura Pramanik of Icharchali, police-station Badarganj, Rs. 1,000 for a Masjid at Icharchali, district Rangpur; Kandura Chaukidar of Rajibpur Rs. 700 for an Indara and masjid at Rajibpur in the Rangpur district.

Roads.—A total sum of Rs. 1,07,400 was contributed for roads by the following gentlemen:—

Babu Jogendra Chandra Basu Rs. 1,00,000 for a *pucka* metalled road from Khalsini to Bhola in Singoor, about 12 miles in the district of Hooghly; Babu Ram Krishna Rakshit Rs. 2,500 for a *katcha* road, &c., from Garibpur to Borra, a distance of 3 miles, district Jessore; Raja Ban Behari Kapur Rs. 1,500 for a road leading from Grand Trunk Road to a basti newly settled near Gangpur, district Burdwan; Lakhikanta Saha and Shajan Pramanik Rs. 1,500 and Rs. 900 for a road at Kaibarito, Dashotyhat and Karochgram, respectively, district Rajshahi; Raja Rajendro Narain Rai Bahadur and Babu Ambika Prosad Rai Choudhuri Rs. 500 each for roads from Sripur to Muthajuri and from Kashimpur to Semalaya, district Dacca.

Bridges.—Mr. H. W. J. Hill contributed Rs. 2,000 and 500 for bridges at Turkowlia and Pandaria, respectively, district Champaran; Hemtulla Parkar of Bhotmari, police-station Kaliganj, Rs. 1,200 for a bridge at Bhotmarigati river, district Rangpur; Babu Mahipat Teli Rs. 800 for a bridge at Bahadurpur, district Champaran.

Tanks.—The total expenditure on tanks was Rs. 1,83,038, of which the following are the principal donations:—

Babu Jagannath Panda, Midnapore district; Rs. 5,000, Gobinda Nath Bagchi, Pabna district, Rs. 5,000; Babu Sheo Gulam Misir, Gaya district, Rs. 400; Denamoni Peshakar, Mymensingh district, Rs. 3,758; Hari Krishna Sardar, Rajshahi district, Rs. 3,000; Babu Awadh Bihari Narain, Darbhanga district, Rs. 3,000; Estate of A. N. Roy of Kasimbazar, district Birbhum, Rs. 2,635; Babu Dina Nath Mirdha, Midnapore district, Rs. 2,500; Bhodu Pramanic, Rajshahi district, Rs. 2,500; Keshub Chandra Bandyopadhya and Srimati Basanta Kumari Debya Chowdhurani, district Dinajpur and Pabna, respectively, Rs. 2,500, Ashutosh Nath Rai, Tippera district, Rs. 2,500; Babus Rajani Kanta Biswas and Ram Lal Biswas, Faridpur district, Rs. 2,400; Babus Raghabram Ghosh and Rai Charan Das, districts Hooghly and Nadia, respectively, Rs. 2,000 each. Bara Harish Chandra Shaha of Raipur, Rajmohan Saha and Khoda Bux Chakladar, districts Dinajpur, Bogra and Pabna respectively, Rs. 2,000 each. Babu Mathura Nath Sanyal, Faridpur district, Rs. 2,000. Babu Mooshar Kawas of Sursund, district Muzaffarpur, Rs. 2,000, Babus Doman Sundi and Makund Jha, district Darbhanga, Rs. 2,000 each.

Wells.—Five wells were sunk at a cost of Rs. 2,898. A maid-servant of Babu Nafar Chandra Pal Chowdhuri of Latudoho gave Rs. 800 for a masonry well at Mayapur, district Nadia. Nanda Lal Shaha of Mathurapur gave Rs. 598 for a *pucka* well in the Dinajpur district; Rs. 1,500 were contributed for 3 *pucka* wells in the Rangpur and Bhagalpur districts.

Bunds.—Thakrain Makham Kumari of Lachmipur gave Rs. 9,000 for bunds for irrigation, district Bhagalpur; Babu Ram Bandhu Chatterjee gave Rs. 500 for constructing bund, district Bankura; Rs. 2,450 were spent for four bunds in the Singbhum district.

Resolution.—The total amount contributed for works of public utility during the year 1895, shows a marked increase over the figures of the two previous years. This increased display of public spirit and liberality on the part of those who have helped to contribute towards these works is viewed by the Lieutenant-Governor with much satisfaction, and in conveying his acknowledgments His Honour desires to bring to notice the liberal contributions of

Rs. 1,00,000 and Rs. 23,658 given, respectively, by Babu Jogendro Chandra Basu and the late Dr. Bholanath Bose.

Formal letters of acknowledgment will be forwarded by the Government to those, or their representatives, who have constructed works costing Rs. 500 each and upwards. The usual acknowledgment will be conveyed to the others from the Commissioner or Magistrate of the Division.

ORDER.—Ordered that a copy of this Resolution and of the statement be forwarded to the Board of Revenue, Lower Provinces, and to all Commissioners of Divisions, to all Superintending Engineers of Public Works Circles in Bengal, and to Inspectors of Works for information.

Ordered also that a copy of this Resolution and of the statement be forwarded to the Revenue and Judicial Departments of this Government for information.

Ordered also that this Resolution and the statement be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

J. G. H. GLASS,

Secretary to the Govt. of Bengal.

DISTRICT ROAD FUND.

No. 3442R.C.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Road Cess.

Dated Calcutta, the 10th July 1896.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 421L.F., dated 25th June 1896, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 31st March 1896.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal, for the fourth quarter of the year 1895-96, be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded for information to the—

Commissioners of the Rajshahi, Chittagong, Bhagalpur and Chota Nagpur Divisions;
Superintending Engineer of the Northern Circle;
Inspectors of Works, Eastern and Western Circles;
Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,

J. G. H. GLASS,

Secretary to the Govt. of Bengal.

R. E. HAMILTON,

Accountant-General, Bengal.

NOTIFICATION.

No. 2989M.—The 20th July 1896.—The following is published for general information.

H. H. RISLEY,
Secretary to the Govt. of Bengal.

WORKING OF THE FIRE-BRIGADE IN THE TOWN AND SUBURBS OF CALCUTTA AND IN THE MUNICIPALITY OF HOWRAH FOR THE YEAR 1895-96.

No. 6569, dated Calcutta, the 7th July 1896.

From—Sir John Lambert, K.C.I.E., Commissioner of Police, Calcutta,
To—The Secretary to the Government of Bengal, Municipal Department.

I have the honour to submit, for the information of Government, a report on the working of the Fire-brigade in the Town and Suburbs of Calcutta and in the Municipality of Howrah for the year 1895-96.

2. During the year 49 fires occurred, in each of which the value of the property destroyed exceeded Rs. 50 in value.

At 41 of these the Brigade were in attendance, and 8 were extinguished by the residents of the localities.

Of the above fires that occurred during the year under review, three call for special notice:—

(1) On the 9th December 1895, at 12-45 P.M., a fire broke out in the Strand Bank Hydraulic Jute Press in Kali Kumar Singh's Road. The press was stored with bales of jute and cotton. The fire lasted 44 hours and 15 minutes, and was extinguished by the Fire-brigade. The damage caused was estimated at Rs. 3,73,317.

(2) On the 24th March 1896, at 11-45 A.M., a fire broke out in an extensive *busti* in Nulwaparah, Watgunge. Owing to the extremely inflammable material of the huts and a high wind, the fire spread with great rapidity. One thousand two hundred and twenty-seven tiled and *golputta* huts were destroyed, and nine lives were lost. The estimated damage to property was Rs. 85,000. This fire was extinguished in 4 hours and 15 minutes by the Fire-brigade.

(3) At 4-20 P.M., on the 21st January 1896, it was ascertained that some jute stored in a tiled shed godown belonging to Guzdar's Hydraulic Jute Press at Ghoosery, Howrah, was on fire. This rapidly spread to another tiled shed and a corrugated-iron godown. The fire was extinguished in 13 hours and 40 minutes by the Fire-brigade. Estimated damage Rs. 60,000.

3. In addition to the 49 serious fires already noticed, 91 other petty fires occurred—27 in the Town of Calcutta, 54 in the Suburbs, and 10 in Howrah. The Brigade attended 14 of these fires: the remaining 77 were extinguished by the residents of the localities.

The average value of property destroyed at these fires was Rs. 7.

The estimated value of property destroyed during the year amounted to Rs. 6,93,647 as against Rs. 5,98,534 in 1894-95.

4. There was loss of life at two fires only during the year—

(1) In a small fire in Harrison Road two men, who had locked themselves into a brick-room, were suffocated before they could be rescued.

(2) In the large *busti* fire of Watgunge, 3 women and 4 children were burnt to death, and 2 women died in hospital from injuries received.

5. There were six fires in buildings licensed under Act I (B.C.) of 1893 and Act I (B.C.) of 1894. Property to the value of Rs. 4,34,977 was destroyed.

6. During the year 16 prosecutions were instituted under the Explosives Act, 14 convictions being obtained.

7. A memorandum of the fires that occurred and a statement showing receipts and expenditure on behalf of the Brigade are enclosed.

'emorandum of Fires in Town and Suburbs of Calcutta and in Howrah from 1st April 1895 to 31st March 1896.

CALCUTTA:
The 7th July 1896.

J. LAMBERT,
Commissioner of Police.

WEATHER AND CROP REPORT.

For the week ending the 20th July, 1896.

Burdwan.—Rainfall at Sadar 0·71, Kalna 1·65, Katwa 1·84, Raniganj 1·26. Weather hot and cloudy. More rain wanted all over the district. Rice being transplanted. Fodder and water sufficient. Condition of cattle good. Common rice selling at the following rising prices:—

	Srs.	
Sadar	11 to 15	per rupee.
Kalna	12	
Katwa	13⅛	
Raniganj	14½	

Midnapore.—Rainfall at Sadar 2·77, Contai 2·72, Tamluk 2·02, Ghatal 0·68. Weather seasonable. Prospects of indigo, sugarcane, and jute good. Transplantation of *aman* paddy going on. More rain wanted in Contai. Cattle-disease reported from Garhbeta and Contai. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Contai	16 to 20	
Tamluk	13	
Ghatal	14 to 15	

24-Parganas.—Rainfall at Sadar 1·90. Weather hot and showery. Prospects of jute and *aus* favourable. Transplantation of *aman* continues. Fodder and water sufficient. Condition of cattle good. Common rice sells at—

	Srs.	c.	
Sadar	10 to 13	0	per rupee.
Barasat	10	0	
Basirhat	11	10	
Diamond Harbour	11	6	

Murshidabad.—Rainfall at Sadar 1·28, Jangipur 0·77, Kandi 1·45. Weather hot and cloudy. Transplantation of *aman* continues. Standing crops promising. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar 0·84, Bagerhat 2·56, Satkhira 2·45. Weather unusually hot. Rain is urgently wanted in parts of the district for transplantation of paddy. No cattle-disease. Fodder and water sufficient. Prices of common rice:—

	Srs.	c.	
Sadar	11 to 12	0	per rupee.
Bagerhat	11	15	
Satkhira	11	0	

Dinajpur.—Average rainfall 2·06. Weather is very hot. Prospects of standing crops continue good. More rain is wanted for *aman*. Common rice sells from 11 to 14 seers per rupee. No cattle-disease. Fodder and water sufficient.

Rangpur.—Average rainfall 3·16. Harvesting of *aus* and transplantation of *aman* going on. Prospects fair. Common rice selling from 12 to 14 seers per rupee. Fodder and water sufficient.

Pabna.—Rainfall 2·15. Weather cool and cloudy. Crops progressing favourably. Fodder available.

Dacca.—Rainfall 1·39. Weather hot. Harvesting of *aus* paddy and jute going on. Prospects appear good. Fodder available. No cattle-disease. Common rice 12 seers per rupee.

Chittagong.—Rainfall 3·99. Weather changeable. *Aus* crop is still being harvested. Cultivation of *aman* in progress. Prospects fair. Water and fodder sufficient. Commonest rice selling at 13 seers per rupee.

Patna.—Rainfall at Sadar 1·36. Sowing and transplantation of paddy in progress. Prospects of *bhadoi* crops favourable. Fodder and water sufficient. Prices normal. Common rice selling at 17 seers per rupee.

Gaya.—*Bhadoi* doing well. Transplantation of paddy has begun. Price of common rice at Sadar 13¼ seers, against average of 13¾ seers per rupee.

Champaran.—Rainfall at Sadar 3·92, Bettiah 2·50. Paddy being transplanted. Price of common rice at Sadar 17 seers, against normal 13½ seers per rupee. Fodder and water ample.

Darbhanga.—Rainfall at Sadar ·95, Samastipur 4·16, Madhubani 2·94. Transplantation of *marua* and paddy in progress. Prospects favourable. Fodder sufficient. Common rice selling at 16 seers per rupee.

Bhagalpur.—Weather hot. Rain all over the district except Supaul, where it is wanted. Cattle-disease still prevailing in some places in the interior of Madhipura and Supaul. Transplantation is going on, and prospects of standing crops are good. Fodder and water sufficient. Common rice sells at 15 seers per rupee.

Purnea.—Rainfall 3·52. Prospects of *bhadoi* paddy and jute good. Transplantation of *aghani* paddy continues. Indigo damaged by the Kusi floods. Cattle-disease reported from Tamajganj outpost. Fodder and water sufficient. Common rice 13 to 17 seers per rupee.

Cuttack.—Rainfall 1·93. Weather seasonable. Agricultural prospects generally good. Cattle-disease reported from thana Tirtole. Fodder sufficient. Common rice sells at—

		Srs.	c.	
Cuttack	...	19	1	per rupee.
Jajpur	...	25	0	
Kendrapara	...	25	0	
Banki	...	26	8	

Hazaribagh.—Rainfall at Sadar 2·18, Giridi 0·64. Weather seasonable. Sowing almost completed. Transplanting in progress. Rice sells from 10 to 14 seers per rupee.

General Summary.—There was general rain during the week. Agricultural prospects continue favourable, but more rain is required in some districts for the transplantation of winter rice. All standing crops are doing well. In North and East Bengal the harvesting of early rice and jute is going on. In Purnea indigo is said to have been damaged by floods in the Kusi river. The supply of fodder is generally sufficient, and there is no cattle-disease except in places in Midnapore, Bhagalpur, Purnea, and Cuttack. The price of common rice continues high, but in East Bengal a tendency to fall is reported. Prices have risen in the islands of Hatia and Sandip and the adjacent mainland of Noakhali, owing to exceptionally high tides on the 27th and 28th June, and the consequent destruction of crops.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT, M. FINUCANE,

The 21st July, 1896. *Offg. Secy. to the Govt. of Bengal.*

The highest velocity of the wind in one hour	12
	%
The mean relative humidity	89
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	86
	Inches.
The total fall of rain from 12th to 18th July 1896	1·97
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·92
The total fall from 1st January to 18th July 1896	26·07
The average fall of the corresponding period for 24 years, Surveyor-General's Office	28·69

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy: d, drizzling rain; p, passing temporary showers; t, thunder; ≤, lightning; ⛆ dew.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Council Chamber on Saturday, the 18th July, 1896.

Present:

The Hon'ble SIR CHARLES PAUL, K.C.I.E., Advocate-General, *presiding.*
The Hon'ble W. H. GRIMLEY.
The Hon'ble J. PRATT.
The Hon'ble H. H. RISLEY, C.I.E.
The Hon'ble M. FINUCANE.
The Hon'ble J. G. H. GLASS, C.I.E.

The Hon'ble GURU PROSHAD SEN.
The Hon'ble W. B. GLADSTONE.
The Hon'ble M. S. DAS.

MR. WHEELER'S CASE.

The Hon'ble MR. RISLEY said:—"The Council will remember that at the last meeting the following question was asked by the Hon'ble Babu Surendranath Banerjee:—

'Whether the attention of the Government has been called to a statement which has appeared in the *Behar Herald* of the 27th June last to the effect that a Circular Order has been issued by the Magistrate of Saran, addressed to all Deputy Magistrates under him, drawing their attention to the leniency with which excise cases are treated by them and urging them to inflict exemplary punishment on the parties concerned? Is there any truth in this statement? If so, whether the Government will be pleased to direct the withdrawal of the Circular as interfering with the Judicial discretion of Magistrates subordinate to the District Magistrate of Saran?

'Is it the case that this officer who has been placed in charge of such an important district as Saran is only of four years' standing? If so, will the Government be pleased to devise measures to prevent comparatively young officers being placed in responsible charge of important districts?'

"I said at the time that a reply to this question would be given hereafter when the result of certain enquiries then being made was known. Since then the enquiries have been completed, and I am now in a position to reply as follows:—

"It has been ascertained that the Officiating Collector of Saran finding, on reviewing the Excise Returns, that breaches of the Law were not being adequately dealt with, 'drew the attention of the Deputy Magistrate to the question of the amount of punishments in Excise cases,' and remarked that 'the general tendency is to be far too lenient, especially in tari cases.' This was a perfectly legitimate criticism on the part of the District Magistrate, and to describe it an interference with Judicial discretion is a perversion of terms.

"The Lieutenant-Governor would be very glad if the state of the service enabled him to secure a senior officer for the charge of every district, but he must make the best use of the staff actually at his disposal; and Mr. Wheeler's management of the Saran district, of which he is temporarily in charge, has been very creditable to him."

ALLEGED UNSATISFACTORY RESULTS OF THE RAVENSHAW COLLEGE, CUTTACK.

The Hon'ble MR. M. S. DAS asked—

In the Annual Administration Report for 1894-95 Mr. H. G. Cooke, the Commissioner of Orissa, in speaking of the Ravenshaw College at Cuttack, made the following remarks:—

"On the 31st March, 1895, there were 59 students on the roll against 68 on the corresponding date of the preceding year. At the B.A. Examination held in 1894, 29 candidates appeared, of whom only 7 passed. At the F.A. Examination 5 passed out of 31. The result is not at all satisfactory. Though the College had an able Principal in Mr. Hallward, there appears to be something wrong with the institution to account for such poor results. If the evil admits of a remedy, I would strongly advocate that the remedy should be sought for and applied. The College is the only institution of the kind in Orissa, which, as a division, is admittedly backward in higher education."

(*a*) Has any enquiry been directed to find out why the results at the University Examinations have been unsatisfactory since Mr. N. L. Hallward's appointment as the Principal of the Ravenshaw College?

(*b*) Has any step been taken to remedy this state of things as suggested in the above quotation from the Commissioner's Administration Report?'

The Hon'ble MR. FINUCANE replied :—

"As the results of the University examinations for the Ravenshaw College in the three years 1894 to 1896, for which alone Mr. Hallward can be held responsible, were in fact more favourable than those of the three preceding years, 1891 to 1893, when the College was under the control of his predecessor, the Lieutenant-Governor does not think it necessary to take any steps of the kind suggested."

First Arts :—		
1894 to 1896	...	38 passed out of 102.
1891 to 1893	...	37 „ „ 110.
B.A. :—		
1894 to 1896	...	15 passed out of 63.
1891 to 1893	...	10 „ „ 44.

ALLEGED INEFFICIENCY OF THE RAVENSHAW COLLEGE AND COLLEGIATE SCHOOL.

The Hon'ble MR. M. S. DAS asked—

(*a*) Is the Government aware of the fact that out of 17 boys who went up from the Ravenshaw College for the B.A. Examination of the Calcutta University in 1893 only 2 passed, and at the F.A. Examination of the same year only 5 passed out of 40 sent up?

(*b*) Is the Government aware of the fact that Mr. Hallward did not teach any subject in the F.A. classes during the years 1893, 1894 and 1895, though the former Principal, Mr. S. Ager, used to do so?

(*c*) Is the Government aware of the fact that Mr. Hallward only taught English in the B.A. classes, and in doing so he taught the 3rd and 4th year classes together?

(*d*) Is the Government aware of the fact that out of the boys who were sent up from the Ravenshaw College for the B.A. Examinations in 1892, 1893 and 1894, the largest number failed to secure the pass marks in the English language—the subject taught by Mr. Hallward?

(*e*) If the Government is not aware of the facts referred to in the questions (*a*), (*b*), (*c*) and (*d*), will the Government be pleased to cause an enquiry to be made with a view to ascertain the correctness of these statements and place the result of such enquiry on the table for the information of the Council?

(*f*) Will the Government be pleased to take such steps as may restore the Ravenshaw College and the Collegiate School to that condition of efficiency which they had before Mr. Hallward's appointment as Principal, seeing that, to quote Mr. Cooke's words, "*it is the only institution of the kind in Orissa, which as a division is admittedly backward in higher education*"

The Hon'ble MR. FINUCANE replied :—

"(*a*) Mr. Hallward cannot be made responsible for the results of the examinations of 1893, as he had been in charge of the College for only a few months prior to the close of the course.

"(*b*) *and* (*c*) These are matters of departmental routine with which the Lieutenant-Governor does not think it necessary to interfere. The Director of Public Instruction's attention will be called to them. The question appears to ignore the fact that Mr. Hallward for the first time established and taught M.A. classes in English in the Ravenshaw College.

"(*d*) The fact referred to is not peculiar to the Ravenshaw College. The records of the University show that throughout Bengal, generally, more students fail in English than in any other subject.

"(*e*) In the Lieutenant-Governor's opinion the facts are not such as to call for any special enquiry.

"(*f*) See answer to Question No. I. The Lieutenant-Governor does not recognise the justice of the attempt to fasten upon the Principal the sole responsibility for shortcomings of the Ravenshaw College pupils at the University examinations. The College is conducted upon very inexpensive lines, with one European Principal and a staff of Native graduates; the Principal teaches only one subject out of many. Uriya students as a rule are more backward than those of Bengal; and many of the best of them—those who win scholarships—pursue their further studies in Bengal Colleges."

PROHIBITION OF LEAVE IN COLLEGIATE SCHOOL, CUTTACK.

The Hon'ble MR. M. S. DAS asked—

The minor Raja of Baramba was a student of the Ravenshaw Collegiate School at Cuttack. The Commissioner of the Orissa Division as the *ex-officio* Superintendent of the Tributary States is the guardian of the minor. The Superintendent of Tributary States sanctioned the minor Raja's visit to his State on the occasion of his sister's marriage, and for that purpose leave was obtained from the Head Master of the Ravenshaw Collegiate School. His leave expired on 29th November, on which day the Raja's mother reported to the Superintendent of Tributary States that the Raja could not start back for Cuttack till 2nd December, as his presence at home was necessary in connection with some religious ceremonies: on 5th December the Superintendent of Tributary Mahals wrote to the Head Master for an extension of four days' leave, but the Head Master replied that "*under the rules no retrospective leave can be granted.*" The minor Raja was fined and had to undergo 15 days' drill for having overstayed his leave by four days.

(*a*) Have these facts been brought to the notice of the Government? Does the Government approve of the punishment inflicted on the minor Raja under the abovementioned circumstances?

(*b*) Will the Government be pleased to direct the authorities of the Ravenshaw Collegiate School to revoke this sweeping rule against granting retrospective leave, which is allowed even to Government servants in cases of unforeseen emergencies?

REFUND OF EXCISE FINES LEVIED IN RAVENSHAW COLLEGIATE, SCHOOL.

The Hon'ble Mr. M. S. DAS asked—

Is the Government aware of the fact that in the Ravenshaw Collegiate School boys who absented themselves at the end of holidays were, till last week, fined at the rate of six annas a day, though under the rules framed by the Director of Public Instruction they could not be fined at a higher rate than two annas a day?

Will the Government be pleased to direct the Ravenshaw School authorities to refund the excess amounts thus extorted against rules?

The Hon'ble MR. FINUCANE replied:—

"The punishments to be imposed on pupils for unauthorised absence is a matter that Government has left largely in the hands of Principals of Colleges. The Lieutenant-Governor does not think it necessary to take up the time of the Council with a discussion on details of these matters."

BENGAL MUNICIPAL ACT, 1884, AMENDMENT BILL.

The Hon'ble MR. RISLEY presented the Report of the Select Committee on the Bill to further amend the Bengal Municipal Act, 1884.

PUBLIC DEMANDS RECOVERY ACT, 1895, AMENDMENT BILL.

The Hon'ble MR. FINUCANE moved that the Bill to amend the Public Demands Recovery Act, 1895, be referred to a Select Committee consisting of the Hon'ble MR. BOLTON, the Hon'ble MR. PRATT, the Hon'ble RAI DURGA GATI BANERJEA BAHADUR, the Hon'ble MAULVI MUHAMMAD YUSUF, KHAN BAHADUR, the Hon'ble BABU SURENDRANATH BANERJEE, and the Mover, with instructions to report during the next session of the Council.

The Hon'ble BABU GURU PROSHAD SEN said:—"Some of the processes by which we arrive at the amendment of our Acts are known outside this Council as 'tinkering.' I hope I shall be excused for referring to an expression which I hold as very disrespectful to the dignity of this Council. But while I object to the expression, I am afraid there will be some justification for its use if we allow such amending Acts as the present one, which in effect proposes to amend a small Act of 32 sections by an amending Bill of 12 sections. It would be a puzzle to the uninitiated if they are asked, by a reference to the two Acts, to gather the meaning of the amendments made by the amending Act. This Bill will, moreover, be a waste of time and mental labour to the initiated, for while they can finish the reading and understanding of the original Act in ten minutes, they will have to gather the meaning of the amendment by a laborious comparison of the two Acts for hours. I find that by section 3 of this Bill it is proposed to change the figures 19 into 32, and that in another place it is proposed to change the figure 6 into 13."

The Hon'ble MR. RISLEY rose to a point of order. He said:—"The remarks which the Hon'ble Member was now addressing to the Council should either have been made when leave was taken to introduce the Bill, or should be brought forward at a later stage when the details of the Bill come under consideration. At the present stage of the Bill I submit that it is not in order to criticise the details of the Bill, nor is it convenient or in accordance with the practice of the Council."

The Hon'ble THE PRESIDENT said:—"I took a similar objection on a former occasion, but I was overruled. As far as I have heard the Hon'ble Member, his comments, though they may be pertinent when the Bill comes up for consideration of its clauses, are not in order now. But if he has anything to say against the principle of the Bill, this is the time to bring forward his objections. Minor details can be set to right by the Select Committee to whom the Bill is referred, and if the Hon'ble Member thinks any minor details are susceptible of correction or improvement, it will be open to him to send in his views to the Secretary, and I feel sure they will be carefully considered by the Committee."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If I may be permitted to interpose, I wish to say that when sometime ago the learned Advocate-General raised a point of order as to the criticism of minor details on a motion to refer a Bill to a Select Committee, it was held that questions of principle might be discussed at this stage of the proceedings. That indeed is the rule which regulates our proceedings. It may happen that criticisms in respect of details might involve the consideration of questions of principle, and in that case my hon'ble friend would be within his rights in making his comments now."

The Hon'ble THE PRESIDENT said:—"I can only leave it to the good taste of the Hon'ble Member in introducing details in support of his arguments on questions of principle. I do not wish to dictate to him in the slightest degree."

The Hon'ble MR. RISLEY said:—"I invite attention to Rule 33 of the Rules for the Conduct of Business."

The Hon'ble THE PRESIDENT said:—"I raised that very question sometime back against the Hon'ble Mr. Ghose, and it was ruled by the President, Sir Charles Elliott, that it was open to Hon'ble Members to attack the principle of a Bill at this stage of the proceedings. I was overruled, and I had to submit to the overruling power, as the Hon'ble Member in charge of the Bill must submit to my ruling now."

The Hon'ble BABU GURU PROSHAD SEN continued:—"I do not intend to trench on forbidden ground. I was simply going into the question of the principle of the Bill. I was going into the question, not on the ground that the Bill was not necessary, but on the ground that the amendments would make the Bill perfectly useless to the uninitiated as a guide. What I was going to submit with due deference was that in the interests of the public the Act ought to be repealed and a new Act passed incorporating all the amendments which are found to be necessary and useful. As I find from the motion of the Hon'ble Member in charge of the Bill that the report of the Select Committee is to be submitted during the next Session of the Council, which probably means the next cold weather, I do not see why, as there will be no loss of time, the whole Act cannot be recast in the meantime. That, I submit, will make it more easy of comprehension to the general public, who will suffer by having to read two Acts together and in the end remaining as ignorant of their meaning as they were at the beginning."

The Hon'ble MR. FINUCANE said:—"If the Hon'ble Member was not in his remarks questioning the principle of the Bill, then it is admitted that he is out of order. He has raised no question of principle, but merely objects to the form which the Bill has taken, and which, as the matters with which it deals consist of mere details, the Bill must take. It is not denied for one moment that the Bill is necessary, and as the Hon'ble Member does not found his objection on any question of principle, but has only commented on the form which the Bill ought to take, I submit that the motion before the Council ought to be passed. As to the suggestions made for repealing the Act of 1895 altogether, and passing a consolidating and amending Act, it seems to me that the adoption of that course would be objectionable, as it would necessarily re-open a general discussion upon all questions connected with the recovery of public demands—questions which were fully discussed in this Council last year. If I were to bring in a Bill repealing the Act of 1895 and embodying in a new Bill, the existing Act and all the amendments now proposed, the result would be that the time of the Council would be wasted, unless it was understood that questions which were settled last year should not be re-opened. This is a Bill merely of details, and it is quite unnecessary, as far as I can see, to re-open the general questions connected with the law for the recovery of public demands.

"As to the objection raised to the Bill on the ground of the inconvenience that will be caused by having to refer to two Acts on the same subject, I would submit that if the Bill is passed, its provisions can easily be incorporated in and printed with the Act of 1895 for the use of the officials and others whose duties necessitate a reference to the law for the recovery of public demands. I cannot therefore see that any inconvenience will result from the shape which the Bill has taken, while on the other hand it would cause serious inconvenience and waste of the time of the Council to re-open questions which were discussed at length and settled last year."

The Hon'ble THE PRESIDENT said:—"It appears to me that no question of principle is involved in the observations which have been made by the Hon'ble Member, and that what he referred to is altogether a question of convenience. The questions of principle connected with the law for the recovery of public demands have been considered by the members of this Council on previous occasions, and if there is a tacit consent on the part of every member of the Council that he will not raise any question of principle, but only consider matters of form, there will be no difficulty in bringing in and passing a consolidating measure. But as the Hon'ble Mr. Finucane pointed out, if we attempt

to do so, it would lead to a fresh discussion of the whole Act, and would re-open questions which have been thoroughly discussed and settled. Therefore this Bill is to be passed only for correcting certain mistakes which have crept in and for the purpose of introducing certain improvements in the law. It will always be the case that such Bills will be required. Human ingenuity is not capable of devising a measure which will apply to all sorts of circumstances. That was supposed to be done by the Code Napoleon, but nevertheless a French Law library is as large as an English one. We have large number of volumes of case law, but the French have numerous commentaries on their Code—almost as large in number as our Law Reports. No one is wise enough to be able to draft an Act which will provide a remedy for all possible contingencies; and that being so, this Bill is the necessary outcome of the further consideration which has been given to the Act since it was passed, and it has been found necessary to correct the mistakes which have occurred."

The Motion was then put and agreed to.

The Council adjourned to Saturday, the 1st August, 1896.

F. G. WIGLEY,

Offg. Assistant Secretary to the Govt. of Bengal,
Legislative Department.

CALCUTTA;
The 28th July, 1896.

RESOLUTION ON THE REPORT ON THE LEGAL AFFAIRS OF THE GOVERNMENT OF BENGAL FOR THE YEAR 1895-96.

No. 23J.T.

RESOLUTION.

JUDICIAL.

Dated Yacht Rhotas, the 22nd July 1896.

READ—

The Report on the Legal Affairs of the Government of Bengal for the year 1895-96.

Read also—

The Reports of the two previous years and the orders of Government thereon.

IN consequence of the representation made by the Legal Remembrancer in his report for last year, the date fixed for the submission of this report to Government has been changed to the 15th of June.

2. The two appeals referred to in the report for last year as pending before the Privy Council have remained undecided. Two appeals were filed during the year under report in analogous cases, in which the plaintiffs sued to recover possession of certain plots of land assigned by Government for the wet docks at Kidderpore. The suits were dismissed by the High Court on appeal.

3. The table below compares the results of Government litigation in all the Civil Courts of Bengal during 1895-96 with those of the two preceding years:—

	Original Suits.			Appeals— Before Lower Courts.			Appeals— Before High Court.			Total.		
	1893-94.	1894-95.	1895-96.	1893-94.	1894-95.	1895-96.	1893-94.	1894-95.	1895-96.	1893-94.	1894-95.	1895-96.
1	2	3	4	5	6	7	8	9	10	11	12	13
Decided in favour of Government.	209	110	106	47	45	20	27	18	21	283	173	147
Decided against Government	63	36	36	7	12	15	11	2	20(a)	81	50	71(a)
Compromised, remanded or withdrawn.	46	13	47	18	8	3	6	4	5	70	25	55
Percentage in favour of Government.	76·8	75·3	74·6	87·03	78·9	57·1	71·05	90	84	77·7	74·2	72·7

(a) 17 were analogous cases.

Excluding cases under the Land Acquisition Act, the figures are as under:—

	Original Suits.			Appeals— Before Lower Courts.			Appeals— Before High Court.			Total.		
	1893-94.	1894-95	1895-96.	1893-94.	1894-95	1895-96.	1893-94.	1894-95	1895-96.	1893-94.	1894-95.	1895-96.
1	2	3	4	5	6	7	8	9	10	11	12	13
Decided in favour of Government.	104	86	88	47	45	20	27	17	21	178	148	129
Decided against Government ...	40	36	34	7	12	15	9	1	19(a)	56	49	68(a)
Compromised, remanded or withdrawn.	21	12	45	18	7	3	5	4	5	44	23	53
Percentage in favour of Govern-	73·2	70·4	73·1	87·03	78·9	57·1	75	94·4	87·5	76·06	75·1	71·2

These figures show that there was a slight increase in Government litigation as compared with the previous year. The results, however, were less favourable to Government.

4. In the High Court, four cases were decided against Government, as compared with two in the preceding year. One judgment of the Court decided 17 analogous cases which were brought for setting aside the proceedings of the Settlement Officer appointed to prepare a record-of-rights relating to a Government khas mahal in pargana Singergaon. The Settlement Officer, acting under section 104 (2) of the Bengal Tenancy Act, of his own motion settled what appeared to him to be fair and equitable rents. No appeal was preferred to the Special Judge under the Bengal Tenancy Act, but these suits were instituted in the Munsif's Court. The Munsif held that the Settlement Officer's decision had the force of a decree, and that the question tried by him was *res judicata*. On appeal, the Subordinate Judge reversed this decision, and remanded the suits for re-trial on their merits, and this order was upheld by the High Court. The effect of this decision, if it is treated as establishing a general principle, is to do away with the finality which has hitherto been held to attach to orders fixing rents in proceedings under Chapter X of the Bengal Tenancy Act. In the Lower Appellate Courts, 15 cases were decided against Government, and the percentage of cases decided in favour of Government fell from 78·9 in 1894-95 to 57·1. This unfavourable result is attributed by the Legal Remembrancer, as in the report of the previous year, to the fact that in most of the cases his sanction was not taken as to the grounds on which the appeals were to be argued. As the Civil Court Rules do not distinctly prescribe that this should be done, the Legal Remembrancer states that the Collectors are not to blame. This omission is being rectified in a revised issue of the rules, now under the consideration of this Government. The Lieutenant-Governor cannot, however, regard this explanation as altogether satisfactory, and is not satisfied that sound judgment was in all cases exercised by the local officers or sufficient care taken in setting out the Government case. In Courts of first instance, the results of litigation was much the same as in the preceding year, 74·6 per cent. of the cases having been decided in favour of Government, as compared with 75·5 per cent. in 1894-95.

5. The following statement shows the results of Court of Wards' litigation during the past three years in all Courts:—

	1893-94.	1894-95.	1895-96.
1	2	3	4
Decided in favour of Court of Wards ...	1,322	1,561	1,839
Decided against Court of Wards ...	133	215	149
Compromised, remanded or withdrawn ...	55	49	188
Percentage in favour of Court of Wards ...	90·8	87·8	92·5

There has again been a very large increase in the number of Court of Wards' cases, which has risen from 1,510 in 1893-94 to 1,825 in 1894-95 and 2,176 in 1895-96. The increase occurred chiefly in cases in the Courts of first instance, which have risen from 1,432 in 1893-94 to 2,061 in the past year. It has not been explained in the report. Of 17 cases decided in the High Court, only 5 were decreed against the Court of Wards. In the Lower Appellate Courts 34 cases were decided against the Court of Wards, being mostly suits for recovery of rent, and *zamindari dák* and other cesses, for establishment of occupancy rights, and for setting aside sales held under the certificate procedure. In 20 of these cases the Court of Wards appeared as Appellant. In the Courts of first instance the percentage (94·1) of cases decided in favour of the Court of Wards was very satisfactory, being the highest recorded since 1882-83. Out of the 110 cases decided adversely, the Court was plaintiff in 64 and defendant in 46 cases. Most of these suits were of a Small Cause Court nature, and below Rs. 500 in value.

6. The following Table shows the extent to which decretal amounts, due to Government, have been realized in 1895-96 and the two previous years :—

	1893-94.	1894-95.	1895-96.
1	2	3	4
	Rs.	Rs	Rs.
(1) Amount under realization	47,190	34,726	67,188
(2) Amount realized during the year ...	8,943	6,034	25,753
(3) Percentage of recovery	18·9	17·3	38·3

It is satisfactory to observe a marked increase in the percentage of recovery in the past year, but there is still much room for further improvement. It has been suggested that the Collectorate Nazir should be allowed a commission of 20 per cent. on the amounts realized by him, and that when all the necessary steps prescribed by the rules have been taken, and the amount is still found to be irrecoverable, the decree may be sold by auction in the Collector's office, after due publication. These proposals have still to receive the consideration of Government, and attention will be given to the Legal Remembrancer's remarks deprecating the sale of decrees, in which the Lieutenant-Governor is disposed to agree. The largest outstanding balances on the 1st April 1896 are shown by the districts noted in the margin. In Lohardaga, Darbhanga and Faridpur, the amounts are chiefly made up of a few heavy decrees, the non-realization of which has been explained, but in the 24-Parganas and Gaya energetic measures appear not to have been adopted. The Lieutenant-Governor is pleased to find that the large balance reported from the Sonthal Parganas last year, and referred to in the Resolution of this Government, was wholly realized during the year.

	Rs.
24-Parganas ...	7,871
Lohardaga ...	6,539
Darbhanga ...	3,868
Gaya	2,672
Faridpur	2,670

7. The realisations in cases of Wards' decrees during the three years are shown in the table subjoined:—

	1893-94.	1894-95.	1895-96.
1	2	3	4
	Rs.	Rs.	Rs.
1. Amount under realisation	10,80,794	8,83,083	9,59,451
2. ,, realised during the year ...	2,00,671	1,51,139	2,54,422
3. Percentage of recovery	18·56	17·11	26·5

These figures are satisfactory in so far as they disclose that an effort has been made to improve on the very poor returns of the previous year, which were animadverted upon by Government. The percentage of recovery, though still very poor, has reached a higher figure than has been attained for many years past. Many of the estates, however, have made little progress in this very important respect. The largest balances are shown, as usual, by the Burdwan and Tikari Raj Estates, in which the sums outstanding at the close of the year were Rs. 2,24,667 and Rs. 2,06,051, respectively. In 15 other estates, among which the Deo and Dharm Kumar's Estate in Shahabad, the Khagra Estate in Purnea, and the A. C. Roy's Estate in Backergunge, are prominent, the realisations are shown to have been exceptionally unsatisfactory. This subject still demands the special attention of the Board of Revenue.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Superintendent and Remembrancer of Legal Affairs, and to the Solicitor to Government, for information.

Ordered also that a copy of this Resolution be forwarded to the Revenue Department of this Government, and to the Board of Revenue, for information.

Ordered also that a copy of the Report and of the Resolution be submitted to the Government of India, in the Home Department, for information.

Ordered also that a copy of the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Offg. Chief Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON THE CALCUTTA MEDICAL INSTITUTIONS FOR THE YEAR 1895.

MUNICIPAL DEPARTMENT—MEDICAL.

Calcutta, the 28th July 1896.

RESOLUTION—No. 3142Medl.

READ—

The Report on the Calcutta Medical Institutions for the year 1895.

Read also—

The Report for the year 1894 and the Resolution recorded upon it.

The mortality in Calcutta and Howrah during the year 1895 was exceptional. In Calcutta the death-rate rose from 32·9 to 39·6 per thousand; in Howrah from 25·95 to no less than 42·84. A comparison with the figures available, for Calcutta from the year 1889, and for Howrah from 1885, shows that these rates have been unapproached of late years. In Calcutta the small-pox epidemic, breaking out at the end of 1894, reached its height during the early months of 1895 and increased the number of deaths under this head from 405 to 2,220; the mortality from fever rose within the same period from 8,963 to 11,345; and the deaths from cholera numbered more by 404 than in the previous year. In Howrah the deaths from cholera rose from 513 to 1,295, and those from small-pox from 11 to 65, while the mortality from "other causes" increased from 645 to 1,044.

2. The numbers of in-door and out-door patients treated during the last two years in the hospitals of Calcutta and Howrah are compared in the following table:—

Names of Institutions.	1894.								1895.							
	Indoor.			Outdoor.		Total number of patients, both indoor and out-door.	Total number of deaths among indoor patients.	Percentage of deaths on total number of in-door patients treated.	Indoor.			Outdoor.		Total number of patients treated, both indoor and out-door.	Total number of deaths among indoor patients.	Percentage of deaths among total number of indoor patients.
	Number treated.	Daily average.	Number of beds available.	Number treated.	Daily average.				Number treated.	Daily average.	Number of beds available.	Number treated.	Daily average.

Total ...	23,318	1,222·83	1,603	252,928	1,784·93	276,246	3,073	13·49	25,130	1,234·94	1,641	254,981	1,760·58	280,111	3,350	13·59
Howrah General Hospital	1,594	58·53	108	11,113	86·44	12,707	359	22·52	1,749	68·69	112	11,691	87·36	13,440	429	24·52
Grand Total ...	24,912	1,281·36	1,711	264,041	1,871·37	288,953	3,432	14·08	26,879	1,303·63	1,753	266,672	1,847·94	293,551	3,779	14·32

3. The number of out-patients, 266,672 against 264,041 in 1894, shows an increase of 2,631. The attendance at the Medical College rose by 535, owing to the growing popularity of the out-door ward at the Eden Hospital, and of the special department for the treatment of diseases of the throat, ear and nose, under Surgeon-Captain O'Kinealy. The increase of 216 at the Presidency General Hospital is ascribed to the fact that the out-door department worked throughout the year, instead of for nine months only. At the Campbell

Hospital an increase of 1,127 is reported, but the accuracy of the statistics is open to question owing to the issue in some cases of duplicate tickets. The numbers at the Mayo and Chandney Hospitals rose by 2,004, at the Chitpur Dispensary by 1,505, at the Bhowanipur Dispensary by 317, and at the Howrah General Hospital by 578. Against this the Park Street Dispensary shows a falling off of 1,819, the Sukea Street Dispensary of 1,112, and the Dufferin Victoria Hospital of 720.

4. The number of in-door patients rose from 24,912 to 26,879. The increase of 1,967 was shared by all the hospitals except the Medical College, where the number fell by 93, and was most marked at the Campbell and Police Hospitals, owing to the admission at the former of a large number of small-pox cases, and in the case of the latter to the unusual prevalence of malarial fever among the police.

5. Including out-door and in-door patients, 178,982 men, 45,764 women, and 68,805 children were treated during the year. The total number of men rose by 7,898, and that of women by 50, while the number of children treated was less by 3,350 than in 1894, the net increase, taking all classes together, being 4,958. Of the whole number treated, Hindus formed 49·3 per cent., Muhammadans 32·1, Eurasians 11·9, and Europeans 2·9. The number of Muhammadans decreased by 1,499; that of Eurasians rose by 3,132 and that of Hindus by 4,239.

6. Excluding the cases treated in the Eye Infirmary, the death-rate fo all the institutions rose from 14 0 to 14·3, the highest mortality recorded for 1 years. Depending as this does to a great extent upon the class of patient an the condition in which he is brought to the hospital, the rate varies withi wide limits. Thus the death-rate for men ranged from ·67 at the Polic Hospital, where the bulk of the patients are men in the prime of life, to 22·5 at the Campbell Hospital, which receives all the waifs and strays of Calcutta and at the Howrah Hospital, where an unusual number of moribund cases many of them pilgrims, were admitted, it reached 24·11. Similarly in th case of adult women, the Dufferin Victoria Hospital shows a rate of ·8 and the Campbell Hospital of 32·71. At the Presidency General Hospita the death-rate among female children rose from 3·75 to 10·83, the reaso assigned being the emaciated condition of many of the children who wer brought for treatment.

7. The epidemic of small-pox, which commenced in December 1894 continued to increase in virulence till March 1895, when the mortality bega to diminish. During January, February, and March there were 104, 23 and 260 cases in the Sealdah Small-pox Hospital, which necessitated th erection of temporary sheds to supplement the existing accommodation. Th number of Europeans and Eurasians among the patients was unprecedented being 213 against 32 in 1894, while the number of natives increased from 144 t 552. Altogether, 765 patients were treated at the Sealdah Hospital: of these 239 were said to have been vaccinated, among whom 27, or 11·29 per cent., died, but of these only 4 had distinct scars. Among 480 cases that were unprotected either by vaccination or inoculation, 244, or 50·83 per cent., died.

8. The number of admissions for cholera rose to 600 against 567 in 1894, 349 cases, or 58·16 per cent., proving fatal, against 323, or 56·96 per cent., in the previous year. The death-rate fell among Europeans and Eurasians from 72·72 to 56·81, and rose among other classes from 56·33 to 58·27. Five cases, of which no explanation could be furnished, originated at the Campbell Hospital, of which three were fatal. Although this compares favourably with the 14 unexplained cases of 1894, the fact of cholera showing itself in a hospital on such a scale in two successive years seems *primâ facie* to indicate that the sanitary arrangements must be defective. Although cholera was extremely prevalent in Howrah during the year, no case occurred in the hospital. It may be hoped that the recent provision of a supply of filtered water for the town of Howrah will materially reduce the mortality from this cause, and it will be interesting to observe the effect of the new water-works on the mortuary statistics for the present year.

9. The admissions to hospital on account of dysentery increased from 8,363 to 9,206, and the death-rate from 30·17 to 32·17. Sixty per cent. of

the cases were treated in the Campbell Hospital, where the rate of mortality under this head reached 42·36, while among native patients at the Howrah Hospital it amounted to 53·94. Both of these hospitals always receive a large number of moribund cases, and at Howrah the majority of these are said to have been pilgrims. Diarrhœa cases fell off by 99, and the death-rate decreased from 35·86 to 32·37. The number of in-patients treated for malarial fever rose from 4,059 to 5,107, and of out-patients from 49,676 to 54,149. In the Presidency General Hospital the number of Europeans and Eurasians admitted increased from 181 to 437, and the Superintendent observes that the increase was most marked among residents of Calcutta. The total death-rate, however, fell from 12·21 to 8·73. The number of persons treated for venereal diseases increased by 255, but the more serious cases show a decrease. Leprosy patients numbered only 17, half the number of 1894. The new Leper Asylum has not yet been built, but a site has been selected at Gobra, and the plan is under consideration.

10. Major operations numbered 3,775, against 3,643 in the previous year; 124 ended fatally, giving a death-rate of 3·15, as compared with 3·4 in 1894. The Campbell Hospital showed an increase of 112 major operations, but such an increase was to be expected, seeing that a separate surgical ward had been opened in the hospital during the year, and the Lieutenant-Governor hopes that the surgical work of the current year will show a further improvement. At the Medical College Hospital 2,117 major operations were performed, being 18 less than in 1894; the death-rate was 3·33 against 3·44. At the Dufferin Victoria Hospital there was a decrease of 14 in the number of major operations.

11. The total number of women and children admitted at the Eden Hospital fell from 1,462 to 1,453, of whom 718 were Europeans, 581 Hindus and Muhammadans, while 154 belonged to other classes. The death-rate for Europeans was 6·23 and for the others 12·56 and 7·59, respectively; the figures for the previous year being 5·48, 10·59 and 6·80. The mortality among Hindu and Muhammadan children was remarkably high, 46·15 against 33·89 in 1894; the lower rate of 15·67 among European children is explained by their being brought to hospital at an earlier stage of disease. Confinement cases decreased from 618 to 546; but of these only 34 proved fatal, against 23 in the previous year. There was an increase of 2 in cases of septicæmia; but out of the 25 cases which occurred, only 7 originated within the hospital, against 14 in the previous year. The Inspector-General has no doubt that septicæmia is to a certain extent introduced into the hospital by persons admitted with septic symptoms. A separate ward for such patients was opened in June 1895, and it is hoped that the segregation of these cases will have a good effect. There were 357 major operations performed in the hospital, 30 of which ended in death. This compares unfavourably with the figures of the previous year—392 with 26 deaths. Minor operations, rose from 2,747 to 4,803, and at the out-door department the number of patients increased from 3,990 to 7,083. Since the close of the year under review, attention has been drawn to certain defects in the structural arrangements of the Eden Hospital, and a Committee has been appointed to consider and report on the subject.

12. In the Shama Churn Law Eye Hospital the number of in-door patients decreased from 506 to 452: that of out-patients, on the other hand, rose from 11,964 to 13,725. Operations for extraction of the lens numbered 328, of which 252, or 76·82 per cent., were successful.

13. The Ezra Hospital showed a decrease both in in-door and out-door patients: the number of the former fell from 287 to 199, and of the latter from 1,674 to 1,624. Although beds for 20 patients were provided, the daily average of sick was only 13·20. The total cost of the hospital was Rs. 6,107-12, to which Government contributed Rs. 5,231-12, or 85·65 per cent.

14. The work of the nurses at the Medical College and the Presidency General Hospitals, under the supervision of the Clewer Sisters, is favourably reported on by the Inspector-General. At the Campbell and Howrah Hospitals nurses locally selected appear to have given satisfaction. Seventeen nurses and eleven dhais passed out of the Eden Hospital during the year.

15. The invested capital of the Calcutta and Howrah Hospitals shows an increase from Rs. 5,93,300 to Rs. 5,99,400. The Howrah Hospital

invested Rs. 4,500, the Campbell Hospital Rs. 100, and the Governors of the Mayo Hospital invested Rs. 3,34,921, which represents the sale and reinvestment of Government securities held by them, but also included a donation of Rs. 1,500 from the Maharani of Mysore and Rs. 1,986 saved from their ordinary income. The following statement compares the main heads of receipts and expenditure for all the hospitals during the year:—

INCOME.

	1894. Rs.	1895. Rs.
Opening balance	29,519	33,025
From Government	3,24,585	3,32,984

„ bazar medicines	5,535	5,649
„ European medicines	32,685	32,623
„ diet	1,27,840	1,33,770
Miscellaneous charges	85,522	87,752
Buildings and repairs	58,778	70,531
	5,12,955	5,38,770
Invested during the year	6,300	3,39,528
Closing balance ...	33,025	28,941
GRAND TOTAL ...	5,52,280	9,07,239

16. Excluding the opening balance and the receipts from securities sold, the total income of the year amounted to Rs. 2,09,797, or Rs. 11,621 more than in 1894. The cost to Government increased by Rs. 8,399, owing to additional expense having been incurred under Salaries of Medical Officers, European Medicines, Diet, and Special Allowances. Receipts from paying patients show an increase of Rs. 5,986, mainly due to the admission at the Campbell Hospital of a large number of European paying patients, who had been attacked with small-pox. Miscellaneous receipts fell off by Rs. 422; subscriptions showed a rise of Rs. 3,119, and there was a slight increase in the receipts from municipal funds. The total expenditure rose from Rs. 5,12,955 to Rs. 5,38,770. The amount spent on buildings and repairs increased by Rs. 11,753, quadrennial repairs at the Presidency General Hospital absorbing Rs. 8,947. The cost of diets increased by Rs. 5,930 owing to the larger number of patients under treatment. During the year the sum of Rs. 3,39,528 was invested, almost entirely by the Mayo Hospital, against Rs. 6,300 in 1894 and Rs. 4,029 in 1893.

17. The report contains an interesting comparison of the cost per patient, under the chief heads of expenditure, at each of the different hospitals. As was remarked last year, such statistics do not necessarily afford a final test of hospital management, and they require to be judged with reference to the special circumstances of each institution. After making full allowance for these considerations, the Lieutenant-Governor is disposed to accept the Inspector-General's opinion that the numbers of the compounders at the Howrah Hospital, and of the compounders and dressers at the Mayo Institutions, are

capable of being reduced, and that a disproportionate number of menial servants are employed at the Sukea Street Dispensary. The establishment of the General and Campbell Hospitals seems also to be unduly high as compared with that of similar hospitals at Bombay, and the Lieutenant-Governor will be glad to consider any definite proposals for reducing it which the Inspector-General may submit. It is satisfactory to find that the high cost of medicines at the General Hospital, commented on in last year's Resolution, has been reduced. At the Mayo Hospital, however, the expenditure under this head came to Rs. 43-5-3 per patient, as compared with Rs. 36-5-8 at the General Hospital and Rs. 34-12-2 at the Medical College. The Inspector-General states that there is great room for economy at this hospital, and intimates a doubt whether proper supervision is exercised over the issue of medicines. The Lieutenant-Governor will await the report on the subject which Dr. Ross proposes to submit.

18. Last year the Inspector-General recommended that medical officers of the Presidency might be allowed to purchase their drugs and instruments from England. It is now, however, reported that medicines are supplied by the Government Medical Store Depôt cheaper than by private firms in England. No change will, therefore, be made in the existing system.

19. The new hospital in Bhowanipur, which is intended to accommodate native patients in the south of Calcutta, has been completed since the close of the year at an approximate cost of Rs. 1,30,000, and will be open soon. It will form a valuable addition to the medical institutions of the city, and will meet a want which has been greatly felt. The Municipal Commissioners have contributed a substantial proportion of the cost of construction, and also make a grant towards its maintenance. It will be managed by a Board of six Governors, of whom four will be appointed by Government and two by the Corporation.

20. Surgeon-Colonel R. Harvey was Inspector-General of Civil Hospitals up to 23rd March 1895, when he was succeeded by Surgeon-Colonel G. C. Ross, who remained in charge till the end of the year. The thanks of the Lieutenant-Governor are due to Dr. Ross for his frequent and careful inspections of the Calcutta Hospitals and his energetic endeavours to introduce reforms in their structural and administrative arrangements. Sir Alexander Mackenzie recognises that, owing to causes for the most part beyond the control of the medical officers in charge, several of the Calcutta Hospitals fall conspicuously short of the standard of comfort and efficiency which the advance of medical science demands. Steps are now being taken to ascertain how the special needs of each institution can best be met; and if the Provincial finances continue to prosper, the Lieutenant-Governor hopes that it will be possible within a reasonable period to remove many of the chief defects.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

Government of Bengal,

IRRIGATION DEPARTMENT.

Calcutta,
The 23rd July 1896.

A. S. THOMSON,
Under-Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 27th July, 1896.

Burdwan.—Rainfall at Sadar 1·96. Weather hot and cloudy. Transplantation of *aman* is retarded for want of rain. *Aus* and jute getting on well, but rain is wanted all over the district. Condition of cattle good. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	c.	
Sadar	11 to 15	0	per rupee.
Kalna	12	0	
Katwa	13	2	
Raniganj	13	8	

Midnapore.—Rainfall at Sadar 3·13, Contai 4·91, Tamluk 9·91. Weather cloudy and rainy. Transplantation of *aman* paddy going on. Prospects of indigo, sugarcane, *til* and jute are good. Cattle-disease reported from Dantan. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Contai	17 to 20	
Tamluk	13	

24-Parganas.—Rainfall at Sadar 5·79. Weather stormy. Prospects of *aus* crop favourable. Jute has been injured by insects in Barasat and Basirhat. Transplantation of *aman* continues, but is delayed in Diamond Harbour owing to excessive rain. Fodder and water sufficient. Condition of cattle good. Common rice sells at—

	Srs.	c.	
Sadar	10 to 13	0	per rupee.
Barasat	10	0	
Basirhat	11	10	
Diamond Harbour	11	6	

Murshidabad.—Rainfall at Sadar 1·05, Kandi 1·89, Jangipur 6·58. Weather hot. Transplantation of *aman* continues. Manufacture of indigo proceeding. Standing crops promising well. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Khulna 3·77, Bagirhat 5·70, Satkhira 3·63. Weather rainy. Recent rain has improved the prospects of *aman* rice, which are now fairly good. No cattle-disease. Fodder and water sufficient. Prices of common rice:—

	Srs.	c.	
Sadar	11 to 12	0	per rupee.
Bagirhat	11	11	
Satkhira	11	0	

Dinajpur.—Average rainfall 2·36. Weather very hot. *Aus* and jute injured for want of rain. Rain is also much wanted for the cultivation of *aman*. Common rice sells from 11 to 14 seers per rupee. Slight outbreak of cattle-disease. Water and fodder sufficient.

Rangpur.—Average rainfall 2·40. Harvesting of *aus* and jute and transplantation of *aman* going on. Prospects fair. Common rice selling at 15 seers per rupee. Fodder and water sufficient.

Pabna.—Rainfall 1·27. Weather seasonable. Prospects of crops favourable.

Dacca.—Rainfall 3·14. Weather excessively hot. Harvesting of *aus* paddy nearly completed. Jute has been partially damaged by insects in Manikganj. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice sells at 12 seers per rupee.

Chittagong.—Rainfall 5·72. Weather hot. Harvesting of *aus* continues. Transplantation of *aman* has begun, but more rain is wanted. Water and fodder sufficient. Coarse rice selling at 13 seers per rupee.

Patna.—Rainfall at Sadar ·90. Transplantation of paddy in progress. Prospects of *bhadoi* favourable. Common rice selling at 17 seers per rupee. Prices rising in Barh. Fodder and water sufficient.

Gaya.—*Bhadoi* crops doing well. Transplantation of paddy commenced. Price of common rice at Sadar 13½ seers, against average of 13¾ seers per rupee.

Champaran.—Rainfall at Sadar ·06. Hot and sultry weather. Rain required for transplanting rice. Price of common rice at Sadar 17 seers, against an average of 13½ seers per rupee.

Darbhanga.—Rainfall at Sadar 1·17, Madhubani ·73, Samastipur 1·85. More rain wanted at Madhubani and Sadar for transplanting paddy. Break in rains at Samastipur was beneficial to *bhadoi*. Fodder sufficient. Common rice selling at 15 seers per rupee.

Bhagalpur.—Rainfall at Sadar ·48. Heat prevails everywhere in the district. Transplanting still going on. Prospects of standing crops good. Common rice is sold at 15 seers per rupee. Cattle-disease reported from some places in the interior of all subdivisions. Fodder and water sufficient.

Purnea.—Rainfall ·41. Prospects of *bhadoi* paddy and jute fair. Transplantation of *aghani* paddy in progress. Indigo is being cut. Cattle-disease reported from Kasba, Kishanganj, Dhamdaha, Kadwa and Matiari thanas. Fodder and water sufficient. Common rice sells from 14 to 17 seers per rupee.

Cuttack.—Rainfall 5·45. Weather cloudy. Heavy floods in Katjori and Mahanadi rivers. Agricultural prospects generally good, but what damage done by floods not yet known. Fodder sufficient. Common rice sells at—

		Srs.	c.	
Cuttack	... ...	19	1	per rupee.
Jajpur	... ...	25	0	
Kendrapara	... ...	26	4	
Banki	... ...	26	8	

Hazaribagh.—Rainfall at Sadar 7·06, Giridih 7·47. Weather seasonable. Sowing of paddy and *bhadoi* crops completed. Rice sells from 11 to 14 seers per rupee.

General Summary.—There was rain in all parts of the Province during the week, the falls being heavy in the south of Bengal, Orissa and Chota Nagpur. The general agricultural prospects are favourable, but in the west of Bengal and parts of Bihar more rain is required for the transplanting of winter rice. All standing crops are reported to be doing well. In Northern and Eastern Bengal the harvesting of early rice and jute is proceeding. The manufacture of indigo has begun. Cattle-disease is still reported from Midnapore, Bhagalpur and Purnea. The price of common rice is generally stationary. The cyclone and storm-wave which, as previously reported, occurred in Noakhali on the 27th June, also passed over the eastern part of Backergunge, doing some damage to the crops. The latest report from Noakhali shows that damage was done to the crops more or less throughout the whole littoral, but the greatest mischief was in Hatia. There may possibly be some distress among the poorer classes in a limited area, and enquiries are being made with a view to undertake relief measures if necessary. Heavy floods are reported from Cuttack, but the damage done is not yet known.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT, M. FINUCANE,

The 28th July, 1896. *Offg. Secy. to the Govt. of Bengal.*

Results of the Meteorological Observations taken at the Alipore Observatory from 19th to 25th July 1896.

	Inches.
The mean pressure of the seven days	29·461
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·518
	Hours.
The total number of hours of bright sunshine	23·9
The maximum possible number of hours of sunshine	92·9
	°
The mean temperature of the seven days	82 7
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83·4
The extreme variation of temperature	12·4
The maximum temperature	89·9
	Miles.
The highest velocity of the wind in one hour	14
	%
The mean relative humidity	88
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	86
	Inches.
The total fall of rain from 19th to 25th July 1896	5·60
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·69
The total fall from 1st January to 25th July 1896	31·67
The average fall of the corresponding period for 24 years, Surveyor-General's Office	31·38

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ≤, lightning.

Results of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 19th to 25th July 1896.

LIBERALITY OF RAI CAMALESHWARI PROSHAD SINGH BAHADUR.

No. 3287Med., dated Calcutta, the 3rd August 1896.

From—H. H. RISLEY, Esq., C.I.E., Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Bhagalpur Division.

I AM directed to acknowledge the receipt of your memorandum No. 851J., dated the 23rd July 1896, forwarding for information a copy of a letter from the Magistrate of Monghyr, reporting that Rai Camaleshwari Proshad Singh Bahadur has built a Zanana Hospital in the town of Monghyr at a cost of Rs. 8,056.

2. In reply, I am directed to request that you will be so good as to convey to the Rai Bahadur the thanks of His Honour the Lieutenant-Governor for his liberality and public spirit. The correspondence will be published in the *Calcutta Gazette*.

No. 851J., dated Bhagalpur, the 23rd July 1896.

Memo. by—W. B. OLDHAM, Esq., Commissioner of the Bhagalpur Division and Sonthal Parganas.

COPY of the following forwarded to the Government of Bengal, Municipal Department. This is the Hospital which was opened at Monghyr on the 16th July 1896 by His Honour the Lieutenant-Governor.

No. 1380J., dated Monghyr, the 14th July 1896.

From—C. R. MARRIOTT, Esq., Magistrate of Monghyr,
To—The Commissioner of the Bhagalpur Division.

I HAVE the honour to inform you that Rai Camaleshwari Proshad Singh Bahadur has built a Zanana Hospital in this town at a cost of Rs. 8,056. The building is now complete, and will be opened for the reception of female patients very shortly. I request that his liberality and public spirit may be acknowledged in suitable terms by publication in the *Calcutta Gazette*.

WEATHER AND CROP

For the week ending the 3rd A

Burdwan.—Rainfall at Sadar 1·20, Kalna ·56, K hot and cloudy. Standing crops doing well, but transplantation of *aman* paddy greatly retarded everywhere for want of rain. Condition of cattle good. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	c.	
Sadar	11 to 16	0	per rupee.
Kalna	12	0	
Katwa	13	2	
Raniganj	13	8	

Midnapore.—Rainfall at Sadar 2·50, Tamluk 3·54, Ghatal 4·19. Weather seasonable. Prospects of indigo and sugarcane good. Transplantation of *aman* progressing favourably. Jute is suffering from heavy rain and high wind. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Tamluk	13	
Ghatal	13½ to 15	

24-Parganas.—Rainfall 3·54. Weather cloudy with showers. Prospects of *aus* crop favourable. Harvesting of jute commenced in the Diamond Harbour subdivision with an estimated outturn of 12 annas. Transplantation of *aman* continues, but is delayed in Diamond Harbour owing to excessive rain. Fodder and water sufficient. Condition of cattle good. Common rice selling as follows:—

	Srs.	c.	
Sadar	10 to 13	0	per rupee.
Barasat	10	0	
Basirhat	11	10	
Diamond Harbour	11	6	

Murshidabad.—Rainfall at Sadar ·73, Jangipur ·56, Kandi ·33. Weather hot. More rain wanted. Transplantation of *aman* still going on. *Bhadoi* and jute plants thriving well. Manufacturing of indigo proceeding. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar ·75, Bagirhat 1·01, Satkhira 2·30. Weather very hot with occasional slight showers. More rain is urgently wanted in the south of the Satkhira subdivision and in Bagirhat for transplanting rice. *Aus* and jute doing well. No cattle disease. Fodder sufficient. Common rice selling as follows:—

	Srs.	c.	
Sadar	11 to 12	0	per rupee.
Bagirhat	12	6	
Satkhira	10	8	

Dinajpur.—Average rainfall ·16. Weather seasonable with high easterly wind. *Aus* and jute suffering for want of rain. Transplantation of *aman* is also being retarded. Fodder and water sufficient. Slight outbreak of cattle-disease in some places in the mufassal and Sadar. Common rice selling from 12 to 13 seers per rupee.

Rangpur.—Average rainfall ·21. Harvesting of *aus* and jute going on. Transplantation of *aman* on high lands retarded for want of rain. Prospects fair. Fodder and water sufficient. Common rice selling at 9 to 14 seers per rupee.

Pabna.—Rainfall 2·64. Weather hot and dry. Want of rain and lowness of the river are retarding the progress of the crops. Fodder available. Rice selling from 9 to 14 seers per rupee.

Dacca.—Rainfall ·57. Weather excessively hot. Harvesting of *aus* paddy nearly completed and that of jute going on. Prospects appear good. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Chittagong.—Rainfall 1·70. Weather hot. Harvesting of *aus* continues; average outturn expected. Transplantation of *aman* retarded for want of rain. Fodder and water sufficient. Rice selling at 14 seers per rupee.

Patna.—Rainfall at Sadar ·12. Prospects of *bhadoi* crops favourable. Transplantation of paddy retarded for want of rain, which is deficient except in Barh. Prices rising in Barh and Patna City. Common rice selling at 16½ seers per rupee. Fodder and water sufficient.

Gaya.—*Bhadoi* crops doing well. Transplantation of paddy continues, but more rain is wanted.

Champaran.—Rainfall at Sadar ·03. Rain everywhere badly wanted, especially in Bettiah. Transplantation of paddy at a standstill. Price of common rice has risen from 17 to 16¼ seers, against average of 13½ seers per rupee. Fodder and water ample.

Darbhanga.—Rainfall at Sadar ·16, Madhubani ·43, Samastipur nil. Prospects of *bhadoi* crops favourable. But all crops want rain, and transplantation of paddy retarded. Common rice selling at 15 seers per rupee. Fodder sufficient.

Bhagalpur.—Rainfall at Sadar ·03. Extreme heat prevailed throughout the district until 1st August; since then sky overcast and strong east wind blowing. Rain urgently wanted everywhere except at Banka. Transplantation of crops is stopped owing to want of rain in Sadar, Madhipura, and Supaul. Common rice is sold at 15 seers per rupee. Cattle-disease reported from some places. Fodder and water sufficient.

Purnea.—Rainfall ·48. Rain needed for *bhadoi* and *aghani* paddy. Cutting of jute commenced. Indigo manufacture nearly finished. Cattle-disease reported from some police-stations, and a veterinary assistant sent here for treatment. Fodder and water sufficient. Common rice sells from 12 to 16 seers per rupee.

Cuttack.—Report not received.

Hazaribagh.—Rainfall at Sadar 2·93, Giridih 1·28. Weather seasonable. Transplanting in progress. Rice sells from 10 to 12 seers per rupee.

General Summary.—There was general, and in places heavy, rain in the south of the Province, but elsewhere rainfall has been scanty, and more is urgently needed for the transplanting of winter rice. The prospects of *bhadoi* crops are generally favourable. Sugarcane is doing well. The harvesting of early rice and jute is in progress, and indigo manufacture is going on. Cattle-disease continues in Purnea and Bhagalpur, and a slight outbreak is reported from Dinajpur. The price of common rice continues steady, but shows an upward tendency in some districts. Further report from Noakhali shows that there is very slight distress in the island of Hatia, and measures are being taken to relieve such distress as exists. No report received from Cuttack, where heavy floods were reported last week.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 4th August, 1896.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

The extreme variation of temperature	11·1
The maximum temperature	89·4
	Miles.
The highest velocity of the wind in one hour	22
	%
The mean relative humidity	87
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	86
	Inches.
The total fall of rain from 26th July to 1st August 1896	2·21
The average fall of the corresponding period for 24 years, Surveyor-General's Office	4·04
The total fall from 1st January to 1st August 1896	33·88
The average fall of the corresponding period for 24 years, Surveyor-General's Office	35·42

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers.

RESOLUTION ON THE ADMINISTRATION REPORTS OF THE ALIPORE AND HAZARIBAGH REFORMATORY SCHOOLS FOR THE YEAR 1895.

No. 50P.T.

RESOLUTION.

JAILS.

Dated Yacht Rhotas, the 10th August 1896.

READ—

Letter No. 6022, dated the 8th June 1896, from the Inspector-General of Jails, submitting the Annual Reports on the Alipore and Hazaribagh Reformatory Schools for the year 1895.

Read also—

The Reports for the years 1894 and 1893, and the orders of Government recorded thereon.

In accordance with the orders conveyed in this office letter No. 225P., dated the 18th January 1896, these reports have been submitted after the Annual Administration Report of the Jail Department was laid before Government, and the tabular statements have been drawn up in the revised forms prescribed. There is still, however, a want of uniformity in the order in which the several subjects are dealt with, which should be remedied.

2. The total number of boys in the two institutions on the 31st December 1894 was 562, of whom 224 were in the Alipore school and 338 at Hazaribagh. The number admitted into the two schools, respectively, during the year was 52 and 67, making a grand total of 681. Of these, 131 boys were released, 1 died and 1 escaped, leaving, at the close of the year 1895, 213 boys at Alipore and 335 at Hazaribagh, or a total of 548, of whom 363 were Hindus, 157 Muhammadans, 21 aboriginals, and 7 Native Christians. The general health of the two schools is reported to have been good, only one death having occurred, against four in the previous year. One escape took place from the outer garden of the Alipore school, but the boy was recaptured, and he and two others who abetted his escape were flogged and the warder at fault punished. No escape occurred from the Hazaribagh school.

3. *Offences, punishments and marks.*—The total number of offences committed in the Alipore school rose from 55 to 83, and the percentage of boys punished to daily average number of boys rose from 25 to 38. The increase occurred chiefly under the heading "Destroying Government property," but the Superintendent reports that the discipline and behaviour of the boys continued satisfactory. At Hazaribagh the number of offences fell from 336 to 322, of which 149 were of idling. The larger number of offences reported from this school, and the difference in the manner in which they were dealt with, would seem to indicate diversity between the systems of discipline followed in the two institutions. At Hazaribagh no case of solitary confinement occurred during the year, while at Alipore, with only one-fourth as many punishments, solitary confinement was ordered in 16 cases. The mark system is reported to have worked satisfactorily, the average number of boys entitled to marks being 159 at Alipore and 324 at Hazaribagh, against 160 and 228, respectively, in 1894; and the average weekly money earnings amounted to Rs. 5-15-1 at Alipore and Rs. 13-11 at Hazaribagh, against Rs. 6-1-1 and Rs. 11-9-1, respectively, in 1894.

4. *Instruction and gymnastics.*—The boys at both schools were employed on blacksmith's work, tinsmith's work, and carpentry. At Alipore they were also employed in book-binding, printing and cane-work, and at Hazaribagh in weaving, tailoring and shoe-making. At both institutions the boys were instructed in Hindustani, Bengali and arithmetic, the more advanced boys being taught English as well. Attendance at the night school has, under the orders contained in the Resolution of last year, been made compulsory instead of optional, as it previously was. The teachers are reported to have attended to their duties carefully in both schools, but the staff at Hazaribagh is said to be inadequate for the number of boys. The Inspector-General should consider this question, and submit proposals, if necessary, to Government. Gymnastics are practised for one hour per diem at Hazaribagh, and the boys are reported to have shown considerable skill in the exercises taught. At Alipore they receive one hour's instruction in gymnastics every alternate day, and are said to take cordially to this part of their training.

5. *Character reports of released boys.*—The reports received from District Magistrates in regard to 102 of the boys released during the year, show that 55 were well conducted, 24 were not traceable, 7 were in jail, 12 were viewed with suspicion, and 2 were pursuing the trade taught in the school. Five boys released during the two years 1894 and 1895, are reported to be following their own trades, which had been taught them while under detention. As the Superintendent of the Hazaribagh school remarks, it is apparently hopeless to expect that boys belonging to any of the agricultural castes will continue, after release, to follow any of the trades taught to them in the schools.

6. *Manufactures.*—The same industries were carried on as in the previous year. The total profits from manufactures rose from Rs. 16,640 to Rs. 16,679, of which Rs. 12,763 were made in the Alipore school and Rs. 3,916 at Hazaribagh. The larger profits at Alipore are due to the earnings from book-binding and carpentry, the two chief industries taught. At Hazaribagh the greater portion of the profits accrued from blanket-weaving. The average earning per head at Alipore was Rs. 64-2-2, and at Hazaribagh Rs. 17-7-6.

7. *Expenditure.*—The following table compares the expenditure under the several heads in the two schools during the past two years :—

Head of Expenditure.	Alipore School.				Hazaribagh School.			
	Total cost.		Cost per head.		Total cost.		Cost per head.	
	1894.	1895.	1894.	1895.	1894.	1895.	1894.	1895.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs. A. P.	Rs. A. P.	Rs.	Rs.	Rs. A. P.	Rs. A. P.
1. Fixed establishment	9,770	10,191	43 9 10	46 11 11	8,875	10,217	28 5 5	29 10 9
2. Diet	8,044	6,657	35 14 9	30 8 7	8,059	8,886	25 11 9	25 13 4
3. Hospital	220	165	0 15 9	0 12 3	136	72	0 6 11	0 3 3
4. Clothing	391	736	1 11 11	3 6 0	1,063	893	5 3 5	2 9 6

6. Construction and repairs ...	23	87	0 1 3	0 6 4	4,092	813	14 15 3	2 5 9
	20,691	20,097	92 5 9	92 3 0	25,481	22,186	81 5 4	64 5 8

* Including travelling allowance.

In the case of each school there has been a slight reduction both in total cost and in cost per head. It is desirable, as suggested by the Superintendent of the Hazaribagh school, to follow the practice in the corresponding jail return, and place the item of construction and repairs below the total in this return. That item is casual and subject to great fluctuation, and does not properly enter into the calculation of the cost of the schools per head of population.

8. *General.*—At Alipore the printing industry is said to keep two presses constantly at work, and two more have been indented for. Sir Alexander Mackenzie is satisfied, after personal inspection of the school, that further accommodation is required for the workshop, and instructions have accordingly been issued to the Public Works Department to add a second story to one of the workshops. As yet no boy has been received from Assam at Hazaribagh, and the Superintendent thinks, in consequence, that the necessity for providing increased accommodation at that institution is not urgent. The daily average population during the year (544), however, was the highest on record, and as the school will, at present, only admit of the reception of 357 boys, it may soon become necessary to enlarge the building. Both institutions appear to have been sufficiently inspected by official and non-official visitors during the year.

9. The Lieutenant-Governor notices with pleasure the general interest taken by the Board of Management and the Committee of Visitors in the two institutions, and the good work done by Mr. Hill, Deputy Superintendent of the Hazaribagh School. The Government heard with regret of the death of Mr. C. J. Courtenay since the close of the year. The Alipore School had in him a most efficient Superintendent.

Order.—Ordered that a copy of the Reports and a copy of the Resolution be forwarded to the President of the Board of Management of the Reformatory School at Alipore, for information and for communication to the members of the Board.

Ordered also that a copy of the Reports and a copy of the Resolution be forwarded to the Inspector-General of Jails, for information, and for communication to the Superintendent of the Hazaribagh Reformatory School.

Ordered also that the Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Offg. Chief Secy. to the Govt. of Bengal.

BABU RAM LAL MUKERJI'S FUND FOR THE RELIEF OF DISTRESS.

REVENUE DEPARTMENT,—AGRI.

RESOLUTION—No. 3155 Agri.

Calcutta, the 11th August 1896.

READ the following papers :—

(1) A letter, dated the 5th July 1895, from Babu Ram Lal Mukerji, offering to place a sum of Rs. 50,000 at the disposal of this Government for the relief of distress caused by inundation or scarcity.

(2) This Government's letter No. 3615, dated the 29th July 1895, accepting the above offer.

(3) Letters, dated 12th September and 17th October 1895, from Babu Ram La-Mukerji, forwarding to Government the lower and upper halves of a Governl ment Promissory Note for Rs. 50,000.

(4) Preliminary and final Notifications dated 27th January and 11th August 1896, respectively, under the Charitable Endowments Act, 1890.

In July 1895, Babu Ram Lal Mukerji, zamindar of Boinchee in the district of Hooghly, offered to place at the disposal of the Government of Bengal a sum of Rs. 50,000 with a view to creating an endowment for the relief of distress due to inundation or to scarcity brought on by drought, in any part of this Province, including Bihar, Chota Nagpur and Orissa. The Lieutenant-Governor accepted the offer with much pleasure. Babu Ram Lal Mukerji has transferred a 3½ per cent. Government Promissory Note, No. 053,858 of 1865, for Rs. 50,000, to the Accountant-General, Bengal, as Treasurer of Charitable Endowments in Bengal; and, with his concurrence, a preliminary Notification (No. 433L.R., dated the 27th January 1896) under Act VI of 1890, with a scheme for the administration of the Fund, was published in the *Calcutta Gazette*, of the 29th idem. The Commissioner of Burdwan, having reported that no objection to the scheme was made in any of the districts of that Division within the period fixed by that notification for receiving such objections, a final notification vesting the endowment in the Treasurer of Charitable Endowments in Bengal will be published in the *Calcutta Gazette* of the 12th August 1896. The Secretary to the Government of Bengal in the Revenue Department has been appointed Administrator of the Fund.

2. The Lieutenant-Governor desires to thank Babu Ram Lal Mukerji for his liberality and public spirit, and directs that a copy of this Resolution be forwarded to him, and that it be also published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 10th August, 1896.

Burdwan.—Rainfall at Sadar 2·09, Kalna 2·25, Katwa 1·72, Raniganj ·90. Weather hot and cloudy. Standing crops doing well, but more rain wanted for completing transplantation of *aman*. Condition of cattle good. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	c.	
Sadar	11 to 15	0	per rupee.
Kalna	12	0	
Katwa	13	2	
Raniganj	14	0	

Midnapore.—Rainfall at Sadar 1·12, Contai 3·58, Tamluk 1·34, Ghatal 1·84. Weather seasonable. Indigo is being harvested. Prospects of sugarcane and jute good. Transplantation of *aman* paddy going on except in some parts to the south of Tamluk, where it has been retarded owing to excessive rain, and in some places in thana Ramnagar, where the seedlings have been much injured by flood. Cattle-disease reported from Garhbeta and Narayanagar police-stations. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Contai	16 to 17	
Tamluk	13	
Ghatal	13½ to 15	

24-Parganas.—Rainfall at Sadar 1·30. Weather cloudy with showers. Prospects of *aus* crop favourable. Harvesting of jute going on. Transplantation of *aman* continues. Fodder and water sufficient. Condition of cattle good. Common rice sells at:—

	Srs.	c.	
Sadar	11 to 13	0	per rupee.
Barasat	10	0	
Basirhat	11	10	
Diamond Harbour	11	6	

Murshidabad.—Rainfall at Sadar ·78, Kandi 1·03, Jangipur 2·39. Weather hot. More rain wanted for transplantation of *aman*. Standing crops doing well. Indigo manufacture proceeding. Fodder and water sufficient. Common rice sells at 12 seers per rupee.

Khulna.—Rainfall at Sadar 1·70, Bagirhat 2·74, Satkhira 4·00. Weather warm and cloudy with occasional rain. More rain wanted for transplantation of *aman*. No cattle-disease. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Sadar	11 to 12	0	per rupee.
Bagirhat	12	6	
Satkhira	10	8	

Dinajpur.—Average rainfall ·48. Weather very hot. *Aus* and jute suffering for want of rain. Transplantation of *aman* is being retarded. No report of cattle-disease. Fodder and drinking-water sufficient. Common rice selling from 12 to 13 seers per rupee.

Rangpur.—Average rainfall ·41. Harvesting of *aus* and jute continues. Transplantation of *aman* is at a standstill for want of rain. Steeping of jute retarded for want of water. Prospects not favourable. Fodder sufficient. Common rice selling at 9 to 13 seers a rupee.

Pabna.—Rainfall 1·03. Crops suffering from want of rain. Fodder available.

Dacca.—Rainfall 1·27. Weather seasonable. Harvesting of jute and *aus* rice continues. Prospects not good owing to falling off of the river. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Chittagong.—Rainfall ·12. Weather dry and hot. Harvesting of *aus* continues. Transplantation of *aman* retarded for want of rain. Fodder and water sufficient. Rice selling at 14 seers per rupee.

Patna.—Rainfall at Sadar ·19. Rain badly wanted everywhere. *Bhadoi* crops suffering. Transplantation of paddy retarded. Prices slightly rising in Patna. Price of common rice ranges from 16 seers in Patna to 13 seers in subdivisions. Fodder and water sufficient.

Gaya.—*Bhadoi* crops suffering somewhat and paddy transplantation retarded for want of rain. Price of common rice at Sadar 13 seers, against average of 13 seers 15 chitaks per rupee.

Champaran.—Rainfall at Sadar ·19. Agricultural operations practically at a standstill, and crops suffering greatly from continued want of rain. Price of common rice risen from 16½ to 14½ seers, against average of 18½ seers per rupee.

Darbhanga.—Rainfall at Sadar ·50, Madhubani ·45, Samastipur ·09. *Bhadoi* crops suffering for want of rain. Transplantation of paddy stopped. Rain urgently wanted. Prices rising steadily.

Bhagalpur.—Rainfall at Sadar ·51. Weather very hot and cloudy with occasional light local showers. Rain very urgently required. Standing crops seriously damaged by want of rain. Both *bhadoi* and paddy seedlings are withering. Transplantation stopped. Fodder sufficient. Some cattle-disease in Madhipura. Common rice sells at 15 seers per rupee.

Purnea.—Rainfall ·56. Rain badly wanted for *bhadoi* and *aghani* paddy. Cutting of jute and manufacture of indigo still going on. Some cattle-disease in Kasba and Kishanganj. Fodder and water sufficient. Common rice sells from 12 to 15 seers per rupee.

Cuttack.—Rainfall 4·58. Weather cloudy and hot. Floods subsiding. Paddy crops mostly under water. Damage not yet known, but *beali* (early rice) mostly distroyed. Fodder not sufficient. Cattle-disease reported from thana Tirtol. Common rice sells at Cuttack 17½ seers per rupee. Reports from subdivisions not received.

Hazaribagh.—Rainfall at Sadar 4·87, Giridih 1·23. Weather seasonable. More rain wanted in Giridih. Transplanting in progress. Rice sells from 10 to 13 seers per rupee.

General Summary.—There was rain all over the Province during the week, but, except in the south, it was very scanty. More rain is urgently required for the transplanting of winter rice. In Bihar and parts of North Bengal, it is reported, the transplantation of paddy is stopped, and the *bhadoi* crops are withering. Rain is urgently required there. Early rice and jute are being harvested. In some districts the steeping of jute is retarded for want of water. Indigo manufacture is going on. No cattle-disease is reported except from Midnapore, Bhagalpur, Purnea, and Cuttack. The price of common rice is almost stationary. Further report from Noakhali shows that the state of things in the island of Sandip is better than was anticipated, and what little distress has occurred there is being met. The floods in Orissa are subsiding. The damage to crops is not yet known, but most of the early rice, it is reported, has probably been destroyed.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 11th August, 1896.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of July 1896.

	Inches.	Date.	Hour.
The mean pressure of the month	29·501		
The average pressure of July from 24 years' registers ...	29·537		
The highest pressure in the month	29·703	17th	22
The lowest pressure in the month	29 245	28th	16
The range of pressure	0·458		
	Hours		
The total number of hours of bright sunshine during the month	112·6		
The maximum possible number of hours of sunshine ...	413·1		
	°		
The mean temperature of the month	83·7		
The average temperature of July from 24 years' registers ...	83·5		
The highest temperature in the month	91·9	1st	
The lowest temperature in the month	77·5	21st	
The range of temperature during the month	14·4		
The mean daily range of temperature	9·0		
The greatest range of temperature in one day	12·8	2nd	
	Per cent.		
The mean humidity of the month	88		
The average humidity of July from 24 years' registers ...	85		
	Inches.		
The mean vapour tension of the month	1·015		
The average vapour tension of July from 9 years' registers ...	1·002		
The mean cloud proportion of the month	7·32		
The average cloud proportion of July from 19 years' registers	7·98		
	Inches.		
The total rainfall of the month	12·08		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	10·80		
The average fall of July from 48 years' registers ...	12·84		
The greatest fall in 24 hours	2·70	22nd	
	Days.		
The number of rainy days in the month	25		
The average number of rainy days in July from 24 years' registers	25		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	145·5		
The mean difference of sun and air temperatures	57·1		
The greatest sun temperature	157·3	22nd	
The greatest excess of sun over air temperature	68·6	22nd	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	77·5		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1·8		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	2·9	13th	
	Miles.		
The mean movement of the wind per day	121·7		
The greatest movement of the wind in one day	301·0	27th	
The greatest movement of the wind in one hour	22·0	27th, 4 to 5 A.M. and 6 to 7 A.M.	

The number of hours with winds from each of the 8 points—
N. 10, N.E. 56, E. 133, S.E. 133, S. 186, S.W. 139, W. 58, N.W. 4, Calm 25.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

G. W. KÜCHLER,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 10th August 1896.

Abstract of the Results of the Barometric and Thermometric Observations taken at 10 a.m. at the Meteorological Office, Chowringhee, in the month of July 1896.

	Inches.	Date.
The mean pressure at 10 A.M. during the month	29·535	
The mean temperature at 10 A.M. during the month		
The highest temperature during the month		
The lowest temperature during the month	Not recorded; thermometer shed under repair.	
The absolute range of temperature during the month		
The mean daily range of temperature during the month ...		
The greatest range of temperature in one day during the month ...		
The mean 10 A.M. humidity during the month		
The mean 10 A.M. vapour tension during the month		
	Inches.	
The total rainfall of the month	11·74	
The greatest fall in 24 hours	2·71	22nd.
	Days.	
The number of rainy days in the month	16

	Inches.
The mean pressure of the seven days	29·575
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·584
	Hours.
The total number of hours of bright sunshine	42·2
The maximum possible number of hours of sunshine	91·4
The mean temperature of the seven days	82·3
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83·0
The extreme variation of temperature	13·7
The maximum temperature	89·3
	Miles.
The highest velocity of the wind in one hour	17
	%
The mean relative humidity	87
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	87
	Inches.
The total fall of rain from 2nd to 8th August 1896	2·43
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·58
The total fall from 1st January to 8th August 1896	36·31
The average fall of the corresponding period for 24 years, Surveyor-General's Office	38·00

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 10th August 1896.

G. W. KÜCHLER,

The Hon'ble A. H. WALLIS.

NEW MEMBER.

The Hon'ble MR. A. H. WALLIS took his seat in Council.

MAINTENANCE OF ROADS OUT OF PROVINCIAL REVENUES.

The Hon'ble MR. RISLEY said:—"The Council will remember that at the Meeting of the 11th July last, the following question was asked by the Hon'ble Babu Guru Proshad Sen:—

'Will the Government be pleased to state how many miles of roads, metalled and unmetalled, existed in each district, the maintenance of which was a charge on the Provincial Revenues when the Road Cess Act came into operation, and how many miles of these roads, metalled and unmetalled, are now maintained out of the Provincial Revenues?'

"I said at the time that owing to the form in which the accounts relating to these roads were kept by the Public Works Department, the statistics required by the reply to the question were still incomplete.

"I now lay on the table three statements, A, B and C, furnishing as full particulars as can be gathered from the books maintained by the Public Works Department. Before the introduction of the Road Cess the distinction now recognised between Provincial and District roads did not exist. Roads were classified as Imperial or Local, the former being maintained as a rule from Imperial Revenues, and the latter as a rule from the Amalgamated District Road Fund, which consisted of the net balances remaining after meeting the first charges on a number of separate funds, mostly of a local character, supplemented by contributions from the one per cent. Income-tax Fund and from Imperial Revenues. Shortly after the passing of the Road Cess Act, Sir George Campbell issued the following order:—

'In introducing the new system of local taxation under the Road Cess Act, the Lieutenant-Governor desires to act with the utmost liberality towards local interests. For many years past all the local road and ferry toll collections have been brought into one Central Road Fund, and distributed at the pleasure of Government. The Lieutenant-Governor has determined that this system shall now cease, and that all the sums collected from local roads and canals, and from all ferries, except those on roads maintained from the general revenues, shall be made over to the districts and municipalities in whose limits the lines of communication lie. The main lines of arterial communication, both roads and canals, will be maintained from Provincial Funds, and the collections from them will be credited to the Provincial treasury; all others will be made over to the District Fund, receipts and expenditure together.

* * * * * *

'The Lieutenant-Governor does not propose to make any further allotments from general sources to the rich and populous districts, which may be considered quite capable of paying their own way. Anything that can be spared from Provincial needs will rather be given in aid of poor districts which have suffered from peculiar difficulties of communication.'

"In January, 1872, detailed effect was given to the principle thus laid down. The main lines of road shown in Statement A, in length 1,764¾ miles, were classified as Provincial roads, and at the same time the Calcutta Canals, the Nadia rivers and the Backergunge Canals were made a Provincial charge. Of the small local roads entered in Statement B, comprising in all 981 miles, 79½ miles were transferred to Railways and Municipalities, and 901⅓ miles, costing about Rs. 84,173 a year, were made over to District Road Committees to be maintained from the Road Cess and from the proceeds of ferries on district roads. Grants-in-aid amounting to Rs. 4,98,238, besides the balance of the assignments for 1871-72, aggregating Rs. 2,08,720, were also given for the year 1872-73, in order to enable the Committees to carry on work on these and the local roads then existing until their income from Road Cess began to come in. Since then the 734 miles of road, referred to in Statement C, have been made over to Local Authorities, with the grants entered in column 6 of the Statement.

The only case in which a portion of a Provincial road has been transferred to a Local Authority without a corresponding grant occurred in 1879, when 18 miles of the Grand Trunk Road from Dhobi to Gaya were made over to the Road Cess Committee of that district."

RATHJATRA CEREMONY.

The Hon'ble Babu Surendranath Banerjee asked—

Is it true, as stated in the *Hitabadi* newspaper of the 26th June, that the Magistrate of Midnapore has interfered with the Rathjatra ceremony by imposing a fee varying from Rs. 4 to Rs. 16 on every Rath or holy car? Is the Government aware that there are poor people who do not spend more than six or seven rupees per annum in all upon performing this religious ceremony, and that it will be a great hardship to them if they are not allowed to perform this ceremony without paying such a heavy annual fee? Will the Government kindly state what steps, if any, it intends to take in this matter?

The Hon'ble Mr. Risley replied:—

"The facts of the case are these:—It is the duty of the Magistrates to see that Rath processions are so conducted as not to endanger life. Accordingly the Magistrate of Midnapore issued in 1885 an order on the owners of a considerable number of large cars requiring them, before using the cars, to obtain a certificate of soundness of the woodwork and ropes from a Public Works or District Road Committee's officer not under the rank of a Sub-Overseer. This system of examination has been in force ever since without objection. This year it was pointed out to the Magistrate by the District Engineer that the examination of these cars was not part of the ordinary duties of the officers of the District Board, and that a fee varying according to the distance to be travelled from the head-quarters should be allowed. Recognizing the fairness of this claim, the Magistrate fixed a fee of from Rs. 4 to Rs. 16. It appears that 41 applications for examination were received, in only 23 of which fees were charged. The Magistrate reports that whatever objections were made either on the ground of the cars being too small to require examination, or of the owner being too poor to pay the fee, were fully considered, and that in only one case has he since learnt that the owner was not fully able to pay.

"The Hon'ble Member can see the Magistrate's report if he desires to peruse it."

Mr. WHEELER'S CASE.

The Hon'ble Babu Surendranath Banerjee asked—

With reference to the reply given at the meeting of the Council on the 18th July last in answer to my question regarding the Magistrate of Saran, the Hon'ble Mr. Risley stated that "the Officiating Collector of Saran finding

on reviewing the Excise Returns that breaches of the Law were not being adequately dealt with, 'drew the attention of the Deputy Magistrate to the question of the amount of punishment in Excise cases,' and remarked that 'the general tendency is to be far too lenient, especially in *tari* cases.'"

I have now to ask:—

(*a*) Whether the remarks were made on the Excise Returns alluded to, or whether a separate Circular was issued to all Deputy Magistrates?

(*b*) Whether Mr. Wheeler did not issue instructions to inflict "exemplary punishment" in these cases? and

(*c*) Whether the Government will be pleased to lay a copy of Mr. Wheeler's remarks in this connection on the table?

The Hon'ble MR. RISLEY replied:—

"Mr. Wheeler's remarks were based on the Excise Returns, and were embodied in the following Circular order:—

'The attention of all Deputy Magistrates is drawn to the question of the amount of punishments in excise cases. The general tendency is to be far too lenient, especially in *tari* cases. I know it will be argued that the accused are poor labourers and cannot pay more; but such persons are often acting for others, and there appears a tendency to push the argument to excess.

'It should be remembered that for every excise case detected there are numbers that are not, and when detection is successful, punishment should be more exemplary.'

"The principle that offences against the revenue should be visited with deterrent punishment is one which is recognised in all civilised countries, and has been repeatedly affirmed by the Government of India."

TEXT-BOOKS IN GOVERNMENT EXAMINATIONS.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

With reference to the reply given at the meeting of the Council on the 11th July last in answer to my question regarding the text-books prescribed for the different examinations and other cognate matters, the Hon'ble Mr Finucane stated, among other things, that as regards those examinations which are under the Lieutenant-Governor's control, "the books are read during a two years' course; and in so far as they are fixed by the Department, they are changed either wholly or partially from year to year, so as to encourage meritorious authors and text-books and to avoid anything like a monopoly." I have now to ask whether it is not the case that—

(*a*) A book on Hygiene, written by the Secretary of the Text-book Committee, who is a high Government official, has been in use as the text-book in Bengali for the Middle Vernacular Examination for more than twenty-five years?

(*b*) Another book, a History of Bengal written in the Bengali language has been in use for nearly twenty years for the Upper Primary Examination?

Whether the Government, in view of the fact that the books referred to in the first part of the question have so long been in use against the declared policy of the Government not to encourage monopolies, will consider the propriety of substituting other books for them?

The Hon'ble MR. FINUCANE replied:—

"In the statement laid upon the table in connection with my reply to the Hon'ble Member's question on the same subject put on the 11th July

the two books referred to in his present question were specified as permanent text-books. My observations that certain books were changed from year to year by the Department did not apply to these or to other text-books, in subjects other than Bengali literature, which are described as permanent in the statement.

"With regard to the two books named in the question—

(*a*) The book on Hygiene (*Swasthy Raksha*, by Rai Radhika Prasanna Mukherjee Bahadur, Inspector of Schools, Presidency Circle,) has been prescribed as a text-book in that subject (not in Bengali literature, as the question seems to imply) for the Middle Scholarship Examination since 1880, and was in use in schools before that date.

(*b*) The History of Bengal, in Bengali, by the late Babu Rajkrishna Mukherjee, has been on the authorized list since 1875. For many years it was the only text-book approved by the Text-book Committee in that subject for the Upper Primary Standard, and consequently it was in general use, though not authoritatively prescribed. In the orders of Government No. 267, dated the 23rd January, 1894, it was for the first time prescribed as a text-book for the Upper Primary Examination.

"The Director of Public Instruction has already decided to remove from the permanent list the second of the two books named in the question, which is now to stand on an equal footing with the three other books on the same subject approved by the Central Text-book Committee, two of which, however, cover only a part of the course in History prescribed for the Upper Primary Standard.

"The first book named in the question has been selected as a permanent text-book on the recommendation of the Central Text-book Committee, who were requested by the Director of Public Instruction in December, 1894, at the instance of Government, to examine all the approved text-books on Hygiene and recommend one for permanent use. They reported unanimously in favour of *Swasthya Raksha*, by Rai Radhika Prasanna Mookerjea Bahadur. In conformity with their recommendation, the book, which had been in authorised use since 1880, in combination with the text-book prescribed by the Government of India, was again prescribed as the single text-book in the subject of Hygiene for the Middle Scholarship standard. The Lieutenant-Governor would have no objection to re-considering this question with the view of ascertaining whether it is now desirable to substitute another text-book in that subject, but in the first place there is no other text-book in Hygiene for that standard approved by the Text-book Committee, and in the second place, the whole question of the course in science, including Sanitation, for Upper Primary and Middle schools is shortly to be taken into separate consideration."

COLLECTION CHARGES OF ROAD AND PUBLIC WORKS CESSES.

The Hon'ble Mr. A. M. Bose asked—

(*a*) Will the Government state the principle on which the amount of Rs. 44,500 was fixed in 1879, as collection charges on account of the Public Works Cess; and the total amount of collection on account of Road Cess and on account of Public Works Cess, as well the charges for collection for the two Cesses together, in the year 1879 and at the present time? Had the Government to incur any additional cost, on the imposition of the Road Cess, for the superior establishment concerned in the supervision and control of the collection of that Cess, and if so, how much?

(*b*) Will the Government be pleased to consider the propriety of placing the proportion between the collection charges for the two Cesses on a fairer basis

than would appear to obtain at present, when the amount which is paid from the Provincial Revenues for collecting the Public Works Cess is less than *one-fifth* of that paid by the District Boards for collecting the Road Cess, the total amount of which is rather less than that of the Public Works Cess?

The Hon'ble MR. RISLEY replied:—

"(*a*) The principle on which the sum of Rs. 44,500 was fixed in 1879 was explained in my reply of the 11th July last, and is more fully set out in the following extract, paragraph 20 of Board's letter No. 498A of 18th July, 1878, and paragraph 2 of Government Order No. 2, dated 31st January, 1879:—

'20. It is evident from the reports and communications which the Board have received that most, if not all, District Road Cess Committees anticipate that Government will contribute from the Provincial Revenues half the cost of the establishments maintained for the collection of the two cesses. The Board are well aware that there are strong arguments that may be brought forward against this claim; but as the Road Cess establishments are required by the authority of Government to collect the Public Works Cess, and as even the semblance of illiberality in dealing with the local bodies which Government calls into existence to share in the work of local administration is to be deprecated, the Board would strongly advocate the dealing with this claim in a liberal spirit, and satisfying it so far as it is reasonable. Viewed in this light, its great defect is that it takes no account of the great assistance which Government already gives to the Road Cess establishments. In making the valuations the salary of the Deputy Collector, whose whole time was generally devoted to this work, was entirely borne by Government. At the present moment a portion of the time of a Deputy Collector —a very large portion in some districts—is taken up with Road Cess work, to which has to be added a portion of the time of the Collector, the Commissioner, and the Board. It would be difficult to estimate what this amounts to with any accuracy, but it is very improbable that it would come to less than one-third of the establishment employed in collections, omitting of course the clerks and accountants of the District Board's office. If therefore the Government agree to accept the principle that the total cost, including the time of superior officers, should be shared between the two cesses, and do not require any more accurate estimate, the Board would advocate that in future the joint establishment for collection purposes should be borne two-thirds by the Road Cess Committee and one-third by the Provincial Revenues; this arrangement to take effect from the beginning of the Road Cess year 1878-79.'

'2. In reply, I am to say that the Lieutenant-Governor accepts the general principle of the proposal made in paragraph 20 of your letter No. 498A, dated 18th July last, viz., that one-third of the total cost of the joint establishments be borne by the Provincial Revenues and two-thirds by the Road Cess Committees; but instead of dividing the cost of the establishment every year, and paying a certain proportion to the Road Cess Funds, the Lieutenant-Governor would prefer to allot a fixed sum yearly from Provincial Revenues for each district, and thus obviate the necessity for calculating afresh every year the amount payable by Government.'

"In 1879-80 the collections on account of Road Cess amounted to Rs. 32,85,511, and on account of Public Works Cess to Rs. 35,66,947. In 1894-95 the receipts from Road Cess were Rs. 40,91,522, and from Public Works Cess Rs. 41,77,224. The charges for collecting the two Cesses were in 1879-80 Rs. 1,61,041, and are now Rs. 2,87,186. The additional cost incurred when the Road Cess was imposed for the superior establishment concerned in supervision and control cannot be stated without special enquiry which the Lieutenant-Governor does not propose to undertake.

"(*b*) The question of revising the existing arrangement will be considered in connection with the approaching revision of the Provincial Contract."

MARKS IN LOWER PRIMARY EXAMINATION.

The Hon'ble MR. A. M. BOSE asked—

Is the Government aware that the regulations prescribed for the Lower Primary Examination are much more stringent than those for the other examinations, inasmuch as in order to pass it (1) a student must obtain a minimum of 40 per cent. of the aggregate (except in Bihar, where the minimum is 33 per cent.), while the corresponding minimum needed for passing the Upper Primary, the Middle Vernacular and the Middle English Examinations is only

25 per cent.; (2) he must obtain 25 per cent. in every subject or group of subjects in which he is examined, while for the Upper Primary, the Middle Vernacular and the Middle English Examinations, he has to keep 25 per cent. in only some of the subjects of the examination, no minimum being required in the other subjects?

Will the Government be pleased to reduce the burden on candidates of tender years who appear at the Lower Primary Examination by making its rules uniform with those for the higher examinations in the directions indicated above?

Will the Government also consider the propriety of removing subjects like (1) Mensuration of lines and plane surfaces, (2) Sanitary Primer, from the course of the Lower Primary Examination, confining it to Reading, Writing and Arithmetic, specially as Arithmetic in that Examination is a comprehensive subject comprising the fourfold division of (1) European Arithmetic (75 marks), (2) Native Arithmetic or Subhankari (75 marks), (3) Mental Arithmetic, European and Native (50 marks), (4) zamindari accounts (50 marks)?

The Hon'ble MR. FINUCANE replied:—

"The facts are as stated in the question. A higher pass mark is required at the Lower Primary Examination, because that examination is chiefly confined to the elementary subjects of reading, writing and arithmetic. Much of it is also conducted *viva voce*, which is a form of examination more favourable to candidates. That the standard is not unduly high is shown by a comparison of the results of that examination with those of the two next above it. At the Lower Primary Examination of 1895, 54 per cent. of the candidates passed, at the Upper Primary Examination 47 per cent., and at the Middle Vernacular Examination 59 per cent.

"With the exception of the Sanitary Primer, which has been introduced under explicit orders from the Government of India on account of its special importance to the rural population, all the other subjects of the Lower Primary standard form part of the traditional subjects of the old pathsala course. That course included the mensuration of lines and plane surfaces after indigenous methods, as the present course does. It is a subject of special value to agricultural pupils. In the opinion of the Government this and all other traditional subjects of the course should be retained."

"SANITATION" A SUBJECT OF STUDY.

The Hon'ble MR. A. M. BOSE asked—

Is there any reason for including Sanitation as a subject of study in *every one* of the Departmental examinations, namely the Lower Primary, the Upper Primary, the Middle Vernacular and the Middle English Examinations?

Is there at any rate ground for including *two* books on Sanitation in the Upper Primary Course? Will the Government consider the propriety of removing at least one of these two different works dealing with the same subjects?

The Hon'ble MR. FINUCANE replied:—

"As stated in the answer to the previous question, the orders of the Government of India require that Sanitation shall form part of the course in Primary and Middle schools of every grade.

"In the Upper Primary standard, the 'Way to Health' is the text-book prescribed by the Government of India for all Provinces. The second text-book has been introduced as having special applicability to the circumstances of Bengal, in which the former is necessarily deficient."

PHYSICAL SCIENCE IN UPPER PRIMARY EXAMINATION.

The Hon'ble MR. A. M. BOSE asked—

Is it the fact that the subject of Physical Science, which is prescribed in the alternative for the Upper Primary Examination, is defined neither by syllabus nor by the naming of a text book? Will the Government be pleased to remove the inconvenience caused both to the teachers and the taught by this want of definition.

The Hon'ble MR. FINUCANE replied:—

"Though the course in Physics for the Upper Primary standard is not defined, the authorised list of text-books for that standard includes seven books in Physics, any one of which may be selected by managers of schools. The questions are so set that they can be answered from any one of these text-books."

NON-PROVISION OF APPARATUS FOR MIDDLE AND UPPER PRIMARY SCHOOLS.

The Hon'ble MR. A. M. BOSE asked—

Is the Government aware of the fact that almost without exception Middle schools and Upper Primary schools are wholly unprovided with apparatus or appliances for showing any experiments in connection with the teaching of Physics, and, as a matter of fact, the subject is taught without the help of experiments? Does it consider it any advantage to have that subject included in the curriculum for the Middle Vernacular and the Upper Primary Examinations under these circumstances? Would not such teaching be rather a useless burdening of the memory and likely to create a distaste for the subject?

Is it not the fact that in the course prescribed by the University the subject of Physics is introduced at a much later stage of a student's progress?

The Hon'ble MR. FINUCANE replied:—

"Elementary scientific teaching has always formed part of the Middle and Upper Primary standards, in accordance with accepted views as to the utility of that subject of instruction. It would be impossible to require the 6,000 schools of these classes in Bengal to provide themselves with apparatus, even of a simple character. Proposals are now under consideration for introducing a graduated course for Primary and Middle schools, to include —besides elementary notion of Physics—Natural History, Sanitation and Agriculture, illustrated as far as possible by object lessons.

"Science is introduced into Middle and Upper Primary schools, because the great majority of the pupils attending those schools complete their education at the Middle standard. In the University course elementary science forms part of the Matriculation standard, but the definite study of physics and chemistry is postponed to the First Arts stage, to which the great majority of matriculated students proceed."

UPPER PRIMARY EXAMINATION.

The Hon'ble MR. A. M. BOSE asked—

Is it the fact that a student may appear at the Middle Vernacular Scholarship Examination without previously passing either the Upper Primary or the Lower Primary Examination?

Is it also the fact that in the same way students have hitherto been allowed to appear in the Upper Primary Scholarship Examination without previously passing the Lower Primary test, but by a recent Circular (18—19 of 1894) this privilege has been withdrawn in the case of the Upper Primary Examination.

no one being permitted to appear in it unless he has passed the Lower Primary standard? When does this change come into operation?

Will the Government be pleased to consider the desirability of continuing the present practice and not adding to the number of examinations in which a candidate for the Upper Primary Examination must appear?

The Hon'ble MR. FINUCANE replied:—

"The facts are as stated in the question. The Circular referred to was issued in 1894 in conformity with the opinion of inspecting officers, who were practically unanimous in favour of requiring every boy of the third class of an Upper Primary school to appear at and to pass the Lower Primary Examination as a condition of promotion to the second class, and of subsequent admission to the Upper Primary scholarship examination. An Upper Primary school is merely a development of a Lower Primary school, and was always intended to teach the full Lower Primary course at the corresponding stage. It was found that some Upper Primary schools neglected these useful subjects of instruction, which do not form part of the Upper Primary standard. The order in question was intended to restore these schools to their original constitution, and to keep them as genuine Primary schools, rather than as mutilated Middle schools in which the interests of the agricultural population would be neglected. To make the passing of the Lower Primary standard a condition of eligibility for the Upper Primary scholarship is also in conformity with Sir George Campbell's intention, in framing a chain of scholarships by which the gifted son of a raiyat might be enabled to pass on to the highest University degree."

REFERENCES OF COURSES TO EDUCATIONAL CONFERENCE.

The Hon'ble MR. A. M. BOSE asked—

Is the Government aware of the feeling of dissatisfaction which has found expression in the Press as well as in public gatherings (*e.g.*, the Provincial Conference recently held at Kishnagar) against the burdensome character of the courses of study prescribed at present, to the detriment, intellectual as well as physical, of the rising generation?

Will it be pleased to refer such courses, so far as the examinations conducted by the Government are concerned, for the consideration of a Conference such as recommended by the Education Commission, at which both official and non-official opinion may be adequately represented?

The Hon'ble MR. FINUCANE replied:—

"In reference to the first part of the question, I beg to refer the Hon'ble Member to the reply given to the Hon'ble Babu Surendranath Banerjee at the meeting of the Council held on the 11th July, 1896.

"In reference to the second part, the Lieutenant-Governor will, as intimated in reply to a question by the Hon'ble Member at the meeting of the Council held on the 28th March, 1896, be prepared to summon a Conference to consider educational questions of importance, whenever the need for such a Conference presents itself.

"The Lieutenant-Governor is not aware of any facts to warrant the statement that the course of studies prescribed has been, or is, to the detriment, intellectual or physical, of the rising generation. The Director of Public Instruction will, however, be consulted on the point. His Honour's attention has been separately called to the unnecessary expense that may be entailed on the poorer classes by frequent changes of text-books—changes which were originally intended to encourage the growth of healthy competition among authors,—and he thinks that it may be a question worthy of consideration whether the attainment of that object is worth the extra expense entailed on the poorer classes by frequent change of text-books. For this reason the Director of Public Instruction will be invited to re-consider the matter and report thereon for the orders of Government."

QUALIFICATIONS FOR VOTING AT MUNICIPAL ELECTIONS.

The Hon'ble BABU GURU PROSHAD SEN asked—

Will the Government be pleased to state whether, on the passing of the Bill to further amend the Municipal Act, III of 1884 (B.C.), at present before the Council, in its present form, Government intends to confer, by rule, the right of voting at elections of Municipal Commissioners to all males who have been resident within the limits of a municipality for 12 months immediately preceding the date of election, and who have attained the age of 21 years, and—

(*a*) have paid during the municipal year immediately preceding the election an aggregate amount of not less than Re. 1-8 in all municipalities excepting Howrah, in respect of any of the rates or taxes imposed by the Act:

(*b*) have paid not less than Rs. 20 as rent in respect of the occupation by them of a holding which is assessed with the rate under section 85, clause (*b*):

(*c*) have paid fees for the registration of carts under section 143 of the Act.

DISENFRANCHISEMENT OF VOTERS AT MUNICIPAL ELECTIONS.

The Hon'ble BABU GURU PROSHAD SEN asked—

Have not all these classes of persons, (*a*), (*b*), (*c*), enjoyed the right of voting at elections of Municipal Commissioners for the last 12 years, and if all or any of these classes, are to be disenfranchised, will the Government be pleased to state what is their number, and why the right shall now be withheld from them?

The Hon'ble MR. RISLEY replied:—

"The amendment of the election rules, which was rendered necessary by the passing of Bengal Act IV of 1894, is now under consideration. A revised draft of the rules has been circulated for opinion, and will be taken into consideration when the Bill to amend the Municipal Act has become law. The rules as now drafted leave the existing franchise untouched, except in Kurseong, where it is proposed to raise the qualification under section 15 (1) to Rs. 3. Several of the more advanced Municipalities have asked for a similar change, and their representations will be considered. The case of fees for the registration of carts is governed by the definition of 'rates' in section 15 of the Act, and is not affected by the rules."

PURCHASE OF SONEPORE FAIR LAND.

The Hon'ble BABU GURU PROSHAD SEN asked—

Whether or not the District Board of Saran have, by a supplementary budget for the year 1895-96, sanctioned an expenditure of Rs. 36,068 for the purchase of that portion of the lands of Sonepore, in district Saran, which is yearly occupied, according to a letter of the Commissioner of the Patna Division, dated 1st December, 1894, published in the newspapers, "by the camps of the native gentry and European visitors" during the annual fair at Sonepore, and with respect to which the Hon'ble Mr. Risley, in his letter to the Commissioner, dated 16th July, 1895, also published in the newspapers, said "considering the immense demands on the funds of a District Board for roads, schools, hospitals, drainage, water-supply, &c., the Lieutenant-Governor hesitates to sanction such an expenditure on an object which is not of pressing importance, and which is mostly for the use of European visitors, and which benefits them only for a fortnight in each year"?

Whether the sanction of the District Board was not only provisional and subject, under Rule 40, Part IX of the rules passed by Government under section 138 of Act III of 1885 (B.C.), to the confirmation and approval of the Local Government, and whether the Local Government did confirm and approve of the provisional sanction of the District Board for this expenditure?

CURTAILMENT OF EXPENDITURE ON ROADS.

The Hon'ble BABU GURU PROSHAD SEN asked—

Whether on account of this expenditure, necessary expenditure on roads previously sanctioned has not been curtailed? And whether, on this account, the metalling and repairs of an important road from Siwan to Gopalganj sub-division could not be undertaken during the year?

APPLICATION OF SECTION 100 TO PURCHASE OF LAND FOR SONEPORE FAIR.

The Hon'ble BABU GURU PROSHAD SEN asked—

Whether under clause 3, section 100, head Miscellaneous, under which District Boards are empowered "to hold within their district, from time to time, fairs and exhibitions of cattle, &c., and incur expenditure with the approval of the Commissioner," apply to acquisition of lands, as the Hon'ble Mr. Risley, in his letter quoted above, says "mostly for the use of the European visitors and which benefits them for a fortnight in each year" in such an old and well-established fair as the one held at Sonepore?

DATE OF NOTE BY MAGISTRATE OF SARAN.

The Hon'ble BABU GURU PROSHAD SEN asked—

The letter of Mr. Forbes, Commissioner of the Division, referred to above, states:—"The desirability of the retention of the site in question in the hands of the District Board is set forth in the accompanying copy of a note on the subject by yourself when Magistrate-Collector of the District of Saran, with which I need scarcely say that I entirely agree." Was this note drawn up after the sanction of the District Board was obtained, or before?

PROPOSED LIQUIDATION OF DEBTS PRIOR TO PURCHASE OF SONEPORE FAIR LAND.

The Hon'ble BABU GURU PROSHAD SEN asked—

Whether or not a member of the District Board, at the meeting when this amount was sanctioned by the District Board provisionally under the rules, did propose an amendment to the effect that the expenditure on the purchase of the Sonepore lands be postponed until the District Board debts were paid off? Was this proposal also submitted to Government? Did the Government enquire whether there was such debts owing by the District Board?

The Hon'ble MR. RISLEY replied:—

"Replies to the questions will be given hereafter when the result of certain enquiries now being made is known."

BENGAL MUNICIPAL ACT, 1884, AMENDMENT BILL.

The Hon'ble MR. RISLEY moved that the Report of the Select Committee on the Bill to further amend the Bengal Municipal Act, 1884, be taken into consideration in view to the settlement of the clauses of the Bill.

The Motion was put and agreed to.

The Hon'ble MR. RISLEY also moved that the clauses of the Bill be considered in the form recommended by the Select Committee.

The Hon'ble MR. DAS said:—"The Report of the Select Committee, as well as the Bill as it comes from the hands of the Select Committee, contains a provision for taxing musical processions, or rather, as it is called, music in the streets."

The Hon'ble MR. RISLEY, interposing, said:—"It is usual to take the amendments in the order in which they are set down in the agenda of business."

The Hon'ble MR. DAS continued:—"I am not now moving an amendment. I am objecting to a portion of the Report of the Select Committee being taken into consideration by the Council. My objection amounts to a point of order. I shall presently explain myself. This provision to tax music in the streets was not in the Bill when it was introduced on the 28th March, 1896. Then the Bill was referred to a Select Committee, and the opinions of public bodies were invited upon its provisions. Subsequently two Government Circulars were issued, one of which was directed to Commissioners of Divisions and the other to certain public bodies—certain Associations—inviting their opinion upon certain points, one of which was a proposal to tax musical processions."

The Hon'ble THE PRESIDENT said:—"Do you not think it will be more in order to make your remarks when you come to move your amendment with regard to the particular section of the Bill relating to musical processions? I think the work of the Council will be advanced by proceeding in the order in which the amendments are mentioned in the agenda list."

The Hon'ble MR. DAS said:—"If the President rules that I am out of order I bow to his decision. My objection is that that part of the Select Committee's report is not in order and cannot properly be considered by the Council."

The Hon'ble MR. RISLEY said:—"The motion now before the Council is purely a formal one which brings the whole subject of the Bill into consideration. What my hon'ble friend now proposes is to negative a section of the Bill which introduces the provision to which he objects. The proper time for these remarks is, I submit, when his amendment to that provision of the Bill comes on for consideration."

The Hon'ble MR. DAS said:—"I am not now going to move an amendment. I say that that portion of the Select Committee's report is altogether *ultra vires*. It was not in the Bill which was referred to the Select Committee, and it was not competent to them to report upon a subject not in the Bill. By this provision a new tax is imposed. The Rules of the Council distinctly say that no Bill can be introduced unless by leave of the Council first obtained."

The Hon'ble THE PRESIDENT said:—"I think it will be open to you or to any other Hon'ble Member to move that the section of the Bill relating to this tax shall not be passed, but I think you are distinctly out of order in raising that question now. We will therefore now proceed with the business according to the order in which the amendments appear on the list."

The Motion was then put and agreed to.

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR moved that the following additional proviso to paragraph 2 of section 14 of the Bengal Municipal Act, III of 1884, be inserted :—

"Provided further that the Commissioners to be appointed by the Local Government shall be male persons residing or paying rates in the municipality who have attained the age of twenty-one years."

He said :—"I find that an amendment to introduce substantially the same provision in section 15 of the Bill has been put on the business list by the Hon'ble Mr. Bose. I thought such a proviso ought to come properly under section 14, but I leave it to the Council to adopt the amendment either under the one or the other section. In moving this proviso I shall not detain the Council with any lengthy remarks. The principle which I advocate is one that has been recognised in section 15 in respect of the election of representative Commissioners. I submit that people who live in the midst of a municipality or who pay certain rates have a subsisting interest in the administration of municipal matters, and they are more likely to take an intelligent interest in the determination of municipal questions than persons who have no stake. Under the section as it stands—I mean section 14—the Local Government can appoint a minor to be a Municipal Commissioner. A minor is incapable of entering into contracts, but there is no restriction of any sort here provided, so that even a female is not disqualified under this section, and even persons resident outside municipal limits can be appointed. I submit that the Council will not question the principle which I advocate. I advocate nothing more than this—that the same qualifications which are necessary for the election of candidates should be made applicable to the appointment of Commissioners by the Government. I do not mean to say that the Government will exercise its discretion capriciously or whimsically or arbitrarily, but what I do contend for is this, that an executive Act is different from a statutory provision, and that when the Council is amending the law, advantage should be taken to introduce in the Act provisions in respect of appointment, similar to those which have introduced in respect of the election of candidates. The principle which I contend is not a new one. It has been adopted in the Cal[illegible] Municipal Act in which similar provision has been made for the appointment by Government of Municipal Commissioners, and if restrictions as to age and sex and the fact of residence and the payment of certain rates are imposed in a place like Calcutta, I think this provision should with greater strictness be adopted in the Mufassal Municipal Act; and I contend that this is a proper opportunity to introduce such a principle here."

The Hon'ble MR. A. M. BOSE said :—"I will accept the result of the discussion on the motion which has just been made as conclusive in respect of the amendment of a similar character of which I have given notice in reference to section 15."

The Hon'ble MR. RISLEY said :—"My first objection to the amendment is that it comes too late. At any time within the last twelve years, since 1884—and certainly at any time within the last four years, since 1892, when the Municipal Act came under amendment and was carefully considered—during the whole of that time it was possible for such an amendment to be brought forward. Had the Hon'ble Member even made this proposal in April last, when the Bill was referred to a Select Committee, this question would have been submitted to the District Officers and Municipalities and to various other public bodies, and the Council would have had the benefit of opinions which would have enabled the Members to come to a decision on the merits of the subject. No doubt the Hon'ble Member is aware that this idea has only recently been brought forward. It arose from an individual case, and I think I can myself pretty closely fix the origin of it. A gentleman of the legal profession, who is interested in a Municipality near Calcutta, pressed me very strongly to move this identical amendment. I then declined to do so precisely for the reason I have now given, namely, that it is out of time. The Select Committee had submitted its report, and the subject could not now be properly considered,

In the course of the discussion I had with that gentleman, he made it extremely clear that his reason for wishing for this amendment was intimately connected with his desire to exclude a particular individual from being appointed a Commissioner of a certain Municipality. He explained that this gentleman had been nominated because he was somebody's cousin, and that that should not be tolerated. I submit that an amendment which is clearly connected with a purely personal question is *primâ facie* to be regarded with some degree of suspicion.

"Furthermore, on the merits of the question there is this to be said. The Municipal Act of 1876 contained a provision substantially identical with that now proposed. That Act provided that 'no person who is not an owner or occupier of land in the Municipality shall be appointed or elected a Commissioner in such Municipality.' Before we proceed to take any action in this matter, I think it is desirable to ascertain why the Select Committee of the Council, which considered the Bill which was passed in 1884, when the enthusiasm for the principle of Local Self-Government was in full flush, thought proper to strike out the provision on this subject which was contained in the Act of 1876. The provision in question was a conspicuous one, and the presumption is that they struck it out advisedly, and that it was not a mere mistake in drafting.

"However, apart from this, there are objections on the merits of the question. Is it in the least likely that the Government will appoint a school-boy to be a Municipal Commissioner, and as to the age of 21 years, no particular virtue attaches to it, because in point of fact, by the Indian Majority Act, IX of 1876, the age of majority, except in certain special cases, is fixed at 18. Then as to the question of residence, I can conceive a case—and I believe most Hon'ble Members can conceive similar cases—in which the effect of the proposed restriction would deprive the Municipality of certain very able members. I believe that to be the case; but unfortunately, owing to the want of time, I have not been able to make further enquiries on the point; but I believe that the best work done in the petty municipalities around Calcutta has been done by people who live in residential houses in Calcutta, but who are nominated by the Government to work in those municipalities simply by reason of their special aptitude for the work, and it would be a great misfortune to those municipalities if such persons were excluded from nomination by the Government. As for the question of limiting the provision which confers upon Government the right of nomination to persons of the male sex, such things move very slowly; but are *both* the Hon'ble Members who are interested in this amendment certain that at no distant date educated native ladies may not claim a privilege which has actually been conferred on members of their sex in England?"

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I agree with the Hon'ble Member in charge of the Bill that it is somewhat late in the day to bring forward this amendment, and that it would have been a distinct advantage if the matter could have been considered in Select Committee and a provision formulated on the subject. But at the same time I venture to point out, for the consideration of the Hon'ble Member in charge of the Bill, and for the consideration of the Council, that, admitting that the matter comes up rather late for discussion, that ought not to be allowed to stand in the way and prevent our taking it up. The whole question is whether it is a desirable amendment or not. That really is the issue before the Council. Possibly, as has been pointed out by the Hon'ble Member in charge of the Bill, this amendment, as far as the person is concerned who suggested it, and who interviewed Hon'ble Members in connection with it, arose out of personal motives, but Hon'ble Members must know that oftentimes personal grievances prompt most valuable reforms, and that though we may object to the circumstances under which an amendment is put forward, the real question which we have to consider is whether the amendment is a desirable one or not. The Hon'ble Member in charge of the Bill has stated, and we know it as a matter of fact, that gentlemen living in Calcutta, who have been Municipal Commissioners of mufassal towns have done great service to those Municipalities. But in every instance they were elected members of the Municipalities concerned. They were residents in the sense in which the word is used in the rules for the election of Municipal Commissioners, and they were duly elected by the rate-payers. I might instance

the case of the late Dr. Troylukho Nath Mitter, who, though living in Bhowanipore, was an elected Commissioner of the Serampore Municipal[illegible]ad was its Chairman. Again, take the case of the late Babu Bipro Banerjee, Chairman of the Barasat Municipality, who also did great servi Chairman; but while residing in Calcutta he had a house at Barasat and [illegible] therefore a 'resident' under the rules, and was an elected Commissioner. I take it that local interest is the essence of Local Self-Government. A man must feel interest in a Municipality with whose affairs he happens to be connected. But if the Government in its discretion wish to appoint an outsider, he cannot possibly feel the same degree of interest in the affairs of the Municipality as a person who is a resident within the meaning of the Act. I have heard complaints in respect of this matter, and let me mention a concrete case—the case of a gentleman connected with the Titaghur Municipality. This was not a case of a personal grievance, and, if it was, it has the complexion of a public grievance. A gentleman living in Titaghur has been appointed a member of the South Barrackpore Municipality. There is not much love lost between the two Municipalities. Titaghur was withdrawn from the South Barrackpore Municipality after a stern fight. This gentleman was appointed by the Government—I don't wish to challenge the appointment—as a member of the South Barrackpore Municipality, although he is a non-resident and a resident of Titaghur. It has been represented to me that his presence at the meetings of the South Barrackpore Municipality is at times a source of some little embarrassment to the members of that Municipality. I do think the Government ought to surrender its discretion in this matter. The Government did so in the Act of 1876, which has just been read to us. Under that Act nobody could be appointed by the Government as a member of a Municipality, unless he was a 'resident' of the Municipality. I think that was a wholesome provision, and I hope the Government will not take their stand on the lateness of the amendment, but will accede to the Hon'ble Member's proposal, and amend the Bill accordingly."

The Hon'ble MR. A. M. BOSE said:—"I should have somewhat wavered in my loyalty to this amendment if there were any foundation for the prospect, vaguely referred to in the concluding remarks of the Hon'ble Mr. Risley, of lady members gracing municipal meetings. But as that hope has not been held out, and as in the proceedings during the last twelve years no indication of that graceful desire on the part of the Government has been afforded, I think I shall be true to the amendment of which I have given notice. I entirely agree with my hon'ble friend, Mr. Surendranath Banerjee, that the question is not whether this amendment comes late or not, but whether it is a necessary and a proper amendment, whether it is an amendment which would be likely to strengthen the working of the Act. This is a matter which involves a simple question of principle; it is not buried or lost in a variety of details or a mass of facts. We have had the amendment before us for some time, and I may be permitted to say that the reference which the Hon'ble Member in charge of the Bill made to the fact that this provision existed in the Act of 1876, is to my mind an argument in favour of the amendment and not against it. The Hon'ble Member said that in the Act of 1884 this old provision of the Act of 1876 seems somehow or other to have dropped out. Surely the necessity for the introduction of the very Bill, now before the Council, might show to the Hon'ble Member that sometimes omissions or mistakes do take place through pure inadvertence. And there may possibly have been also this consideration that, as in 1884 for the first time the privilege of election was conceded to municipalities in the Mufassal, it was thought desirable that the Government should keep in its hands the absolute and unrestricted power of nomination. Since then twelve years have passed and the Act has been admitted on all hands to have been, on the whole, a success, including those who had some misgivings at its first introduction; and I submit the time has now come when the unrestricted power should be limited and defined in the manner now proposed. If the Government were able in 1876 to select the whole number of Commissioners from amongst the rate-payers of a municipality, it was not a compliment either to them or to the municipalities to say that in 1896 they could not select *one-third* of that total number from the rate-payers.

"Then coming to the merits of the amendment, I beg in the first place to say that it does not in the slightest degree imply any want of confidence in the Government. On the contrary I firmly believe that according to the light and the information placed before the Government, which sometimes is perhaps a limited light because the Local Government has no direct means of knowing all the facts, the Government has done and will continue to do its very best. But it is a question of principle which is desirable in itself, and which is recommended by experience. In this connection I would also make this observation, with reference to what fell from the Hon'ble Member in charge of the Bill, that I support this amendment not because any individual may have a grievance—on that point I am not competent to say anything—but I support it on general grounds, I support it because I believe this provision would tend to the advantage of the municipalities and the strengthening of their working. As I have already said, the Government undoubtedly endeavours to exercise its discretion in the best way, but I would ask what is the reason that in the case of elected Commissioners, the limitation of residence or payment of rates is required. It cannot be on the ground of want of confidence in the rate-payers; for then they would not have the privilege of electing at all, but because it is practically admitted that nobody should be on the Commission unless he has some link of connection with the municipality either by residence or by possession of property within its limits. That is the only justification for the limitation in the case of elected Commissioners, and that, after 12 years' experience, ought to be, I submit, the guiding principle in regard also to the nomination of Commissioners. Surely within the limits of a municipality the Government can have no difficulty in getting one-third of the Commissioners who are competent and qualified under the rules for election. In the case of the Calcutta Municipality that restriction as regards nominated Commissioners exists; they must either be resident or pay certain rates. I submit that in the case of Mufassal Municipalities the same reason exists, perhaps even to a larger extent; because owing to easy accessibility to Calcutta, people living outside Calcutta might easily transact business, and have some acquaintance with the various wants and circumstances of the town. But in the case of Mufassal Municipalities that would hardly be the case, and it was therefore more desirable that no one should be elected or nominated a Commissioner who is not either 'resident' or does not pay rates in the Municipality. Now that this amendment is before us, we should lay it down that the gentlemen to be appointed Commissioners must have some interest in the Municipality, some stake in its welfare, in one or other of the ways indicated in the amendment. In the interest of the Municipalities themselves, I hope this amendment will be accepted."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"I have to offer a word or two of explanation in justification of the vote I propose to give in connection with the question raised in this amendment. No doubt, I am not prepared to differ from the broad proposition that, generally speaking, it is fairly reasonable that persons who are to have a voice in the management of municipal affairs should be those who have some interest in the well-being of the Municipality either as residents or as rate payers. And if there had been absolute harmony and an absence of race-feeling in the Municipality, I would have joined hands with the Hon'ble Members who have spoken in favour of the amendment; but it is impossible for us to shut our eyes to actual facts and to the state of feeling in the mufassal, and to put the matter mildly, it is a subject of regret that there should be some little want of harmony between Hindus and Muhammadans. There are places where the Muhammadans ought to be represented in larger numbers, and I regret to say that they are not appropriately represented for fault not their own. It is therefore in every way desirable that Government should have power and should be in a position to restore or maintain the equilibrium between the two classes as the case may be. There must be sufficient discretion left in the hands of the Government to be exercised as occasion arises. I would strongly advocate the desirability of Muhammadans having a fair share in the administration of municipal affairs in the mufassal, where that community preponderates. When principles and

theories lead to conflicting results, that principle which is most expedient and least mischievious in its results should be adopted. All theories must be tested by facts. It is undesirable in the protection of Muhammadan interests that I should support a proposition simply because it sounds well when read and reads well on paper. The provisions contained in section 14 of the Act have now been in existence since 1884. During the whole of this time no instance has been brought forward of misuse of the power. And apart from other views I think the very interests which are appealed to require that the existing provisions should be maintained. It may be that a case might arise where, for the protection of the interests of the Municipality itself, it might be necessary to appoint an outsider and to take full advantage of the wide power given by the section in question. I would therefore vote against this amendment."

The Hon'ble MR. PRATT said:—"Although at first sight this amendment does seem to be both moderate and reasonable, still I feel constrained to vote against it on two principal grounds. In the first place, as has already been remarked, this amendment has been somewhat abruptly brought before us. No notice has been given to the municipalities interested with regard to this question, and we have not had full opportunity of making enquiries regarding it. As has been already pointed out, this Council, after due deliberation, struck out from a former enactment, the provision which it is now proposed to re-introduce, and I should like to be in possession of the reasons which induced this Council to act as it then did, before I give my vote in favour of such an amendment. In the next place I believe it is the practice at the present time to appoint the Sub-divisional Officer to be a Commissioner of Municipalities which are not necessarily situated at the head-quarters of the sub-division; and I should conceive that no more fit individual could be appointed a Commissioner by the Government for such municipalities. And we can also quite understand that in the case of young and budding municipalities, instances will occur when it would be advantageous to appoint as Commissioners public-spirited men who, though not residing in a particular municipality, yet take a real interest in its affairs. Therefore I say that for these reasons I am not prepared to give my vote for this amendment. Perhaps on some future occasion, and when more information on the subject is placed before the Council, a provision of this kind may be accepted, but at present I feel constrained to vote against the amendment."

The Hon'ble RAI ESHAN CHUNDRA MITTRA, BAHADUR, in reply, said:—"I was rather surprised to hear the Hon'ble Member in charge of the Bill raise a suspicion, for which there was absolutely no ground. I can assure the Hon'ble Member that nobody called on me for this purpose. I considered it a necessary amendment, and I put it forward for the acceptance of the Council, and I regret that such an observation should have been made. Certain persons might have called on the Hon'ble Member, but I say that nobody called on me on the subject. As regards the question which has been raised by the Hon'ble Mr. Pratt that the Sub-divisional Officer may be very useful as a Commissioner of a Municipality, I say it is difficult to imagine that a Sub-divisional Officer could not be paying some rates. Therefore I have used the words 'residing or paying rates.' He might possess a horse and carriage for instance, and, as I have said, I can hardly imagine that he would be excluded under this provision. It does not provide that rates must be paid for the previous twelve months or anything of that kind, or that he must be a resident, but merely 'residing.' As to the objection that this amendment comes late in the day, I submit it is not a question of fact but a question of principle, and as the principle was admitted in the previous Act, I submit there is no reason why it should not be admitted in this Bill."

The Hon'ble THE PRESIDENT said:—"I do not wish to detain the Council by any lengthy remarks, but I myself am inclined to agree with the Hon'ble Member in charge of the Bill that this amendment has come upon us rather suddenly at the last moment. We have had no opportunity of consulting Local Municipalities, and of considering the matter in the Select Committee, of which I was

a Member. It has been strongly brought to notice that no inconvenience has arisen from this power which has remained in the hands of the Government for the last twelve years. It was also said by the Hon'ble Member in charge of the Bill, that he is not aware of the reasons which actuated the Council, when passing the Act of 1884, to change the provision of law as it existed in the Act of 1876. Neither am I in that position, nor should I be without studying the debates of the Council. I may, however, be able to throw some light on the subject. The change may possibly have been introduced in view of the circumstances of the many small municipalities in the 24-Parganas, and on the other side of the river for which it was not always possible to secure suitable Commissioners or the most suitable Chairman among the residents. In the case of the Serampore Municipality, the right of Dr. Troylukhonath Mitter to be appointed a Commissioner was, I believe, challenged, he being a non-resident, but in the interests of the Municipality his appointment as Chairman was considered extremely desirable; and in my own case I once remained a Commissioner and Chairman of an important Municipality, though I had ceased to be a resident; but if the section of the Act of 1876 had been retained, it would have removed me from those posts; but whether that would have been an advantage to the Municipality or otherwise it is not for me to say. There is an instance within my knowledge where, owing to some rule of the High Court that Munsifs shall not be appointed Chairman of Municipalities, it was impossible to find a proper person to be Chairman within the limits of the Municipality itself, and where as Commissioner of the Division I solved the difficulty by suggesting the appointment of a person to be the Chairman, who was residing at a distance, and who was in no way connected with the Municipality. So that the law, as it now stands, has a superior advantage, whereas if we alter it now it might possibly have a disadvantage which might interfere with the very working of the Municipal Law. I have no doubt instances will occur to other Hon'ble Members of persons living in Calcutta, who have some interest in neighbouring municipalities and are willing to devote a portion of their time and attention to the affairs of such municipalities."

The Motion being put, the Council divided:—

Ayes 5.	*Noes 10.*
The Hon'ble Mr. Das.	The Hon'ble Mr. Wallis.
The Hon'ble Babu Guru Proshad Sen.	The Hon'ble Mr. Gladstone.
The Hon'ble Rai Eshan Chundra Mittra, Bahadur.	The Hon'ble Maulvi Muhammad Yusuf Khan Bahadur.
The Hon'ble Mr. Bose.	The Hon'ble Nawab Syud Ameer Hossein.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea, Bahadur.
	The Hon'ble Mr. Glass.
	The Hon'ble Mr. Finucane.
	The Hon'ble Mr. Risley.
	The Hon'ble Mr. Pratt.
	The Hon'ble Mr. Grimley.

So the Motion was negatived.

The Hon'ble MR. A. M. BOSE, by leave of the Council, withdrew the following motion, identical with the one just disposed of, of which he had given notice:—

That in section 3 of the Bill, after sub-section (1), the following be inserted:—

"(1) After the words 'for election to be a Commissioner of such Municipality in the paragraph following the first proviso to section 15, the following shall be added, namely:—

'And no one, unless he is a male person, who has attained the age of twenty-one years, and either resides or pays rates in the Municipality, shall be deemed qualified for nomination as such Commissioner.'"

The Hon'ble BABU GURU PROSHAD SEN also, by leave of the Council, withdrew the motion of which he had given notice that in section 3, clause (*i*) of the Bill, for the words "three rupees" the words "one rupee and eight annas" be substituted.

The Hon'ble MR. A. M. BOSE moved that in section 3, clause (*i*), after the words "three rupees," the following words be added:—

"in Howrah, and one rupee eight annas in any other Municipality."

He said:—"The principle of this amendment is that legislative sanction should now be accorded to the rules which have been framed by executive authority, which have been fully tested in operation for many years, and in regard to which there has been no complaint. Let me at the outset most fully admit that the provision of the law, as it now exists, was necessary at the time when the Act of 1884 was passed. At that time a maximum qualification was fixed, and the lower limit was left to be determined by the Government on the result of enquiries to be instituted by it. There was not then sufficient information before the Council to enable it definitely to fix what ought to be the rate of qualification in the Act itself. A maximum was laid down; and after that the Government set on foot enquiries, as the result of which certain rate-paying qualifications have been introduced and given effect to. No complaint, either in the Press or in any other way, has been made that the qualification, as it had been framed by rule, is liable to objection; therefore I ask that the qualification which has been so fixed be now embodied in the law. I fully express my gratitude to the Government that in spite of the limit of three rupees provided in the Act of 1884, they reduced it so as to place the franchise on a broader and wider basis; and I submit that the time has now come and the present opportunity should be taken advantage of, to fix that qualification by law. A vitally important matter like the qualification of voters ought to be determined by the Statute itself unless there are indeed strong reasons to the contrary. But no such reasons now exist, or can even be alleged to exist. I submit that the experience of the past does afford grounds for taking as the basis of legislation what the rules have so long laid down; that it ought not to be left to executive order to determine who shall have the franchise, but it is the duty of this Council to decide the question. I would leave the explanation as it is proposed by the Government, namely, reserve to the Government the power, if they think it necessary, to reduce the qualification still further in any case which seemed to them to require such reduction or to meet the case of newly-created municipalities; but subject to that provision, whatever qualification has been found by these twelve years' practical working to be expedient ought to be introduced in the Act; and this is what my amendment proposes to do. I will not trouble the Council with all the opinions which have been sent in favour of this amendment; but one opinion I shall venture to place before them because it is the opinion of a late Secretary to the Government and a Commissioner of Division, and one of the most distinguished Members of this Council. I refer to Mr. Buckland. He says:—

'With regard to section 3, (1), (2), (3), the Chairman of the Vishnupore Municipality writes that under the rules the right to vote has been extended to persons who pay rates to the amount of Re. 1-8, while under the Act the right is given to those who pay Rs. 3. The law should, he suggests, be brought into conformity with the rule and practice founded upon it. This appears to be worthy of consideration.'

"The British Indian and other Associations and public bodies have also supported this proposal. I say therefore that it is worthy of serious consideration that we should not leave this question of franchise to be decided by executive rules, but should bring the law and the practice into harmony with one another. I am told that besides the Municipality of Howrah, in the case of the Cossipore-Chitpore Municipality, the qualification has been raised to Rs. 3, and I have no objection to an exception being made in favour of that Municipality as well. But let not this important matter be left to be from time to time decided by the Government. It may be that long years hence the time may come for another important departure. Possibly by that time there would be occasion to revise this Act on other grounds also; but until that time comes I submit that the law should be brought into conformity with the practice, as established by rule—a practice which has been tested and not found wanting by the experience of the last twelve years."

The Hon'ble BABU GURU PROSHAD SEN said:—"There are some cases in which we are told the rating qualification of voters has been raised. Besides

the case of the Municipality of Howrah, we now hear that in the Cossipore-Chitpore Municipality the rating qualification has been raised to Rs. 3. That is a solitary case, but we have not heard of any case in which the rate fixed by the rule at Re. 1-8 has been lowered. So far, therefore, it has been a success, and that is a good reason why the rating qualification should now be fixed at that rate in the law. There has been no case in which, after the passing of the rules, the Government have thought fit to lower the franchise, but it has been thought fit to raise it in one case. Therefore I submit that it will be one of the strongest safeguards for the present franchise if, by an Act of the Legislature, the rating qualification is fixed at the lower rate by the law and not left changeable by the action of the Executive. Section 15 of the Act may be read in two ways. The word there used is 'qualification.' It may be qualification according to money rate or qualification according to age. I do not mean to say that the Government would ever think of doing so; but there is nothing to prevent them from raising the rating qualification, if they think fit, to Rs. 3 in the case of every Municipality in the Province. In that case large numbers of people, who have been enjoying the franchise for the last twelve years, will have been disenfranchised. Under the rules there are two classes of voters, those who pay rates to the amount of Re. 1-8, and those who pay a rent of not less than Rs. 20; and there may be danger of the franchise being lowered still more, and you swamp the present real body of voters who come under the Rs. 3 rule. But if instead of swamping them thus you bring down the franchise to Re. 1-8, the effect will be that the Re. 1-8 men will then be the real voters under the law. Their number would be, I think, three times as many as the number of those who pay Rs. 3. Therefore, I submit it is but fair that the Legislature should fix the maximum amount of rates on the payment of which a man will be entitled to vote in conformity with the rules which have been in force for the last twelve years."

The Hon'ble MR. RISLEY said:—"I have watched with interest for the last half hour the efforts of my hon'ble friend, the member for Dacca, to ride two horses at the same time. The feat has been attempted before, but its difficulty is proverbial, and it takes a very old Parliamentary hand to do it really well. For the cause which has led my friend into this unfortunate position we must go back to an earlier meeting, when the Bill was referred to a Select Committee. The Council will remember that the Hon'ble Member's sense of the legal fitness of things suddenly became very tender. He was shocked at the supposed discordance of the law and the rules, and urged that they should be reduced to harmony. I endeavoured to the best of my ability to relieve his mind by pointing out, not on my own authority, but on that of the Hon'ble the Advocate-General, that there was no discord at all, and that under these circumstances this passion for harmony was a little out of place.

"My friend, however, stuck to his point in Select Committee, and after much discussion we eventually drafted the explanation which stands in the Bill. We did this, not because there was or ever has been any doubt in the minds of lawyers as to the meaning of the law as it now stands, but because it appeared from the opinion that this section had been misunderstood by some people, and in an Act which is worked to a great extent by Municipal Commissioners it seemed desirable to go out of our way to be clear. The explanation I submit leaves nothing to be desired in point of clearness. I have discussed it with the Hon'ble the Advocate-General, and I have his authority for saying that it adds nothing to the law and takes nothing away. It merely adds to the section an explanation in popular language of what the section really means.

"So far, the Council will see, there was not, nor has there been up to the moving of this amendment any suggestion of changing the law. My friend gave no indication of any such intention in Council. He expressly disclaimed any such intention in Select Committee. His soul only pined for harmony. Now he has got it in the form of the explanation; but still he is not happy and like a familiar personage in fiction he 'asks for more.' He wants to make a sweeping change in the law. He wishes to fix and stereotype the existing Municipal franchise and to prevent the possibility of its being changed except by the tedious process of legislation. That is what my friend's amendment really

means. He has endeavoured to obscure the fact in his note of dissent which so curiously distorts the true position of the case that I must examine it a little. He says the qualification of voters is an important point. Granted. He goes on to say 'this point it is proposed to leave to the Executive Government to settle.' But is it possible that so learned a lawyer does not know that this power which he writes of as if it had been invented yesterday has, in fact, been exercised by Government for the last 20 years—in fact, ever since the passing of Bengal Act V of 1876, section 16 of which is practically identical with the first part of section 15 of the present Act? It is admitted that this power has been wisely used, no complaint as to the manner of its exercise has ever been made, and at the present moment, as I said just now, in reply to my hon'ble friend's question, the Government has before it several applications from some of the most advanced and intelligent Municipalities asking us to exercise this power by raising the voting qualification from Rs. 1-8 to Rs. 3 by doing in fact exactly what the Hon'ble Member wishes to render impossible.

"Again, my friend says 'if rules were to be the guide, there was no use whatever in bringing this matter of amendment of the Municipal Law before the Legislature.' But who brought it before the Council? Why my hon'ble friend himself, who insisted on the removal of an imaginary discord, and by the whole tenor of his speech, gave us to understand that he advocated no change in the substantive law.

"Now if my hon'ble friend had followed the proper course—the course which fairness and common sense indicate—he would have stated either in Council or in Select Committee what his real intention was, and we could then have taken opinions on the subject and have ascertained the views of District Officers, Municipalities, and Associations on the subject. It is neither seasonable nor reasonable to spring so large a change on the Council at the last moment.

"I may add that the amendment introduces so material an alteration in the Bill that would in any case be necessary to report it to the Government of India. If we adopted it now with no further consideration and no further evidence than is now before us, it is extremely probable that His Excellency the Viceroy would refuse his assent to the Bill.

"My friend says in his dissent that there is no hurry about the measure. That, as I explained on a former occasion, is not the case. Under the law the Municipal elections come on in November next. We must, therefore, pass this Bill in the present Session of Council, and we can only do so by declining to consider contentious amendments moved at the eleventh hour.

"So far I have stated what may be called preliminary objections to the amendment. These in themselves are obviously conclusive, and I might fairly stop here without going into the merits at all. To complete the case against the amendment, I may observe in the first place that the proposed change is unnecessary; in the second, that it would be inconvenient.

"On the first point I am content to rely on the authority of the Select Committee of 1893-94. That Committee may be described, so far at any rate as the non-official members are concerned, as a Committee of all the talents. It numbered among its members my hon'ble friend Babu Surendranath Banerjee, whose experience of municipal administration is large and varied: my friend Sayad Fazal Imam, the energetic Vice-Chairman of the great Municipality of Patna, and Mr. Lal Mohan Ghose, whose tact, common sense and knowledge of public business proved invaluable. In fact, you may say of it, as was said of the Master of Balliol, that what that Committee did not know was not knowledge. Their attention was expressly called to the provisions of section 15 by the proposal to raise the amount qualifying for a vote in clauses (1) and (2) from Rs. 3 to Rs. 5. They had before them the opinions of 54 Municipalities and representative institutions, of whom 21 were in favour of the Re. 1-8 qualification, 23 in favour of raising it to Rs. 5, and 10 in favour of raising it to Rs. 3. But neither the Committee nor the persons who gave opinions proposed to change the law in the manner now suggested, and the opinions bring out very clearly the fact that different municipalities may in this matter require different treatment.

"That is the common sense view, and that also is the answer to the attempt to appeal to English precedent. We have in Bengal already 148 Municipalities, and the formation of others is under consideration. These Municipalities vary

in size and importance from Howrah with a population of 116,000, of whom 16,000 are rate payers, and a yearly income of nearly three lakhs, to Nalchiti, in Backergunge, with 1,645 inhabitants, 265 voters, and a yearly income of Rs. 1,908. Is it in reason to compare this state of things to the state of things that prevails in England? Can it seriously be argued that it should be made impossible for the Government to change the voting qualifications of Nalchiti without passing a special Act, that such a very big steam-hammer should be employed to crush such a very tiny nut? After all it is some objection to a proposition that it is absurd."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"No one could have listened to what has fallen from the Hon'ble Member in charge of the Bill without coming to the conclusion that there is a great deal to be said on the other side of the question. It is a question which admits of considerable difference of opinion. I have talked with persons versed in municipal affairs, and I have heard opinions expressed adverse to the view embodied in the amendment. I therefore think we ought not to come to the conclusion that any one who differs from the amendment of my hon'ble friend is necessarily an enemy of Local Self-Government or a traitor to the best interests of his country. I think differences of opinion in a matter like this are legitimate and may be expected. The Hon'ble Member in charge of the Bill has referred to the discussions which took place in the Select Committee of 1894, and has paid a compliment to the Select Committee for which I beg to tender my acknowledgments. This question was the subject of most careful and anxious deliberation. We contented ourselves by keeping the law as it was, and my reasons were these: An attempt was made to raise the maximum rating qualification from Rs. 3 to Rs. 5. I thought discretion was the better part of valour, and we thought we gained a point by keeping the qualification as it stood in the Act. That was the *raison detre* of the vote which I gave on that occasion. This matter was considered very carefully by the Select Committee on this Bill. In fact I suggested the amendment which has now been placed before the Council, and a compromise was effected, which is embodied in the Explanation. If you read the original Bill introduced in March 1896, and compare it with the present Bill, you will find that the original Bill does not contain this Explanation. It was the result of a compromise which was come to on the discussion of the amendment I suggested. It reproduces what is really the present state of the law, and will, I have no doubt go far to popularize the Bill. At the same time I admit it would be advisable to stereotype in the law the concession which has been made by the Local Government in the rules which it has framed. The franchise has been deliberately lowered to Re. 1-8 with very few complaints. Here and there there have been complaints, and in the nature of things complaints were bound to be made, having regard to the number of Municipalities and the differences between them in respect of their size, their resources and other circumstances connected with them. But the complaints have been very few indeed. That being the case, namely, that the franchise has been fixed at Re. 1-8 by the beneficient policy of a progressive Government, I think the time has come when an advance might be made in the law, and that what has hitherto been embodied in the rules should be stereotyped in the law. My hon'ble friend in charge of the Bill suggests that this will represent a substantial change in the law. I do not think so. I say it will be an adaptation of the law to what is the present practice. It will be harmonising law with practice. It will be a step in advance. Now that we are amending the law, such an amendment, if accepted, will represent a distinct advance upon the system of Local Self-Government in this Province. A rule exists which is much more liberal than the law. It embodies the policy of the Administration of the day, and I am happy to say that the attitude, specially of the present Government, has always been one of sympathy with the system of Local Self-Government. It will only be an adaptation of the law to the existing practice, and I hope my hon'ble friend, the member in charge of the Bill, will see his way to accept the amendment."

The Hon'ble RAI ESHAN CHUNDRA MITTRA, BAHADUR, said:—"After the eloquent speech which the Council has just heard from my hon'ble friend, Babu

Surendranath Banerjee, it is unnecessary for me to say much. It appears to me that the fact that the rule of Re. 1-8 franchise has worked well cannot be denied. I have been the Chairman of the neighbouring Municipality of Hooghly for the last twelve years, and I have heard no complaint against this rule. The people in fact seem to be under the impression that it is the law. I, therefore, contend that the law should be harmonised with the rule of Re. 1-8 franchise."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"It is no doubt a sound principle that an Act of Legislation should be as complete as possible and that as little as possible should be left to the rules to be framed under the Act. I myself tried to enforce the recognition of that principle in this Council in connection with certain measures. But I failed to succeed in cases that came much better within the operation of this principle.

"It would no doubt be a triumph of legislation if all details relating to the working of the numerous Municipalities in Bengal, consisting of more than 100 in number, could be finally and formally laid down. But the causes which affect them are so varied and so many that to attempt to lay down rules—in however general terms they might be expressed—in respect to each and all would be a gigantic and hopeless task. Certain matters must therefore be dealt with in the Act in their outline, so that the details must be worked out by the rules as occasion arises in respect of each individual case. We must have confidence in the Government and we must hope that the right thing to be done shall be done. In fact, all the gentlemen who have preceded me have spoken in terms which shew utmost confidence in the Government. From the satisfactory way in which Municipalities have under the rules framed by the Government for a period of about twelve years, worked one may confidently expect the same satisfaction in future. The Government would enforce the same standard as before, but it has under the Act as it stands some discretion and some power which has only been exercised in cases of emergency. I do not think it would be to promote the interests of the community I represent if the Act is to be rendered less elastic and if the Government is to be deprived of the power which was hitherto vested in it."

The Hon'ble MR. A. M. BOSE said:—"I trust that at any rate we shall have the vote of my hon'ble friend who has last spoken in support of this amendment. He admitted fully the soundness of the principle, but his objection to vote in its favour arose from what he believed to be the practical difficulty of carrying it out. That was an argument which was also advanced by the Hon'ble Member in charge of the Bill. But that argument is opposed to actual experience. The rules were framed in 1884, and with the exception of one Municipality to which the 3 Rs. qualification was applied, with regard to all the other Municipalities, the Government found on enquiry that the one rule of Re. 1-8 would be suitable; and it has been admitted that no complaints have been brought forward against this arrangement. Let not therefore the Council be scared away by the idea put forth by the last speaker and also by the Hon'ble Member in charge of the Bill as to the gigantic and hopeless task of framing a large number of rules. Experience has shown that that is not necessary. The gigantic task referred to has already been accomplished, was accomplished in fact 12 years ago; and the method of its performance has given uniform satisfaction. I was glad to hear of the compliment paid by the Hon'ble Mr. Risley to the Select Committee of 1894. But as that compliment has been used as an argument against the acceptance of this amendment, I may be permitted to remind the Council that the Hon'ble Member has not always spoken in such high terms of that Committee. In his Circular letter, dated the 28th April last, addressed to all Commissioners of Divisions, he says that 'owing to defective drafting, section 15(3) of the Act is wholly unintelligible in its present form.' Surely that drafting was placed before the Select Committee, was considered by the Select Committee, and was adopted by them. But the Circular says that a section which was considered and passed by the Select Committee has in fact no meaning at all.

"Then coming to the other point which was urged, that this amendment will introduce a material change in the Bill, and that it is not right or fair that the change should be brought up in this *ex-parte* way, I submit that if there was any matter which was referred to all Municipalities and District Officers for opinion in connection with the present Bill, it was the question of this very section 15. It was prominently mentioned in the Statement of Objects and Reasons, and was referred to at the time when the Bill was sent to the Select Committee and from the prominence so given to it, section 15 in all its aspects, was fully considered by all Municipalities. As a matter of fact a great many of the parties who were consulted have given their opinions on this very point, and many of them are in favour of the proposal to harmonise the rules and the law—the very principle which is now being contended for. Therefore, whether it is a sound principle or an unsound principle, at any rate it is not liable or open to the objection that it has been sprung upon the Council at this late hour. I have already referred to Mr. Buckland's opinion and I need not refer to it again.

"The whole question lies in a nutshell. What we ask is that the Government should not have the power to disfranchise a body of men, who have enjoyed and exercised the power of voting for so many years, without the sanction of the legislature. Is that asking for too much, or for what is unreasonable? After twelve years the law is being amended; the Government has enough experience whereon to base definite proposals, and the proposed explanation leaves to the Government the power of extending still further the benefit of its liberal policy by reducing the franchise.

"With reference to what is called the tedious process of consulting this Council, I consider that a desirable process, even if it should sometimes prove tedious; and I contend that it will be to the interest of the Government itself to adopt that procedure in all cases in which they may desire to deprive the people of a privilege which by its own action they have enjoyed for a long time. And after all it is not a very tedious process. If after a period of say from three to six years the Government find in the case of a certain Municipality or a group of Municipalities a slight raising of the rating qualification is necessary, a short Bill of one section will answer the purpose, if the materials placed before the Council are sufficient. That is the principle of the amendment, and I appeal to the Council to accept that principle as reasonable and sound. And I would appeal to the Government to consider that disfranchising people is not a popular thing. By taking the legislature into its confidence when circumstances rendered this course of disfranchising necessary, they would give publicity to their reasons, enlist public support on their behalf, and, if unpopularity there was to be, at least make the legislature sharers in that unpopularity."

The Hon'ble THE PRESIDENT said:—"The course pursued by the Hon'ble Members, the movers of amendments 3 and 7, calls to mind an utterance ascribed to a former Lieutenant-Governor of Bengal, Sir John Peter Grant, that the administration of this country could be appropriately described by the metaphor of changing six pence into half-pence and the same half-pence back into six pence every decade. The amendments are a singular example of the aptness of this illustration, for they propose to revert to a policy which was deliberately disapproved in this Council twelve years ago, and the abandonment of a policy as deliberately approved in the same debate, which has stood the test of all these years. In the Municipal Bill of 1884 the property qualification was placed at Re. 1-8; but before the Bill passed into law this was rejected and a Rs. 3 rate adopted. As a Member of the Select Committee I have read with attention the remarks of the Hon'ble Babu Guru Proshad Sen in support of his proposal, that the Legislature should provide for the qualifications of voters by positive enactment, and I have listened to the effective speeches before this Council of the Hon'ble Messrs. Bose and Surendranath Banerjee, but I venture to think that the Hon'ble Members have not clearly foreseen the full effect of the measure they advocate. It would, as the Hon'ble Mr. Risley has already said, fix and stereotype the franchise within narrow bounds, which cannot be passed without fresh legislation, while under the present elastic system it is possible to Government within certain limitations to extend the franchise at any

time and in any manner it may think fit. The principle underlying the present Municipal Act, as formulated by the Hon'ble Mr. Reynolds, who introduced the Bill in 1884, is the recognition of the demand of the more intelligent classes for a large freedom in the management of their own affairs, and this was intended to be secured by permitting the people to chose their own representatives. To this end the Act provided that rules should be framed by Government for the conduct of Municipal elections. There was so much variety in size and importance in the different Municipalities that it was impossible to make provisions in the new law which would be applicable to each. 'But' said Mr. Reynolds (I quote from the debates in this Council), 'if this power of passing rules were subject to no restrictions, it is evident that the power might be so used as to nullify the principle of popular election. It would be of little use to extend the elective system to a Municipality and then to declare by a rule that the franchise should only be exercised by those who paid Rs. 50 a year in rates. The Bill therefore provides that while Government may lay down such rules as it thinks fit, and may cancel any rule at its pleasure, it may not make a rule which would have the effect of excluding from the franchise any resident of the Municipality who pays rates to the amount of two annas a month.' This passage from Mr. Reynolds's speech makes it clear that the restriction imposed of a property qualification in certain cases, was framed in the interest of the rate-payer, and was in fact, a restriction intended to bind the hands of Government not to raise the franchise. It practically dictates to Government 'you may lower the franchise as you will, but you may not place a limit, imposed by law, which says that every person who pays rates to the extent of Rs. 3 is entitled to a vote;' but it does not say that any one who has paid below this rate is not so entitled, for it leaves it open to Government by the rules to reduce the limit as it may think proper. As a matter of fact Government has acted liberally under the rules, as the Hon'ble Babu Surendranath Banerjee admits, and lowered the limit generally to Re. 1-8, the only exception being the large Municipalities of Howrah and Cossipore-Chitpore. The amendments suggested appear to me to be opposed to the first principles of Municipal legislation, as understood when the Act was passed, and I shall therefore vote against them."

The Motion being put, the Council divided:—

Ayes 5.	*Noes 10.*
The Hon'ble Mr. Das.	The Hon'ble Mr. Wallis.
The Hon'ble Babu Guru Proshad Sen.	The Hon'ble Mr. Gladstone.
The Hon'ble Rai Eshan Chundra Mittra, Bahadur.	The Hon'ble Maulvi Muhammad Yusuf Khan Bahadur.
The Hon'ble Mr. Bose.	The Hon'ble Nawab Syud Ameer Hossein.
The Hon'ble Babu Surendranath Banerjee.	The Hon'ble Rai Durga Gati Banerjea Bahadur.
	The Hon'ble Mr. Glass.
	The Hon'ble Mr. Finucane.
	The Hon'ble Mr. Risley.
	The Hon'ble Mr. Pratt.
	The Hon'ble Mr. Grimley.

So the Motion was negatived.

The Hon'ble BABU GURU PROSHAD SEN moved that in section 3, after clause (*iii*), the following clause be added:—

"(*iv*) has paid not less than Rs. 20 as rent in respect of the occupation by him of a holding which is assessed with the rate under section 85, clause (*b*)."

He said:—"Under the law as it stands it will be found by the Hon'ble Members of this Council that there is not a word with respect to what is called the 'lodger franchise.' Section 15 stands thus:—

Rules to be laid down for election.

'For the purposes of the aforesaid election of Commissioners, the Local Government, with respect to each Municipality, shall lay down such rules, not inconsistent with the provisions of this Act, as it shall think fit, in respect of the Division, where necessary, of each Municipality into wards, and the number of Commissioners to be elected for each of such wards, the qualifications required

to entitle any person to vote for a candidate for election, and in respect of the mode of election. And the Local Government may at any time cancel any rule made by it under this section:

Provided that every male person who is at the time of such election, and has been for a period of not less than twelve months immediately preceding such election, resident within the limits of a Municipality, and who—

(i) has, during the year immediately preceding such election, paid, in respect of any of the rates imposed by this Act, an aggregate amount of not less than three rupees; or

(ii) has, during the year aforesaid, paid, or been assessed to the tax imposed by Act II of 1886 (an Act for imposing a tax on income derived from sources other than agriculture); or

(iii) being a member of a joint undivided family, one of the members of which has, during the year immediately preceding such election, paid, in respect of any of the rates imposed by this Act, an aggregate amount of not less than three rupees, is a graduate or licentiate of any University, or holds a certificate as a pleader or a mukhtear, or revenue agent,

shall be entitled to vote at the election of Commissioners of such Municipality.

'No person who is not entitled to vote at the election of Commissioners of a Municipality shall be deemed qualified for election to be a Commissioner of such Municipality.

"Then comes the explanation which provides that the 'rules made under this section may reduce but not raise any of the sums' mentioned in the first proviso thereto, and may declare that any persons who are not referred to in that proviso shall be entitled to vote.' There is a large class of persons paying Rs. 20 for holdings assessed under section 85 who have during the last twelve years enjoyed the franchise. Possibly it is not intended to deprive these persons of the franchise, but I submit that this explanation will not help to prevent their being deprived of the franchise, if the Government so determine. Some attempt has been made to father this explanation upon me. I deny that parentage, but I see that my hon'ble friend, Babu Surendranath Banerjee, owns its paternity. We have been told that any person who is a lawyer will not have any doubt regarding the correct interpretation of this section, but we have many opinions coming from Government officials and from public Associations with numbers of lawyers in them who have fallen into an error; and what is still more even the Hon'ble Member in charge of the Bill cannot but admit that the language of the section admits of two different interpretations. It is only the word 'qualification' in the early part of the section which one can rely upon to enable the Government to frame rules not inconsistent with the provisions of this Act which may reduce to a minimum the right given under the Act; for if a large number of persons with a qualification of a Re. 1 or As. 8 rate can be brought in in order to swamp the right of those who have the franchise under the law, then what is that right worth? Therefore strictly in accordance with the interpretation of the law it will not enable the Local Government to put a different construction to it than that of which it naturally admits, and you must read the word 'qualification' as meaning a qualification other than a monetary qualification. I am glad, however, that an assurance has been given that it is not intended to disfranchise this large body of voters. But if the rating qualification of Re. 1-8 has worked well within the last twelve years, why should we not, as a matter of principle, enact it by law?

"As for the other portion of my amendment, I hope I will not be misunderstood. This is an amendment which stands by itself. It has nothing to do with controlling the power of the Government. Even without controlling the power of the Government, you may form a class of voters under clause (iv) and still leave the section as it is. This also is the case with the first clause, the amendment upon which has just been lost. Under the amendment which I now propose persons will be entitled to vote who have paid not less than Rs. 20 as rent in respect of the occupation by them of a holding which is assessed with the rate under section 85, clause (*b*): that does not exclude the power of the Government to lower the franchise still further or to bring in other persons. I submit there is no reason why men who have been enjoying the franchise for the last twelve years should now be swept away, and which it is possible may be done. Well it may be said that there is no intention to sweep them away, and probably it will not be done under the present liberal Government. But what is the guarantee that this will never be done?

It is the object of my amendment to prevent this being done, and it has no reference to taking away the power of the Government in any way."

The Hon'ble MR. RISLEY said:—"I understood the Hon'ble Rai Eshan Chundra Mittra Bahadur to say, when the question of grouping these amendment was discussed, that it would be convenient that the principle of all these amendments should be discussed upon the first amendment, and that it would be unnecessary to discuss it again when the other amendments came up. The rules which have been framed under the Act were drawn up in 1884 by Mr. Macaulay in consultation with the Advocate-General and the Legal Remembrancer of the day, and the Law Officers of the Government have now held that those rules are in accordance with the law as it stands, and they add that the alterations which the Select Committee now propose do represent the law as it stands. The attitude which the Government has assumed with reference to all these municipalities is to act in accordance with their wishes, and their wishes have been thoroughly considered with reference to the effect they are likely to have. It appears to me impossible to please any one who takes the view the Hon'ble Mover of the amendment entertains. If we raise the franchise, the complaint is that we disfranchise numbers of voters. If we lower the franchise, we are told we shall swamp the existing voters. It is difficult to see how an unfortunate Government can possibly be right under these circumstances. The Rs. 20 lodger qualification was introduced in 1886 to meet a want which was then suggested; it was carefully considered, and there is no intention to deprive this class of voters of the franchise. But it might happen that the circumstances of particular municipalities might be such that a different amount of rent might be suitable, either more or less than Rs. 20. Why should it be proposed to cut off from the Government the power of complying with the wishes of those municipalities in a matter of this kind? That is the whole point to be considered in regard to this amendment."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am sorry I cannot accept this amendment. The Hon'ble Mover of the amendment proposes that a particular rule should be incorporated in the law, and the argument in favor of his proposal is that there is no guarantee that the rule may not be done away with in the future, and a large class of people may thus be disenfranchised. We have the assurance of the Hon'ble Member in charge of the Bill that there is not the remotest idea on the part of the Government to disenfranchise the class of voters referred to in the amendment, and if ever there was any such danger, the fact of this discussion in the Council will afford an effectual safeguard against such a proceeding on the part of the Government. That, I submit, is a sufficient safeguard against the possibility in the future of this right being taken away. We cannot possibly incorporate all the rules which have been passed by the Government into the law. I should have felt greater inclination to accept the amendment, if it were proposed to reduce the qualification from Rs. 20 to Rs. 10, if an attempt had been made to widen and broaden the franchise, and not to stereotype it. The Government ought to have the power of extending the franchise, but I do not think the Government have any intention to raise it in order to exclude those who now possess the right. The action of the Government in the past precludes the possibility of such an assumption. It has been a past of much sympathy and of generous encouragement of Local Self-Government, and we may take it that in the future it will be the same. For these reasons I am not prepared to accept this amendment."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"The question raised by this amendment stands upon a footing slightly different from that on which the question, raised in the last amendment which has just been disposed of, stood. The argument in favour of the amendment might be stated thus: no doubt the rules framed under the Act relate to lodging franchise, but the section itself is silent in regard to such franchise, so that this amendment supplies a heading and an item, and points to a class of persons not indicated in the section. Considered in this light, the amendment seems to be a reasonable one. The section lays down certain principles as landmarks, and indicates

certain classes in a general way, and the Government is empowered to frame rules thereunder: the rules are not necessarily to be restricted to the classes to which the section relates, but it would be more symmetrical if the classes could, with some approach to exhaustiveness, be laid down in the section. As the section at present stands, this class does not find a place there. The first clause deals with the qualification of payment of Rs. 3 rates, the second refers to the income-tax qualification; the third refers to the case of joint undivided Hindu families; but there is no clause relating to a lodging franchise.

"No doubt rules framed by the Government under section 15 comprise the case of lodging franchise, and there is also no doubt that such rules are not *ultra vires* in consequence of the omission of the class in the section. But it would be far more satisfactory to include a clause in section 15 introducing a heading relating to lodging franchise by way of recognition of a principle in the enactment itself. I do not understand it is the object of the amendment to lay down the limit of Rs. 20; for reasons already assigned by me whilst discussing the last amendment, I do not think it expedient to lay down a rigid rule and to restrain or limit the power of the Government in regard to the extent of the qualification. That must be left to the Government as a matter of detail. Hon'ble Members have already highly eulogised the action of the Government in framing the rules and carrying them into effect. If therefore the money qualification is the gist of the amendment, then I am not inclined to view it with favour, and the matter must remain where it is: but if the object of the amendment is to supply a class, then it has my sympathy. Therefore, regarded from this point of view, subject to some further light which might be thrown on the nature of the amendment and its effect in the course of the discussion, I am, as at present advised, inclined to vote in favour of the amendment."

The Hon'ble MR. DAS said:—"I was at first inclined to support this amendment, but in view of certain remarks which have fallen from the Hon'ble Member in charge of the Bill, I am not now prepared to support it. When this Bill was introduced, the Hon'ble Member said that it was one of the proposals—rather a prominent proposal—to grant what may be called a lodger franchise in future. I expected that the rule now under discussion would be embodied in the Act, because it certainly was in the nature of a lodger franchise. But as it has not been embodied in the Bill, I would have voted for the amendment, but for the remarks which fell from the Hon'ble Member in charge of the Bill, and which remarks were to the effect that a certain amount of latitude ought to be left to the Government so as to meet certain cases in which it may be necessary to reduce the amount of qualification and other cases in which it may be necessary to raise it; whereas if we embodied the rule as it stands in the Act, we would stereotype the qualification, and no latitude of discretion would be left to the Government. From the assurance which has been given by the Hon'ble Member in charge of the Bill and the remarks he made in introducing it pointing out the intention of the Government to confer a lodger-franchise, I venture to think we should rest satisfied that it is not intended by the Government to disenfranchise any persons who have been hitherto qualified."

The Hon'ble MR. A. M. BOSE said:—"I wish to make one observation, and that is, to suggest to the Hon'ble Mover of the amendment not to press his Motion to a division. I do this on two grounds: first that he may well be content with the very favourable statement made by the Hon'ble Member in charge of the Bill, namely that the Government have no intention of lowering the franchise, and, secondly, that the question of principle involved has already been decided, namely, whether the legislature ought to leave to the Government the power of making rules in respect of these matters instead of embodying them in the Act. That question was raised and fully discussed on a former amendment, and I think it is better to accept the fact that the Government has certainly had the better in the voting."

The Hon'ble BABU GURU PROSHAD SEN, in reply, said:—"I regret I cannot accept the suggestion of the Hon'ble Member who last spoke, because by my

next amendment on the agenda I propose to do what the Government are so much afraid of; that is to say, to control the power of the Government in these matters and have them determined by an Act of the Legislature. I have only heard a few remarks which ought to be answered in connection with this measure. My hon'ble friends who intend to vote against me on this occasion would like to give the Government a latitude to frame rules, in other words, to give an elasticity to the provisions of the Act, which is a favourite expression with some of them. As for that I have only to submit that elasticity will not be wanting if the Government would move the Legislature from time to time to amend the law as may be found convenient, and not leave it to be done by framing rules. It is also said that by leaving this power in the hands of the Government, the qualification might either be raised or lowered, as may be found expedient. I would not quarrel with the lowering of the franchise to any extent possible, but it will be dangerous to leave to the Government the power of raising the franchise. The Government might raise the lodger franchise from Rs. 20 to Rs. 100. That is what is meant by raising the money qualification, and we have no section corresponding to the section prescribing the 3-rupee rate as the maximum, that a man paying a rent of Rs. 20 shall be entitled to vote. If that had been inserted in the law, I may have seen the wisdom of Hon'ble Members opposing this amendment. There is no maximum fixed in the law. Everything is left in the hands of the Government, and they are left to provide this lodger-franchise at any amount they please under the words contained in the explanation—'and may declare that any persons who are not referred to in that proviso shall be entitled to vote.' That is something which appears to me—I will not say absurd—but something which is out of order. It will be, as was said by the Hon'ble Maulvi Mahammad Yusuf, not in the spirit of the law to frame rules by which you will confer a lodger-franchise. The spirit of the Act will be against such a rule."

The Motion being put, the Council divided:—

Aye 1.	*Noes 14.*
Hon'ble Babu Guru Proshad Sen.	Hon'ble Mr. Wallis. Hon'ble Mr. Das. Hon'ble Mr. Gladstone. Hon'ble Rai Eshan Chundra Mittra Bahadur. Hon'ble Mr. Bose. Hon'ble Maulvi Muhammad Yusuf Khan Bahadur. Hon'ble Babu Surendranath Banerjee. Hon'ble Nawab Syud Ameer Hossein. Hon'ble Rai Durga Gati Banerjea Bahadur. Hon'ble Mr. Glass. Hon'ble Mr. Finucane. Hon'ble Mr. Risley. Hon'ble Mr. Pratt. Hon'ble Mr. Grimley.

So the Motion was negatived.

The Hon'ble BABU GURU PROSHAD SEN also moved that the word "only" be inserted after the word "shall," where it occurs in the concluding clause of the first proviso to section 15 of the Act, so as to make the clause run thus:—

"shall only be entitled to vote at the election of Commissioners of such Municipality."

He also moved that in section 3, sub-section (*3*) be omitted, and that in its place the following be substituted:—

"*Explanation.*—The words 'qualifications required to entitle any person to vote for a candidate for election' relate to the qualification as to age and as to one's being registered as a voter under the rules to be framed by the Local Government under this section."

He said:—"This brings us to the question of principle, with regard to which we have heard the reply in anticipation, and I submit that the principle is a very sound one, namely, that instead of leaving everything to be done by rules, the most important matters should be provided by

the law. The maximum rating qualification is Rs. 3. By putting it at Rs. 2-8 you will disenfranchise a large class of men who have been enjoying it for the last twelve years under the Re. 1-8 rule, and by putting it still higher at Rs. 3 you possibly disenfranchise three-fourths of the present voters. On the other hand, by putting it very low, you can swamp a number of voters to whom you have given the right and privilege. You minimise the right to nothing. If you have not got all the materials before you to come to a conclusion regarding this matter, you should wait until all the materials are obtained. We are told that we cannot do this, we cannot wait, because the next election will take place in October next. That, I submit, is no reason why in considering an Act of the Legislature there should be any hurry. The last elections took place under the existing rules. The concession, to be a real concession, must be a concession which is made by the Legislature, and not left to be provided for by rules made by the Local Government, however favourable that Government may be to lowering the franchise. No doubt the present Government is very liberally disposed to all kinds of local institutions, but at the same time I must say, and I must say distinctly, to those who are the supporters of the principle of Local Self-Government in this country, that this is a matter which ought not to be left to the will of the Executive alone. I appeal to those who desire to foster the principle of Local Self-Government, whether my amendment does not meet with their entire approval. I will not compare India with countries which have both the Municipal and Parliamentary franchise. I will not compare our little India with Great Britain; but, on consulting the English Statutes, I find that in many Acts qualifications are not only laid down for guidance, but even the details are regulated by the Legislature. They do not leave even the matter of registration to the Executive, but employ revising barristers for the purpose. In India, in the Presidency towns, the rating qualification is fixed by Statute, and even in the North-Western Provinces, where these matters are left to rules, there is a safe-guard under which the rules are to be framed, and that is that the people are to be consulted in framing these rules, and in other places you are allowed six months to consider the rules. Under these circumstances I submit that, as by the experiment which has been tried within the last twelve years, it has been established that the Re. 1-8 rating qualification is suitable for all municipalities in these Provinces, and that the lodger franchise of Rs. 20 will also answer, we have now arrived at a time when these matters should be definitely provided by an Act of the Legislature, and not be left to the Executive. If this amendment is accepted, it will make as little change in the present rule of franchise as possible.

"One word as to the change of attitude with which I have been charged. I do not know of any such change of attitude or change of position on my part. I have never held that the matter should be left to the discretion of the Local Government, as some of my friends have thought fit to do on different grounds. I do not know the ground upon which some Hon'ble Members would proceed, but I know the ground upon which my hon'ble friend, Babu Surendranath Banerjee, is acting, namely, the ground of elasticity. I have contended from the very beginning that this matter ought not to be left to be determined by rules, but should be provided for by positive legislation, and I do not think I can be charged with any change of attitude. If the rules are to provide for everything, how is it that this amending Bill is brought before the Legislature? The rules might very well have provided for the few changes now sought to be made in the law. The only important matter embodied in the Bill is the proposal to confer the franchise on those who pay income-tax. If the interpretation of the law is as it is said to be, how is it that this Rs. 50 income-tax clause could not be provided for by rule. In this case my hon'ble friend the Mover of the Bill, thought otherwise; he did not think it could be done without an Act of the Legislature. I say that if the rules are to be our guide on every point, in that case there would be no necessity for an enactment of this Legislative Council. I submit that those who are the friends of Local Self-Government should vote with me in this matter."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"I think after what has fallen from my hon'ble friend, Babu Surendranath Banerjee, the

Hon'ble Mover of this amendment will be pleased to consider whether it would not be wise in him to withdraw the amendment. He has just been defeated in the amendment relating to lodging franchise, and the effect of introducing the little word 'only' might be that Government would be precluded from framing rules including the very persons for whose benefit statutory recognition was insisted on, viz., persons who pay Rs. 20 as rent assessed under section 85. The Hon'ble Mover of the amendment would, by showing persistance in favour of his amendment, defeat the very object he had in view in moving the preceding amendment, which, although nominally lost, is really secured, though in a different shape.

The Hon'ble MR. RISLEY said:—"I do not think the Hon'ble Member has seen the consequences which will result from this amendment. By inserting the word 'only' in the concluding clause of the first 'proviso' to section 15, he proposed to stereotype his two earlier amendments, but these he has now lost, and if he passes this, he will stereotype the law as it now stands, and the effect will be that he will disfranchise all those who now have a right to vote under the Rs. 20 lodger-franchise. As to the question of principle, the position of the Government has been entirely misapprehended: we have no intention of reducing the franchise. All that the Government desires is to give each Municipality what it wants. To embody in the law the varied requirements of all the municipalities would save the Government a great deal of trouble. In point of fact this movement to stereotype the Re. 1-8 rating qualification surprises me extremely, because it is the one question in which the several municipalities have clearly expressed their wishes. Out of the whole number, 33 municipalities want to raise the franchise, some to Rs. 5, some to Rs. 3, and 21 want to keep it at Re. 1-8, and the Government agree that for the minor small municipalities Re. 1-8 is the best limitation, but in more advanced places the qualification of Rs. 3 and Rs. 5 might be introduced if people want it. I do not think the Re. 1-8 limit expresses the wish of the more intelligent classes of the community. The limit of the municipal franchise in England cannot be referred to by way of comparison, because it follows the Parliamentary franchise and refers to a wholly different state of things. Then the Hon'ble Member said that the Government of the North-Western Provinces took a more liberal view of things and regulated the franchise by Statute. I do not happen to have the Municipal Act of the North-Western Provinces at hand to refer to, but my impression is that in the whole of Northern India legislation is based on the principle of leaving as much as possible to be provided for by rules, and that I submit is distinctly better than to attempt to provide for all possible circumstances by legislation. As to consulting local bodies before passing rules, I may mention that I think the last proposed edition of the rules was sent out with a long explanatory letter and circulated to District Officers and Municipalities some time in May last. I do not wish to dwell on the question of my hon'ble friend's change of position. He said in April when the Bill was introduced that no change in the law is necessary; now he says he wants to harmonise the law with the rules and the existing practice. My own opinion is that any attempt to do so will bring about rather discord than harmony."

The Hon'ble RAI ESHAN CHUNDRA MITTRA, BAHADUR, said:—"The circumstances of the several municipalities are so varied and different that it is impossible to say that no power should be left to Government to frame rules. We must have some rules, and every day there may be a necessity to frame some rule. I therefore cannot agree with my hon'ble friend that we should stereotype the existing practice by including in the law what is now provided by rules."

The Hon'ble BABU GURU PROSHAD SEN, in reply, said:—"After the assurance which has been given by the Hon'ble Member in charge of the Municipal Department of this Government, it is not necessary for me to press this matter to a decision, especially as my amendment regarding the Rs. 20 lodger-franchise and the Hon'ble Mr. Bose's amendment regarding the Re. 1-8 rating qualification

have been negatived, I therefore beg leave to withdraw the motion which is now before the Council."

The Motions were, by leave of the Council, withdrawn.

The Hon'ble BABU SURENDRANATH BANERJEE moved that after the word "University" in line 6 of clause (iii) of section 3, the following words be added :—

"Or has passed the First Arts examination of the Calcutta or any other Indian University."

He said:—"Clause (iii) of section 3 of this Bill proposes to confer the franchise upon a person 'being a member of a joint-undivided family, one of the members of which has, during the year aforesaid, paid in respect of any rates an aggregate amount of not less than three rupees—is a graduate or licentiate of any University,' and so on. I claim for my amendment that it is in entire accord with the principle which underlies this Bill. I am thankful to be able to say that this Bill represents a distinct advance upon the principle of Local Self-Government, inasmuch as it includes a large body of intelligent men who hitherto have not enjoyed the franchise, and I beg to tender my acknowledgments for the conciliatory spirit which the Hon'ble Member in charge of the Bill evinced throughout our discussions in the Select Committee, and, as a proof of that conciliatory spirit, I desire to refer to the Bill as it has been amended by the Select Committee as compared with the Bill which was introduced in March, 1896. There is a great difference between the Bill as it now stands and the Bill as it was introduced. Many important and significant modifications have now been made in the Bill. The Bill has been practically recast in the light of the opinions which have been received by the Select Committee. It is not necessary for me to refer to the various modifications which have been made. I need only refer to the important changes which have been made in the section to which my amendment refers. When introducing this Bill, the Hon'ble Member in charge proposed to create a lodger franchise, to confer the franchise on all persons in occupation of holdings paying an annual rate of Rs. 3, provided they were in receipt of a monthly salary of Rs. 50. But this lodger franchise has now been abandoned in favour of the much wider proposal which confers the franchise on all residents of municipal towns, no matter whether they are in occupation of holdings which pay rates to the amount of Rs. 3 or not, provided only that they be assessed to the income-tax. The change broadens the franchise and confers it on persons who did not possess it before. It is not necessary that such persons should be in receipt of a salary of Rs. 50 a month, but that they should have an income of about Rs. 42 a month, and that their names should appear in the assessment books of the Income-Tax Department. I want to broaden the franchise a little further, to give fuller effect to the policy which underlies the Bill, and I claim the sympathy of the Council and of the Hon'ble Member in charge of the Bill in favor of my amendment. I have no hesitation in saying that undergraduates are at least as intelligent and as honest a class of men as Mukhtears and Revenue Agents. And having regard to one of the election rules, which provides that no person shall be allowed to vote who has not attained the age of 21 years, we have a safeguard which will prevent too young persons from exercising the franchise. The undergraduates upon whom I desire to confer the franchise represent a considerable constituency. I have made some rough calculations, and I desire to place the materials before the Council, in the hope that Hon'ble Members will be in a position to form their own conclusions. The First Arts examination has been in force for the last 35 years in the Calcutta University. For the last 8 or 10 years the average number of those who have passed the First Arts examination is more than 1,000. The average of the last 5 years was about 1,200. If for the 35 years you take an average of 500 a year, you will have at least 17,000 undergraduates, resident in mufassal towns, who ought to be admitted to the franchise. But even taking 10,000 to be residing in mufassal towns, they represent a considerable number of intelligent people who ought to be invested with the franchise. It might be said why not include those who have passed similar examinations in connection with the English Universities. I have not

the slightest objection to widen the scope of my amendment. But I look upon this matter from a practical point of view. How insignificant must be the number of English graduates in mufassal towns in Bengal, as compared with the number of Indian graduates. I proceed on the actual lines of the Act and of the Bill. You don't confer the franchise on barristers who have been reading in the Inns of Court, and have passed the examinations, and have gone through the important ceremony of eating their dinners, although these gentlemen may be residing in the mufassal. But you have conferred the franchise on the much lower class of legal practitioners, known as mukhtears and revenue agents. I thus follow the lines of the Bill. My amendment is in complete harmony with its principles. I therefore feel the less hesitation in appealing to my hon'ble friend in charge of the Bill, who being on the governing body of the University must feel an interest in the intellectual as well as in the political advancement of our young men, to accept this amendment. It is indeed a very small concession, but if granted it will popularize the Bill, strengthen the electorate, and broaden the basis of Local Self-Government by enlisting on its behalf the sympathies of the young, the ardent, and the intelligent."

The Hon'ble MR. RISLEY said :—"I have found myself, Sir, so much in accord with my hon'ble friend in respect of other sections of this Bill, and his attitude towards the Bill has been so generally reasonable, that I am sorry I cannot go with him in this. To start with, the amendment amounts to giving votes to under-graduates as such. There is no getting over that. You may define it in terms of the First Arts, but it really means giving votes to under-graduates. If the Council does that, the Council will lay itself open to comment, and will run the risk of making itself ridiculous. Moreover, when once we have embarked on the course of enlarging these educational qualifications, where are you to stop? If the F.A. men are to get votes, why not the Entrance men, and I can imagine a plea being put in even for the fail-entrances? We shall have opened a door which ought not to be opened, and the tendency will be to try and open it wider.

"Then there is a more serious objection. You will see if you look at the Act that the proposal gives to under-graduates of Calcutta a privilege which is restricted to graduates of the elder Universities. This is a fatal flaw, and I do not see how it could be got over. I can see no solution.

"Lastly, even if you chose to ignore the illogical character of the proposal, it would in any case work unevenly. You might even have in the same joint family two members, one of whom had passed the Calcutta F. A., and the other had passed or even taken honours in moderations at Oxford, but had stopped there. The Calcutta man would have a vote; the Oxford man would not."

The Hon'ble RAI ESHAN CHUNDRA MITTRA, BAHADUR, said :—"I rise to support this amendment. I think that inasmuch as by this Bill the franchise has been given to gentlemen who have obtained licenses from vernacular medical schools, why should not the same privilege be given to a class of men who from their education are likely to exercise the franchise most intelligently? It is well-known that in the Mufassal it is most difficult to secure the votes of educated candidates, and those who have obtained a certain amount of education and position are not likely to be led away by the tricks which are played upon ignorant and uneducated men, such as cart-drivers and others of the same class. They are a respectable body of men, and they should have the privilege of voting in the same way as the holders of the diplomas of Government colleges and mukhtears and revenue agents, with whom under-graduates are at any rate equally educated."

The Hon'ble Mr. A. M. Bose said—"I really hoped that the persuasive powers of my hon'ble friend the Mover of the amendment would have prevailed to secure the adhesion of the Hon'ble Member in charge of the Bill, but I confess myself disappointed. The first argument against the amendment is that if we adopt this proposal there will be no knowing where to stop. The Hon'ble Member is well aware that that is a stock argument which in the history of progressive legislation is always brought forward whenever any

change is proposed. The answer to that argument is that a change should be resisted when for its own sake it ought to be resisted, but not on the ground that it may possibly in the future lead to other changes. The next argument of the Hon'ble Mr. Risley, which in fact was his strongest argument, was one with which I shall have felt considerable sympathy if it had any appreciable foundation in fact. This was that by this amendment you would draw an invidious distinction between under-graduates of Indian Universities and those who have passed similar examinations in connection with English and other European Universities. That, I submit, is hardly an argument of a practical character under the circumstances of the present case. I confess, speaking for our countrymen who have been to European Universities, that I cannot at present call to mind any instance of gentlemen resident in the mufassal who have proceeded to Europe and who have passed the previous examination of some University there but did not proceed to a degree. And with regard to European gentlemen similarly situated, one is not aware of any such residing in a mufassal Municipality. No instances were mentioned. At any rate, whether it is so or not, the number of such gentlemen is not likely to be of any appreciable magnitude. And in any case the difficulty, if any, can be easily removed by slightly broadening the scope of the amendment. I appeal therefore to the Hon'ble Member to reconsider the matter. Having regard to other classes of voters whom it is proposed to admit, those who have passed the First Arts examination and are 21 years of age, would form a most desirable addition to the electoral body. Another argument which has been advanced is that by adopting this amendment we shall be breaking new ground. I say, first, that this is not an argument which comes with very good grace from the Hon'ble Member in charge of the Bill, the very object of which is to break new ground. That is the reason for the Bill, and though the amendment of my hon'ble friend may go beyond the scope of the proposals contained in the Bill, it is a reasonable extension of the franchise; and after all it is new ground very much more limited in its character than that which is the groundwork of the amending legislation proposed by the Hon'ble Member. I again appeal to him to consider whether it will not be desirable to recognise the educational test as an important test in connection with the exercise of the franchise. It has been pointed out that gentlemen who have satisfied the requirements of the University, and who have probably entered life in various capacities, would be at least as well qualified, both intellectually and morally, as many of those on whom it is proposed by the Bill to confer the municipal franchise, and I appeal to the Hon'ble Member to say whether education is not the best help towards good administration, its best ally, and its securest guarantee. By recognising it you not only liberalise your policy, but you strengthen your position and improve the practical results of the exercise of the franchise."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"The strong and eloquent appeal which has been made in favour of this amendment has not failed to make an impression on my mind, although, correctly speaking, what has weighed with me more than the appeal is the favourable effect of the amendment, so far as it tends to the furtherance and promotion of Muhammadan interests. It is on this ground that I give my support to this amendment and add my voice in its favour. The persuasive powers of my hon'ble friends having failed to achieve success, I will try the effect of my arguments; and I put the matter thus: the sum total of convenience in favour of the amendment far outweighs the inconvenient points. There are a great many Muhammadan students who have passed the First Arts Examination who would be let in and have the right to vote by virtue of this amendment, but who would be otherwise excluded. In their early years, generally speaking, the Muhammadan students are engaged in the study of Arabic, and if so they are 21 years of age by the time they have passed their First Arts Examination; so there is not likely to be much difficulty as regards the question of age: the letting in of the amendment would therefore be a distinct gain to the Muhammadan community. The pleaders of the Zilla Courts must also be those who should have passed the First Arts Exami

will favourably affect that class also. But apart from the question of nationality, and applying myself to the quality of the material let in, it appears that in point of education and therefore of intelligence and character, the persons who would acquire the franchise are in no way inferior to those who are already in. In fact the higher the educational standard, the worthier the men you get. The objections which have been urged against the acceptance of the amendment are so small that they may very well be put aside and disregarded. The difficulty to determine the equivalent examination in English and other Universities is not insurmountable and might be easily provided for and that difficulty arises in so few cases that for the sake of the few, the many need not be sacrificed; because how many students of European Universities are residents of Mufassal Municipalities. I therefore express a hope that the Hon'ble Member in charge of the Bill will see his way to accept the principle of this amendment. By so doing he will promote the cause of Local Self-Government in more ways than one; he will put the franchise in fitter and worthier hands in some cases. The case of failed or passed Entrance students stands on a different footing, and when their matter will be brought forward, it will, I submit, be time enough then to consider it: but in regard to the *passed* First Arts students, they are, from their intelligence, education and character, in every way entitled to the franchise. The principle of the amendment is fair and reasonable; its particular wording is a question to be decided hereafter."

The Hon'ble MR. DAS said:—"I also must vote for this amendment. With regard to the difficulties pointed out by the Hon'ble Member in charge of the Bill, it has been said by the Hon'ble Mr. Bose that the difficulties are of a theoretical character, and are of no practical importance. If it is necessary to extend the franchise to persons who have obtained similar honors from English Universities, in order that this new franchise may be consistently and justly extended to First Arts passed students of the Indian Universities, I do not think the Hon'ble Mover of the amendment will have any objection to such extension. Local Self-Government is in its infancy in this country. The Hon'ble Member in charge of the Bill supposes certain difficulties which may be met with if the franchise is extended to certain classes of men, but with all possible deference to the Hon'ble Member, I say that he has no personal experience of the difficulties met with in Mufassal Municipalities, where we have to deal with a number of voters who are wanting in intelligence. When this Bill was introduced, it was said that one of the reasons for introducing the Bill was to extend the franchise to an intelligent class of voters; and the franchise was, as proposed, extended to a class of men who have not been included, because they have the property qualification, but they seem to have been included because they have an educational qualification. That was no doubt an amendment in the right direction, and as this Bill has been amended by the Select Committee so as to extend the franchise to persons in whose case their education is a guarantee for the just exercise of the right of voting, I think it should on the same ground be extended to those who have passed the First Arts examination. I have known an instance in the Mufassal where a person who had worked for a municipality for twelve years (he occupied the position of an Executive Engineer, which went to show that he was a man who could do an immense amount of service to the municipality), stood for election as a Commissioner of that municipality, but I was the only person who voted for him. All the other electors voted for a clerk in the Commissioner's office, who was in receipt of a pay of Rs. 35 a month. And I have also known an instance where a gentleman's own coachman and *durzee* voted against him, because a clerk in the office told them they would have their taxes remitted if they voted for him. These are examples which show that we should encourage intelligence in voters, and I think that in the interests of Local Self-Government it is necessary that the franchise should be extended to Firt Arts students. I do not think they are in any way inferior to mukhtears in intelligence and not certainly to revenue agents, and I do not see why the franchise should not be extended to them. We have heard from the Hon'ble Mover of the amendment that a very large number of

this class of intelligent men are to be found in the Mufassal, and I dare say it will be to the interest of Local Self-Government, and of the municipalities themselves, to have intelligent voters to vote for people who really take an interest, and have the ability to administer, the municipal affairs."

The Hon'ble MR. RISLEY said:—"As the temper of the Council has been very distinctly indicated in this matter, I am prepared to come forward with a compromise which might possibly meet the case. I entirely admit the intelligence of the proposed class of voters. The question of age is covered by the rule which prescribes the age of 21. Perhaps the difficulty might be met by the addition of the words 'or the corresponding standard of any other University.' I accept the principle of the amendment, the exact wording of which can be settled hereafter."

The Hon'ble MR. PRATT said:—"The expression 'First Arts' examination was only applicable to the Calcutta and Madras Universities. In Bombay the corresponding standard was called the 'Previous' examination, and in the Panjab and Allahabad it was termed 'Intermediate.'"

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If the principle of the amendment is accepted, the exact wording can be settled at a subsequent Meeting of the Council."

The further consideration of the amendment was accordingly postponed.

The Council adjourned to Saturday, the 8th instant.

CALCUTTA;

The 18th August, 1896.

F. G. WIGLEY,

Offg. Assistant Secretary to the Govt. of Bengal,
Legislative Department.

[*To be substituted for the Resolution bearing the same number and date.*]

WORKS OF PUBLIC UTILITY CONSTRUCTED DURING THE YEAR 1895 FROM PRIVATE CONTRIBUTIONS.

No. 3529M.P.I.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Mis. Pub. Improvements.

Calcutta the 16th July 1896.

RESOLUTION.

READ—

Statement of works of public utility constructed by private individuals in the several districts in Bengal during the year 1895, and statement of similar works constructed during the year 1894, and the Resolution thereon.

REMARKS.—The following is a distribution of works of public utility, which were constructed during the year 1895 at a cost of Rs. 3,81,982-6-0 :—

		No. of works.	Cost. Rs. A. P.	Rs. A. P.
I.—Works costing Rs. 500 each and upwards.	Public buildings	15	59,133 13 3	
	Roads	6	7,400 0 0	
	Bridges	4	4,500 0 0	
	Tanks	172	1,83,038 0 0	
	Wells	5	2,893 0 0	
	Bunds	6	11,950 0 0	
				2,68,919 13 3
II.—Works costing less than Rs. 500 each.	... ...	...	1,13,062 8 9	1,13,062 8 9
	Total ...	208	.....	3,81,982 6 0

2. The amounts contributed during the year under review for the two classes of works, as compared with those of the two preceding years, are given in the subjoined statement, and show that the outlay on the operations of 1895 exceeds that of 1894 by Rs. 4,058, but shows a decrease compared with the figures of 1893 :—

Class of works.	1895.	1894.	1893.
1	2	3	4
	Rs. A. P.	Rs. A. P.	Rs. A. P.
I.—Works costing less than Rs. 500 each.	1,13,062 8 9	1,10,747 0 0	1,09,158 6 0
II.—Works costing Rs. 500 each and upwards.	2,68,919 13 3	2,67,177 3 0	2,86,462 0 0
Total ...	3,81,982 6 0	3,77,924 3 0	3,95,620 6 0

3. The following works deserve special notice :—

Public buildings.—The contributions under this head amount to Rs. 59,133-13-3, and show a slight increase over the figures of last year. Of this sum the late Dr. Bholanath Bose gave Rs. 23,658 for a charitable dispensary at Barrackpore with free accommodation for 9 in-door male and 4 female patients. His Highness the Maharaja of Kuch Bihar contributed Rs. 5,360 for pucca buildings, viz. staging bungalow and bench room at Debiganj; Dr. Mohendra Lal Sirkar of Calcutta Rs. 5,000 for a Leper Asylum just beyond Deoghar municipal limits; Raja Sitesh Chandra Pandey of Pakour Rs. 4,952-13-3 for the Pakour Jubilee Institution; Newlram Marwari and others Rs. 3,500 for a building for use of pilgrims and travellers, Bankura district; Babu

Anandi Lal Rs. 3,000 for a Dharmsala at Jamunagurkinath, Patna district; Babu Nanda Lal Sen Rs. 2,597 for a charitable dispensary at Baldhara, Dacca district; Babu Hari Charan Bose Rs. 2,000 for a masonry building for the school-house at Sakpukuria, district Jessore; Babu Mathura Lal Bhagat, Rs. 2,000 for a Dharmsala at Berboi, district Puri; Raja Srinath Roy Rs. 1,626 for restoration of a *matt* at Rajabari, district Dacca; Rai Budh Sing Dudhuria Bahadur and his nephew, Babu Bejoy Sing Dudhuria, of Azimganj, Rs. 1,490 for building a female ward in addition to the Jangipur Charitable Hospital and Dispensary, district Murshidabad; Dianet Mandal Rs. 1,250 for a Masjid at Bishanpur in the Mymensingh district; Babu Shyama Charan Poddar Rs. 1,000 for a masonry building for Garapota school at Garapota, district Jessore; Kandura Pramanik of Icharchali, police-station Badarganj, Rs.1,000 for a Masjid at Icharchali, district Rangpur; Kandura Chaukidar of Rajibpur Rs. 700 for an Indara and masjid at Rajibpur in the Rangpur district.

Roads.—A total sum of Rs. 7,400 was contributed for roads by the following gentlemen:—

Babu Ram Krishna Rakshit Rs. 2,500 for a *kutcha* road, &c., from Garibpur to Bora, a distance of three miles, district Jessore; Raja Bun Behari Kapur Rs. 1,500 for a road leading from Grand Trunk Road to a basti newly settled near Gangpur, district Burdwan; Lakhikanta Saha and Shajan Pramanik Rs. 1,500 and Rs. 900 for a road at Kaibarito, Dashotyhat and Karochgram respectively, district Rajshahi; Raja Rajendro Narain Rai Bahadur and Babu Ambika Prosad Rai Choudhuri Rs. 500 each for roads from Sripur to Muthajuri and from Kashimpur to Simalaya, district Dacca.

Bridges.—Mr. H. W. J. Hill contributed Rs. 2,000 and Rs. 500 for bridges at Turkowlia and Pandaria, respectively, district Champaran; Hemtulla Parkar of Bhotmari, police-station Kaliganj, Rs. 1,200 for a bridge at Bhotmarigati river, district Rangpur; Babu Mahipat Teli Rs. 800 for a bridge at Bahadurpur, district Champaran.

Tanks.—The total expenditure on tanks was Rs. 1,83,038, of which the following are the principal donations:—

Babu Jagannath Panda, Midnapore district, Rs. 5,000; Gobinda Nath Bagchi, Pabna district, Rs. 5,000; Babu Sheo Gulam Misir, Gaya district, Rs. 400; Denamoni Peshakar, Mymensingh district, Rs. 3,758; Hari Krishna Sardar, Rajshahi district, Rs. 3,000; Babu Awadh Bihari Narain, Darbhanga district, Rs. 3,000; estate of A. N. Roy of Kasimbazar, district Birbhum, Rs. 2,635; Babu Dina Nath Mirdha, Midnapore district, Rs. 2,500; Bhodu Pramanic, Rajshahi district, Rs. 2,500; Keshub Chandra Bandyopadhya and Srimati Basanta Kumari Debya Chowdhurani, districts Dinajpur and Pabna, respectively, Rs. 2,500; Ashutosh Nath Rai, Tippera district, Rs. 2,500; Babus Rajani Kanta Biswas and Ram Lal Biswas, Faridpur district, Rs. 2,400; Babus Raghabram Ghosh and Rai Charan Das, districts Hooghly and Nadia, respectively, Rs. 2,000 each. Bara Harish Chandra Shaha of Raipur, Rajmohan Shaha and Khoda Bux Chakladar, districts Dinajpur, Bogra and Pabna respectively, Rs. 2,000 each. Babu Mathura Nath Sanyal, Faridpur district, Rs. 2,000. Babu Mooshar Kawas of Sursund, district Muzaffarpur, Rs. 2,000, Babus Doman Sundi and Makund Jha, district Darbhanga, Rs. 2,000 each.

Wells.—Five wells were sunk at a cost of Rs. 2,898. A maid-servant of Babu Nafar Chandra Pal Chowdhuri of Latudoho gave Rs. 800 for a masonry well at Mayapur, district Nadia. Nanda Lal Shaha of Mathurapur gave Rs. 598 for a *pucka* well in the Dinajpur district; Rs. 1,500 were contributed for 3 *pucka* wells in the Rangpur and Bhagalpur districts.

Bunds.—Thakrain Makham Kumari of Lachmipur gave Rs. 9,000 for bunds for irrigation, district Bhagalpur; Babu Ram Bandhu Chatterjee gave Rs. 500 for constructing bund, district Bankura; Rs. 2,450 were spent for four bunds in the Singhbhum district.

RESOLUTION.—The total amount contributed for works of public utility during the year 1895 shows but little increase over the figures for the previous year, and is still below the amount contributed in 1893. The Lieutenant-Governor desires that the thanks of the Government may be conveyed to those who have displayed their liberality and public spirit.

Formal letters of acknowledgment will be forwarded by the Government to those, or their representatives, who have constructed works costing Rs. 500 each and upwards. The usual acknowledgment will be conveyed to the others from the Commissioner or Magistrate of the Division.

ORDER.—Ordered that a copy of this Resolution and of the statement be forwarded to the Judicial and Revenue Departments of this Government for information.

Ordered also that a copy of this Resolution and of the statement be forwarded to the Board of Revenue, Lower Provinces, and to all Commissioners of Divisions, to all Superintending Engineers of Public Works Circles in Bengal, and to Inspectors of Works, for information.

Ordered also that this Resolution and the statement be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

J. G. H. GLASS,

Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 17th August, 1896.

Burdwan.—Rainfall at Sadar ·33, Kalna ·73, Katwa 1·10, Raniganj 1·37. Weather hot and cloudy. Rain much wanted everywhere except in Raniganj. *Aman* paddy on high lands will dry up if more rain does not fall very shortly. Harvesting of *aus* paddy commenced. Jute and sugarcane doing well. Fodder and water sufficient. Condition of cattle good. Common rice selling as follows:—

	Srs.	c.	
Sadar	11 to 15	0	per rupee.
Kalna	12	0	
Katwa	13	7	
Raniganj	14	0	

Midnapore.—Rainfall at Sadar 3·17, Contai 1·91, Tamluk 2·04, Ghatal 1·84. Weather seasonable. Indigo manufacture nearly closed. Prospects of sugarcane, jute, and *aus* good. Transplantation of *aman* going on. Weeding commenced in some places in Contai. Cattle-disease reported from Garhbeta, Narayanagar, and Dantun police-stations. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Contai	16 to 18	
Tamluk	14	
Ghatal	13 to 15½	

24-Parganas.—Rainfall at Sadar 2·82. Weather cloudy and showery. Prospects of *aus* crop favourable. Harvesting of jute going on. Transplantation of *aman* continues. Fodder and water sufficient. Condition of cattle good. Common rice sells as follows:—

	Srs.	c.	
Sadar	11 to 13	0	per rupee.
Barasat	10	0	
Basirhat	11	10	
Diamond Harbour	11	6	

Murshidabad.—Rainfall at Sadar ·34, Jangipur ·29, Kandi ·45. Weather hot. Transplantation of *aman* retarded and *bhadoi* crops withering for want of rain. State of sugarcane and mulberry tolerably good. Indigo manufacture proceeding. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Khulna.—Rainfall at Sadar 1·04, Bagirhat 1·48, Satkhira ·50. Weather cloudy. Rain urgently wanted for transplanting paddy, especially on high lands. No cattle-disease. Fodder sufficient. Price of common rice at—

	Srs.	c.	
Sadar	11 to 12	0	per rupee.
Bagirhat	12	6	
Satkhira	10	8	

Dinajpur.—Average rainfall ·35. Weather very hot. *Bhadoi* crops suffering for want of rain. It is very urgently wanted for transplantation of *haimanti* rice, and for steeping jute which has begun to be cut. Fodder and drinking-water sufficient. Cattle-disease prevails in places. Rice selling from 11 to 12 seers per rupee.

Rangpur.—Average rainfall ·18. Transplanting of *aman* and steeping and washing of jute retarded for want of water. Prospects not favourable. Fodder and water sufficient. Common rice selling from 9 to 13 seers per rupee.

Pabna.—Rainfall ·64. Cutting of jute delayed, and prospects of all crops rendered unfavourable by want of rain. Fodder available.

Dacca.—Rainfall 1·73. Weather seasonable. Harvesting of jute going on. Prospects of *aman* appear good. River gradually rising. Fodder available. No cattle-disease. Common rice sells at 11 seers per rupee.

Chittagong.—Rainfall 2·76. Weather hot. Harvesting of *aus* nearly completed Rain urgently wanted for transplantation of *aman*. Water and fodder sufficient. Rice selling at 14 seers per rupee.

Patna.—Rainfall at Sadar 1·53. Rain urgently wanted throughout the district for *bhadoi* crops, and for transplantation of paddy which has been retarded. Fodder and water sufficient. Prices slowly rising. Price of common rice ranges from 15 seers at Sadar to 12½ seers per rupee at Dinapore.

Gaya.—Fair rain fell during the week, and proved beneficial for *bhadoi* crops. More rain urgently wanted for transplanting paddy. Price of common rice 11 seers, against average of 14 seers per rupee.

Champaran.—No rain at Motihari or Bettiah. Light showers in a few places. Agricultural operations at a standstill. Rain most urgently wanted. Rice seedlings getting seriously damaged. Prices rising. Price of common rice risen from 14½ to 12 seers a rupee, against average of 13½ seers. Fodder and water for cattle sufficient. [A telegram since received states: "Rainfall this morning (18th) ·47 much improved crop prospects."]

Darbhanga.—Rainfall at Sadar ·43, Madhubani ·34, Samastipur ·23, about an inch in Dalsingh Serai thana. *Bhadoi* crops slightly benefited by rain, but much more rain wanted everywhere and urgently. Paddy seedlings are suffering. Fodder sufficient. Prices rising.

Bhagalpur.—Rainfall at Sadar ·21. Weather hot and cloudy. Rain very urgently wanted throughout the district. Standing crops seriously damaged. Transplantation stopped. Both *bhadoi* crops and paddy seedlings are withering. In Supaul a worm called *mara* has begun to attack the crops. Prospects gloomy. Common rice sells at an average of 13 seers per rupee. Cattle-disease reported from all the subdivisions.

Purnea.—Rainfall ·10. Rain badly wanted for *bhadoi* and *aghani* paddy. Jute cutting and indigo manufacture still going on. Cattle-disease not reported this week. Fodder and water sufficient. Common rice sells from 12 to 14 seers a rupee.

Cuttack.—Rainfall 3·11. Weather cloudy. Rivers rising again. Rice crop seriously damaged by the late flood in many parts. Fodder not sufficient. Cattle-disease reported from thana Jagatsingpur. Common rice sells as follows:—

				Srs.	c.	
Cuttack	...	...	...	18	6	per rupee.
Jajpur	...	...	...	21	0	

Reports from Kendrapara and Banki not received.

Hazaribagh.—Rainfall at Sadar ·61, Giridih 1·63. Weather seasonable. More rain wanted in some places. Transplanting in progress. Rice sells from 10 to 12 seers per rupee.

General Summary.—There was rain in all the reporting districts during the week, but the rainfall is still generally very deficient, except in Orissa and the south of Bengal. More rain is urgently wanted both for the *bhadoi* crops and for the transplantation of the winter rice. The reports from the northern districts of Bihar are very unfavourable; and unless there is heavy rain soon, fear is entertained that the result will be a great failure of the crops. The rice crop in Cuttack is reported to have been seriously damaged in many parts by the late flood. The rivers in this district are said to be again rising. Early rice and jute are being harvested, but for the latter more water is required for purposes of steeping and washing. Indigo manufacture is proceeding. Cattle-disease is still reported from Midnapore, Dinajpur, Bhagalpur, and Cuttack. In Cuttack the fodder-supply is not sufficient. The price of common rice is reported to have risen in the districts of Bihar in consequence of the prolonged drought; elsewhere the price continues steady.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT, M. FINUCANE,

The 18th August, 1896. *Offg. Secy. to the Govt. of Bengal.*

Results of the Meteorological Observations taken at the Alipore Observatory from 9th to 15th August 1896.

The total fall from 1st January to 15th August 1896	38·90
The average fall of the corresponding period for 24 years, Surveyor-General's Office	41·69

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, rom observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the ometers are verified and the readings have been corrected to a standard constructed and verified at the Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, rly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in eteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers, t, thunder.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JULY 1896.

As in June, but for other reasons, the discussion of the weather conditions this year during July has to be divided into two parts—one referring to the first half of the month and the other to the latter half. The reason for the division in June was the change that became general owing to the bursting of the monsoon. In July the disturbing causes developed over the land in the early part of the month, and in the north of the Bay in the latter half. The importance of the land disturbances, as compared with those which take place over the sea, arises from the more heavy and general rain which falls in the north and centre of the Province with the former class, while with the latter the heaviest rainfall is confined to the south-west of the Province. Up to nearly the middle of the month no depression formed over the Bay, but at times there were slight depressions inland. These caused an irregular cyclonic circulation of light winds and heavy rainfall, which were most marked about the 5th and 6th and again on the 11th.

The rapid rise of pressure which followed the second of these depressions began in the north of the Province, and, extending southwards, gave rise to a shallow depression on the 13th off the coast of the Circars. By the 14th it had crossed the coast of the Circars, and the disturbance had practically ceased so far as the Bay area was concerned.

During the following week high pressure developed over Bengal and spread slowly westwards. It remained well defined till the 19th, when a fall began in the north-east of the Province and extended south-westward in much the same way as the previous rise had done. With the fairly rapid fall in the north-east a shallow depression formed, and this low-pressure area was each day farther south than the preceding one, till it was over the north of the Bay, where it remained till the end of the month. While it was over the land heavy local rainfall occurred, especially when the centre of the irregular cyclonic circulation was in East Bengal on the 21st.

Within this low-pressure area, which was a very marked feature of the pressure distribution during the last week, two cyclonic storms developed close to the head of the Bay. They followed almost exactly the same track towards the west or west-north-west, passing near Saugor Island and Balasore and across the north of Orissa. The first was well defined within that area on the 22nd and 23rd, and the second on the 26th and 27th.

Their influence on the weather in Bengal was not very great, but the continued low pressure over the north of the Bay, intensified as it was during the existence of the cyclonic storms, gave rise to strong winds over almost the whole of the Bay area and a high sea, which did not moderate till after the close of the month.

Weather conditions during the last few days of June were recovering from the effects of a cyclonic storm, and, as frequently occurs, after these disturbances the rapid rise of pressure continues till readings are relatively higher in the west than the east of the Province. This was the case on the 1st July, though not to any great extent; but westerly winds had become general over a great part of the Province, and very little rain was falling. The difference from the normal in pressure varied from excess of ·03 inch in Chota Nagpur to defect of ·05 inch in North Bengal, and mean temperature was everywhere in excess by about 2°. The westerly winds were farther east on the 2nd, and as some interaction was taking place, moderately heavy local rainfall occurred, chiefly in the central districts.

A slow fall of pressure began on the 3rd, and continuing for several days, gave rise to the first shallow depression over the land. It was very faint on the 4th, being shown more by the cyclonic circulation of winds than by differences of pressure; but it become slowly more definite, and on the 6th it was in the western half of the Province. By the 7th it had crossed Bihar, and easterly or south-easterly winds prevailed. During these days many stations reported heavy rain daily. On the 5th falls of from one to two inches were fairly general; on the 6th falls of between two and three inches occurred in the central districts; and on the 7th the heavy rainfall was confined to the north of the Province.

The slow changes of pressure had made little difference on the distribution, and on the 7th readings were slightly below the normal. A slow rise on the 8th was followed by a more decided fall on the 9th. This fall began in the east, and caused westerly winds on that day at all except the extreme eastern and northern stations. Very little rain was then falling; but as pressure became lower daily, the second depression formed, and owing to the cyclonic circulation it set up, rainfall became more frequent and heavy. On the 11th the depression was over the central districts, and on the 12th a brisk rise of pressure had driven it westward. The distribution was again normal with light general rain in all districts except Chota Nagpur.

Up to this time settled weather of the ordinary monsoon character had prevailed over the Bay. The brisk rise of pressure which began on the 12th in Bengal and continued on the 13th, accompanied, as it was, by a slow fall in the south-west of the Bay, led to the formation of a depression off the coast of the Circars. It was very shallow and of short duration, as on the 14th it had crossed the coast between Vizagapatam and Gopalpur, having caused no disturbance except rather heavy rainfall on that part of the coast.

Pressure recovered rapidly on the 15th and 16th, and high readings became general over the Province and the Bay, being most marked in the eastern districts of Bengal. This arrangement retarded the monsoon, and very little rain fell either in Burma or Bengal for several days. Winds were generally south-west over the Bay, and south or south-east in Bengal. These being the usual monsoon directions, the effect of the high pressure was shown more in the loss of strength than in any change of direction.

The first signs of a change began on the 18th, when westerly winds set in over the western districts with the exception of North Bihar, and heavy rain fell at Darjeeling. There was still high pressure everywhere, excess varying from ·1 inch in the north of the Province to nearly ·2 inch in the east of the Bay. On the 19th it was falling over the whole Province and the greater part of the Bay, nowhere rapidly, but most so in Assam and the adjacent part of North Bengal. Winds had become westerly or irregular, and light or moderate rainfall was general. On the 20th the fall of pressure continued, and again the greatest change was in the west of Assam and part of North Bengal, while a moderate rise prevailed in the west of the Bay. These changes had an important influence on the distribution. The difference from the normal on the 20th varied from excess of a fifth of an inch in the Circars to defect of ·03 inch in North Bengal, so that the gradient was now much steeper than usual from south-west to north-east. The area of greatest fall of pressure moved south-westward, and the gradient over the Bay was again steeper on the 21st; also, as the area of lowest pressure was now over Lower Bengal, heavy rain was falling at many stations in the south of the Province, especially at Chittagong, Barisal, and Ranchi. On the 22nd the southward motion of the low-pressure area was checked over the north of the Bay, where the depression deepened and a cyclonic storm developed.

As the fall of pressure on the 22nd was ·15 inch at Saugor Island and over the adjacent part of the Bay, while there was a slow rise in the west of Bihar, the depression became well defined with a considerable defect over the Sunderbans and the extreme north of the Bay. Barometric readings varied from 29·32, inches at Saugor Island to 29·946 inches at Colombo—a difference of ·625 inch, showing a steep gradient down to the south of the Bay. Stormy weather prevailed over the sea; but as the area of lowest pressure was now to the south of the Province, comparatively fine weather prevailed at inland stations, except in the south-west, where rain was falling in moderate amounts. On the 23rd the centre of the depression was near Balasore, weather being practically unchanged, and on the 24th it had passed out of the Province.

Pressure did not recover with the rapidity usual after a cyclonic storm of such intensity, and consequently a trough of low pressure remained stretching across the north of the Bay, and deepest in Orissa on the 24th. One result of this arrangement was that the winds in the east and centre of the Bay remained much above the average strength.

A slow rise of pressure on the 25th in the west of the Bay and a slow fall in the east transferred the area of lowest pressure eastward over the north of the Bay, and a second cyclonic storm began in the same place as the one preceding. It immediately began to move towards the west, and at 8 A.M. of the 27th the centre was close to Saugor Island, at which the barometric reading was 29·065 inches. At the same time the reading at Colombo was 29·862 inches, the difference being ·807 inch, nearly ·2 inch greater than in the case of the previous storm.

This greater difference was due to the steep gradient in the north-west angle of the Bay. The depression moved rapidly to the west; and though there was a very rapid rise at Saugor Island and in its immediate neighbourhood, this recovery was local, and the trough of low pressure remained. Defect on the 28th varied from ·2 inch to ·28 inch over almost the whole of the north of the Bay. Though pressure rose slowly on the three succeeding days, the distribution remained practically the same, with a steep gradient over the Bay and considerable defect in the northern part.

This last disturbance of the month was the most severe experienced during the present season, but the rainfall caused by it in Bengal was very slight owing to the low pressure which continued over the north of the Bay. This low-pressure area prevented the free flow of the monsoon current over the Province and the showery weather which generally prevails after such depressions have moved away to the west.

Pressure.—There is very little to note under this head for the early part of the month. The usual oscillations, never large, occurred. During the latter half of the month, on the other hand, the distribution was very abnormal—(1) in the high pressure prevailing during the third week; (2) in the continued low pressure during the last week, especially in the north of the Bay and in Lower Bengal.

The effect of this low pressure, notwithstanding the previous high readings, is shown in the means for the month, which are below the normal at all stations. Defect varies from ·02 inch in the north to ·05 inch in the south of the Province.

Temperature.—At the beginning of the month temperature was about 1° above the normal at all stations. At times it fell in the northern and more rarely in the western districts till readings were 1° or 2° below the normal, but there was no great change in the early part of the month. Afterwards, when the cyclonic storms occurred, there was a fall in the south-west of the Province. At the same time fine weather with comparatively cloudless skies prevailed in the north, and temperature became unusually high for the season. Towards the end of the month mean excess was as much as 6° in Bihar and 8° in part of North Bengal and Assam.

Average maximum and minimum readings for the month are nearly normal in Orissa and above the normal elsewhere by amounts increasing towards the north, where excess was 2° in the case of the former and 1°·5 for the latter. Mean excess also varied from 0 in the south of Orissa to 2° in North Bengal.

Rainfall.—The distribution of rainfall, though as usual rather irregular, did not differ to a large extent from the normal, except in the Orissa Hill Tracts, part of South Chota Nagpur, and part of East Bengal. In the two first there was a moderate to large excess, and in the last a moderate defect. The average fall in North Bengal was 17·71, Chota Nagpur 15·53, Orissa 15·26, East Bengal 12·67, South-East Bengal 12·13, and Bihar 11·67 inches. In Orissa there was an average excess of 8·59 inches, in Chota Nagpur 1·7 inches, and in North Bengal about 1 inch, while in the other divisions there was defect varying from ·65 inch in South-West Bengal to 4·89 inches in East Bengal.

Though the average fall for the whole Province was very nearly normal, the area over which amounts fell in excess of the normal is much less than half, and is largely in the west. There are two strips of country in North Bengal showing excess rainfall of from 2 to 4 inches generally. One contains the greater part of the Cooch Bihar and Jalpaiguri districts, and the other runs almost east and west from the Garo Hills to the Southal Parganas. The main area of excess rainfall begins from the coast of the north-west angle of the Bay, and, extending in a direction a little to the west of north, includes the greater part of Orissa, part of South-West Bengal, and the east of Chota Nagpur. Continuing northwards but narrowing rather quickly, it crosses Bihar as far as Muzaffarpur. Over the greater portion of this tract excess was between 1 and 5 inches, and the heaviest rain fell in Chota Nagpur in an area extending northwards from Singhbhum to Hazaribagh. In the part indicated by the three stations, Chaibassa, Chakradarpur, and Ranchi, excess was more than 13 inches.

In East Bengal, the Sonthal Parganas, and in the East of Bihar there are considerable areas over which defect was between 5 and 7 inches, but over the greater part of the Province, excluding the tracts dealt with in the paragraph above, defect was generally between 1 and 3 inches.

With the exception of a few stations on the Himalayas, the heavest rainfall occurred in the south-west of Singhbhum, where more than 30 inches fell. Diminishing from this centre, falls of more than 20 inches were recorded at all stations from Ranchi south to the Orissa Hills, and of more than 15 inches in the whole of Orissa, the southern half of Chota Nagpur, and part of South-West Bengal. As usual the area of lightest rain was a comparatively narrow strip, except at the eastern end, extending from East Bengal north-westwards to the west of South Bihar. Within this area falls were between 5 and 10 inches, frequently about 7 inches. In North Bihar falls were generally about 10 inches, and in North Bengal they were generally between 10 and 15 inches, except close to the hills, where they varied between 30 and 46 inches.

The following table gives a comparison of the falls in the various divisions during the month of July with the normal fall, the actual being given as a percentage of the normal fall. The table also shows the actual falls for each of the previous months of the year expressed in the same way, and the last column of the table shows the total of the falls of the past seven months of the year in each division expressed as a percentage of the normal fall :—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	Actual rainfall of first seven months of 1896 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	31	18	18	36	97	128	95	96
North Bengal ...	8	5	2	63	142	49	106	86
East Bengal ...	48	110	43	94	115	99	72	90
Bihar ...	16	5	0	26	102	84	85	81
Orissa ...	8	0	60	31	78	163	131	120
Chota-Nagpur ...	6	9	0	0	49	139	112	103

The following table gives full data for the comparison of the actual and normal rainfall of the month of July in all districts of the Province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past fifteen years. The second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage; and the fourth column gives the same information in a slightly different form, expressing as a percentage how much the district rainfall varied in excess or in defect from the normal rainfall :—

Percentage Table for July 1896.

Division.	District.	Normal district rainfall July.	Actual district rainfall July 1896.	Percentage actual to normal rainfall.	Percentage excess (+), defect (−).

RESOLUTION ON THE ANNUAL REPORT ON THE GOVERNMENT CINCHONA PLANTATION AND FACTORY IN BENGAL FOR THE YEAR 1895-96.

FINANCIAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 18th August 1896.

RESOLUTION—No. 4618 Mis.

READ—

The Annual Report on the Government Cinchona Plantation and Factory in Bengal for the year 1895-96.

The year under review was remarkable for the drought which followed the close of the rains, a drought which is said to have been the severest on record since the plantation was started thirty-two years ago. It did considerable damage to the cinchona plants, and effectually prevented any extension being made during the cold season, although 300,000 seedlings were ready to be planted out and a large piece of land had been prepared to receive them. Thus, except for the addition of 9,200 plants of hybrid cinchona, the plantation was not increased. The number of trees uprooted for their bark was 453,000 against 498,500 in the previous year; the number comprised 65,000 red-bark trees used for the manufacture of cinchona febrifuge, and 388,000 of the kinds which yield yellow or quinine-producing bark. The result of the year's operations was that the total number of living cinchona plants at the Government plantations, excluding the nursery stock, at the close of the year, was 3,483,701.

2. The crop collected during the year amounted to 467,190 lbs. of dry bark against 500,534 lbs. in 1894-95, and consisted of 53,380 lbs. of red bark and 413,810 lbs. of yellow bark. The whole of this crop, with the exception of 790¼ lbs. supplied to medical depôts or sold to Government institutions, was, as usual, made over to the Cinchona Factory for manufacture into quinine and febrifuge. In addition to the bark cropped at the Government plantations, 170,000 lbs. of bark of the quinine-yielding sorts were purchased from certain tea companies in Darjeeling.

3. The outturn of the factory was 9,004 lbs. of sulphate of quinine and 3,124 lbs. of cinchona febrifuge, against 8,318 and 4,032 lbs. respectively in 1894-95. The following statement compares the issues of the year with those of the preceding year:—

Sold to Government officers, dispensaries, and medical missions, &c.	3,085 1	.....	3,280 10½	.....
Sold to Government officers and to the general public.	.....	2,416 9	.....	2,611 0
Given as samples	1 8½	0 7	2 11½	1 14
Total ...	7,561 13½	3,276 4	10,287 2½	3,830 14

The increase of 2,725 lbs. in the issues of sulphate of quinine was caused in nearly equal proportions by the growth of the post-office demand for pice-packets, and also by the larger indents of the medical depôts in connection with the Chitral Expedition. The rise of 194 lbs. in the quantity of cinchona febrifuge purchased by the public shows that although the minor cinchona alkaloids are now sold very cheap, this preparation still ranks high as a remedy for fever. The stock of manufactured alkaloids in hand at the close of the year was 3,105 lbs.; viz., 2,357 lbs. of sulphate of quinine and 748 lbs. of cinchona febrifuge.

4. The following statement compares the receipts from the sale of sulphate of quinine, cinchona febrifuge, cinchona bark, and other products of the plantation during the last two years:—

	1894-95.	1895-96.
	Rs.	Rs.
By sale for cash	74,347	79,508
By credit from the medical depôts and Port Blair	39,500	63,589
By credit from the Inspector-General of Civil Hospitals, Bengal	2,657	1,090
By credit from the Inspector-General of Jails, Bengal—		
For jails	515	874
For pice-packets	27,084	44,469
Total ...	1,44,103	1,89,530

Excluding Rs. 73,025 which was paid on account of the last instalment of the purchase-money of the Nimbong Cinchona Plantation, and Rs. 34,000 paid for the purchase of bark from the Darjeeling Tea and Cinchona Association, the expenditure on the plantation amounted to Rs. 79,865 against Rs. 73,806 in the previous year, the increase being chiefly under contingent expenditure incurred on the transport of bark from Nimbong. The amount spent on account of the factory rose from Rs. 35,700 to Rs. 41,811, which was chiefly due to the extensive purchase of chemicals during the year In addition to the factory expenditure proper, a sum of Rs. 21.171 was paid for the purchase and transport from the Madras Government Factory, Ootacamund, of 1,500 lbs. of quinine required to meet the increased demand for pice-packets.

6. The net profit on the working of the plantations amounts to Rs. 4,598 against Rs. 7,705 in the previous year. As the capital cost of the plantations has long ago been paid off, and Government desires only to secure for the people, without loss to itself, a cheap remedy for fever, the Lieutenant-Governor considers this result entirely satisfactory.

7. The scheme for the sale of Government quinine, through the medium of the Postal Department, makes steady progress. The amount delivered to the Jail Department, for conversion into pice-packets, was 3,170 lbs. against 2,025 lbs. in 1894-95. The demand for this quinine has increased with such rapidity that it has been necessary to limit the sale to post-offices in Bengal and Assam, and to discontinue the regular supply to other Provinces. The working of the scheme has been reviewed at some length in the Jail Report for 1895 and in the Resolution recorded thereon, and attention was drawn in the Resolution on the Sanitary Commissioner's report to the general correspondence between fever mortality and the demand for quinine.

8. The acknowledgments of the Lieutenant-Governor are again due to Dr. King and Mr. Gammie for the efficient management of the Department during the year.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF THE INCOME-TAX DEPARTMENT FOR THE YEAR 1895-96.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Calcutta, the 20th August 1896.

RESOLUTION—No. 4558S.R.

Read—

The Report of the Board of Revenue on the financial results of the Administration of the Income-tax for the year 1895-96.

No change of any importance was made during the year in the administration of the Income-Tax. The following statement compares the financial results during the last two years:—

	1894-95. Persons.	1895-96. Persons.
Number of persons originally assessed, excluding Government servants	108,765	110,584
Number of persons finally assessed, excluding Government servants	106,975	108,901
Number of persons finally assessed, including Government servants	115,583	117,639
Number of assessees, including Government servants, who paid the tax within the year	112,874	114,820
	Rs.	Rs.
Final demand of income-tax for the current year	44,87,280	46,44,587
Final demand, including penalties, fines, and arrears of previous years ...	47,20,384	48,14,912
Collections of income-tax within the year ...	43,95,230	45,14,456
Gross receipts	45,61,118	46,58,323
Charges	1,75,703	1,81,774
Percentage of charges on receipts ...	3·9	3·9
Net revenue	43,85,415	44,76,549

The net revenue shows an increase of Rs. 91,134 or 2·08 per cent., against an increase of Rs. 2,13,234 or 5·1 per cent. in the previous year. Including advance payments and excess collections, and making allowance for various adjustments, the actual receipts at the close of the year amounted to Rs. 46,58,323 against Rs. 45,61,118 in the previous year. The receipts on account of the current demand for 1895-96 amounted to Rs. 45,43,598, which is Rs. 1,22,986 in excess of similar receipts in the previous year.

3. The increase in the final demand occurred in every district except in Monghyr, Murshidabad, Cuttack, Patna, Bogra, Hazaribagh, Khulna, Palamau, Malda, Tippera, Rajshahi, Lohardaga, and the 24-Parganas, and is ascribed by the Board to the discovery of new assessees and enhanced assessments in towns and centres of trade. In some cases, however, special causes have been at work. Thus in Manbhum the development of coal mining in the north of the district, and in Darjeeling a prosperous tea season and great activity in the building trade, enhanced taxable incomes and brought in new assesees; while in Dacca an increase of 24·5 per cent. was mainly due to fluctuations in the profits of the jute trade from year to year. The causes assigned for the instances of decrease are various, but in no district does the percentage of decrease exceed three, except in Cuttack and Monghyr, which show a decline of 3·9 and 3·08 per cent., respectively. These causes scarcely call for comment, except in Khulna and Palamau, where the decrease was due to large exemptions on revision, consequent on careless assessments made in previous years.

4. *Demand, collections, and balances.*—The following statement shows the original demand, the revised demand, and the percentage of collections from assessees, exclusive of Government servants:—

Year.	Original number of assessees.	Revised number of assessees.	Original demand.	Final demand after revision.	Amount of final demand collected.	Percentage of final demand collected.
1	2	3	4	5	6	7
			Rs.	Rs.	Rs.	
1894-95	108,765	106,975	40,72,941	39,72,351	38,80,301	97·7
1895-96	110,584	108,901	42,28,980	41,32,382	40,02,151	96·9

The outstanding balance at the close of the year, including penalties, &c., aggregated Rs. 1,64,461 against Rs. 1,62,002 in 1894-95. Of this balance, Rs. 81,100 are reported to be good and under realization, Rs. 57,985 doubtful, and Rs. 25,376 bad and irrecoverable.

5. The districts which succeeded in collecting the entire demand within the year were Burdwan, Bankura, Murshidabad, Faridpur, Tippera, Noakhali, Patna, and Mālda, the last three of which did equally well in the previous year. The collections on account of current and arrear demand, including tax, penalties, &c., were below 95 per cent. in the following districts:—

Dinajpur ...	... 94·1	Darbhanga ...	... 90·9
Calcutta ...	... 92·2	24-Parganas ...	... 84·9
Muzaffarpur ...	... 92	Singhbhum ...	... 73·6

These districts failed to attain the prescribed standard in 1894-95. Two of them, Calcutta and Darbhanga, were also unable to collect 95 per cent. of the current demand of tax only. No explanation is furnished of the short collections, except in Darbhanga and Calcutta: in Darbhanga this is attributed to the non-payment of the tax by several European employés of the Darbhanga Raj and of indigo factories, and in Calcutta to unavoidable delay in completing the assessment of certain large native firms and of some house-property in selected areas. The Lieutenant-Governor trusts that the Board will continue to impress on the officers engaged in the administration of the tax the importance of making timely assessments and enforcing prompt payments so as to get in the bulk of the current demand within the year.

6. *Assessments.*—The number of assessors employed was 49—the same as in 1894. These assessors visited 69,450 villages (including streets in Calcutta) against 68,461 in 1894-95. The number of persons finally assessed was 108,901 against 106,975, showing an increase of 1·8 per cent. Calcutta, where the numbers in the preceding year fell off by 208, heads the list with an increase of 319: Midnapore and Gaya, with an increase of 308 and 283 respectively, occupy the second and third places. A few districts show a reduction, but this nowhere exceeds 59, except in Khulna and Tippera, where the decrease was 199 and 100, respectively. The decline in Khulna is attributed to exemptions on revision due to faulty assessments in previous years: the decrease in Tippera, which had showed a falling off of 184 persons in the previous year, has not been explained.

7. *Objections.*—The following table gives statistics of objections to assessment:—

Year.	Number originally assessed, excluding Government servants.	Number of objections.	Percentage of objections.	Number of successful objections.	Percentage of successful to total number of objections, column 5 to column 3.
1	2	3	4	5	6
1894-95 ...	108,765	10,635	9·8	3,486	32·8
1895-96 ...	110,584	10,797	9·8	3,362	31·1

The percentage of objections to assessments was again highest in Gaya (36·9). The percentage of successful objections exceeded 40 in Cuttack (55·2), Calcutta (44·5), 24-Parganas (42·8), and Burdwan (42·7). These figures show a slight improvement on the results obtained in 1894, but the need for great care in supervising the work of the assessors, while the assessments are being revised, must not be lost sight of.

8. *Incidence of the tax.*—Excluding the tax on interest of Government securities and the salaries of Government officials, the average incidence of the tax in the whole Province was Re. 1 to every 17·2 persons, against 17·9 persons in the preceding year. Outside Calcutta, the average incidence was Re. 1 to 33·7 persons, against Re. 1 to 34·9 in 1894-95. Darjeeling continues to show the highest mufassal average, Re. 1 to every 4 persons; while the incidence was lowest in Singhbhum, Re. 1 to 87 persons. The average incidence

in Calcutta was Re. 1 to every ·4 person, and 1 person in every 39 was assessed to the tax. The proportion of person assessed for the whole of Bengal was 1 to 653 against 1 to 665 in the previous year.

9. The following statement illustrates for the year under review and for previous years the distribution of the income-tax and of the other direct taxes which preceded it as between Calcutta and the rest of the province:—

Years.	Act imposing tax.	Number of persons assessed in—			Amount of tax realised in—		
		Calcutta.	Rest of province.	Total of columns 3 and 4.	Calcutta.	Rest of province.	Total of columns 6 and 7.
1	2	3	4	5	6	7	8
					Rs.	Rs.	Rs.

* Figures not available.
† Exclusive of the tax on salaries, &c., recovered by the Accountant-General and the tax on the interest of Government securities.

The figures show a steady increase in collections, both in Calcutta and in the mufassal since 1887-88, Calcutta contributing in the past year 48·4 per cent. of the whole.

10. *Coercive measures.*—The coercive measures which had to be taken for the realization of the tax are compared for the last three years in the following statement:—

Year.	Number of persons finally assessed.	Distress warrants.		Cases of distraint.		Cases of sale.	
		Number.	Percentage to column 2.	Number.	Percentage to column 2.	Number.	Percentage to column 2.
1	2	3	4	5	6	7	8
1893-94 ...	105,476	5,920	5·6	2,290	2·2	288	·3
1894-95 ...	106,975	5,035	4·7	1,934	1·8	337	·3
1895-96 ...	108,901	5,636	5·2	2,173	2·	317	·3

The number of distress warrants issued was larger than in the previous year, but the cases in which actual sale was resorted to fell from 337 to 317. In Darbhanga, Purnea, Gaya, Jalpaiguri, Singbhum, Jessore, and the 24-Parganas, the proportion of warrants issued exceeded 10 per cent. of the number of persons assessed. The last three districts showed a high percentage in 1894-95 also. In 12 districts no sales of distrained property took place, while such sales were again most numerous in Jessore, Gaya, and Rangpur. In Calcutta distress warrants were issued in 684 cases against 736 in the previous year, and in one case only

was sale found necessary. Ignorance and wilful recusancy on the part of assessees no doubt account for a large proportion of the warrants issued, but it is obvious that the earlier the assessments are completed the less need will there be for coercive measures, which are often resorted to somewhat at random towards the close of the year in order to get in the demand.

11. Under section 9 (2) of the Income Tax Act, a small commission, varying with the date of payment, is allowed to managers of companies, or other employers of labour who collect the tax from their employés on behalf of Government. The total amount of tax collected in this manner was Rs. 2,74,233 against Rs. 2,68,234 in the previous year, and the number of companies, &c., who undertook to collect the tax also rose from 303 to 318. Ten of these, however, failed to collect the tax which was realized by the district officers. It is not suggested that the present rate of commission is inadequate, but where the number of taxable servants is small it is not worth the employer's while to undertake the work of collection.

12. *Expenditure.*—The total expenditure rose from Rs. 1,75,703 in 1894-95 to Rs. 1,81,774 in the year under review. The rise is due partly to increase in establishments rendered necessary by increased work and partly to the accident of certain travelling bills for 1894-95 having been cashed during the year under review.

13. The system of payment of income-tax by money-order is said to be still rising in public favour as a simple and safe method of remitting the tax. One trifling embezzlement occurred, and that was due to neglect of rules on the part of the assessee. Under an order issued in October 1894, income-tax assessors are required to learn the numerals of any native character in which accounts are usually kept in the district in which they are employed, so as to enable them to form fair estimates of the income of traders whose accounts are kept in that language. With the exception of the Assessor of Cuttack who has not yet mastered the Telugu numerals, all the assessors have complied with these orders. The Board's proposal that the assessors should further learn not only the numerals but the languages in which accounts are kept in their districts, should be separately submitted for the orders of Government.

14. The names of the Deputy Collectors specially reported by the Board as having done good service, will be communicated to the Appointment Department.

15. On the subject of popular feeling in regard to the tax, the Lieutenant-Governor has nothing to add to the remarks recorded by Sir Charles Elliott in the concluding paragraph of the Resolution on the last year's report.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE TRIENNIAL REPORT OF THE SANITARY COMMISSIONER FOR BENGAL ON THE WORKING OF THE VACCINATION DEPARTMENT DURING THE YEARS 1893-94, 1894-95 AND 1895-96.

MUNICIPAL DEPARTMENT - SANITATION.

Calcutta, the 24th August 1896.

RESOLUTION—No. 3669S.

READ—

The Triennial Report of the Sanitary Commissioner for Bengal on the working of the Vaccination Department during the three years 1893-94, 1894-95, and 1895-96.

This Triennial Report, which is the third of its kind, was due to Government on the 15th June, but wat not received until the 27th July. No reason is assigned for the delay. Surgeon-Lieutenant-Colonel W. H. Gregg was in charge of the Department from the 1st April to the 1st May 1893, when he went on furlough for six months, and Surgeon-Captain H. J. Dyson, who was transferred from the Sanitary Department of the Punjab, officiated for him. This officer was in charge of the Department from the 2nd May to the 1st November 1893. Dr. Gregg resumed charge on the 2nd November 1893, and held it till the 25th August 1895, when he vacated the appointment and Dr. Dyson succeeded him. The latter officer, who submits the report, was thus in charge of the Vaccination Department during the first six and the last six months of the period under review.

2. *Strength of inspecting and working staff.*—The following table shows the strength of the working and supervising staff during each of the three years under review:—

	Years.	Inspecting Staff.						Operators.				Total number of operators.
		Number of Superintendents.	Number of Deputy Superintendents.	Number of Inspectors.	Number of Sub-Inspectors.	Number of Head Vaccinators.	Total number of Inspecting Officers.	Vaccinators.		Apprentices.

Total	1893-94 ...	47 + 3	1	63	137	14	265	456	1,830	13	985	3,286
	1894-95 ...	48 + 3	1	62	143	14	271	479	1,985	7	1,095	3,566
	1895-96 ...	48 + 3	1	64	146	13	275	489	2,057	6	1,099	3,651

The fluctuations which the table discloses in the numbers of the subordinate establishments are due mainly (1) to the provision made for extra supervision in the Orissa Tributary States; (2) to the employment for the first time of special establishments paid by the District Boards of Puri and Noakhali and by zamindars in Tippera; (3) to the appointment of a small extra Government staff in certain districts where small-pox broke out; and (4) to the creation of the new district of Angul. In point of numbers the superior staff, consisting of Civil Surgeons and Deputy Sanitary Commissioners, remained practically unaltered, but the Sanitary Commissioner observes that the systematic working of the department was greatly interfered with by the frequent shifting of individual officers, especially of the three Deputy Sanitary Commissioners, among whom no less than eleven changes occurred in 1893-94.

3. *Number of operations and average per operator.*—The total number of vaccinations performed rose from 1,844,304 in 1893-94 to 2,174,097 in 1894-95 and 2,277,081 in 1895 96, while the yearly average for the period 1893-96 was 2,098,494 against 1,770,492 in 1890-93, giving an increase of 328,002. The average per operator also rose from 560 in 1893-94 to 608 in 1894 95 and 622 in 1895 96. The increase in the yearly average is shared by 35 districts, including Calcutta and the Tributary States of Orissa and Chota Nagpur. It was highest in the following districts :—

Dacca ...	59,927	Noakhali ...	20,897
Darbhanga ...	42,708	Backerguuge ...	20,727
Mymensingh ...	35,586	Faridpur ...	19,382

Fourteen districts show a falling off, the decline being largest in—

Cuttack ...	16,222	Manbhum ...	5,988
Pabna ...	6,666	Hooghly ...	4,442
Rajshahi ...	... 3,339		

In Cuttack the large decrease is said to have been due to a strike among the vaccinators in 1892-93 in consequence of the reluctance of the people to pay their fees This reduced their number from 100 to 12, and although the strength has since risen to 48, it still falls short of the needs of the district. In Pabna the Civil Medical Officer refers to the greater unhealthiness of the people as accounting for the decline in vaccination. In Manbhum the decrease is attributed to three causes, viz. (1) to the scarcity which prevailed in the district in 1893-94; (2) to less populous and more jungly tracts having been taken up for vaccination; and (3) to the excessive prevalence of measles in 1895-96. An unusual outbreak of malarial fever, especially among children, is said to have been one of the causes of the reduction of vaccinations in Hooghly. In Rajshahi the falling off is ascribed to a smaller number of persons being available for vaccination and the prevalence of malaria in the district. In rural areas the average number of operations per man was 612 against 665 in 1890-93: this decrease is attributed to the employment, since the reorganization of the department, of a large number of apprentices who do less work than the regular vaccinators. The average has also been affected by the inclusion of vaccinators paid by Government or the District Board, who worked for short periods during the prevalence of small-pox.

4. *Protection afforded to infants.*—In paragraph 6 of the report a statement is given showing the degree of protection afforded to infants under one year of age, which, as has often been pointed out, is the proper test of the working of the Department. The total number of such infants available for vaccination during 1895-96 was estimated at 2,460,469 against 2,491,305 in the preceding year, and of these, 416,307, or 169·19 per thousand, were successfully vaccinated, as compared with 405,065, or 162·59 per thousand in 1894-95. The proportion of infants successfully vaccinated per thousand of population in 1892-93, the last of the previous triennial period, was 125·49 only, so that a distinct advance has been made during the past three years. The Malda and Darjeeling districts head the list with 712·49 and 700·68 successful operations, respectively, out of every thousand of the available infant population. Next in order comes Lohardaga with 641·71 per mille. Gaya, Cuttack, and Patna stand lowest with 37·72, 36·29 and 26·52, respectively, per mille The statistics, however, vary so greatly that their accuracy cannot be wholly relied on, and it seems probable that in many districts the proportion of infants protected has been overstated.

5. *Primary vaccinations.*—The average ratio per cent. of successful cases for the entire Province for the three years is returned at 95·38 against 99·26 in the previous triennial period. The Sanitary Commissioner ascribes this incredibly high percentage to the dishonest practice, believed to have been in force in Bengal for many years, and strongly condemned in paragraph 5 of last year's Resolution, of excluding unsuccessful cases from the returns, and even of entering absolute or partial failures as successful vaccinations. Dr. Dyson goes on to show, by statistics laid before the Royal Commission on vaccination, that the degree of protection afforded by vaccination bears a definite

relation to the number of successful vaccination marks, and for this reason he recommends that in future three punctures should be made in each arm, as is the practice in the Panjab, and that the vaccination returns should show exactly in how many points each case of vaccination has been successful. The Lieutenant-Governor accepts this recommendation, and desires the Sanitary Commissioner to submit for the approval of Government a draft of the instructions which he proposes to issue on the subject.

6. *Secondary operations.*—The average ratio per cent. of successful secondary operations in rural areas for the entire Province for the triennial period was 60·07 against 52·81 in the preceding triennial period, and in municipalities 53·79 against 38·70. Here again the percentages of successful cases seem rather high, and their accuracy is questionable. In connection with this subject, the Sanitary Commissioner refers to the almost complete suppression of small-pox in Germany, which has been brought about by the introduction in 1874 of compulsory vaccination for infants and of revaccination for all school children in their twelfth year, and urges that all boys at school and all young men entering Government service should be vaccinated or revaccinated, as the case may be. The proposal should be submitted to Government through the Director of Public Instruction.

7. *Recess work.*—The average number of operations performed during the recess in connection with small-pox epidemic rose from 75,357 in 1890-93 to 110,541 in 1893-96. This increase is attributed to increased activity shown in vaccinating whole communities on the slightest outbreak of small-pox, instead of, as before, only those residing in the immediate neighbourhood of the persons attacked. It is also stated that many municipalities now carry on vaccination all the year round.

8. *Vaccination at the expense of District Boards.*—The number of vaccinators employed by District Boards and paid from District Funds rose from 37 in 1893-94 to 39 in 1894-95 and to 67 in 1895-96, and the total number of persons vaccinated by them from 13,086 in 1893-94 to 27,061 in 1894-95 and to 59,060 in 1895-96. The contributions made by District Boards towards vaccination in rural areas also increased from Rs. 654 in 1893-94 to Rs. 3,279 in 1895-96. The largest contribution during the past year was made by the District Board of Puri, viz. Rs. 1,148. Among the other District Boards, Tippera contributed Rs. 500, Gaya Rs. 450, Chittagong Rs. 384, Dacca Rs. 317, Backergunge Rs. 300, Bogra Rs. 91, and Bankura Rs. 88. Provisions have been inserted in the Bill to amend the Local Self-Government Act, which will legalise the action of these Boards and will enable other District Boards to devote a portion of their funds to providing free vaccination in those parts of their districts where, for special reasons, the system of licensed vaccination is found to be unpopular.

9. *Cost of vaccination.*—The total cost of vaccination during the year 1895-96 was Rs. 2,09,480 as against Rs. 1,95,218 in 1894-95 and Rs. 1,80,199 in 1893-94. The average cost of each reported successful vaccination was the same during the past two years, viz. 1 anna 6 pies, as against 1 anna 7 pies in 1893-94.

10. *Death-rate from small-pox and proportion of population protected.*—The usual diagram illustrating the death-rate from small-pox in each district, as compared with the proportion of population protected by vaccination, is given. It shows that, as a general rule, small-pox is comparatively low in places where vaccination is actively carried on, and *vice versâ*. The total number of deaths from small-pox during 1895-96 was 13,080 as against 9,562 in 1894-95 and 12,499 in 1893-94, or ·18 per thousand of population, as compared with ·13 in 1894-95 and ·17 in 1893-94. The following districts had the highest mortality:—

Midnapore	...	...	...	...	1,784
Cuttack	...	...	...	...	1,505
Patna	...	...	...	...	1,160
Faridpur	...	...	...	...	1,106
Calcutta	...	...	...	...	1,010

Singhbhum and Jalpaiguri returned only two deaths, Rajshahi three, Lohardaga four, and Malda and Darjeeling five each.

11. *Methods of vaccination.*—The Sanitary Commissioner as usual furnishes a statement which purports to show the comparative efficacy of the three methods of vaccination practised in Bengal, viz., (1) with vaccine lymph obtained direct from the calf, (2) with vaccine lymph prepared with lanoline, and (3) with human lymph taken by arm-to-arm transfer. But, as he remarks, the value of the statement is reduced by the fact that in the case of the arm-to-arm method repetitions are included and unsuccessful operations excluded from the returns. On the advantages of using vaccine rather than human lymph, Dr. Dyson observes :—

"Speaking, from personal experience extending over six years in other provinces, of all these methods of vaccination, I have no hesitation in pronouncing very decidedly in favour of vaccination direct from the calf. I see it stated in previous reports of this Department that lymph 'when properly procured by the arm-to-arm process and from healthy children, is of equal value to the lymph procured direct from calves.' I am not prepared to admit this; but even supposing it to be the case, the difficulty is always to procure healthy subjects. Invariably, the children used as vaccinifers are low caste and unhealthy. No woman of the well-to-do classes will allow her child to be used as a vaccinifer. On the other hand, the advantages of vaccination direct from the calf are distinct, and obviously superior to any other kind of lymph. In the first place, the lymph is pure, the only danger being from tuberculosis, which, however, is not a common disease among cattle in this country; secondly, this source of supply is practically inexhaustible; and, thirdly, the poorer people are not harassed to supply their babies as vaccinifers, which is an important consideration. The advantages of direct calf-vaccination are so great, that it is fast gaining a strong foothold in the public estimation. Three years ago when I was officiating as Sanitary Commissioner of these provinces, and suggested this idea for mufassal towns and rural areas, there was immediately a storm of opposition; religious prejudices were put forward, and the impossibility of inducing the people to give up their calves temporarily was said to be insuperable. Judicious perseverance, however, in some places, in accordance with my expressed conviction that it would succeed, has gained the day, and I now find on returning to Bengal that there is scarcely any prejudice in the northern, eastern and lower districts of the Province."

Lanoline lymph is said to be very useful in starting vaccination, and also in times of emergency, such as sudden outbreaks of epidemic small-pox, and it is for this reason chiefly that a supply of it ought to be maintained.

12. It was stated in the last Resolution that arrangements had been made to provide the Nepal Darbar with a regular supply of vaccine lymph from the Darjeeling depôt. Of the lymph sent last year three consignments out of five proved inert owing to the change of temperature, but 694 persons in all were vaccinated, 573 being successful. The Medical Officer in charge of the Bir Hospital, Nepal, has taught the arm-to-arm method to a number of vaccinators, who will commence work next season, and it is stated that there is no immediate necessity for supplying fresh lymph. Should such necessity arise, the Sanitary Commissioner will no doubt be able to meet the requirements of the Darbar.

13. *Attitude of the people.*—The Sanitary Commissioner reports that in Bengal the people seem to be gradually realising the benefits of vaccination, but that there are still places where vaccination is opposed chiefly on sentimental grounds. A considerable step in advance has been made in Faridpur by Dr. Deare, Deputy Sanitary Commissioner, who induced 36,240 Ferazi Muhammadans, including the leaders of the community, to submit to vaccination with lanoline lymph. A full account of Dr. Deare's operations forms an appendix to the report. The Lieutenant-Governor's acknowledgments are due to him, and also to Maulvi Fazl-ul-Karim, Subdivisional Officer of Madaripur, for the tact and perseverance with which they managed to overcome the prejudice which has long been a serious obstacle to the spread of vaccination in Eastern Bengal.

14. *Inspections.*—The Sanitary Commissioner remarks that the inspections made by Deputy Sanitary Commissioners were on the whole not as numerous as they should have been, but he adds that they have to inspect the remote parts of the districts, while Civil Surgeons visit places comparatively easy of access. The increased activity on the part of Civil Surgeons noticed in the last year's report, was maintained in 1895. The largest amount of inspections

was made by Dr. Peck, Civil Surgeon of Muzaffarpur, who inspected 13,997 operations. Dr. Russell, of Dacca, comes next with 13,487 inspections, and is followed by the Civil Surgeons of Saran, Mymensingh and Monghyr, with 11,892, 11,865 and 11,479 inspections, respectively. Twelve Civil Surgeons inspected more than 5,000 operations, and thirty-one from 1,000 to 5,000, while the officers in charge of the 24-Parganas, Faridpur, the Chittagong Hill Tracts and Angul inspected less than 1,000. The amount of inspection done by Inspectors and Sub-Inspectors varied greatly from district to district. While the Inspector at Dacca inspected 72,331 out of 141,822 operations performed in the district, the Inspector at Howrah could not manage to inspect as many as 10,000 operations. The special attention of the Civil Surgeons should be drawn to the matter.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

FINAL FORECAST OF THE JUTE CROP FOR 1896.

THE following is published for general information.

REVENUE DEPT., M. FINUCANE,
The 25th August 1896. *Offg. Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

FINAL FORECAST OF THE JUTE CROP FOR SEASON 1896.

(Up to the middle of August.)

1. *Explanatory.*—The form in which the final report now appears differs in a few particulars from the form used in previous years, the chief difference consisting in the substitution of the "average acreage of two previous years" for "normal acreage" in column 4. It is hoped that a comparison of the current year's crop with the average of previous years will enable a better idea to be formed of the nature of the present crop than any comparison with the so-called "normal acreage," about the meaning of which term much uncertainty exists.

2. *Season.*—The character of the early part of the current jute season was described in the preliminary forecast issued on the 23rd June 1896, as being generally of a much less favourable character than that of the year 1895; but it was noted that the outturn would depend very much on the rainfall in the two months between the middle of June and the middle of August. Unfortunately the rainfall in all the important jute-growing districts during this period has fallen considerably short of the normal, and the present season has proved unfavourable to the jute crop in many ways. Want of rain was felt in March and April, when land is usually prepared for jute, and much of the crop is also sown in *chur* and other low-lying lands. In May and the early part of June excessive rainfall interfered with the growth of the seedlings and also with weeding operations. And now deficiency of rainfall in July and August has still further reduced the prospects of the crop in most of the important jute-growing districts, and in some places has interfered with steeping. The crop is also reported to have suffered to some extent from want of flood water in Dacca and Tippera, and from the ravages of insects in Nadia, Jessore, Pabna, Dacca and Faridpur. And it seems doubtful whether heavy rain now will save the prospects of the crop.

3. *Area cultivated.*—The total area under jute in the current year is estimated at 2,220,400 acres against 2,242,700 acres estimated to have been cropped in 1895. The decrease of 22,300 acres is nominal.

4. *Character of the crop.*—The deficiency of rainfall during the last two months, which has been referred to above, has caused a reduction in the preliminary estimates in many of the most important jute-growing districts, notably in Tippera, Pabna, Rangpur and Mymensingh. Only two (Rajshahi and Purnea) of the eleven principal jute districts return a 15-anna crop, only one (Tippera) a 14-anna crop, and the rest estimate the crop at from 10 to 12 annas. The mean outturn for the Province, obtained from the district reports, stands at 12 annas as against a mean outturn of $15\frac{1}{3}$ annas in 1895.

5. *Gross outturn of the crop.*—As suggested by the Chamber of Commerce in a recent letter, the factors which determine the exportable balance of bales, such as the amount locally consumed, and the amount taken by Indian mills, are so uncertain and variable that it is safest to let those interested in the trade make their own calculations from a rough estimate of the total crop.

The gross outturn of the present jute crop would appear, from the appended district returns, to amount to about $49\frac{3}{4}$ lakhs of bales, as against $64\frac{1}{4}$ lakhs estimated as the produce in 1895, and $55\frac{3}{4}$ lakhs suggested as the average outturn of the two years 1893 and 1894.

This calculation is based on the assumption that 1,200 lbs or three bales may be taken as the rough average or 16-anna outturn from one acre for all jute districts in Bengal. Experiments are being conducted to determine this figure more exactly, but for the present this is the estimate which approximates most nearly to the reports on outturn which have been received in this Department.

B. C. BASU,

Assistant Director of Land Records and Agriculture, Bengal.

COUNTERSIGNED.

P. C. LYON,

Offg. Director of the Dept. of Land Records and Agriculture, Bengal.

CALCUTTA,
The 23rd August 1896.

Final Report on the Jute Crop of Bengal for the year 1896.

District.	Acreage.					Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1896)?	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1895)?	Outturn in bales of 400 pounds.			Percentage by which column 9 exceeds (+) or falls short of (−) outturn in		Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
	Of current year's crop (1896).	Of previous year's crop (1895).	Average of two preceding years, viz. 1893 and 1894.	Percentage by which column 2 exceeds (+) or falls short of (−) area in				Estimated yield of current year, i.e. of area in column 2 (1896).	Yield of previous year, i.e. of area in column 3 (1895).	Average of two preceding years, viz. 1893 and 1894.				
				Column 5.	Column 6.						Column 10.	Column 11.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Burdwan ...	Acres. 12,700	Acres. 10,900	Acres. 10,300	−1·33	−0·93	Annas. 15¼	Annas. 11¼	31,600	24,000	20,300	+31·66	+55·66	The outturn this year is expected to be better than that of last year in the Sadar Kalna and Raniganj subdivisions. The crop was affected to some extent by want of rain at sowing time in the Katwa subdivision.	
Midnapore ...	9,500	11,100	10,900	−14·41	−12·84	12¼	12¼	21,300	25,500	18,600	−14·51	+17·20	A larger area was actually brought under cultivation than was estimated in the preliminary forecast. The timely rainfall of the present year has had a good effect on the crop, and the outturn, though estimated at three-fourths of the average, is likely to prove a little higher. It is curious that though the season has been more favourable, the area sown has been reported as less than last year's.	

STRICT.	ACREAGE.					Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1896)?	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1895)?	OUTTURN IN BALES OF 400 POUNDS.			Percentage by which column 9 exceeds (+) or falls short of (—) outturn in		Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
	Of current year's crop (1896).	Of previous year's crop (1895).	Average of two preceding years, viz. 1893 and 1894.	Percentage by which column 2 exceeds (+) or falls short of (—) area in				Estimated yield of current year, i.e. of area in column 2 (1896).	Yield of previous year, i.e. of area in column 3 (1895).	Average of two preceding years, viz. 1893 and 1894.	Column 10.	Column 11.		
				Column 5.	Column 6.									
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	Acres.	Acres.	Acres.			Annas.	Annas.							
...ly ...	7,000	12,000	13,400	—41·66	—47·76	16	9	21,000	18,000	27,800	+16·55	—24·46		The Collector does not explain why this year's area should have fallen so short of the areas sown in previous years. It has probably been underestimated; but as the outturn has been estimated at a higher figure than in the neighbouring districts, no change in the area has been made.
...rganna ...	36,300	35,500	38,300	+2·55	—5·48	13½	12½	91,600	82,700	74,000	+10·76	+23·78	The difference between the average area (column 4) and the area sown this year is due to the want of sufficient rain at the sowing time. But the subsequent rains did much good to the crop, and the outturn is expected to be better than that of the last year.	
... ...	42,400	44,000	46,800	+5·45	—0·85	12	13	104,400	107,300	101,100	—2.70	+3·26	The reduction in the outturn from that estimated in the preliminary forecast is owing to the fact that since the latter part of June last damage has been caused to the plants by insects in thana Damurhuda in the Meherpur subdivision, and in places in the Kushtia subdivision.	

Murshidabad...	19,300	20,300	25,800	−4·92	−25·19	11	11	39,800	41,900	56,300	−5·01	−29·92	Owing to the want of timely rain, the seeds did not germinate in some places. The crop is rather late, and the outturn has in consequence been estimated at 11 annas.
Jessore ...	41,000	34,100	31,500	+20·23	+30·16	12	14	92,300	89,500	63,400	+3·13	+45·58	The difference between the preliminary and final forecast is owing to insufficient rainfall after the sowing time, and to the injury done to the crops by insects.
Khulna ...	21,600	21,600	19,600	.....	+10·20	14	15½	56,700	62,100	44,200	−8·69	+28·28	The decrease in the outturn is in the Sadar subdivision, and it is reported to be due to want of timely rainfall. The Subdivisional Officer of Satkhira reports that the cultivators were subsequently induced to cultivate the full area there, and hence the difference between the preliminary forecast and this in respect of this year's area.
Rajshahi ...	104,000	103,300	102,600	+0·67	+1·36	15	16	292,500	309,900	261,900	−5·61	+11·67	The decrease in the outturn is reported to be in the Sadar and Naugaon subdivisions, and is due principally to deficient rainfall.
Dinajpur ...	107,500	107,500	107,000	...	+0·47	10	18	201,600	362,800	280,700	−44·43	−28·18	The crop will be 10 to 12 annas; at one time it promised to be better still.
Jalpaiguri ...	65,400	64,900	62,800	+0·77	+4·14	11½	10½	141,000	127,800	173,300	+10·33	−18·64	Want of seasonable rains has reduced the rate of outturn, but the extension of jute cultivation in the Alipore subdivision has resulted in an increase in the gross outturn as compared with last year's.
Darjeeling (plains).	13,800	13,800	13,800	.....	.....	10	10	25,900	25,900	36,200	.....	−28·45	

District.	Acreage.					Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1896)?	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1895)?	Outturn in bales of 400 pounds.			Percentage by which column 9 exceeds (+) or falls short of (—) outturn in		Remarks by the District	Remarks by the Department of Land Records and Agriculture, Bengal.
	Of current year's crop (1896).	Of previous year's crop (1895).	Average of two preceding years, viz. 1893 and 1894.	Percentage by which column 2 exceeds (+) or falls short of (—) area in Column 3.	Column 4.			Estimated yield of current year, i.e., of area in column 2 (1896).	Yield of previous year, i.e., of area in column 3 (1895).	Average of two preceding years, viz. 1893 and 1894.	Column 10.	Column 11.		
1.	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Rangpur ...	Acres. 267,900	Acres. 278,000	Acres. 287,100	—3·85	—6·89	Annas. 11	Annas. 16	551,300	834,000	735,700	—33·89	—25·06	The short outturn is due to absence of rain in the earliest part of the season, preventing or interfering with sowing. Excessive rainfall in May and the early part of June also interfered with weeding operations. Short rainfall later in the season, interfered with the full development of some of the crops, and was, and is, a very great hindrance to steeping.	
Bogra ...	100,000	100,000	87,500	.....	+14·29	10	13	187,500	243,800	215,600	—23·09	—13·03	.....	
Pabna ...	158,300	175,500	185,800	—9·80	—14·80	12	17	356,200	559,400	450,900	—36·32	—21·00	Worms, locally known by the name *chhenga*, have caused much damage to the plants. The outturn is estimated at only three-fourths of an average crop.	

Dacca ...	176,400	178,300	209,900	—1·07	—15·96	10½	14	347,300	463,000	448,100	—25·79	—22·49	In most places in the Manikganj subdivision the jute has been injured by insects. This, added to the insufficiency of flood water, is the cause of the difference in the outturn between this and the preliminary forecast.
Mymensingh	558,700	558,000	536,200	+0·13	+4·19	12	15½	1,257,100	1,621,700	1,387,900	—22·48	—9·42	The low outturn is due to want of rain in the sowing season, and to heavy showers in May, from which the plants have been unable to recover.
Faridpur ...	86,000	86,000	77,500	.....	+10·97	10	14	161,300	225,800	180,000	—28·56	—10·39	Insufficient rainfall since the submission of the first forecast, damages done by insects, and want of water for steeping, have caused the reduction of the estimate from 14 annas in the preliminary forecast to 10 annas.
Backergunge...	6,400	6,400	6,400	.....	.....	16	11	19,200	13,200	12,000	+45·45	+60·00	The Collector reports that the season has been fairly good, and that he sees no reason to alter his former estimate.
Tippera ...	235,800	231,200	225,900	+1·99	+4·38	14	18	619,000	780,300	593,800	—20·67	+ 4·24	The decrease in the outturn is due to rainfall being deficient throughout the district, and to the low lands not being properly flooded.
Noakhali ...	9,500	9,500	9,500	...	...	10	14	17,800	24,900	18,700	—28·51	—4·81	Owing to insufficient rainfall the outturn has been less than was reported in the preliminary forecast.
Bhagalpur ...	22,400	22,400	21,000	...	+6·66	13	16	54,600	67,200	65,100	—18·75	—16·13	Owing to an unequal distribution of rainfall in the months of June and July in the Supaul and Banka subdivisions, there has been some variation in the estimated outturn as reported from those subdivisions in the preliminary forecasts. But the district average, as returned in the preliminary forecast, has not been affected, and it stands at 13 annas at present.

District.	Acreage.					Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1896)?	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1895)?	Outturn in bales of 400 pounds.			Percentage by which column 9 exceeds (+) or falls short of (—) outturn in		Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
	Of current year's crop (1896).	Of previous year's crop, (1895).	Average of two preceding years, viz. 1893 and 1894.	Percentage by which column 2 exceeds (+) or falls short of (—) area in				Estimated yield of current year, i.e. of area in column 2 (1896).	Yield of previous year, i.e. of area in column 3 (1895).	Average of two preceding years (viz. 1893 and 1894).	Column 10.	Column 11.		
	Column 3.	Column 4.												
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	Acres.	Acres.	Acres.			Annas.	Annas.							
Purnea ...	75,500	76,500	72,000	.....	+4·86	15	15	212,300	212,300	209,500	.....	+1·34	Deficient rain since the submission of the preliminary forecast has caused the difference in outturn.	
Malda ...	35,000	35,500	33,500	—1·41	+4·48	8	12	52,500	79,900	82,000	—34·29	—35·97	On account of prolonged drought the outturn is expected to be half of the average.	
Cuttack ...	4,100	4,900	4,700	—16·32	—12·76	11	13	8,500	11,900	9,300	—25·57	—8·60	Sowing had not been completed when the first forecast was submitted. Hence the difference between the area in column 2 of this return and that in column 5 of the first forecast. Heavy floods at the end of July damaged the jute crop. Hence a decrease of outturn is expected.	
Balasore ...	2,600	2,700	2,900	—3·70	+10·34	12	12	5,900	6,100	5,600	—3·28	+5·36		
Total ...	2,290,400	2,242,700	2,242,200	—0·99	—1·02	12	*15½	4,970,700	6,425,900	5,572,500	—22·64	—10·79		

N.B.—20 annas represent a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

* This represents the mean outturn, the crop of 1895 was roughly estimated as a seventeen anna one in this Department.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FIRST QUARTER OF 1896-97.

No. 741B., dated Calcutta, the 14th August 1896.

From—E. H. WALSH, Esq., Offg. Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

SALT.

THE HON'BLE MR. W. H. GRIMLEY.

I AM directed to submit the following report on the state of the salt market for the first quarter of 1896-97, comprising the months of April, May, and June 1896.

2. The quantity of salt of every description cleared during the quarter under review, amounted to 28,43,269 maunds, against 24,00,904 maunds in the previous quarter, and 28,04,085 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon, was Rs. 68,06,060, against Rs. 54,88,437 in the previous quarter, and Rs. 66,34,015 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of locally-made salt removed from the golas in Orissa during the quarter under review, and the quantity which remained in store at the close of the quarter, are shown below in table I:—

TABLE I.

1	2
	Puri.
	Mds.
Balance at the close of the previous quarter ...	2,70,619
Manufactured or added during the quarter ...	1,46,400
Total ...	4,17,019
Sold during the quarter	18,130
Wastage	3,335
Total ...	21,465
Balance at the close of the quarter	3,95,554

The total sales of locally-made salt during the quarter under review amounted to 18,130 maunds, against 19,275 maunds in the previous quarter, and 17,932 maunds in the corresponding quarter of the previous year. Duty was levied during the quarter on the full quantity sold.

4. The subjoined table shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under

review, as compared with the figures of the corresponding quarters of the previous two years:—

5. Table III shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter under review, as compared with the results of the previous four quarters:—

TABLE III.

WHERE STORED.	First quarter of 1895-96.	Second quarter of 1895-96.	Third quarter of 1895-96.	Fourth quarter of 1895-96.	First quarter of 1896-97.
1	2	3	4	5	6
	Mds.	Mds.	Mds.	Mds.	Mds
Sulkea Salt golas	25,35,892	27,50,366	20,36,615	25,30,946	13,39,359
Kidderpore Dock do.	1,59,317	3,51,571	6,26,006	5,49,200	1,72,853
Chittagong Government Salt golas	84,141	1,54,211	2,94,168	3,06,777	1,45,701
Ditto Private ditto.	.... .	.....	.....	60,960	48,953
Khulna (Salt Bonded Warehouse of Messrs. Turner, Morrison & Co.) ...	584	1,564	819	6,949	1,246
Balasore (ditto)	2,231	1,837	2,485	8,553	137
Chandbali (ditto)	.....	.....	3,160	3,096	3,724
Bhairab Bazar (ditto)	..	.....	9,869	2,860	.....
Total ...	30,81,185	32,59,549	38,73,452	34,60,329	17,11,973

The stock in bond at the close of the quarter was reduced to half of what it was at the close of the previous quarter, owing to heavy deliveries from the golas during the period under review. The shipments of salt for Calcutta, as noted in paragraph 9, have, however, considerably advanced, being almost double of what they were during the previous quarter.

6. The despatches of salt from Calcutta by water and the three railways passing the several pass-stations into the interior of the country both east and west of the river Hooghly, as well as the despatches by steamers and flats during the quarter under review and the corresponding quarters of the previous two years, are shown in the table below:—

TABLE IV.

PERIOD.	BY WATER.					BY RAIL.			BY STEAMERS AND FLATS.	
	Vid Balikhal.	*Vid* Sankrail.	*Vid* Gewakhally.	*Vid* Kidderpore.	*Vid* Ballisghats.	*Vid* Ruthtollah Ghat.	By the East Indian Railway.	By the Eastern Bengal and South-Eastern Railways *vid* Chitpur.	Quantity despatched to the interior (excluding Orissa).	Quantity despatched to Orissa.
1	2	3	4	5	6	7	8	9	10	11
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
First quarter of 1894-95 ...	1,43,328	1,05,991	49,234	59,701	3,66,723	668	10,80,171	3,66,751	4,40,650	65,300
Ditto of 1895-96 ...	1,32,006	1,37,[illegible]2	49,863	69,703	2,17,827	1,212	8,61,950	2,70,508	4,08,554	57,896
Ditto of 1896-97 ...	99,068	1,25,[illegible]	45,271	48,094	1,52,003	524	11,89,985	2,57,032	2,57,450	42,185

The decrease in the quantity of duty-paid salt despatched to Orissa is counterbalanced by the increased transactions in bonded salt shown in table VI, paragraph 11.

7. The quantity of salt despatched by the East Indian Railway to the stations beyond Buxar during the quarter under review, amounted to 7,495 maunds 20 seers, as noted in the margin, against 33,347 maunds 10 seers in the previous quarter, and 5,622 maunds 10 seers in the corresponding quarter of the previous year.

	Mds. s.
April	2,248 20
May	3,373 10
June	1,873 30
Total ...	7,495 20

8. The quantity of saltpetre removed from the refineries during the quarter on payment of duty, amounted to 12,963 maunds, against 12,134 maunds in the previous quarter, and 12,557 maunds in the corresponding quarter of the previous year.

9. The shipments of Liverpool salt for the port of Calcutta, according to published market reports, were as follows:—

	Tons.
April	18,070
May	31,030
June	16,800
Total ...	65,900

10. Table V shows the average wholesale price per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter:—

No transactions in sea-imported salt have been reported for the quarter from Cuttack and Puri.

WEATHER AND CROP REPORT.

For the week ending the 24th August, 1896.

Burdwan.—Rainfall at Sadar 2·97, Kalna 2·55, Katwa 3·74, Raniganj 2·66. Weather rainy, hot and cloudy. Heavy rain all over the district has improved prospects of *aman* crop immensely. It should now be almost up to the average. No more rain wanted at present. *Aus* being harvested. Jute and sugarcane doing well. Condition of cattle good. Water and fodder ample. Common rice selling as follows:—

	Srs.	c.	
Sadar	11 to 15	0	per rupee.
Kalna	10½ to 12	0	
Katwa	13	7	
Raniganj	13	0	

Midnapore.—Rainfall at Sadar 8·58, Contai 4·58, Tamluk 4·16, Ghatal 2·22. Weather seasonable. Transplantation of paddy going on. Prospects of sugarcane and jute good. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Contai	15 to 18	
Tamluk	14	
Ghatal	14 to 15	

24-Parganas.—Rainfall at Sadar 3·60. Weather cloudy and showery. Prospect of *aus* crop favourable. Harvesting of jute going on. Transplantation of *aman* continues. Fodder and water sufficient. Condition of cattle good. Common rice selling as follows:—

	Srs.	c.	
Sadar	10 to 13	0	per rupee.
Barasat	10	0	
Basirhat	11	10	
Diamond Harbour	11	6	

Murshidabad.—Rainfall at Sadar 2·30, Kandi 2·68, Jangipur 1·79. Weather hot. The recent rain has done much good to *aman* and other standing crops. *Bhadoi* is being harvested in some places. Indigo manufacture still proceeding. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Khulna.—Rainfall at Sadar 0·56, Bagirhat 1·55. Weather hot with occasional rain. Rain urgently wanted in Bagirhat and Satkhira for transplantation of *aman* paddy. Health of cattle good. Fodder sufficient. Common rice sells as follows:—

	Srs.	c.	
Sadar	9 to 11	0	per rupee.
Bagirhat	12	6	
Satkhira	10	6	

Dinajpur.—Average rainfall 1·52. Weather very hot. *Bhadoi* and jute are being cut. More rain urgently needed for the transplantation of *haimanti* rice and for steeping jute. No cattle-disease. Fodder and drinking water sufficient. Rice selling from 11 to 12 seers per rupee.

Rangpur.—Average rainfall 1·92. Transplantation of *aman* and steeping and washing of jute retarded for want of water. More rain urgently needed. Prospects not favourable. Common rice selling from 9 to 13 seers per rupee. Fodder sufficient.

Pabna.—Rainfall 1·72. Weather hot and cloudy. Prospects improving, but more rain wanted. Fodder sufficient.

Dacca.—Rainfall 1·22. Weather hot. Prospects of standing crops not very good. Fodder available. No cattle-disease. Common rice sells at 10 seers per rupee.

Chittagong.—Rainfall 1·63. Weather hot. Harvesting of *aus* still continues. Rain badly wanted for transplantation of *aman*. Fodder sufficient. Common rice sells at 13 seers per rupee.

Patna.—Rainfall at Sadar 6·88. Recent rain has improved prospects of *bhadoi*. Transplantation of paddy going on briskly. Prices have fallen in Bihar, but are stationary elsewhere. Price of common rice ranges from 12½ seers at Dinapore to 15 seers per rupee at Sadar. Fodder and water for cattle sufficient.

Gaya.—Sufficient rain fell during the week. Transplantation of paddy going on. *Bhadoi* crops improving. Common rice selling at 13½ seers per rupee.

Champaran.—Rainfall at Motihari 9·56, Bettiah 7·27. This general rain has saved the crops, and prospects are now very fair. Transplantation of winter rice in full swing, and everybody employed. Price of common rice at Sadar fallen from 12 to 13½ seers per rupee, against average of 13½ seers. Fodder and water ample.

Darbhanga.—Rainfall at Sadar 5·38, Madhubani 6·23, Samastipur 6·12. Rain has done much good. *Bhadoi* crops improved, and transplantation of paddy now going on again where not already finished. More rain would still do good in Madhubani.

Bhagalpur.—Rainfall at Sadar 4·04. Heavy showers at Sadar for three days. Weather hot and cloudy throughout the district, with occasional local showers in all subdivisions except Supaul. More rain wanted, especially at Supaul. Transplantation of winter rice is suffering at Supaul and Madhipura. Indian-corn is expected to yield, on the average, an outturn of about 8 annas. Fodder sufficient. Cattle-disease reported from two thanas of Supaul. Common rice sells at an average of 13 seers per rupee.

Purnea.—Rainfall 6·54. Rain still wanted for *bhadoi* and *aghani* paddy. Transplantation of *aghani* paddy in progress. Cutting of jute and manufacturing of indigo still going on. Some cattle-disease in Raniganj. Fodder and water sufficient. Common rice sells from 12 to 14 seers per rupee.

Cuttack.—Report not received.

Hazaribagh.—Rainfall at Sadar 8·59, Giridih 5·46. Constant rains. Sufficient rainfall for full crops. Rice sells from 10 to 12 seers per rupee in mufassal. At Hazaribagh the dealers are holding back for 7 and 8 seers per rupee.

General Summary.—There was general and heavy rain over the greater part of the Province during the week. In Northern and Eastern Bengal more rain is still required for the transplantation of winter rice and for the steeping and washing of jute. In Bihar, where the crops had been suffering from a prolonged drought, the heavy rain of the week has put an end to all anxiety, and the transplantation of paddy is now in full swing. In parts of the Bhagalpur Division, however, more rain is still said to be required. The harvesting of early rice and jute and the manufacturing of indigo are in progress. No cattle-disease is reported. The price of common rice in Bihar, which had risen in consequence of the drought, is now beginning to fall. No report has been received from Cuttack.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,

	Inches.
The total fall of rain from 16th to 22nd August 1896	3·53
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·46
The total fall from 1st January to 22nd August 1896	42·43
The average fall of the corresponding period for 24 years, Surveyor-General's Office	45·15

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 24th August 1896.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Council Chamber on Saturday, the 8th August 1896.

Present:

The Hon'ble SIR CHARLES PAUL, K.C.I.E., Advocate-General, *presiding*.
The Hon'ble W. H. GRIMLEY.

PROTECTION OF WOMEN IN MYMENSINGH.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to a statement which appeared in the *Charu Mihir* of Mymensingh to the effect that a number of *budmashes* carried off the daughter of one Kumari Chandalini, of Bajipore, and committed outrages on her? Is it the case that the Judge in sentencing the accused to seven years' rigorous imprisonment remarked:—"I have already called attention to the need of protection of women in this district?" Will the Government be pleased to state what action it has taken to ensure this protection?

The Hon'ble MR. RISLEY replied:—

"The attention of the Government has been drawn to the statement referred to. The accused arrested in the case of Kumari Chandalini were fortunately convicted, and sentenced to imprisonment for seven years each. The Judge remarked, before passing sentence, that he had already called attention to the need women have for protection in the district, but this remark referred evidently to observations made by him in a previous case, when the accused were also convicted for an outrage on a young woman; and in both cases the remarks were intended by him to explain the severity of the sentences passed. The Judge has not addressed the Government as to the necessity for special measures for the protection of women in Mymensingh. Such measures have, however, been taken by the Magistrate's orders on the occasion of the Ashtami bathing festival, and the Commissioner has been instructed to renew them annually so long as necessity for them appears to exist. As regards isolated outrages on women which might occur anywhere and at any time during the year, it is impossible to take special measures. It may be hoped that the severe punishments which have been inflicted in Kumari Chandalini's and the previous case will have a salutary effect in deterring the bad characters who are disposed to this kind of crime. The Lieutenant-Governor has also directed that the most experienced and reliable police officers available should always be deputed to investigate these cases whenever they occur, and the District Superintendent of Police has been instructed to give his special attention to the cases.

"The Magistrate reports that these offences are usually committed by low class Muhammadan loafers of loose character, who, under Act X of 1872, could have been dealt with under section 505 as persons of notoriously bad livelihood or dangerous character, but who cannot be reached under section 110 of the present Criminal Procedure Code."

SERIOUS ALLEGATIONS AGAINST MR. AINSLIE.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Has the attention of the Government been drawn to some paragraphs published in the *Hitabadi* newspaper of the 5th June, in which some serious allegations are made against Mr. Ainslie, the Subdivisional Officer of Govindpur? Is it the case that Mr. Ainslie harassed witnesses and parties by causing them to follow him from camp to camp and by holding *cutcheries* in the mufassal, but not always in the places notified? Is it true that he struck off from his file seven out of nine cases on the 11th May last, three out of six cases on the 12th, and four out of eight cases on the 15th, the parties not having been able to find out his camp and attend in time and committed several other irregularities referred to in the same paper? If so, will the Government take any steps to prevent a recurrence of similar proceedings in future?

The Hon'ble MR. RISLEY replied:—

"The attention of the Government was drawn to the paragraphs referred to, and the Commissioner was requested to issue instructions to Mr. Ainslie to

make better arrangements for the convenience of parties in future. This has been done, and the Lieutenant-Governor trusts that similar cause for complaint will not recur. The figures in the paragraphs in question are generally, though not uniformly correct."

MR. MORSHEAD'S CASE.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

(1) Whether it is true, as stated in the newspapers, that Mr. Morshead, Deputy Commissioner of Purulia, directed Babu Upendra Chandra Mookerjee, a Deputy Magistrate, at the instance of the District Superintendent of Police, to withdraw an order for bail issued by the said Deputy Magistrate in respect of some persons charged with an offence under section 392, I. P. C., and that in consequence the order was withdrawn and the prisoners were remanded to jail, where they remained from the 9th June to the 1st July, when they were ordered to be released after a full investigation by the said Deputy Magistrate?

(2) Is it the case that the Deputy Commissioner, in the order directing the withdrawal of the bail-bond, laid down the dictum that "when accused persons are sent up in A Form (by the Police) there are *primâ facie* grounds for believing that they have been guilty of the offence of which they are accused"?

Does the Government approve of this interference on the part of an Executive Officer with the judicial discretion of a Magistrate subordinate to him? Will the Government be pleased to take such steps as to the Government may seem fit with a view to prevent the recurrence of proceedings such as these on part of Executive Officers?

In the absence of the Hon'ble MR. A. M. BOSE, who came late, the Hon'ble BABU SURENDRANATH BANERJEE asked—

(*a*) Has the attention of the Government been called to the facts and the papers marginally given of a case at Purulia, which have been published in the *Amrita Bazar Patrika* of the 7th July, and in which, under the orders of the Deputy Commissioner, an order passed by the trying Deputy Magistrate admitting the accused persons to bail was cancelled and they were sent to *hajut?* Are the proceedings correctly given in the *Patrika?*

(*b*) Under what provision of any existing law did the Deputy Commissioner interfere with an order passed judicially by the Deputy Magistrate, and direct him to commit the accused to custody; and under what provision did the District Superintendent of Police appeal to the former against the order of the Deputy Magistrate? Is it not the fact that, under the law, the High Court alone could interfere with that order? Does the Government approve of such interference by District Officers? If not, will it be graciously pleased to take steps which may lead to its prevention?

THE PURULIA PAPERS.

ORDER SHEET.

District Manbhum.

In the Court of Babu U. C. Mukerjee, Deputy Magistrate.

No. 111 OF 1896.

Kharakri of Jobla, thana Silli, district Lohardaga, *versus* (1) Sonaram Mura, (2) Panroo Mura of Gundhudi, pargana Bagnundi, (3) Naboo Dom of Uhatoo, pargana Jhalda.

Section 392, Indian Penal Code.

The 9th June, 1896.—The Court was occupied from 8 A.M. to 11-20 A M. with the rioting case. No time to-day, and the file is full to-morrow. Case remanded till the 19th instant.

U. C. M.

Recognizance of Rs. 20 each from the witnesses. Accused may be enlarged on good bail of Rs. 200 each.

U. C. M.

The 9th June, 1896.—Under orders of the Deputy Commissioner, the order of bail is recalled and accused are committed to custody.

U. C. M.

URGENT.

DEPUTY COMMISSIONER—

In this case Deputy Magistrate, Upendra Chandra Mukerjee, has let out three men on bail in a special report case without first going into the evidence, though the witnesses for prosecution were present.

According to section 497, Criminal Procedure Code, the Deputy Magistrate should have first, I think, gone partly into the case and then given bail, if he considered the evidence against the accused weak or insufficient.

2. The men standing bails are mukhtears, and the man marked thus is said to be unfit to go bail. Necessary orders solicited.

C. B.

The 9th June, 1896.

BABU U. C. MUKERJEE—

Please report and return by bearer.

L. F. M.

The Explanation of the Deputy Magistrate.

I could not go into the evidence of this case, as I was very fully occupied with a rioting case in which six witnesses were cross-examined in great length by vakils engaged in the case. It is humbly submitted that it is illegal to send accused to *hajat* without satisfying one's self that there is anything like a case against them. I therefore allowed them to be released on bail.

I should note that when the Police first sent the accused to have their confessions recorded by the Senior Deputy Magistrate a few days ago, they made no confessions or incriminating statements of any sort, and on the express ground that the Police failed to send any evidence to justify their being put into *hajat*, that this Court ordered the accused to be released on bail. When the A Form was sent I thought it would be fair to examine the witnesses at the trial in the regular way. If the accused have offered any security who is unfit to stand bail, the matter should be reported to me in the usual way. My order on the record was that the accused should give good bail.

UPENDRA CHANDER MUKERJEE.

The 9th June, 1896.

DEPUTY MAGISTRATE—

It is a question of the interpretation of section 497, Criminal Procedure Code. When accused persons are sent up in an A Form there are *primâ facie* grounds for believing that they have been guilty of the offence of which they are accused, otherwise they would not have been sent up. They should not be released on bail; therefore until it appears that such reasonable grounds do not as a matter of fact exist, you are requested to recall the bail and commit accused to custody.

L. F. MORSHEAD,
Offg. Deputy Commissioner.

The 9th June, 1896.

(*c*) Is it the fact that after the order referred to by the Deputy Commissioner the accused were taken to jail and kept there for several weeks until on the case for the prosecution alone, and at its close, they were released from custody on bail and afterwards acquitted? Was the order committing them to jail passed in their presence?

(*d*) Does the Government approve of the general proposition which appears to have been laid down by the Deputy Commissioner and which would seriously affect the liberty of the subject, viz., that whenever an accused is sent up by the Police under any of the numerous sections relating to offences of a non-bailable character, it must be held that there are *primâ facie* grounds for believing that he is guilty of the offence charged, and he should not be released on bail until the contrary is made out? Is it the fact that statements before the Police may be and are made behind the back of the accused, and he has no means of testing them at the time? Is the Government aware that, altogether apart from any question as to the credit or capacity of any section of the Police, sometimes on the facts deposed to before the Police alone, no offence under the law is established at the hearing against the accused?

The Hon'ble Mr. RISLEY replied:—

"One reply may be conveniently given to the separate questions asked by the Hon'ble Babu Surendranath Banerjee and Hon'ble Mr. A. M. Bose.

"These are the facts of the case.—Three men arrested by the Police on a charge of robbery (section 392, Indian Penal Code) were sent before Babu Atal Bihari Moitra, the Senior Deputy Magistrate at Purulia, on the 4th June, 1896, to have their confessions recorded. They did not, however, confess, and no evidence having been sent with them, the Deputy Magistrate allowed bail in the sum of Rs. 400 each. On their failure to furnish bail they were kept in custody. On the 6th an A Form, sending up the accused for trial, was submitted by the Police, and the Deputy Magistrate passed an order that the men should be kept in custody until the 9th. This rescinded the previous order granting bail. On the 9th the Deputy Magistrate made the case over for trial to Babu Upendra Chunder Mukerjea, another Deputy Magistrate. The latter, without recording any evidence, though the witnesses for the prosecution were present, very improperly postponed the case to the 19th June, on the ground that he had no time, although he might easily have taken up the case in the afternoon of the 9th, as his other case work only occupied him up to 11-20 A.M. He ordered at the same time that the accused might be enlarged on bail of Rs. 200 each. The District Superintendent of Police brought the order to the notice of the Deputy Commissioner, and the Deputy Commissioner, being of opinion that bail should not have been allowed, since the Deputy Magistrate having taken none of the evidence which was ready

uld not assume that there were no reasonable grounds for the serious arge against the accused, requested the Deputy Magistrate to recall the il and commit the accused to custody. The bail was accordingly t allowed, and the accused remained in custody. On the 19th the Deputy agistrate took up the case and examined some witnesses, and rejected an plication then made to him for bail, wishing to hear further evidence. The aring was postponed to the 27th, and thence to the 29th, for want of time: d on the latter date a charge was framed against the accused under section 392, dian Penal Code. There were then further adjournments to the 30th June, d the 1st, 2nd, and 3rd July, and finally, on the last date, the accused were quitted; no witnesses for the defence having been examined, and only one of e witnesses for the prosecution having been cross-examined after the drawing of the charge.

"There is no doubt that Mr. Morshead was technically wrong in the order ich he passed requesting the Deputy Magistrate to recall the bail. The istake was, however, made in good faith, through misapprehension as to his dicial authority. The Deputy Magistrate's order allowing bail, with which interfered, appears, moreover, to have been wrong. The Deputy Magis- ate should not have passed that order without first satisfying himself that ere was some doubt as to the truth of the charge. He actually refused bail the 19th June after hearing some of the witnesses, and he also drew up a arge against the accused, thus showing that he considered a *primâ facie* se to have been made out against them. It would appear that he allowed il on the 9th merely because he had decided to postpone the case for days, and not because he then entertained doubt as to the guilt of the cused.

"With regard to the third part of the Hon'ble Babu Surendranath Banerjee's estion, the Lieutenant-Governor is satisfied that Mr. Morshead acted not ecutively, but on what he conceived to be his judicial authority. The istake was made *bonâ fide* by an individual officer, and His Honour considers at no necessity exists for such steps as the Hon'ble Member suggests.

"With regard to clause (*d*) of the Hon'ble Mr. A. M. Bose's question, the eutenant-Governor does not feel called upon to interpret authoritatively the ovisions of the Criminal Procedure Code, which both Magistrates and Police e required to follow, and which are sufficiently clear for their guidance."

COOLIE-RECRUITING.

In the absence of the Hon'ble MR. A. M. BOSE, who came late, the Hon'ble BU SURENDRANATH BANERJEE asked—

Has the attention of the Government been drawn to the many cases orted in the *Bankura Darpan* and several other papers, showing the gross evils ulting from the present system of coolie-recruiting for the labour districts?

Has the attention of the Government been drawn to the following remarks this subject of coolie-recruiting, reported to have been made by Sir Steuart yley, late Lieutenant-Governor of Bengal, at a meeting held in London on e 14th of May last:—

"Systematic recourse to fraudulent recruiting and even to kidnapping became common—ficiently common to be felt as a discredit to the Administration" (*vide Statesman* of 1st ly)?

And also to the following remarks reported to have been made at the same eeting by Sir Charles Elliott, late Lieutenant-Governor of these Provinces:—

"The great evil which had arisen with regard to the competition for labourers had sen from the immense number of different persons who were competing against each er, deceiving each other, stealing each other's coolies, kidnapping women and children, enticing them by false pretences, and even using force and wrongful confinement, so that y constantly figured in the Police Courts." (*Statesman* of 1st July.)

What steps does the Government propose to take on behalf of a most helpless and ignorant class of its subjects, both women and children, to put a stop to the sad abuses referred to in the above extracts?

The Hon'ble MR. FINUCANE replied:—

"The special attention of Government has for some time been directed to the whole system of coolie-recruiting for the labour districts. The subject is still under consideration of Government."

LABOUR COMMISSION'S REPORT.

In the absence of the Hon'ble MR. A. M. BOSE, who came late, the Hon'ble BABU SURENDRANATH BANERJEE asked—

Has the work of the Labour Commission been finished? When is its report expected to be published?

The Hon'ble MR. FINUCANE replied:—

"The report of the Labour Commission has been lately received, and been sent to the Chamber of Commerce, the Mining Association, the Tea Association, and other authorities for their remarks. It cannot be stated exactly when the report will be disposed of, but copies are available for purchase at the Secretariat Press, and are now being forwarded to the principal newspapers for information."

BENGAL MUNICIPAL ACT, 1884, AMENDMENT BILL.

The Hon'ble MR. RISLEY moved that the consideration of the Bill to further amend the Bengal Municipal Act, 1884, be resumed.

The Motion was put and agreed to.

The Hon'ble BABU GURU PROSHAD SEN said:—"Before proceeding to move the first amendment which stands in my name, I should like to know, through the Hon'ble Member who represents the Local Government in relation to this Bill, whether the large class of carters, who have enjoyed the privilege of voting during the last twelve years, will, with the present definition of the word 'rates' in its most restricted sense, still have that privilege, that is to say, whether, the rules will confer the franchise on this large body of men. I may add that section 15 now gives the Government power to deal with such cases, even if they do not fall under the provisoes of that section under the explanation added to it."

The Hon'ble MR. RISLEY said:—"I understand the Hon'ble Member's intention is to offer to withdraw the amendment, of which he has given notice. As he has so gracefully retired from the uncompromising position he took up the other day, and is content to leave the matter to the discretion of Government, I am glad to be able to say that I have not the slightest hesitation in giving the assurance which my hon'ble friend wants, namely, that there is no intention of withdrawing the franchise which this body of men have had ever since the year 1886. Any action intended to restrict the franchise in any direction will only be undertaken on the strongest representation from a Municipality itself."

The Hon'ble BABU GURU PROSHAD SEN in reply said:—"Having received this assurance, I have much pleasure in withdrawing the amendment. I could not have advanced the cause any further by pressing for my amendment than what I have got from the assurance which has now been given."

The Motion that sub-section (*2*) of section 3 of the Bill be omitted was then, by leave of the Council, withdrawn.

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR moved that in section 6, clause (*v*) the words "and libraries" be inserted between the words "schools" and "either."

He said:—"The Bill recognises the principle that a certain portion of the municipal fund may be devoted to the establishment and maintenance of schools, either wholly or by means of grants-in-aid, and it follows as a corollary that a portion of the municipal funds may also be spent on the establishment and maintenance of libraries. Libraries are schools where boys and grown-up men may alike take instruction. They are in one sense hospitals in which those who are diseased in mind and body are ministered to by a class of superior doctors, who do not claim their fees. I find that provision has been made in the Calcutta Municipal Act to legalise the expenditure of a certain sum of money upon the maintenance of 'free libraries,' and there is a similar provision in the Bombay Municipal Act (VI of 1873). It is not with the object of incorporating into the Bengal Municipal Act provisions which are found in the Calcutta Municipal Act and the Bombay Municipal Act, that I press this amendment for the consideration of Hon'ble Members, but because the want of libraries has been sadly felt in mufussal Municipalities. I am personally aware that in Hooghly there is a library established by the munificence of the local zamindars for the use of the public, some thirty years ago, and there are still funds amounting to about Rs. 3,000 in the hands of the Collector of Hooghly, who is the trustee of that library. This library had its subscribers, but they have ceased to pay, and the library is now shut up, as it now receives no support at all from any quarter. With the extension of education and a consequent increase in the number of educated rate-payers, such a provision has become absolutely necessary, and I hope the Council will see its way to accept the amendment."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"The Council will be pleased to observe that this amendment refers to clause (*v*) of section 69, and is not comprised within the group of clauses to which the proviso relates. This amendment ought not to be accepted. Libraries have all the advantages claimed for them in the eloquent and figurative language employed by the Hon'ble Mover of the amendment. Sir John Lubbock in his book, 'The Pleasures of Life,' says: 'Comfort and consolation, refreshment and happiness, may indeed be found in his library by any one who shall bring the golden key that unlocks its silent door. A library is true fairyland, a very palace of delight, a haven of repose from the storms and troubles of the world. Rich and poor can enjoy it equally, for here at least wealth gives no advantage. We may make a library, if we do but rightly use it, a true paradise on earth, a Garden of Eden without its one drawback; for all is open to us, including and especially the fruit of the tree of knowledge, for which we are told that our first mother sacrified all the pleasures of Paradise. Here we may read the most important histories, the most exciting volumes of travels and adventures, the most interesting stories, the most beautiful poems; we may meet the most eminent statesmen, poets and philosophers, benefit by the ideas of the greatest thinkers, and enjoy the grandest creations of human genius. (See page 63, the 'English Citizen: his Life and Duties,' by Charles Henry Wyatt.)

"But although the advantages of a library have been set out in such glowing terms, still it is questionable whether the funds of the Municipalities should be diverted in the manner proposed by the Hon'ble Mover of the amendment to the establishment and maintenance of libraries in the mufassal. The resources and wealth of the Municipalities are pretty well known; so also their immediate wants requiring immediate attention. I do not think libraries in the mufassal are matters of such necessity that municipal funds must be devoted to them. I am not therefore prepared to vote in favour of the amendment."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am not in agreement with the Hon'ble Member who has just spoken. We have been treated to some poetical effusions from a distinguished writer, notwithstanding that our work here is of the most prosaic order. The question is not whether the provision now under consideration should be made a compulsory obligation on the part of Municipalities, but whether power should be given to Municipalities

which they may exercise in their discretion for the promotion of the interests of education in general. My hon'ble friend's amendment is in entire accord with the accepted principles of the municipal law. In section 6 of the Bill we have a statement of the objects to which the municipal fund may be applied; Municipalites may devote their funds to the establishment and maintenance of schools, hospitals, dispensaries, and a variety of other purposes; and, if my hon'ble friend's amendment be accepted, municipal funds may also be devoted to the establishment and maintenance of libraries. And then, as a matter of fact, we, in the Calcutta Corporation, make a grant of Rs. 4,000 a year as a contribution towards the maintenance of the Calcutta Public Library as a free library, and I submit that mufassal Municipalities ought to have a similar power conferred upon them. The principle is admitted that Municipal funds may be devoted to educational purposes, and the enlargement of the power now proposed would involve only a slight amplification of this principle. I hope the Hon'ble Member in charge of the Bill will see his way to accept this amendment."

The Hon'ble MR. PRATT said:—"I regret I cannot agree to this amendment. It seems to me that in mufassal Municipalities, where the proportion of highly educated people is comparatively small, a library will be a luxury enjoyed by a very small portion of the community. The books in these libraries will be almost entirely in English, which probably not 5 per cent. of the population will read. I do not think it fair to compare mufassal Municipalities with Calcutta, where we have a very large proportion of the community highly educated, and in this respect I think a distinction should be made between the Calcutta Municipal Act and the Bill now before the Council."

The Hon'ble MR. GRIMLEY said:—"The amendment regarding 'libraries' will doubtless commend itself to many, though it might conveniently have been brought forward at a much earlier stage of this Bill, so as to have permitted of local opinion being obtained, and of its being considered by the Select Committee. The proper place, however, for it would be among clauses 8 to 11; for a library, as the HON'BLE MR. PRATT has said, is undoubtedly a luxury which should not be permitted or indulged in until all ordinary expenditure has been provided. A library must be free, and it may be necessary to impose a library rate, for there is the question of maintenance to be considered. In most mufassal stations there is a library for Europeans, and I feel no doubt that if free municipal libraries were started, the committees of many of these European libraries would be able to present many of their superfluous books to it, and gifts might also be expected from persons leaving a station on transfer. The idea of municipal libraries is one to be encouraged. If, then, the sense of this meeting is in favour of the proposal, I would suggest that the following words be placed either after clause (xi) or before clause (viii)—'the establishment and maintenance of public libraries.'"

The Hon'ble MR. RISLEY said:—"I fully accept the principle upon which the establishment and maintenance of free libraries is permitted in the Calcutta Municipality, namely, that in questions of this kind we should give full discretion to the Corporation. Unfortunately in this particular case the proposal has been brought forward so late in the day that we have not been able to obtain any expression of opinion from the Municipalities which are concerned. I think that theoretically the matter may be taken as an open one. I regret I cannot altogether agree with my hon'ble friend Mr. Pratt, or my hon'ble friend on my left (Maulvi Muhammad Yusuf) that a library is merely a luxury. I know that in the stations of Gaya and Rangpur the people were much benefited by the establishment of libraries which were the gifts made by certain Judges on their retirement, and that they were much resorted to, and I should not be at all surprised to find that the Municipalities of those stations did contribute towards the support of those institutions. But it is quite clear that the interpretation which the Hon'ble Mover of the amendment attempted to put upon the section is not tenable. You cannot say that libraries are either schools or hospitals. It is also equally clear that any library which may be

established or contributed to, must be a free library which is a distinct omission in the terms of the amendment, and I do not know that it would not be well to consider the provisions of the English Libraries Act which restricts the contribution by the local authority to a penny in the pound, or one two-hundred-and-fortieth part of the annual income, or say about a pie in the rupee. Whether some limitation of this kind should not be attached to the provision is a matter for consideration; but I am perfectly sure that if the amendment is accepted, it should come after clause (xi), so that it may be included among the forms of expenditure, which should only be undertaken after all the other forms of expenditure which are mentioned have been met and disposed of. Subject to that condition, I am prepared to vote for the amendment as a provision of the same category as those specified in clauses (viii) to (xi). The question is entirely an open one for the Council to determine."

The Hon'ble the PRESIDENT said:—"I think that this amendment ought to be allowed. I consider that the range of subjects over which this section 6 travels is so large, and embraces so many useful purposes, that I cannot for a moment conceive why this very useful purpose, the establishment and maintenance of libraries, should not also be included. A man's education does not end when he leaves school; he begins then to mature what he has learned before, and a library is very necessary for that purpose; and taking the proposal in connection with the establishment and maintenance of schools for which provision is made in the Bill, I cannot conceive a more useful purpose. But whether this provision should be inserted where it is proposed by the Hon'ble Mover of the amendment, as an addition to clause (v), or where the Hon'ble Mr. Grimley suggests it should come, is for the Hon'ble Member in charge of the Bill to consider."

The Hon'ble MR. RISLEY, by way of amendment, moved that the following new clause be inserted after clause (xi), in section 6:—

"(xii) the establishment and maintenance of free libraries;"

Also that the remaining clauses of the new section 69 (*1*) be re-numbered accordingly, and that in the proviso to the same section for "xi" the figures "xii" be read.

These amendments were put to the vote and agreed to, and the original motion of the Hon'ble Rai Eshan Chundra Mittra Bahadur was withdrawn.

The Hon'ble BABU GURU PROSHAD SEN moved that in section 6, clause (*viii*), the words "and of veterinary practitioners" be omitted, that is to say, that the training and employment of veterinary practitioners be not included as one of the objects upon which municipal funds may be expended.

He said:—"There is no doubt that the object aimed at by these clauses of the Bill are very desirable ones. But the question is whether the scanty revenue of our Municipalities should be devoted to the purpose. I submit in reference to this amendment, and also with reference to other amendments standing in my name on this subject, in regard to which I shall not separately address the Council, that they are very desirable objects no doubt, but the question with reference to all of them also is whether municipal funds should be applied to these purposes. Instead of giving you my opinion upon the matter, I shall simply put before you certain opinions given by public Associations and other bodies and persons. The Calcutta Trades' Association, of which we find an hon'ble representative here, say:—

'The Bill further proposes to empower municipalities to spend money on the improvement of the breed of horses, cattle and asses, and on the breeding of mules.' The Committee submit that these are purely agricultural objects, which do not come within the scope of municipal enactment, and on which, therefore, municipal funds should not, in their opinion, be employed. Indeed, the committee consider it would be unwise to divert any portion of the scanty revenues of municipalities to objects other than those for which they are intended, such as the provision of a water-supply, the repair of roads, the improvement of sanitation,

etc. If experiments for the breeding of mules and the improvement of draft cattle are necessary, the committee submit that the same should be conducted by, and at the expense of, the State alone. As to the probability of such experiments proving *a source of profit to the Commissioners*, the committee of the Association doubt the expediency of allowing a township to embark on schemes for the improvement of cattle and the breeding of mules, on the chance of obtaining a profit. There is in this an element of speculation which the committee feel should not be introduced amongst municipal objects.'

"The Indigo Planters' Association say :—

'It seems very improbable that natives will take advantage of any veterinary staff or hospital for the treatment of cattle or horses. There is at present a competent establishment in Muzaffarpur under charge of persons who have passed through the Lahore Veterinary College; but it receives little or no encouragement or support from the zemindars or people generally. It is believed that horses cannot be bred with success on this, the (north) side of the Ganges, and the attempt at mule-breeding, made under Government auspices some years ago, was a conspicuous failure.'

"The Eurasian and Anglo-Indian Association say :—

'The Association, however, are inclined to question whether it would be good policy, and whether any practical benefit would result, if breeding establishments for cattle and horses or for mules were directly established and maintained by municipalities. It is doubted whether municipal bodies are fitted for the management of such enterprises, which, to be economically and efficiently worked, must be conducted by owners under the stimulus of personal interest, and which under paid agency are likely to be costly failures, as even the Government stud department has proved.'

"The Bengal National Chamber of Commerce say :—

'The Committee cannot refrain from observing that municipal funds, specially intended as they are for purposes of sanitation and conservancy and other purposes of a cognate nature, and which are hardly sufficient for satisfying their requirements, cannot legitimately be devoted to objects specified in the second paragraph of the letter under reply, the costs of which, vast as their scope is, should, the Committee respectfully submit, be borne from the Provincial funds.'

"The British Indian Association has something to say to the same effect:—

'Considering that the resources at the disposal of Municipal Commissioners are limited, and that the number and character of works on which the municipal fund may be spent are diverse, it is desirable that, except in the matter of works of primary importance, they should be given full and free scope in the selection of works. The training and employment of medical and veterinary practitioners and the establishment of dispensaries for the treatment of animals—in short, all the new clauses added to section 69 should be left entirely to their discretion. They should be also left unfettered as to the system of training and treatment, for it is still a moot question whether the native system of treatment of domestic cattle is not superior to any foreign system.'

"The Bhagalpur Landholders' Association say :—

'As regards section 5, the new provisions occur in clauses (6), (8), (9) and (10) of sub-section 1 to section 69 and in sub-section 3. There is not much objection to the provisions contained in clause (6). The establishment and maintenance of veterinary dispensaries at the cost of the municipality is not required, and is not desirable at present. The treatment of horses and other animals, however desirable, is not of such urgency as improvements in other directions. The municipal fund should not be applied for the above purpose unless it can be spared after adequate provision has been made for more legitimate purposes. There are municipalities where roads are in a wretched condition, and conservancy and latrine arrangements are very unsatisfactory, and yet the municipal fund is diverted to pet projects, and the same may be done if discretionary power be vested in the Municipal Commissioners under these new provisions. As regards clause (10), the objection would apply very forcibly. It is not the business of municipalities to embark in trade. It is not desirable to burden them with the work of improvement of the breed of horses, cattle and asses and the breeding of mules. There will be a danger of the municipal fund being appropriated to this purpose at the sacrifice of improvements of a more legitimate character affecting the health, comfort and well-being of the townspeople. A small expenditure will be inadequate for the purposes referred to in clauses (6), (8), (9) and (10), and if the expenditure be large, it would affect the other purposes to which the municipal fund can be applied. Novelty is more attractive, and a Municipal Chairman and Municipal Commissioners, for the sake of introducing a new

thing, would not be unwilling to incur expenditure, for the purposes referred to in the aforesaid clauses, to the sacrifice of other necessary purposes. The matter should be considered from a practical and not from a theoretical point of view. The argument that the appropriation of the municipal fund to the purposes mentioned in the new provisions will be entirely in the discretion of the Commissioners may be good in theory, but in practice the discretion is not always judiciously exercised. The power should not be given unless it be required, and my Association are of opinion that the power to apply the municipal fund to the purposes specified in clauses (8) and (10) is not required. My Association would further suggest that the training of medical and veterinary practitioners should be restricted to such of them as would practise within the limits of the municipality defraying the cost of the training, so that it may reap the benefit of the cost incurred. Why should a person trained at the cost of a particular municipality be free to practise anywhere he may choose, and not be bound to practise in the municipality which met the cost of his training?'

"To these opinions may be added the opinions of some officials. I shall not trouble the Council by reading all the opinions in favour of my amendment, but I shall call attention to the opinions of Mr. Westmacott, Commissioner of the Presidency Division, Mr. Bourdillon, Commissioner of Patna, and Mr. Dutt, Commissioner of Orissa.

"Mr. Westmacott says:—

'*Training of veterinary practitioners, veterinary hospitals and dispensaries, appointment and payment of veterinary practitioners.*—I do not think that municipal funds should be spent on these objects until there is a public demand for it. At present, I believe, any veterinary hospital would remain empty, and any veterinary practitioner would remain idle, so far as native owners of cattle are concerned. Such a legal provision as is proposed might do no harm so long as Municipal Commissioners are unable to spend money on these objects without the sanction of the Commissioner of the Division, but I do not think the provision, even when permissive, is at all required by the people. A few fussy amateurs might get up an agitation on the subject; but so long as the public do not want the expenditure, I see no use in making it permissive.'

"Mr. Bourdillon says:—

'As regards section 5, my personal opinion is that the improvement of the breed of horses, cattle, and asses and the breeding of mules are not objects on which the money of the rate-payers should be expended. Besides the fact that the rate-payers will derive little if any, benefit from them, there remains the consideration that these operations to be successful must be carried on by a specially trained staff, and that they require constant attention, are expensive, and as far as the experience of Government goes, doomed to failure. For all these reasons, I should be unwilling to see any municipality given the opportunity of spending public money on such schemes.'

"Mr. Dutt says:—

'Mr. Bell's opinion is quoted below:—

'He says:—While fully realising the importance of endeavouring to improve agriculture in these as in many other ways, I think that such an object should not be delegated to municipalities, but should be kept under the direct control of the central Government of the Province. The improvement of agriculture is a public function which, specially in a country like India, concerns all, and that alone is a weighty reason for entrusting it to a central Government.

'I think there is considerable force in what Mr. Bell says. It appears to me that *the training and employment of medical and veterinary practitioners* is an object in which residents outside municipalities have a larger interest than those in towns, and I scarcely think such institutions should be supported from municipal contributions, unaided by contributions from other sources, and the same remark applies to the establishment and maintenance of veterinary dispensaries, the appointment and payment of qualified persons to treat animals and the improvement of the breed of horses, cattle, &c.

'The resources of mufassal municipalities are also exceedingly poor, and are not fully adequate in any large town that I know of in Bengal to provide for necessary sanitary improvement and the provision of water-supply.'

"It will probably be said that there are the opinions of the Chairmen of a number of municipalities in favour of the provision in the Bill, but looking to those opinions, we find that most of them say:—'We are poor; the provisions do not affect us; but we don't see any objection to the provision applying to Municipalities which can afford to spend money over them;' if not, like the opinion of a Deputy Commissioner, who says 'I am very busy, have

no time for this, but I approve, I submit that the body of weighty opinions which I have quoted should not be disregarded. The only thing that will be said is that the expenditure is permissive. The legislature simply enables—it does not compel. True, but let me remind you of what Mr. Westmacott says:—'A few fussy amateurs might get up an agitation on the subject.' Let me then tell you what the Bhagalpur Landholders' Association say:—'Novelty is very attractive, and a Municipal Chairman and Municipal Commissioners, for the sake of introducing a new thing, would not be unwilling to incur expenditure for the purposes referred to in the aforesaid clauses, to the sacrifice of other necessary purposes.' While on this point I shall give you a concrete case. The other day I asked a question in this Council about the expenditure by a certain Municipality of Rs. 37,000 for the acquisition of certain land."

[The Hon'ble MR. RISLEY—I submit this is not relevant.]

[The Hon'ble the PRESIDENT—It is by way of illustration, and is not out of order.]

The Hon'ble BABU GURU PROSHAD SEN, continuing, said:—"I am simply illustrating my point. The acquisition of land was for the purposes of the Sonepur fair. On turning to the law, you will find that there is nothing in the law to justify the expenditure of money for such a purpose, and if in that instance money could be expended beyond the sanction of the law, what would there be to prevent it being done in regard to the matter now under discussion. Again, the subject of deterioration of cattle in this country attracted attention long ago. In 1871 there was a Commission, and an elaborate report was drawn up, after a searching enquiry. The Commission determined the causes and pointed out remedies. It is only the Imperial Legislature which can, to some extent, grapple with the causes, and it is the Imperial exchequer which alone can supply sufficient funds for carrying out the remedies. We have waited these twenty-five years without taking any initiative whatever, excepting, perhaps, the formation of a veterinary school at Belgachia two or three years ago, and now it appears to me somewhat odd that the first experiments regarding this matter should commence with local funds. It is not fair, I submit, that to carry out the suggestions of that commission or to try experiments, money should be spent from local funds. The subject is one of Imperial interest or at least of Provincial concern. We here in Bengal entertain a costly establishment under a Director of Land Records and Agriculture. To outsiders it appears from the work turned out that this Department is dying of inanition. The proper course possibly would be to give it work, and work for which at least the Provincial funds should be available. But certainly I am sure that the money for these purposes should not come out of municipal funds. Look at the state of those funds. You have in all about 22 lakhs raised by 146 Municipalities; under municipal administration, you have 2½ million inhabitants, but the municipal revenues are not contributed by all these people, but by a small knot of rate-payers whose number does not exceed 450,000, *i.e.*, about one-sixth of the population under municipal administration. Why then should the Municipal funds be charged with the additional duty of looking after animals with which they have no concern when they have not only themselves, who supply the rates, but five-sixths of their fellowmen, who do not pay the rates to look to? With these remarks, I ask the Council to support my amendment."

The Hon'ble MR. RISLEY said:—"The Council has nothing to do with the question whether veterinary medicine and surgery are or are not wanted in India. That point has been settled long ago by authority. The Cattle Plague Commission in 1870, Dr. Voelcker in 1892, and Dr. Fleming in his various writings had said the last word on the subject. Their conclusion is that enormous numbers of cattle and horses die every year from preventable causes, and Dr. Fleming, the leading expert on the subject,—an expert with special Indian experience—estimated the yearly loss on this account, the yearly diminution of the wealth of

the country, at nine millions sterling. If anyone is rash enough to attempt to go behind this mass of evidence, all I can say is that that person will have a very long day's work. By the time he has read the literature he will probably have learned enough to qualify him to agree with the experts. If he has not, his opinion may be neglected. The real question before the Council is—Can Municipalities, and local bodies generally, properly be empowered to contribute to veterinary schemes? This is only a part of the larger question of which much has been heard in Europe and is likely to be heard in this country—What is the proper division of functions between the Central Government and the organs of Local Government? Much has been written on this subject of late years, and all writers of whatever school and whatever nation, agree that the principle of general and particular interest governs the division—what affects the whole society is done by the Central Government; what is specially needed by a locality or minor division is usually done by the latter. All who have touched the subject, whether practical politicians like Mr. Goschen, or theoretical economists like those of the continental school, accept this principle, which, after all, is the plainest common sense. I ask that this principle be applied to what is proposed by the Government. It is to the general interest of the people of the Province that veterinary practitioners, like medical practitioners, should be properly trained, so that they may cure and not kill. Therefore Government started, as it has done here, and as other Governments have done in Bombay and Lahore, Veterinary Colleges. These Colleges further serve the interest of the society generally by opening respectable and lucrative careers to educated young men of the over-crowded middle classes. The conversion of the existing school here into a college, and the raising of the scales of pay will greatly improve the prospects of the men who take up this line It is also to the interests of Society generally that veterinary practitioners and veterinary institutions should be subject to inspection and control. For this reason the Government provides an inspecting and controlling staff. As to the practical working of the scheme, the Hon'ble Mr. Finucane is better acquainted than I am with the administrative details, but I understand the general idea is to place before the local bodies of a certain number of districts a scheme for a veterinary dispensary with a suitable staff, and to invite them to accept it. Something may at the same time be done for the interior of districts by opening dispensaries, or appointing Veterinary Assistants in large Government or Wards' estates. In all dispensaries some income might be secured by charging fees on a reasonable scale, to be approved by local bodies and Commissioners of Divisions, for the treatment of horses and cattle belonging to well-to-do individuals or companies. A scheme thus framed is precisely in accordance with the principle which I have quoted. It puts upon local funds matters of particular interest—dispensaries which will serve a special area and so forth,—and it leaves matters of general interest to Provincial funds. Municipalities will, moreover, have another source of income to help them in the form of the fines realised under the Act of 1869 for the Prevention of Cruelty to Animals. During the five years ending 1894-95, receipts from that source increased in mufassal Municipalities from Rs. 5,000 to Rs. 28,000, and the Government of India have sanctioned the continuance of the existing arrangement for a further period of five years. This concession will, no doubt, be maintained as an inducement to Municipalities to interest themselves in veterinary undertakings.

"The Hon'ble Mover of the amendment has spoken to the whole case, and I will also deal with the whole matter. The Hon'ble Member has quoted certain 'opinions' on the matter. I will deal with those opinions in the order in which they have been quoted. As to the opinion of the Trades' Association, that Association makes, only with less authority, the same points as the Planters' Association does. The Association suggests that the assistance of Municipalities 'should be limited to the grant of scholarships.' But this is exactly what is meant by training, This and practically nothing more. The term could not be defined more closely. The opinion of the Planters' Association is an opinion which should carry some weight. It should be treated with respect, as the planters certainly know what they were talking about. But even the planters were not infallible. They argue from a single instance

of very recent date. The establishment at Muzaffarpur is only a year old. I should have liked to have heard a little more about it. It is possibly due to the fact that the institution is in charge of unsympathetic foreigners,—Punjabis—that it received so little support from local zemindars. Punjabis and Purbias, like oil and vinegar, cannot unite. They hate each other and cannot understand one another's language. Government has recognised this difficulty and has proposed to raise the status of the local veterinary school, and teach up to a higher standard, in order to avoid employing foreigners from Bombay or Lahore. As to horses there is little doubt that they cannot be bred successfully north of the Ganges, nor at Dacca, but surely they can south of the Ganges in Arrah. In regard to mules, where Government failed Municipalities might succeed. At any rate Municipalities will not attempt to breed them unless there is a fair prospect of remuneration. The Defence Association has no authority for their opinion. As for the Bengal National Chamber of Commerce, its opinion, taken as a whole, is that the proposed system will be to the advantage of Municipalities. Most of the Municipalities have declared in favour of the scheme. The Hon'ble Mover of the amendment has laid special stress upon the remarks of Mr. Bourdillon, the Commissioner of the Patna Division. It is true that Mr. Bourdillon says: 'Besides the fact that the rate-payers will derive little if any benefit from them, there remains the consideration that these operations to be successful must be carried on by a specially-trained staff, and that they require constant attention, are expensive and, as far as the experience of Government goes, doomed to failure.' Now, as to the benefit to be derived by the rate-payers; surely very many of them own cattle. In all Municipalities, in overgrown villages, even in real towns, cattle are kept under horribly unsuitable conditions. Take the case of Dacca, where four or five years ago there was a severe outbreak of cholera. Several cases were traceable to bad milk. If Dacca had kept a veterinary practitioner, he would have stirred up the Gowalas, if he did nothing else, and would have earned more than his pay in the saving of human life, let alone the cows. As to the necessary trained staff, Government has a college whence to supply them. Then as to the anticipated failure. The real cause of the failure of the Government Studs was that the establishments were worked on a very expensive scale, and the cost of a horse bred at one of these establishments was very high. Horses could be obtained cheaper from Australia. Where Government failed, private enterprise has everywhere succeeded. Then the fact is overlooked that Municipalities will not undertake breeding operations unless they are assured that they are likely to pay and can undertake the operations cheaply. Mr. Bourdillon then goes on to say that 'trained assistance should be available for the use of the rate-payers.' Of course it will be. They do it already in the case of medical practitioners. Municipalities will assuredly take excellent care that the people they train will work for them when their education has been completed. They can deal with them under any bye-laws they may frame. As far as I understand him, Mr. Bourdillon would not object to the section in its present form.

"One very interesting opinion has been received from Babu Umesh Chunder Ghosh, the Chairman of the Jessore Municipality. His concluding remark in his reply to the application for his opinion runs thus: 'The provisions for breeding and training of medical men may be made both in the Municipal Act and in the District Board Act.' This gentleman is evidently a very advanced person, and it would be interesting to know how he intends that his recommendation for the 'breeding and training of medical men' should be given effect to. It is a difficult enough job to train doctors, let alone breeding them. The Hon'ble Mover of the amendment has quoted the opinion of Mr. Westmacott, the Commissioner of the Presidency Division. It is pleasant to see how, in the necessities of debate, the lion and the lamb have lain down together. Mr. Westmacott, as is well known, is an authority on horses, but I am not aware that he is strong on cows. He, however, sees no harm in the measure 'so long as Municipal Commissioners are unable to spend money on these objects without the sanction of the Commissioner of the Division.' That of course they can in no case do. The opinion of Mr. R. C. Dutt, the Officiating Commissioner of the Orissa Division, is also, as a whole, in favour

of the section, under certain reservations. In regard to the purchase of a plot of land at Sonepur, an unfair attempt has been made to prejudice those who have brought it about. What is the use of Local Self-Government if local bodies are not to be trusted to some extent? The Sonepur District Board proposed the purchase, and the expenditure was perfectly legal. Before the purchase was completed, the local Government declined at first to give sanction, but said that if the District Board pressed the point and showed good cause, the necessary sanction would be given. They did show cause, and Sir Charles Elliott accorded his sanction to the arrangement. This was done in the interests of sanitation and for the better regulation of a great fair, and it is well known that Sonepur during its annual great fair is the centre of cholera.

"I have also to say that the scheme on which the Municipalities have recorded their opinions is distinctly less favourable to them than the scheme as it now stands. The former said nothing about the combination of all the local bodies in a district, an arrangement which obviously lightens the burden of any particular Municipality. Nevertheless 102 Municipalities are for, and only 7 are against, it. Had they had before them the scheme as it now stands, I have little doubt that the opinion would have been unanimous. Anyhow I have stated the facts. A definite proposal has been put before the local authorities, and all but an insignificant minority have accepted it. What happens next? The professed advocates of Local Self-Government turn round and laboriously discredit the action of local authorities whom they themselves represent. I confess I do not understand the position. If the Council cannot trust the elective Municipalities to know their own minds, how can these bodies be trusted to do anything—to elect a member of Council for example. What is the good of them? That is not what I say, but what the supposed friends of Local Self-Government have been saying this day. But people must be consistent. One cannot face both ways—swear by Local Self-Government when it suits one's purpose and disown it when it produces unexpected results. I note that what I will call the coercion argument has been made use of in the Council to-day and has apparently had its weight with the Hon'ble Member for the Trades' Association. Now this talk about coercion reminds me of the famous examination answer, which everybody knows—'The horse is a noble animal, but if you drive him he will not do so.' That is just the way of Municipalities. They are noble institutions, but if you drive them 'they will not do so,' particularly if you want to drive them to do something which the law leaves optional with them.

"In conclusion, I trust seriously that the Council will reject all the amendments on this subject, and pass the provisions in the Bill as they stand. The Bill is a deliberate and well considered attempt to deal with a very difficult problem. It deals with it, as I have shown, on recognised principles, and in the present stage of the question we are bound to be comprehensive. We are some extent feeling our way. We are also bound, as far as possible, to follow the same lines as other Provinces. The thing has got to be tried. There is every reason to believe it will succeed. At any rate I can give the most positive assurance that it will be worked with all fairness towards local interests."

The Hon'ble BABU SURENDRANATH BANERJEE said—"While I sympathise to a great extent with what has fallen from the Hon'ble Member in charge of the Bill, I think the Council should not accede to his suggestion to receive all these proposals *en masse* in the form in which they have been recommended by the Select Committee, by whom no doubt they were very carefully considered. The clauses should, I think, be considered separately with reference to the modifications which have been proposed. I have listened with great interest to the speech of the hon'ble mover of the amendment. But I have not been convinced by his arguments. When this Bill was introduced in March last, it was recommended, I believe, by the Hon'ble BABU GURU PROSHAD SEN himself that the Bill should be circulated among different public bodies and among the several municipalities in the Province for an expression of their opinion. That has been done, and we have before us a big tome of

papers, mostly from the municipalities which have been consulted. It is a matter of the first importance that we should consider with great care and attention the opinions of the municipalities who will be called upon to administer the provisions of this Bill. However great may be my respect for the various Associations who have submitted their opinions, the Bihar Planters' Association, the Chamber of Commerce, the British Indian Association, the Bengal National Chamber of Commerce, I am bound to say that, in matters affecting municipal interests, I would attach greater importance to the opinions of those who have a larger interest in and a more intimate knowledge of municipal affairs. As has been pointed out by the Hon'ble Member in charge of the Bill, 106 municipalities gave their opinion in favour of the veterinary clauses of the Bill. Only five or six are opposed to them, and about a dozen at the most give a somewhat uncertain sound. I say that we are bound to pay the utmost possible deference to these expressions of opinion. My hon'ble friend the mover of the amendment referred to the opinion of the British Indian Association, and let me repeat the words he used in doing so. He said:—"The British Indian Association say something on the subject." What that something was, he left his hearers to infer. That something was distinctly in favour of the Bill before us. I will read to the Council what the Association say. They observe—

'*Section 5.*—Considering that the resources at the disposal of the Municipal Commissioners are limited, and that the number and character of works on which the municipal fund may be spent are diverse, it is desirable that, except in the matter of works of primary importance, they should be given full and free scope in the selection of works.'

"I claim on behalf of the Select Committee that such full and free scope is provided by the terms of the proviso we have attached to this section of the Bill. The British Indian Association go on to say—and I desire to draw the special attention of my hon'ble friend the mover of the amendment to this part of their observations;—

'The training and employment of medical and veterinary practitioners and the establishment of dispensaries for the treatment of animals—in short, all the new clauses added to section 69—should be left entirely to their discretion. They should be also left unfettered as to the system of training and treatment, for it is still a moot question whether the native system of treatment of domestic cattle is not superior to any foreign system. The Committee would accordingly beg leave to suggest that the new clauses be added to the proviso appended to section 69.'

"In fact we have gone a step further. We have provided that it is only after the primary needs of a municipality have been fully met that a municipality will be at liberty to spend municipal funds upon the objects mentioned in clauses (viii) to (xii) of the section. Thus then the opinion of the British Indian Association, to which my hon'ble friend referred in somewhat ambiguous and doubtful terms, is an opinion which entirely supports these provisions of the Bill as now modified by the Select Committee.

"There is another opinion to which I think my hon'ble friend will attach the utmost importance, because it is the opinion of a gentlemen who is held in the highest possible respect by all those who have the honour and the privilege of his acquaintance—I refer to Babu Ambica Charan Mazumdar, Secretary to the Faridpur People's Association. He says—

'The avowed object of the Bill seems to be to provide for the protection and improvement of the live-stock in the country. In this the Committee of the Association fully shares the views of the Government; and as a preliminary attempt towards the practical solution of a great economic problem, it cordially welcomes the proposal of Government to accord its sanction to the establishment of veterinary institutions in the country. Though the Committee is not very sanguine as to the probable results of the proposed experiment, it would not hesitate to say that it wholly dissents from the view expressed in certain quarters that no portion of the municipal funds can be legitimately appropriated to any such purpose as the one now under consideration. In fact, since the amending Act of 1894 has rendered even agricultural holdings chargeable with the municipal tax, the Committee does not see how municipal corporations can altogether repudiate the responsibility which naturally attaches to them for effecting some improvement in the breeding and rearing of cattle. Those who are entrusted with the duty of preventing cruelty to animals ought at least to have some

arrangement made for protecting them either from natural diseases or from the effects of such treatment. It may be that in many cases, owing to want of necessary funds, this object of the Bill will practically remain a dead-letter. Nevertheless, if the barest recognition of the principle by Government will encourage and stimulate some Municipalities to give effect to the noble intentions of the Bill, the labour of the Government and of its Council will not be deemed to have been spent in vain.'

"I attach very great importance to this opinion, and I am certain that my hon'ble friend will attach a similar measure of importance to it. Therefore, having regard to these expressions of opinion, I submit that these clauses should form a part of the Bill. Whether they should be modified and changes made here and there are matters which may fairly admit of discussion; but as far as the principle of the inclusion of these veterinary clauses within the scope of the Bill is concerned, I am bound to say that, having regard to the opinions which have been received, and to which the hon'ble member in charge of the Bill has referred, we ought to come to a conclusion distinctly in favour of these clauses. At the same time I desire to say that in a matter like this the Provincial Government ought to come to the assistance of local bodies. I hope and trust when the Bill is passed, the Local Government will see its way to give wherever possible contributions to help local bodies in regard to an object in which the Local Government is interested, in which the people at large are interested, and in which, I am perfectly certain, are involved the best interests of an agricultural country like ours."

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR said:—"I happen to be the Chairman of a neighbouring Municipality, and I think I ought to say something. Before making any remarks upon the subject of the amendment now before the Council, I may inform Hon'ble Members that some two or three years ago the Commissioners of the Hooghly and Chinsura Municipality purchased a very fine bull at a cost of Rs. 200 and has been maintaining it at an expenditure of Rs. 15 or Rs. 16 a month, but it unfortunately so happened that the animal got sick and there was no body in the district who was able to discover the disease from which the animal suffered and to treat it, and the animal is still suffering. I may also inform the Council that the District Board of Hooghly, of which I am a member, passed a resolution recommending a scholarship to be given to any one who would study in the Veterinary College at Belgatchia, and then practise as a Veterinary Surgeon in the Hooghly district. That resolution was passed by the representatives of the people not under pressure from any quarter, but in due discharge of their duties. They have under the present law committed an illegality, but I may say in their defence that they done a little legal wrong to do a great right. I am in a position to say that there is a growing want for improvement in the breed of cattle, and I therefore submit that it is not quite the proper thing to object to the clauses under discussion. To the Indian peasant cattle is of more concern than roads and bridges, and looking to the constitution of the municipal fund, and the class of people who pay the rates, I submit that a portion of those funds should be devoted to the relief of diseased cattle. Something has been said in the reports that have been read by the Hon'ble Mover of the amendment about the novelty of the scheme operating as an inducement to Municipal Commissioners to spend money upon it. I must say I do not relish that remark. Municipalities in Bengal are now represented mostly by elected Commissioners, and the men so elected are not likely to fritter away the municipal fund through official pressure; they have their independent judgments, and I do not appreciate the remark that the Commissioners will be attracted by the novelty of the scheme, and be thus led away unless restrained by the provisions of the Bill. Lastly, I would observe that Hindus have a very sacred veneration for the bovine class, and a measure like this, which tends to the improvement of that class of animals, will be welcome to the Hindus. It will be equally welcome to the Muhammadan and the Christian communities. It is said that municipal funds ought not to be spent for this purpose, but in fact bulls and other animals are kept by Municipalities for conservancy purposes, and they require some such person as a Veterinary Surgeon to look after them. Therefore I submit there can be no possible objection to these clauses of the Bill, and I support the provisions of the Bill and oppose the amendment."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"This day's debate in Council has served to bring to a focus the real question and the real point in connection with the clauses under consideration. The question is whether the clauses relating to the training and employment of veterinary practitioners should be allowed to find a place in the Bill, and the existence of the proviso to the section must not be forgotten in connection with that question. The effect of the proviso is to render the Bill only an enabling measure. The Bill simply seeks to confer on the Municipal Commissioners a power which they do not possess under the Act: it only legalises the expenditure of municipal funds on such objects, when the Commissioners should think it desirable to incur such expenses, and when their funds permit them to do so. It could not be denied that the measure is one of great importance and utility: the obvious tendency of it will be to improve the condition of the agricultural classes, whose sole wealth not unoften is their cattle; and the treatment of cattle-disease and the improvement of the breed of cattle is calculated to improve the general prospects of agriculture.

"The objections against the measure are two: first, it is the duty of Government to provide funds for the object, and, secondly, that the permissive character of the measure might not be sufficient in some cases, and that, in spite of the permissive character of the Bill, 'a few fussy amateurs might get up an agitation on the subject,' and thus induce the general body of Commissioners to devote funds on this subject to the detriment and prejudice of more important objects.

"As regards the latter objection, what I have to say is that legislation must be undertaken on the assumption that people concerned in and entrusted with the carrying out of the law will do their duty. If we are to go into such side issues as have been raised to-day, and if we are to be deterred from legislating by reason of want of confidence even in such a body of intelligent and reliable persons as the Municipal Commissioners generally are, it will be impossible to pass a single measure in connection with Municipalities. We are bound to proceed on the assumption that the Municipal Commissioners as a body of men having a deep sense of their high responsibilities will do their duty unflinchingly, and will not attempt to abuse the power by diverting the resources of the Municipalities to this purpose to the neglect of other proper and more needful purposes.

"As regards the first objection, it is urged that the subject is one of Imperial interest or at least of Provincial concern, and the Imperial exchequer alone ought to supply funds, and that at least Provincial funds must be applied to this purpose, for which local funds should not be employed. As regards this objection, what I have to say is that I am not here to advocate that the Government is not bound to contribute towards the purposes of these clauses. On the other hand, I say it is the paramount duty of a good Government to promote by all possible means the welfare of the subject, and more particularly of the agricultural classes, and I say that the Government is bound to contribute from Provincial or Imperial funds for all measures having a tendency towards the improvement of the condition of these classes. But this duty of the Government has not much to do with the question. Alongside with the duty of the Government it is the duty of the Municipalities, *when they have surplus funds and superfluous money*, to apply that surplus and superfluity to such a desirable object. At least they should have the power to do so, and be in a position to exercise that power whenever they are inclined and willing to spend money in this direction after other necessary purposes have been satisfied.

"It must be remembered that these clauses comprehend the treatment of cattle both within municipal limits and outside such limits; but the fact that cattle coming from outside the municipal limits are to be benefited by the operation of these clauses affords no ground for the rejection of these clauses. Hospitals and schools situated within a Municipality are institutions by which the population generally is benefited: their usefulness is not confined to those only who reside within municipal limits: it has never been made an objection that because persons residing outside municipal limits are benefited by schools

and hospitals, therefore municipal funds should not be expended for the maintenance and support of schools and hospitals. In the same way cattle within municipal limits will be benefited by the operation of these clauses, and there should be no objection based on the benefit being extended to areas outside the municipal limits or shared in by persons living outside such areas.

"The Muhammadan bodies who were invited to give their opinion on this Bill have expressed themselves in favour of the inclusion of these clauses in the Bill. In East Bengal the bulk of the *chasa* population consists of Muhammadans; in Bihar the cultivating class consists both of Hindus and Muhammadans. But whether Hindus or Muhammadans, the ignorance which prevails in the country in regard to the treatment of cattle is simply appalling. Even *salutrees*, ignorant and useless as they are, are difficult to get at. These *salutrees*, it is said, work very much by the rule of the thumb, and they kill more cattle than they cure by their treatment. Nobody is more fully acquainted with the condition of Bihar than the hon'ble mover of the amendment. I appeal to him to say whether the Bihar raiyats have any knowledge how to treat cattle, and whether it is not a fact that cattle there are dying by hundreds and thousands every day, the people being powerless in the matter and wholly apathetic, attributing the result to divine visitation. I have taken care to ascertain the state of feeling of the people on this question, and I find that these clauses are generally accepted as a boon to the country, and that the Muhammadan feeling is very keen in favour of the Bill: in fact I have been told that the Bill falls short of what it ought to be, that this measure should have been made one of the chief objects of municipal administration, and not be allowed to have a place given to it where it might remain a dead-letter. As, however, there is no motion before the Council in the direction of making the provision more stringent, I must be content with what we have in the Bill. But I certainly say that to deprive the population of the benefit to be derived from the training and employment of veterinary practitioners, because it is the duty of the Government to provide for it, is not a just appreciation of the duties of the municipal bodies: also that to refuse to accept power, because the power might be abused, is not showing that confidence in the Municipalities generally which they, in my opinion, fully deserve. I would vote against the amendment."

The Hon'ble MR. M. S. DAS said:—"There cannot be any general objection to the introduction, into the Municipal Act, of a proviso relating to veterinary matters. Much has been already said on the subject, but it strikes me that now that certain agricultural areas are included within municipal limits, it becomes the legitimate duty of the Municipality, when funds can be spared for the purpose, to do something towards improving the breed of cattle in the country, and we cannot do a greater service to the agricultural population than to improve the breed of cattle. I am glad to hear that the Hooghly Municipality have been maintaining a bull for this purpose. I always thought the disappearance of the old *Brahmini* bull, which was a fine specimen of a bull, was due to the avarice of Municipalities. The *Brahmini* bull, which is dedicated to an idol, is often found in Municipalities in the scavenging cart, and I am glad to see that on Municipality at least has exhibited its zeal for the atonement of the sacrilegi ous misappropriations by purchasing and maintaining a bull specially for th purpose of improving the breed of cattle. As regards the remark that th attempt to establish veterinary dispensaries in certain places has proved failure, I think that in a country like India any new institution must b launched under the most favourable circumstances, and efforts should be mad to see that the people take to it. Conservative people like those in India wi not easily take to new institutions. When the Cattle Commission sat, I believ that two or three years before that there was a good deal of cattle-disease i Bengal, and steps were taken by the Government to check it. It was the in the contemplation of the Government to meet the expense of preventiv measures from the revenues derived from pounds. Now that revenue goes t Municipalities, and I think therefore that they may be well called upon t devote a portion of this fund for veterinary purposes. I do not think we shal get a favourable answer from the Hon'ble Member in charge of the Bill as t

the probability of a grant from the Provincial Revenues. The Hon'ble Member is never liberal in making grants, but where a measure is practicable and feasible, and it is put on the ground that it should be undertaken only when funds are available for the purpose, I do not see that there can be any objection to such a measure being included in the Bill."

The Hon'ble MR. FINUCANE said—"If I interpose in the debate on the particular questions now under consideration, it is because my official duty has necessitated my giving some attention to them for the past 10 or 12 years. So far back as 1885, I proposed the establishment of a Veterinary as well as an Agricultural School or College in Bengal.

"At that time it was held by many competent authorities that there was no demand in these provinces for the kind of instruction that would be given in these Schools or Colleges, and it was urged that the licentiates of them would obtain no employment, and would only add to that numerous class of persons who have already received instruction, at the expense of the State, in various branches of literary and scientific learning, which they are unable to utilise for their advancement in life, to the extent that they had expected, and therefore are disappointed and discontented.

"The Veterinary School has, however, already been established in Bengal, largely owing to the munificence of two native gentlemen—Sir Dinshaw Manockjee Petet, a Parsee of Bombay, and Rai Shewbux Bogla Bahadur, a Marwari of this city. Its classes have been attended by Hindu students of different castes from the highest downwards, by Muhammadans and others, who have shown much interest in the subjects taught and been very successful at the annual examinations hitherto held.

"In view of the assertions to which I have referred that there was no demand for veterinary instruction in Bengal, I had at first some misgivings regarding the immediate practical results of the establishment of the school, though none as to its ultimate utility. I listened therefore with great pleasure at one of the first meetings of this Council, at which I had the privilege to attend, to one after another of the hon'ble elected members expressing his cordial assent to the desirability and necessity of providing the means for giving instruction in agricultural science generally to such natives of Bengal as may desire to avail themselves of it. This approval was carried so far that Hon'ble Members vied with one another in their enthusiastic expressions of it, and each of them wished to have an Agricultural College in his own particular part of the country. Approval of the introduction of a system of agricultural instruction I thought implied approval also of providing instruction as to the means of improving the breed of cattle and of preventing and combating cattle-disease—subjects than which none can be more important to agriculturists.

"But, Sir, if the desirability of giving instruction in veterinary science is admitted, on what ground, it may be asked, is it now asserted that we are not to utilise the services of the veterinarians when we have got them? Or that we are to be prohibited from utilising them in the manner provided in this Bill?

"The Hon'ble Member who has proposed the present amendment says the Government of India or the Local Government ought to provide employment for them, while another Hon'ble Member appears to think that veterinary services should be paid for exclusively by such private individuals as may require them.

"Now I submit that it is absolutely out of the question that Veterinary Assistants should be appointed or veterinary dispensaries established in each and every local area throughout India or Bengal. Veterinary Assistants can at present, and for many years to come, only be appointed in a few selected places where local opinion is sufficiently enlightened to require them. If this be so, why should the general tax-payer throughout India or Bengal be called upon to pay the entire cost of services rendered or advantages obtained in particular localities only? The Government of Bengal pays the whole expenditure on the establishment of the Veterinary School. It will also pay the cost of such an inspecting staff as may be required. I am not in a position to make any definite promise on the point, but I think it will probably be

willing to give grant-in-aid to such local bodies as may be willing to employ veterinary Assistants and establish veterinary dispensaries. More it cannot be expected to do. As to the other view that private individuals should pay for veterinary aid if they require it, I admit there is more to be said for it. It is, I think, quite true that what we ought to aim at, and what we in fact are aiming at, is the attainment of a stage when each individual proprietor or each individual raiyat or other owner of cattle will pay for the services rendered by veterinary licentiates to him personally. This, as every one acquainted with the *mufassal* knows, at present is impracticable of attainment, and therefore we look to the smallest aggregate of individuals, or, in other words, to the smallest local body that we can reasonably look to, as the unit for employment and payment, for the present, of Veterinary Assistants for services locally rendered. It is hoped and believed that large proprietors will employ some of the Veterinary Assistants on their own estates, and the Government and Court of Wards will, as a matter of course, pay for such Veterinary Assistants as may be required on estates managed by them respectively. But this is not enough. We desire to enlist the co-operation of local bodies, knowing that even if Government were to send Veterinary Assistants to the mufassal as Government Agents, they would be at first regarded with suspicion, and would not be given a fair opportunity to show what they can accomplish. For this among other reasons we have asked local bodies whether they are willing to help in the matter, but we do not desire to force them to do so. What is their answer?

"I have looked through most of the reports which we have received on this Bill, and find, as we have been already told by Mr. Risley, that of 109 Municipalities no less than 102 are in favour of the provisions which the Hon'ble Member would eliminate, and only 7 against them. But the Hon'ble Member says two or three Commissioners and an important body like the Bihar Indigo Planters' Association are against the allocation of any part of municipal or District Board Funds to purposes of the kind. He does not, however, refer to the opinions of the six other Commissioners or of the 102 Municipalities or of many Public Associations who hold that it is right to give Municipalities the powers proposed to be given under this Bill, and he does not examine the arguments of the few Commissioners and Associations who hold the same views as himself. The reasons given by the Commissioners to whose reports he has referred are, that there is no demand for veterinary assistance among natives of this country, that the people are too ignorant to appreciate its advantages, and therefore that the provisions of the Bill now under consideration, however laudable their object may be, will remain a dead-letter. In answer to such arguments I would submit that some of the more enlightened Municipalities have already applied for Veterinary Assistants, and others have expressed their intention to do so if the law permits them, and so far is it from being a fact that Veterinary Assistants have failed wherever they have been tried, the exact reverse is the case.

"The Hon'ble Member has referred to the Bihar Indigo Planters' Association in support of his amendment. What does that Association say. Their Secretary writes:

'The native public generally will not make use of veterinary establishments, which would therefore be conducted at a dead loss. Private enterprise has already started such establishments in Muzaffarpur and Darbhanga, which are freely used by European gentlemen, and I have heard that it is likely that similar establishments will be opened at other centres, but in every case they will be dependent on European support.'

"The Veterinary establishments referred to by the Secretary to the Planters' Association are mainly intended for the treatment of horses, and prohibitive fees are charged at them, but the Veterinary dispensaries that we propose to establish with the aid of Municipalities and Local Boards are entirely or mainly intended for treatment of cattle disease in which little, if any, fees will be charged for treatment. Does the Hon'ble Member or does this Council think that it is only Europeans who are interested in, or will contribute anything towards, the treatment of cattle disease in this country? The Hon'ble Member refers to the opinion of the Bihar Planters' Association, but he does not refer to the

opinion of the most powerful and, from the landholders' point of view, the most representative of all such associations, namely, the British Indian Association.

"That body, as we have heard today from the Hon'ble Babu Surendranath Banerjee, say—

'The training and employment of medical and veterinary practitioners and establishment of dispensaries for the treatment of animals in short all the new clauses to section 69—should be left entirely to their discretion (*i.e.*, of Municipalities and other local bodies).'

"This is precisely what the Bill proposes to do—to leave it entirely to their discretion. But the Hon'ble Member would refuse to give them that discretion.

"What, then, is the position? These 102 Municipalities say they desire to be allowed to spend part of their funds in employing Veterinary Assistants when they think fit. The Governments of India and of Bengal say they think it is right that Municipalities should be given power to spend their money in this way if they wish to do so after they have provided for more urgent needs; but the Hon'ble Gentleman says power should not be given to them to do anything of the kind, and he asks this Council to support him in taking up that position. There is no subject on which the overwhelming preponderance of opinion could be more on one side, that is to say, in favour of the provisions of the Bill, yet the Hon'ble Member would have us disregard this mass of opinion. I submit that it would not be consistent with the interests of the people of the country or with the principle of Local Self-Government for us to do so.

"The loss to agriculturists in India by preventible mortality among cattle is, according to the best estimates available, no less than six million pounds sterling, or say ten crores of rupees per annum. There can be no more humane or beneficent aim than that of reducing that loss, and no greater injury can, in my opinion, be done to the agricultural classes than would be done by successfully placing difficulties in the way of effecting that object.

"In other provinces District Boards and Municipalities have not felt that it was an improper allocation of their funds to entertain and to pay veterinary establishments. I am informed that Veterinary Assistants are employed by Municipalities and local boards in the Punjab and in Bombay, with excellent results.

"It has been made a subject of reproach to this Province elsewhere that we are so much behind other provinces in this respect; and I hope, as a first step towards wiping out that reproach, that the Hon'ble Gentleman's amendment will be rejected by the Council.

"Whether Veterinary Assistants should be employed or veterinary dispensaries opened, or either or both, is a question for each particular Municipality to decide, having regard to its own special wants and resources, but surely it is not too much to ask that Municipalities be given the option of coming to a decision on that point.

"On the subject of the establishment of dispensaries, I would explain that it is next to useless to employ a Veterinary Assistant, unless we give him a dispensary where he can treat diseased cattle and win the confidence of the people by showing what cures he can effect, and by dispensing the necessary medicines which are not to be otherwise procured in the muffasal. Further, the cost of such dispensaries will be trifling. A Veterinary Assistant and his establishment will cost about Rs. 570 per annum. The expense of instruments will be only Rs. 200 once for all, and that of drugs about Rs. 200 per annum. Is it worth while for any Municipality to spend Rs. 570 on a Veteriniary Assistant, and then refuse to give him the trifling sum of Rs. 200 per annum to enable him to carry on his work satisfactorily?

"Sir, I attach little or no importance to the provisions of the Bill which enable Municipalities to spend money on improvement of the breed of horses, mules, and asses, and would not myself object to their omission, though their retention is, I think, harmless. But I attach great importance to the provisions enabling these bodies to spend moderate sums on improvement of the breed of cattle, and more especially on the prevention and curing of cattle disease.

"Bengal has produced the best native medical practitioners in India, as well as the best native lawyers and engineers. It will, I believe, produce the best veterinary practitioners also if they are given a fair start. I would ask

hon'ble elected members to consider whether, by opposing the provisions of this Bill, they are not placing obstacles in the way of opening up a new profession, and a new outlet for employment to their follow-countrymen, and, what is a far more serious matter, whether they are not placing unnecessary and merely technical difficulties in the way of reducing that enormous loss, to which I have already referred, that is now sustained by the agricultural community.

"We have been told, and told truly, that my hon'ble friend in charge of this Bill has met all reasonable objections to it made by Hon'ble Members, in the most conciliatory spirit.

"Is it too much to ask Hon'ble Members to look at this matter in the same spirit, and in voting on the provisions of the Bill now under consideration, the objects of which are admitted to be most laudable, not to be influenced by technical and narrow considerations as to whether one particular body shall do more and another less towards mitigating the ravages of cattle disease. The right principle I submit is that all should, so far as their resources permit, do what they can towards attaining this most humane object."

The Hon'ble MR. A. M. BOSE said:—"I do not rise to support the provision in the Bill in regard to the training and employment of veterinary practitioners which is the subject-matter of the present discussion, because, after all that has been said, it stands in no need of any further support. I rise to thank the Government for the spirit in which it has met the difficulties which have been raised in connection with this clause, and for the promise made by the Hon'ble Member in charge of the Bill that the Government would meet with perfect fairness any proposals for carrying out these clauses which might be brought forward by any Municipality; and I rise also to thank the Government for the statement made by the Hon'ble Mr. Finucane, who, without making any absolute promise, said it was very likely the Government would make a grant, in order that these clauses might easily be brought into operation; for I believe it is only by cordial co-operation between the Government and the local bodies that the success of the measure can be ensured, and its provisions duly carried out."

The Hon'ble MR. GRIMLEY said:—"The Hon'ble Member in charge of the Bill has fully explained in his exhaustive speech the scope and object of the provisions relating to the training and employment of veterinary practitioners and the principles on which they rest. The HON'BLE BABU SURENDRANATH BANERJEE has described their permissive character and the safeguards which have been introduced in order to ensure that municipal funds shall not be expended in the treatment of cattle until all necessary objects have been sufficiently provided for. The HON'BLE RAI ISHAN CHUNDRA MITTRA, BAHADUR, has given a concrete example in the case of the bull of Hooghly, on which money was or might have been usefully spent. An ounce of fact is worth a pound of theory. I will give another instance embracing the treatment not of a single animal, nor indeed of a hundred, but of cattle in vast herds. Formerly, there were large grazing grounds for the pasturing of cattle in most districts of Bengal, but these have gradually disappeared, and very few now remain. But there are still to be found extensive wastes on the high table lands in the Native States to the north and west of Chota Nagpur, particularly in the State of Sirguja. Hither large herds of cattle are yearly brought to graze from the neighbouring districts in the North-West Provinces of Mirzapur, Allahabad and more distant places. They come in thousands and remain for months in charge of *Ahirs*, who stock the ghi marts of the North-West and Lower Bengal. But though they come in thousands, they only return in hundreds when the grazing season is over, for they are carried off in thousands and tens of thousands by a frightful epidemic which the simple graziers are powerless to check. All that I could do from the distant station of Ranchi was to preach through the Chief of the State segregation of cattle and the burying of carcasses, and to disseminate leaflets of instructions. But the assistance might have taken a more practical form had only a few veterinary practitioners been available in the adjoining districts. This is a consummation to be wished for, and I shall therefore vote against the amendment."

The Hon'ble BABU GURU PROSHAD SEN said:—"As to the desirability of the objects for which these clauses of the Bill are intended to provide, I do not like to differ in the least from my hon'ble colleages who have addressed the Council. They are, indeed, very desirable objects, and I do not see why in a country like this there should not be colleges and dispensaries for the treatment of cattle and proper arrangements also for the improvement of the breed. The only question and I submit the important question—with which we are concerned is whether or not municipal funds should be applied for providing for such things. As, however, the Hon'ble Members who have spoken are in favour of the retention of these clauses in the Bill, I can only say that, with the assurance which has been given by the Hon'ble Member in charge of this Bill and by the Hon'ble Mr. Finucane, I beg leave to withdraw this amendment."

The Motion was, by leave, withdrawn.

The Hon'ble Mr. WALLIS moved that in section 6, clause (viii), the words "training and" be omitted.

He said:—"I am in perfect sympathy with the objects desired to be attained by the employment of female medical practitioners and of veterinary practitioners, the establishment of veterinary and medical dispensaries, and the appointment and payment of qualified persons to prevent and treat diseases of horses and cattle and other animals, but I oppose the use, even of surplus municipal funds, for the training of students. I should like to draw the attention of Hon'ble Members to the fact that on several occasions it has been proposed to introduce into the Bengal Municipal Act a clause providing for the training (at the expense of municipal funds) of medical practitioners. When the Act was being amended in 1883-84, a clause was inserted in the Bill providing for the training of medical practitioners, but this was omitted by the Select Committee, who considered that municipal funds could not properly be applied to such purposes. It was next suggested that the training should be confined to the training of female medical students, but this was also abandoned, and now again we find the proposal is brought forward. I agree with the employment of female medical practitioners and of veterinary practitioners, but I object to their being trained at the cost of Municipalities. If it is thought desirable that Municipalities should encourage the training of these students, they might go so far as to offer scholarships for this purpose. It is true that no part of the municipal funds can be utilised for this purpose without the sanction of the Commissioners in meeting, and it is equally true that the funds can only be so used after all the other purposes for which rates and taxes are levied have been fulfilled. But I submit that it is not a right use of the municipal funds to train men and women to earn their own living, and after they have been trained they may leave the Municipal Institutions if inducement should offer. It may be said that they can be legally bound to serve the Municipality after such training, but we know what the result of such contracts are. If a man is bound to serve against his own will, the chances are that he would be useless. I therefore say that even the surplus funds of a Municipality should not be spent in the *training* of female medical practitioners and of veterinary practitioners. It has also been urged by Hon'ble Members that the operation of this clause would be wholly permissive, and that of course is the only redeeming feature. I cannot agree with the Hon'ble Member in charge of the Bill that the principle is a small one; I submit that the principle is a very large one. The principle is that municipal funds are to be utilised for purposes for which they have not been utilised in the past, and that is the principle I stand against.

"There is another aspect of the case, and that is in some year of unusual prosperity a Municipality may be induced to sanction funds for the training of such students, and having once done so they could not at short notice inform students that surplus funds being no longer available, their training must be discontinued. On the contrary the Municipality will be obliged to find funds to continue the studies of these students, and in consequence the needs of sanitation and other important duties will have to be put on one side. I hope I have been able to show that it is undesirable to utilise even the surplus funds

of Municipalities for the purposes I have mentioned, namely, the *training* of female medical practitioners and of veterinary practitioners."

The Hon'ble MR. RISLEY said:—"It seems to me that my hon'ble friend, the member for the Calcutta Trades' Association, has followed the somewhat unusual course of answering by letter, beforehand, the amendment he now moves in the council. I shall read an extract from the letter of the Trades' Association on the subject. They say:—

'The Committee would venture to suggest that if Municipalities are desirous of obtaining the services of students of medicine, when qualified for their own dispensaries, their assistance should be limited to the grant of scholarships. This is the practice which is now followed in the case of female students studying at the vernacular medical schools, and the Committee see no reason why municipalities should extend any assistance beyond this point.'

"I understand that to the grant of scholarships there is no objection, but that is precisely the meaning of the words 'training and' to which the Hon'ble Mover of the amendment objects. If it is proposed to allow the grant of scholarships for the purpose of receiving the necessary training, I think that is all it is desirable to have; namely, that grants may be made of whatever sum may be necessary to send a girl from any Municipality to the Calcutta, Dacca, or Cuttack Medical School to get a training there in order that she may go back and practise among the poor of the Municipality from which she was sent. That is what is now done, and that is what we want to legalise. It may, however, be necessary to pay for books and for expenses of travelling and the like, which would not come under the head of scholarships, but there is no probability of a provision of that kind being unduly large. As to the history of the proposal, there is no doubt that it was brought forward in 1892. It was strongly urged upon this Government by the Government of India in 1887-88. They said there was a provision in the Madras Municipal Act which met a want which had been felt, and they asked that when the Bengal Municipal Act next came under amendment, the opportunity might be taken to introduce an amendment similar to that contained in the Madras Act. The question was brought up in the Select Committee first of all in the general form of training medical practitioners, and then again in the form of training female medical practitioners. The Select Committee then rejected the proposals on what I think were *à priori* grounds, but the real reply is that the proof of the pudding is in the eating; for while the Select Committee were discussing all the principal arguments on the subject, a great number of Municipalities had incurred very expenditure for this purpose. In 1894-95, the Serampore Municipality made a grant of Rs. 24 towards the training of a female medical student in the Campbell Medical School, the Darjeeling Municipality made a grant of Rs. 235; the Rampur-Boalia Municipality sanctioned Rs. 25 a month; the Hooghly Municipality paid the travelling expenses of a female student; the Backergunge Municipality provided a stipend of Rs. 5 a month, the Patna and Darbhanga Municipalities also made contributions; the Burdwan Municipality paid Rs. 40 in four months; the Khulna and Kutwa Municipalities failed to find any suitable girl. And as for the suggestion that these girls, when they were trained, did not work in the Municipality by which grants were made in their behalf, it appears to me that Municipal Commissioners are not so stupid as all that. When they paid a female student Rs. 4 or Rs. 5 a month for three years to be trained, they take good care to see that she does not go elsewhere to practise, and, moreover, she being a native of the place, has no inducement to go away. In Rampur-Boalia for example I found last year that the arrangement had been most successful, and now they are giving the girl a nominal retaining fee, and she is practising among the people there. So that really what is proposed to be done under this clause is precisely that which I understand is now actually done."

The Hon'ble MR. A. M. BOSE said:—"Having the honour of being connected with the Bengal Branch of the Countess of Dufferin Fund, I beg leave to say a few words in support of the proposal of the Select Committee. The training which is intended to be given to female medical students is not to

enable them to find employment wherever they choose, or to open out a new career for a class of Her Majesty's subjects at the cost of municipalities. If that had been the object, I should entirely sympathise with the Hon'ble Mover of the amendment; but the object is to remove a grave and a felt want within the Municipality, which unfortunately is not met by the law of supply and demand, by the law of competition. There is not the slightest apprehension, as has been pointed out by the Hon'ble Member in charge of the Bill, of anything else being done, but to provide a little scholarship for some suitable female candidate to receive a training at the Campbell Medical School, or at some similar institution. A little money grant makes a deal of difference as to whether a candidate is available to receive that training, not for her own sake, but for the good of the people in the Municipality which provides the scholarship. It is not contemplated, as in the case of veterinary practitioners, that there should be a hospital or an educational institution suitable for the purpose of this training. I hope there will be no opposition to this proposal. The Government has for its own part most generously endowed suitable institutions where female medical practitioners may be trained. All that is wanted is that the municipalities should, where necessary, supplement this by a special grant. It will be for the relief of suffering humanity in the case of those who specially need it, and I am sure the object will command the sympathy of the Council."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"The words proposed to be omitted from clause (viii) govern both parts of that clause, and the effect of the omission on the veterinary aspect of the clause will be something the mischief of which it is impossible to overrate. The result will be the retention and employment of the class of veterinary practitioners called *salutrees*, the extent of whose knowledge, or rather I should say ignorance, is well known to those who have come across them: it is highly undesirable that such a class of persons should have the authority of the Municipality to go about spreading destruction among cattle and rendering their disease worse by their unskilful and quackish treatment: the great object is that the Municipality should be able to train veterinary practitioners so that they might be useful to the country. The effect of the omission as regards female medical practitioners has already been pointed out by the Hon'ble Members who have preceded me. I therefore think it absolutely necessary that this clause should remain as it stands, and that the law should contain a provision for the training and employment both of female practitioners and of veterinary practitioners."

The Hon'ble MR. FINUCANE said:—"I wish to explain in a few words the effect of the omission of the words 'and training' in this clause as regards veterinary practitioners. It will be impossible if these words are omitted for Municipalities to send any persons to a veterinary school at their own expense or to give scholarships to students who go there of their own accord. In point of fact Municipalities have in several cases already established scholarships, and paid for them ever since the institution of the Bengal veterinary school, though without legal authority to do so. The effect of the omission of the words 'and training' will perpetuate the illegality which now exists. I do not think the Hon'ble Mover of the amendment really thinks there is any harm in Municipalities establishing scholarships at the school at Belgachia, and that is all that is meant by training. It is not meant that the expense of providing a veterinary school is to be borne by any Municipality. The only effect of the words is to enable Municipalities to provide for scholarships at established schools."

The Hon'ble MR. WALLIS in reply said:—"Taking into consideration the remarks which have fallen from the Hon'ble Member in charge of the Bill, and the Hon'ble Member who has just spoken, it seems to me that the Council is not disposed to vote for my amendment. I should not like specifically to narrow down the proposal to training by means of scholarships, but as I understand that to be the intention of the clause, I beg leave to withdraw my amendment."

The Motion was, by leave, withdrawn.

The Hon'ble BABU GURU PROSHAD SEN moved that clauses (ix), (x) and (xi) in section 6 be omitted.

The Hon'ble BABU SURENDRANATH BANERJEE said:—"We have already received an explanation from the Hon'ble Mr. Finucane with regard to these clauses. I have given notice of a motion to omit clause (ix). My objection to clause (ix) is based on financial considerations. I believe that Municipalities will not be in a position, having regard to their financial resources, to establish dispensaries for the reception and treatement of horses, cattle and other animals, and it is on that ground I gave notice of this motion. The Hon'ble Mr. Finucane has explained that the establishment of veterinary dispensaries will not be an expensive matter, and I think he has stated that Rs. 200 a year is the normal expenditure on account of a dispensary of this kind. I have another question to ask, and if the explanation is satisfactory, I am prepared to withdraw my motion. I wish to know what the expense would be for the treatment of animals in these dispensaries. Whether I will press my motion or not will depend very much upon the answer I receive."

The Hon'ble MR. FINUCANE said:—"I have been informed by Veterinary Captain Gunn, who is an authority on the point, that persons who send their animals to these dispensaries will have to pay for their keep, and that no expense whatever will be incurred by Municipalities on that account."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Then we may restrict the terms of the clause in that sense. The establishment and maintenance of veterinary dispensaries, and the reception and treatment of animals therein are two different things altogether. Municipalities in general are so poor that they would not have funds to do more than provide the cost of medicines, which, it has been stated, will come up to about Rs. 200 a year. It is distinctly unwise to clog a novel provision like this with a greater liability to expenditure than is absolutely necessary and which will render the clause partially inoperative. I would suggest the clause being restricted to the 'establishment and maintenance of veterinary dispensaries,' and I would omit the subsequent words 'for the reception and treatment of horses, cattle and other animals.'"

The Hon'ble MR. RISLEY said:—"The question is whether the expression 'veterinary dispensary' will include the treatment of horses, elephants, &c.

The Hon'ble BABU SURENDRANATH BANERJEE said:—"A dispensary means place for distributing medicines. That is the sense in which the word is used but when you speak of reception and treatment, you mean a hospital."

The Hon'ble MR. FINUCANE said:—"It is intended that horses and cattle shall be received for treatment. The owners of these animals will have to pay for their keep, but they will be treated in the dispensary. Therefore the expense which will be incurred will be the expense for the medicines."

The Hon'ble MR. RISLEY said:—"Dispensaries in the *mufassal* are usually used as hospitals."

The Motion was, by leave, withdrawn.

The Hon'ble BABU SURENDRANATH BANERJEE by leave, withdrew his motion to omit clause (ix) in section 6.

The Hon'ble MR. WALLIS said:—"After the explanation which has been given that persons who send their animals for treatment in these veterinary dispensaries will have to pay for their keep while under treatment, I conclude this will be provided for in the rules to be framed by the Local Government."

The Hon'ble MR. WALLIS therefore, by leave of the Council, withdrew the motion of which he had given notice, that at the end of clause (ix) in section 6, the following words be added:—

"on payment by owners of certain prescribed fees."

The Hon'ble MR. A. M. BOSE moved that in section 6, in the proviso to the new section 69 (1), for the words after "both inclusive" to the end of the proviso, the following be substituted:—

'unless such application be sanctioned by the consent of two-thirds of the Commissioners present at a meeting specially convened for considering such application, or held after special notice has been given that such application will be considered at such meeting.'

He said:—"The words of this amendment are copied from the wording of the present section merely substituting 'two-thirds' for 'one-half,' and I hope, having regard to the conciliatory way in which the several amendments to this section have been dealt with, the Government will be willing to allow a two-thirds majority to sanction the establishment of these veterinary dispensaries. I venture to suggest that in introducing a novel provision, in making an altogether new departure in municipal administration like that involved in the opening of such dispensaries and the like, a substantial majority of the Municipal Commissioners should be obtained. This would disarm local opposition, and secure that support and co-operation which are necessary for the success of the undertaking. Under the Bill the procedure to be adopted seems somewhat complicated. There are to be two divisions or votings of the Commissioners in meeting. First, a division on the question whether funds are available for these new undertakings, and then there is to be a second motion and a second division on the point whether these available funds should be devoted for veterinary purposes I submit that this is a complicated and a novel procedure. It is absolutely unknown to the Municipal law as it stands; and it is complicated because it requires two divisions where one would be sufficient, that one division being on the question whether on a consideration of all the issues relating to the matter, these measures should or should not be adopted. That question would be discussed in all its bearings and issues—the issue of available funds, the requirements of the Municipality, and the desirability of the undertaking. All these questions would be considered, and then a clear expression of opinion taken in one division. There is another matter regarding which I beg to ask a question of the Hon'ble Member in charge of the Bill. One of the purposes mentioned in section 69 is the training and employment of female medical practitioners and of veterinary practitioners. Expenditure for these purposes would ordinarily be incurred outside municipal limits—at the Campbell or other medical school, and at the Belgatchia Veterinary College; money would therefore have to be spent beyond municipal limits. But there is a special provision of the municipal law relating to this matter. Section 70 of the Bengal Municipal Act provides a special procedure when any expense out of the Municipal Fund has to be incurred in any other municipality, or elsewhere, for any of the purposes mentioned in the Act, and the procedure is that the consent of two-thirds of the Commissioners has to be obtained in a certain manner. I wish to ask whether the Hon'ble Member in charge of the Bill has considered that for the purpose of spending money on the training of female medical practitioners or of veterinary practitioners outside the municipal limits, the vote of the Municipal Commissioners will have to be taken in a particular way, whereas under the proviso to section 69 now under consideration, for all these purposes a bare majority is supposed to be sufficient. This is a matter which requires solution at the hands of the Council in order to avoid uncertainty and trouble in the future. Passing on I would appeal to the Government whether instead of, I will not say driving Municipalities by a bare majority—for a majority is a majority—it is not desirable that a very clear and decided expression of opinion should be a condition precedent to the carrying out of these measures. The Hon'ble Member in charge of the Bill made one observation on the question of pressure or influence being brought to bear on municipalities. He said that the Sanitary Commissioner would always see that the sanitary needs of the Municipality were first attended to. Suppose a Magistrate

wants these objects to be carried out in any particular municipality, how would the Sanitary Commissioner see that no pressure is brought to bear upon the Commissioners. The District Magistrate and the Divisional Commissioner are near; the Sanitary Commissioner is far; he has no opportunity of knowing what is proposed to be done until long after the budget has been passed and sanctioned. The large powers left in the hands of the Divisional Commissioner in passing the annual Municipal Budget give him a controlling influence which every Municipal Commissioner know and has felt only too well. It will only be in exceptional cases that the Sanitary Commissioner will have the opportunity of closely supervising the expenditure of the Municipality, that is to say, when a complaint is made to him, or when, in the course of many years, he pays a visit to the Municipality. There are two opinions bearing on this question among many in the mass of papers which have been circulated to which I may be permitted to refer. One of these is from the District Magistrate, or rather the Deputy Commissioner of Lohardaga, who says:—'If there is any fear (and it is difficult to say that there is no fear) of expenditure under these heads being forced on unwilling municipalities, I would much prefer to see them omitted from the Act altogether.' Therefore there is the fear entertained of some sort of pressure. The only other opinion to which I shall refer is from one who represents not a backward but an advanced district like the 24-Parganas, the Magistrate of which says:—'The Bill is, I am of opinion, premature, but as it is permissive in character, there is no special objection to it, except that municipalities are prone to expend money on new and attractive objects, and *there is some reason to apprehend that pressure may be brought to bear on them in this direction.* I speak, however, only for the municipalities of this district.' I may add that if this should be true for a Metropolitan district like the 24-Parganas, it may be held to be not altogether inapplicable to the circumstances of other parts of the province. The question of pressure, however, is a very delicate matter, and I will not stop to criticise how far these two officers are altogether correct in what they say; but I beg to point out that these new undertakings will carry with them popular support and cordial appreciation on the part of the public if the Government were to accede to the suggestion that the vote of a majority of two thirds should be taken after considering all the circumstances, instead of following the novel procedure prescribed by the Bill."

The Honb'le MR. RISLEY said:—"I trust the Council will support the Select Committee in this matter. This particular amendment was very carefully considered indeed. The solution which the Hon'ble Member has just put forward was very fully considered and deliberately rejected, and it appears to me wholly unnecessary. The section provides ample safeguards against any abuse of these provisions. Moreover, so far from this being a novel procedure, it is based on the nearest approach we could provide to the procedure followed in the Calcutta and Bombay Municipal Acts. In both those Acts separate provision is made for what may be called necessary purposes and for optional purposes. The members of the Select Committee will remember that we tried to define and separate by enumeration the two sets of purposes, but we could not do it to our satisfaction, and the procedure prescribed in the Bill was adopted as the nearest approach to it, and I think it goes as far as any reasonable person can expect us to go without unduly interfering with the discretion of the Commissioners. On principle I don't like a hard-and-fast rule of a two-thirds majority, as it lends itself to obstruction and merely retards business. As regards the Sanitary Commissioner, in point of fact he exercises a much closer supervision over the proceedings of Municipalites than the Hon'ble Member supposes, and he particularly watches to see that there is no diminution of expenditure on account of sanitary purposes. I merely mention this to show that there is no force in a two-thirds majority keeping the Commissioners from any possible abuse of their discretion."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am sorry to find myself somewhat in disagreement with the hon'ble mover of the amendment, with whom I am generally in accord in regard to most matters. My objection

to the amendment is that it dispenses with the safeguards which are now embodied in the proviso, namely, that it is only after the sanitary needs of a municipality have been amply provided for can municipal funds be devoted to veterinary purposes. The double division to which my friend refers imposes this necessary safeguard. That safeguard is dispensed with in this amendment. I think the safeguard which the Select Committe have provided is a more effectual than the safeguard of a two-thirds majority. If pressure is brought to bear on municipalities, it will be brought to bear on the whole body of Commissioners, and the two-thirds will come under it just as much as a bare majority. We ought to provide some safeguard against pressure being brought to bear on Municipal Commissioners by Commissioners of Divisions, who may have their hobbies to ride. A Commissioner of a Division may think it his duty to promote these veterinary objects; therefore we thought it would be better to legislate that it is only after a majority of the Commissioners present at a meeting are satisfied that the other purposes specified in this sub-section, or such of them as the majority consider it necessary to carry out, have been sufficiently provided for, that any portion of the municipal funds can be applied to the purposes referred to in clauses (viii) to (xii). The two divisions required under this provision constitute an effective safeguard. Instead of one division with a majority of two-thirds, we have two divisions each of which requires a majority; instead of one division on one occasion, we have two divisions on two occasions, and I think this, though a complicated procedure, will provide a better safeguard than that proposed by the Hon'ble Mover of the amendment."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"There is one aspect of this amendment with which I do not agree. I do not think it is necessary in the true interests of municipalities that the safeguard contained in the proviso should be so severely and strongly worded as to render the operation of the clauses next to an impossibility. As I have already explained in connection with a preceding amendment, there must be some hope left that these new objects, now recognised, will have their turn in the municipal administration. There must be some facility left for these clauses to be brought into play and to be reached and worked out in the event of funds being available; and the proviso should not be hemmed and hedged by language containing conditions and limitations so as to place the clauses beyond the bounds of possibility. The Hon'ble Mover of the amendment has referred to section 70 of the Bengal Municipal Act on the question of expenditure outside municipal limits. I do not think the wording of the section in question is such that one is obliged to say that the only possible construction of that section is as contended for by the Hon'ble Mover of the amendment: that however is a matter on which the President can speak with authority. As at present advised, it appears to me that you can scarcely say that a scholarship paid to a person who is sent to a college elsewhere to be trained for work to be performed within the Municipality falls within the purview of section 70: if it does, and if the construction contended for by the Hon'ble Mover is fairly correct, or if it is even an open construction, then I admit that a difficulty does arise for which a remedy must be devised: but the remedy must not have a tendency so that the clauses should remain inoperative and be a dead letter."

The Hon'ble the PRESIDENT said:—"I think such an expenditure will certainly come within the scope of section 70. You will be spending the money of the Municipality elsewhere than within the Municipality itself."

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR said:—"I think the proviso in the Bill, as it stands, is a more effective safeguard than what the Hon'ble Mover of the amendment has proposed. The provision that expenditure for necessary purposes shall first be secured before any money is spent for the purposes mentioned in clause (viii) to (xi) should not, I think, be dispensed with."

The Hon'ble MR. A. M. BOSE in reply said:—"I put a question pointedly to the Hon'ble Member in charge of the Bill in connection with the construction

of section 70 of the Bengal Municipal Act, to which the Hon'ble Member has given no answer. It is a question of legal difficulty which cannot be shirked in this way. If this point has not been considered, and the Hon'ble Member requires further time to consider it, I would suggest that the decision upon the amendment, now before the Council, may be adjourned. And in that case I need not enter into other matters at present."

The Hon'ble the PRESIDENT said:—"The section certainly reads as the Hon'ble Mover of the amendment suggests, and I think the point should be considered."

The further consideration of the Motion was postponed to the next meeting of the Council.

The Council adjourned to Saturday, the 15th instant.

CALCUTTA;
The 1st September, 1896.

F. G. WIGLEY,
Offg. Assistant Secretary to the Govt. of Bengal,
Legislative Department.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE DEPARTMENT FOR THE YEAR 1895.

No. 4930J.

RESOLUTION.

POLICE.

Dated Calcutta, the 31st August 1896.

READ—

The Report on the Administration of the Police Department for the year 1895.

Read also—

The Report for the year 1894, and the orders of Government recorded thereon.

Mr. E. R. Henry held the office of Inspector-General throughout the year. The present report, due on the 1st July, was received by Government on the 4th idem. The reports from Divisional Commissioners, which were due in the Inspector-General's office on the 20th March, were received within that month, with the exception of those from the Commissioners of the Chota Nagpur and Orissa Divisions, received on the 2nd and 7th of April, respectively.

2. *Constitution of the force.*—The sanctioned strength of superior officers at the close of the year was 77, including eight probationers, the same as in the two previous years. The sanctioned strength of the subordinate officers and men was 23,514, as compared with 23,142 in 1894 and 22,739 in 1893. It was increased by four Inspectors, 146 Sub-Inspectors, 320 constables and 63 town chaukidars, while 152 head-constables and 16 mounted constables were dispensed with. The total number of men actually employed at the close of the year was, however, short of the sanctioned strength by four Inspectors, 72 Sub-Inspectors, 126 head-constables, 340 constables and 16 town chaukidars. The vacancies in the rank of Sub-Inspector were kept for candidates to be appointed on the result of competitive examination, while those in the rank of head-constable were not filled in order to give effect to the recommendations of the Redistribution Committee. The vacancies in the rank of constable are reported to have been due to difficulty of recruitment.

3. *Expenditure.*—The following table compares the expenditure under the main heads during the financial years 1894-95 and 1895-96, but the figures for the latter year are given subject to further correction when the Accountant-General has finally closed the accounts:—

Serial No.	Heads of charges.	Actual expenditure for 1894-95.	Actual expenditure for 1895-96.	Increase.	Decrease.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.
1	Inspecting agency	1,74,138	1,64,662	...	9,476
2	Pay of District and Assistant Superintendents ...	5,21,473	5,11,182	...	10,291
3	Pay of Executive Police and establishments, with good-conduct pay and batta allowance, &c. ...	30,55,191	31,59,468	1,04,277	...
4	Travelling allowance	92,907	1,07,479	14,572	...
5	Fixed boat establishment	57,599	57,399	...	200
6	Special, regular, and contract contingencies ...	5,83,709	5,45,185	...	38,524
7	Government contribution to the Municipal and Railway Police	1,51,711	1,50,628	...	1,083
8	Bengal Military Police	46,702	68,301	21,599	...
	Total	46,83,430	47,64,304	1,40,448	59,574
	Net increase	...	...	80,874	

The largest increase, which occurred under the head "Pay of Executive Police and Establishment, &c.," is due to the utilization of the balance of the grant made in March 1894 for redistribution reforms, and to certain other increased establishments sanctioned during the year. The increase under the eighth head is chiefly due to the expenses incurred in connection with the Military Police at Gnatong. There has been a satisfactory decrease under the head of Contingencies.

4. *Reduction of investigating centres and recruitment of investigating officers.*—Out of 188 investigating centres recommended for abolition by the Redistribution Committee, 177 have been abolished. Further reduction is not likely to be practicable. At the Sub-Inspectorship examinations held in July and December, 132 candidates were successful. The total number of Sub-Inspectors now employed on the results of competitive examination and after a course of instruction at the training school at Bhagalpur is about 400. The Inspector-General says that they are generally reported to be intelligent and willing workers, the disability under which they labour being lack of experience, a defect which time will remedy.

5. *Police Training School.*—During the year, Mr. Henry submitted to Government a scheme for the establishment of a permanent Police Training School at Bhagalpur, with the object of giving suitable training to investigating officers of the Bengal Police, which met with the approval of the late Lieutenant-Governor. Since the close of the year the project has received the sanction of the Government of India and the Secretary of State. Rules for the management and supervision of the school have been approved and issued, and the institution is now in full working order. The curriculum of study includes the Criminal Procedure and Penal Codes, the Police Code, the Police Act, and portions of the Evidence Act and of other Acts and Regulations with which police officers should be acquainted. Drill, Surveying and Anthropometry, including finger-print decipherment, are also taught. Sir Alexander Mackenzie availed himself of an opportunity of visiting the school during his recent tour, and the arrangements made and the method of instruction appeared to him excellent. He fully shares the Inspector-General's views as to the usefulness of the institution and the improvement it is likely to effect in the general character and efficiency of the investigating staff.

6. The Lieutenant-Governor thinks that steps might now be taken to afford some training and professional education to the inferior officers and the rank and file of the police. Each district ought to have its school at head-quarters through which all recruits should be passed, and to which a certain proportion of the station police should be annually deputed for temporary instruction. Full advantage of such an institution can of course only be taken by men knowing how to read and write, but the number of literates in the force is believed to be yearly growing, and it is only by men previously trained in a police school that such duties as that of village beat patrol, to which the Lieutenant-Governor attaches great importance, can be efficiently performed. The Inspector-General should apply to the Inspector-General of Police, Burma, for information as to the organisation and working of the patrols in that province and the system of beat patrol.

7. *Working of the Town Police.*—The Inspector-General reports that it is a matter of general complaint that the rate of wage fixed for town chaukidars is too low to attract respectable men. Of 2,043 chaukidars, three receive Rs. 7, 507 Rs. 6, and the rest from Rs. 4 to Rs. 5 per mensem. Mr. Henry says:—"There can be no doubt that the general scale of salary is too low, much below market rates, and that until we offer better terms, we cannot expect to improve the *personnel* of the Town Police." The Lieutenant-Governor will await the separate representation promised on this subject. His Honour is disposed to agree that an increase in the rate of pay now drawn by the bulk of the men is advisable where the wages of labour are higher, but objection may fairly be taken to any increase which would have the effect of bringing the pay of town chaukidars, whose services, as a rule, are only required during the night, to an equality with that of constables. The details of the Bengal Town Police system of patrol were fully explained in circular orders during the year, and instructions were issued to introduce it into the larger towns with such modifications as local conditions might require. The

system has been adopted in certain towns in each Division, and the Inspector-General states that good results are already apparent. In several towns criminals are reported to have been caught red-handed by the men on patrol, and a decrease in crime has been the result. The Inspector-General again comments upon the reluctance of municipalities to assist the police by efficient street lighting or supplying them with oil for their lanterns. This is indeed very short-sighted economy. There has been a net increase of 581 street lamps in the different towns during the past year, but, as in many places the practice is not to light the lamps on what are regarded as moonlight nights, or, when lighted, not to allow them to burn the whole night, the actual benefit to the police is small. Many of the streets and lanes are, moreover, without lamps. Magistrates should keep the matter before the Municipal Commissioners.

8. *Rural Police.*—The number of chaukidars under Act VI of 1870 and Regulation XX of 1817 and of chaukidars holding service lands (chakran) in each of the past four years is shown below:—

Class of chaukidars.	1892.	1893.	1894.	1895.
1	2	3	4	5
Under Act VI of 1870	96,787	101,517	109,870	114,134
„ Regulation XX of 1817, salaried ...	53,665	48,696	41,366	35,069
„ „ „ „ chakran ...	18,629	17,911	17,003	17,063
Total ...	169,081	168,124	168,239	166,266

These figures show that considerable progress has been made in recent years in extending the provisions of Act VI of 1870. Excluding the Chota Nagpur and Orissa Divisions, where Act VI is not in force, the total number of chaukidars not appointed under that Act in 1895 was 36,185, of whom no less than 27,734 are returned from the Burdwan Division alone. From the total figures for the Province, it appears that there is one chaukidar to every 400 of population, while in the Burdwan Division there is one chaukidar to every 188 of population. The extension of the provisions of Act VI in that Division has formed the subject of separate correspondence, and instructions have been issued in the matter to the Commissioner of the Division, with the view of ensuring greater expedition in the work of replacing the service chaukidars by men appointed under the Act. The delay hitherto in giving effect to the orders of Government is far from creditable to the local officers. Elsewhere fair progress has been made, except in the Gaya and Murshidabad districts, where there are still large numbers of chaukidars who have not been brought under Act VI. In the latter district systematic steps are being taken since the close of the year to abolish the chakran chaukidars and replace them by men appointed under Act VI of 1870. The delays in this district have been very reprehensible. The conditions of Orissa are peculiar, and the question of modifying the system of chaukidari administration in that Division has long been under the consideration of the Government. The Lieutenant-Governor has recently received fresh reports and suggestions on the subject in connection with the settlement of the province now proceeding, and it is hoped that the matter will shortly be disposed of. In the Chota Nagpur Division, little progress is reported in the extension of Act V of 1887, but, as the Inspector-General remarks, crime is light in the Division, and the chaukidars are now better paid, and, with the large aboriginal population, it is undesirable to press on changes rapidly. The Commissioner should, as suggested by the Inspector-General, take up at once the question of establishing Chaukidari Reward Funds in all the districts. In the Rajshahi Division, the low rate of pay received by the village watch in some districts is considered by the Inspector-General to impair its efficiency. The matter will be referred to the Commissioner. The inefficiency of the chaukidars in this Division generally is reflected in its very unsatisfactory returns of crime.

9. In last year's report the Inspector-General drew attention to the necessity of appointing circle chaukidars for groups of villages, to supervise the work of

the village chaukidars within the area of their circles and to form a link between them and the executive of the district. This suggestion was approved by Government, and effect is being given to it. In Mymensingh the Magistrate (Mr. Earle) is reported to have taken up the subject with energy, and completely reorganized the chaukidari system on a much improved basis.

10. During the year, a sum of Rs. 15,683 was expended in rewards to chaukidars, against Rs. 12,545 in 1894. Of this amount, Rs. 13,971 were disbursed from the District Chaukidari Reward Funds, against Rs. 6,782 in the previous year, while the unexpended balance of these funds rose from Rs. 33,516 at the close of 1894 to Rs. 58,343 at the end of 1895. These figures show some improvement, but, as Mr. Henry points out, the sums at the disposal of District Superintendents are ample and should be more fully utilised in the judicious distribution of rewards. Neglect to make use of this incentive to good work is an indication of lax supervision. In the Murshidabad, Pabna and Muzaffarpur districts, especially, little attention appears to have been devoted to this subject. "The ordinary chaukidar," the Inspector-General rightly remarks, "cannot look forward to increase of salary or to pension; his one incentive to good work, therefore, is the hope of earning money rewards; and, as District Superintendents now have funds at their disposal from which to finance these rewards, it is much to be regretted that they have not utilized them more." Nearly half of the total amount paid out of the assets of the Reward Fund was distributed in the Dacca Division, where, in this respect, as in other details, chaukidari administration has received careful attention. In the Presidency Division, one chaukidar in every 3 was punished, while only one in 64 was rewarded. This shows little discrimination on the part of the officers concerned. The Lieutenant-Governor is pleased to find no complaint recorded of delay in the payment of chaukidars' salaries, and also to learn that few complaints have been made of chaukidars being employed by the police on menial or degrading duties. The careful attention of Commissioners, Magistrates, and District Superintendents should be given to the remarks and suggestions of the Inspector-General in this section of his report.

11. *Railway Police.*—A net increase of 3 head-constables and 12 constables occurred in the sanctioned strength of the Railway Police, owing chiefly to the extra men enrolled for the new Assam-Bengal Railway, raising the total force from 619 to 634.

12. *Additional Police, Special Constables, and Private Police.*—Additional police were employed in 7 cases during the year, as compared with 11 in 1894. In the Nadia, Murshidabad, Faridpur, Tippera and Darbhanga districts, bodies of extra police were quartered in consequence of agrarian disputes, and in Champaran and Muzaffarpur, on account of certain anti kine-killing disturbances which occurred. In 10 cases, as compared with 22 cases in 1894 and 34 cases in 1893, special police were employed. In the Resolution issued last year, the views of Government in regard to the appointment of special police were stated, but the Lieutenant-Governor notices that in at least three of the cases reported this year, special constables were entertained for periods which appear to have been unduly long. The special constables enrolled in the Darbhanga and Sonthal Parganas districts in 1894 were discharged during the year. Police were supplied at the cost of private persons in 42 cases against 48, and to the extent of 319 men as compared with 457 in 1894. The largest forces were employed at the Sonepur fair and during the Car Festival of Jagannath in Puri.

13. *Military Police.*—The fourth company of Military Police, the formation of which was sanctioned during 1894, took charge of Gnatong in Sikkim during the year, causing an increase of 70 men in the total sanctioned strength. The other three companies at Dacca, Dumka, and Bhagalpur were maintained at their former strength, and are reported to have attained a degree of efficiency creditable to the officers responsible for their control. During the year some further concessions as to pay and allowances were made by Government to render the Military Police service more popular, and the results have been satisfactory. The Lieutenant-Governor is pleased to receive the favourable report which Mr. Henry has been able to make of the general efficiency of these three companies, and of the interest displayed by the officers in their duties. Detachments from the Dumka and Bhagalpur companies were despatched to Bankipore and Motihari during the year in anticipation of possible disturbances in connection with the Bakr-id festival.

14. *District and ordinary reserves.*—The organisation of the District Police Reserves has been completed, and their behaviour on occasions on which they were employed to maintain order in disturbances of a religious or factious nature is reported to have been commendable. They have been completely officered, and have been put through a course of musketry; and the Inspector-General reports them to be everywhere efficient. The ordinary reserves are maintained merely to supply vacancies caused by sickness or leave.

15. *Casualties.*—The following figures show the details of casualties during the past three years:—

		1893.		1894.		1895.	
1.	Retirement on pension or gratuity...	412 or 1·74	per cent.	465 or 1·93	per cent	388 or 1·55	per cent
2.	Resignation	728 „ 3·09	„	889 „ 3·70	„	814 „ 3·31	„
3.	Dismissal	624 „ 2·66	„	615 „ 2·56	„	591 „ 2·40	„
4.	Discharge	220 „ ·93	„	161 „ ·67	„	184 „ ·74	„
5.	Desertion	42 „ ·18	„	47 „ ·19	„	90 „ ·36	„
6.	Death	455 „ 1·93	„	559 „ 2·33	„	521 „ 2·11	„
		2,481 or 10·5	„	2,736 or 11·4	„	2,588 or 10·5	

The percentage of casualties to sanctioned strength was 10·5 during the year, or ·9 per cent. less than during the previous year, and the same as in each of the years 1893 and 1892. The total admissions to hospital numbered 11,277, as compared with 11,571 in 1894, and the average daily percentage of sick fell slightly from 1·5 in the preceding year to 1·4. These figures are satisfactory.

16. *Torture and extortion by the police.*—Fifteen charges of torture were brought against the police during the year—the same number as in 1894. Of these, 12 proved to be false after judicial enquiry, against 10 pronounced false in the preceding year, and in one no evidence was forthcoming. The remaining 2 cases, both of which occurred in the Orissa Division, ended in conviction and punishment. The number of cases of extortion reported fell from 127 to 83, of which 11 only ended in conviction, most of them under section 161 or section 341 of the Penal Code. In five cases compensation was awarded under section 560, Criminal Procedure Code, and in one case the complainant was convicted under section 211 of the Penal Code. Of the total number of extortion cases, 53 were reported from five districts—Mymensingh (24), Dinajpur (8), Bogra (8), Backergunge (7), and Cuttack (6). The Mymensingh district again shows the largest number of cases, but most of them were eventually found to be of a petty nature, and the majority were declared to be false after judicial enquiry. The number of cases in the previous year was 44, most of which were also returned as false, and there appeared to be good reason to believe that something like a combined effort had been made in this district to terrorise the police. That influence seems to have been still at work in the past year. The very small number of charges of torture found to be true, and the decrease in charges of extortion throughout the province, as a whole, indicate an improvement in the working of the police, and the Lieutenant-Governor trusts that, with the better class of officers now introduced into the force, continued improvement will be observed in regard to these complaints in the future.

17. *Punishments.*—The following table shows the number of punishments inflicted on members of the force during the past ten years:—

	Judicial convictions under the Penal Code.			Do. under Act V.			Departmental punishments.		
Year.	Number.	Percentage of officers.	Percentage of men.	Number.	Percentage of officers.	Percentage of men.	Number.	Percentage of officers.	Percentage of men.
1886 ...	318	1·0	1·4	207	·2	1·0	5,095	46·5	17·6
1887 ...	279	·5	1·3	213	·3	1·0	5,137	48·2	17·4
1888 ...	297	1·3	1·3	191	·2	·9	5,149	50·5	17·1
1889 ...	330	1·2	1·4	158	·3	·7	4,997	45·0	17·5
1890 ...	336	1·1	1·5	160	·2	·7	4,828	46·0	16·2
1891 ...	260	·8	1·2	112	·3	·5	4,284	39·2	14·3
1892 ...	245	·7	1·0	120	·1	·5	4,228	41·0	14·0
1893 ...	237	·4	1·0	126	·3	·5	4,853	42·4	16·7
1894 ...	276	·3	1·2	133	·03	·6	4,638	36·7	16·2
1895 ...	248	·4	1·1	98	·1	·4	3,893	28·7	13·7

These figures show that the number of convictions under the Penal Code and Police Act has decreased satisfactorily, while the number of officers and

men departmentally punished is lower than it has been during the past ten years. The percentage of officers punished departmentally fell from 36·7 to 28·7, and that of men from 16·2 to 13·7. In the Resolution recorded last year Sir Charles Elliott gave clear expression to his views on the subject of punishment in the Police Department, and it is satisfactory to observe that the attention which the Inspector-General has given to the question has been productive of good results. "Too much stress," as Mr. Henry says, "cannot be laid upon the injury done by over-frequent punishments; officers and men become callous and sullen, and knowing that there is a record of several punishments against them in their service sheets, have no incentive to mend their ways and do better work." Since the close of the year the Inspector-General has dealt with the subject of degradation as a punishment. He states it has hitherto been the practice for District Superintendents to pass orders of degradation without realising their full meaning, but that they will in future be required to specify the pecuniary fine which such an order represents, and they have been furnished with figures showing the length of time it takes a subordinate officer to pass from one grade to another, which will enable them to calculate the precise pecuniary effect of their orders.

18. *Conduct of the police.*—There can be no doubt that in recent years shortcomings and misconduct on the part of the police have been more promptly and more prominently brought to notice than was the case before. Mr. Henry observes: 'Every adverse comment made by subordinate courts upon the conduct of an investigation is at once brought to the notice of the District Superintendent, who is required to take adequate notice, and make such further enquiry as may seem necessary to enable him to pass appropriate orders. Adverse comments by the superior courts are specially reported through the District Magistrate, Commissioner, and Inspector-General of Police to Government. Full enquiry is made in each case with, hitherto, the almost invariable result of exhibiting conflict of opinion as to the wrong-doing of the officer complained against. These reports demonstrate how difficult it is to gauge motives, and how dangerous it is to draw inferences from even the fairly complete information that is put before a court of justice, when the actual conduct of the Police officer is not the subject of the judicial enquiry, and only comes in as a side issue. With the exception, perhaps, of England and Scotland, there is no European country in which the Police force is not unpopular, and in this Province all that can be said is that its unpopularity is lessening. The Government is making an earnest attempt to secure for Police service, without distinction of caste or creed, the best material available. The terms offered are not very liberal, but they are sufficient to attract young men belonging to a respectable class of native society, and if these prove failures, the blame must rest with the community which supplies them. I may empathically assert that no pressure is put upon officers to obtain evidence by undesirable means. Every police-station in the Province has a copy of the circular in which the head of the department has explicitly warned officers that they will not be judged by statistical results, but are required to work energetically, with rectitude of purpose and by fair means. The complaint against the investigating police is gradually changing form. Fewer charges of corruption are preferred, but on the other hand complaints of their incapacity in detecting crime are more frequent. They are said to be less capable detectives than their predecessors. It appears to me that this latter accusation is not correctly formulated. There is no reason to think that their capacity is less, and admittedly they are better educated; but they cannot hope to be as successful with the criminal classes whom they have to fight with less effective weapons. All the old means of securing confessions and disclosure of *caches* of stolen property, and tutoring witnesses are at a discount. There are few criminals now who have failed to realise that the powers of a Police officer are strictly defined by law, and that if he exceeds them he can be put in the prisoners' dock. The investigating staff in this province is passing through a transition stage, and it would be premature yet to venture an opinion as to the results which the new system of recruitment and the change in working practice will bring about. There is a consensus of opinion that, as an agency for the prevention and suppression of organised disturbances of the peace, the Police have proved efficient, and their conduct on many trying occasions has received the commendation of the

public." Divisional Commissioners have not dwelt much upon the general conduct of the police in their reports, but, on the whole, Sir Alexander Mackenzie is inclined to think that the demerits of the police have been in many instances magnified, and unfavourable examples of their conduct have been given an exaggerated importance. At all events there can no longer be any complaint that full opportunity is not afforded to bring all injustice committed to light. All such complaints should be thoroughly investigated by the superior officers, and punishment should be meted out where it is necessary, but it is at the same time due to the police that persons bringing false charges against them should not be permitted to do so with impunity if it is possible to secure their punishment. In the district of Mymensingh, as already noticed, a combination against the police appears to exist, and 94 formal complaints were made before the Magistrates last year against 74 in 1894. In three cases only under serious sections of the Indian Penal Code were the accused officers found guilty. The great majority of the charges are said to have been of no special importance. The Lieutenant-Governor has recently sanctioned an addition to the number of investigating officers in the district, which will, it is hoped, appreciably relieve the great pressure under which the police have been working for some time in certain stations and ensure more satisfactory work generally.

19. *Inspections.*—The Inspector-General spent 146 days on tour, and the Deputy Inspectors-General 169 and 211 days, respectively; and the head quarters of every district were inspected. In Muzaffarpur and Chittagong the District Superintendents do not appear to have paid sufficient attention to inspection work. In almost all other districts this duty seems to have been duly attended to. The Lieutenant-Governor would be glad if the Inspector-General would in future reports furnish information as to the number of serious crimes in which local investigation was made by the District Superintendent in person. A table might be given for each district under each class of offence in the crime section of the report.

20. *Crime.*—The following table shows the incidence of cognizable crime investigated (excluding cases in which investigation was refused under section 157, Criminal Procedure Code, and nuisance cases) according to Divisions:—

Divisions.	Police	Population.	Cases.		Proportion of police to population.	Proportion of police to cases.		Proportion of cases to population.	
	1895.	1891.	1894.	1895.	1895.	1894.	1895.	1894.	1895.
1	2	3	4	5	6	7	8	9	10
					Policeman. Persons.	Policeman. Cases.	Policeman. Cases.	Case. Persons.	Case. Persons.
Burdwan ...	3,586	7,688,818	10,281	10,080	1 to 2,144	1 to 2·9	1 to 3·0	1 to 747	1 to 703
Presidency ..	3,695	7,853,566	10,549	10,623	1 ,, 2,125	1 ,, 2·9	1 ,, 2·8	1 ,, 744	1 ,, 739
Rajshahi ...	2,704	8,019,187	10,669	11,336	1 ,, 2,965	1 ,, 4·1	1 ,, 4·2	1 ,, 751	1 ,, 707
Dacca ...	2,42	9,844,127	14,119	14,114	1 ,, 4,059	1 ,, 6·2	1 ,, 5·8	1 ,, 697	1 ,, 697
Chittagong	1,136	4,082,795	4,827	4,519	1 ,, 3,594	1 ,, 4·3	1 ,, 3·9	1 ,, 845	1 ,, 903
Patna ...	4,598	16,811,014	19,671	19,226	1 ,, 3,440	1 ,, 4·2	1 ,, 4·1	1 ,, 809	1 ,, 833
Bhagalpur ..	2,209	8,582,490	11,447	10,952	1 ,, 3,885	1 ,, 5·1	1 ,, 4·9	1 ,, 749	1 ,, 783
Orissa ...	1,803	4,047,352	5,476	4,013	1 ,, 2,692	1 ,, 3·6	1 ,, 2·6	1 ,, 739	1 ,, 1,009
Chota Nagpur	1,69	4,028,792	5,708	5,647	1 ,, 2,754	1 ,, 3·4	1 ,, 3·3	1 ,, 816	1 ,, 819

The total number of cases of cognizable crime, excluding cases in which enquiry was refused under section 157, Criminal Procedure Code, and cases of public and local nuisance, was 91,360 as compared with 92,747 in 1894 and 85,962 in 1893. The proportion of police to cases of cognizable crime, it will be seen from the above statement, is lowest in the Dacca Division, where there was in 1895 one policeman to every 5·8 cases, while the proportion for the whole Province was one to every 3·8 cases, and for the rest of the Province (excluding the Dacca Division) one to every 3·6 cases. The proportion of cognizable cases to population was on the other hand higher in this Division than in any other. These results for the Division are mainly due to the figures for Mymensingh, which is under-policed as compared with other districts. Sanction for an increase in the number of investigating officers in the district has been given, as mentioned above.

21. *Police tests.*—The following figures show the working results during the past three years as disclosed from the principal prescribed tests :—

		Percentage of cases investigated to cases reported.	Percentage of cases ending in conviction to cases decided.	Percentage of persons convicted to persons sent up for trial.
1		2	3	4
Classes I to V taken together ...	1893	66	74	59
	1894	66	74	58
	1895	67	74	62
Classes I to VI taken together ...	1893	75	86	75
	1894	75	86	75
	1895	75	85	74

The percentages are almost the same as in the preceding year. Bogra again occupies the lowest place in the list of districts arranged according to working results. On comparison of these figures with those for the North-Western Provinces and Oudh, it appears that the percentage of cases investigated by the police in those Provinces is much smaller than in Bengal, but that the percentage of success in both cases and persons is much higher.

22. *Reported crime of the Province.*—The statement below shows the cognizable and non cognizable crime reported in the Province during the last ten years, with the average price of common rice :—

Year.	Cognizable crime.	Non-cognizable crime.	Total reported crime of the province.	Average price of food-grain (common rice) for the rupee.
1	2	3	4	5
				Seers. Ch.
1886	105,793	112,664	218,457	20 8
1887	101,969	109,254	211,223	21 11½
1888	110,357	112,006	222,363	19 0
1889	119,656	117,407	237,063	15 15
1890	117,443	116,554	233,997	17 7
1891	128,472	119,072	247,544	16 8
1892	146,185	121,624	267,809	13 1
1893	137,898	121,490	259,388	13 11
1894	140,902	118,070	258,972	14 19
1895	136,777	125,685	262,462	16 12

The fluctuations in cognizable crime reported, it will be seen from these figures, bear a remarkable relation to the average price of the chief food-grain of the Province. The slight increase observable in total crime in the past year is due to the larger number of non-cognizable cases reported. Mr. Henry attributes the general increase during the past five years to the better attention given to chaukidari parades, and the fuller use made of the power to decline investigation, which, he says, has encouraged people to report petty occurrences, knowing that these reports will not, as a matter of course, be followed by a police enquiry and the harassment incidental thereto. The orders of Government authorising the police to abstain from enquiry in certain classes of petty cases, passed in the Resolution on the Annual Report for 1890, and repeated more clearly in the Resolution on the Annual Report for the following year, have no doubt had the effect of increasing the number of cognizable crimes reported. During the five years 1886—1890, the average number of cognizable cases reported was 111,044, the average number not enquired into by the

police 4,255, and the percentage of cases not enquired into was 3·8; but during the succeeding period of five years, the average number of cognizable cases reported rose to 138,047, while the average number and percentage of cases not enquired into increased in a very much greater proportion to 14,140 and 10·2 per cent., respectively.

23. The incidence of total crime both cognizable and non-cognizable, according to Divisions, will be seen from the statement below:—

Division.	Population, 1891.	Total crime.	Number of population to each case.	Number of population to each case of cognizable crime.	Number of population to each case of non-cognizable crime.
1	2	3	4	5	6
Burdwan	7,689,818	40,817	188	379	374
Presidency	7,853,566	33,666	233	468	464
Rajshahi	8,019,187	26,196	306	525	734
Dacca	9,844,127	42,094	234	518	429
Chittagong	4,082,795	17,271	236	749	345
Total Bengal ...	37,488,493	160,044	234	487	451
Patna	15,811,014	54,905	311	507	801
Bhagalpur	8,582,490	27,334	314	595	665
Total Bihar ...	24,393,504	78,239	312	535	747
Orissa	4,017,352	11,414	339	662	697
Chota Nagur ...	4,628,792	12,265	377	569	1,120
Grand Total ...	70,558,141	262,462	269	516	561

These statistics show that taking only cognizable crime, the Burdwan Division is the most criminal, and Chittagong the least. Taking non-cognizable crime alone, Chittagong is the most criminal, and Chota Nagpur the least criminal, while taking all classes of cases, cognizable and non-cognizable, the Burdwan Division shows by far the most in proportion to population, and Chota Nagpur the least.

24. *False cases.*—The following table shows the number of cases declared to be false and the result of prosecutions during the past five years:—

	1891.	1892.	1893.	1894.	1895.
1	2	3	4	5	6
Number of cases declared to be false ...	6,631	6,253	6,103	6,634	6,735
Ditto in which prosecution was instituted.	1,025	743	725	695	584
Percentage of prosecutions resulting in conviction.	37·1	33·1	37·2	29·5	33·3

The number of cases declared false has risen slightly as compared with the figures of the preceding year; but while it is somewhat in excess of the average for the previous ten years (6,399), the number of prosecutions has fallen from an average of 1,076 during the decade 1885—94 to 584, or little more than half. Mr. Henry says that many reasons combine to diminish the number of prosecutions, the most important being that the Courts everywhere have as much work to do as they can get through, and are, therefore, unwilling to add to it by undertaking prosecutions in these cases. This consideration no doubt operates to some extent, but the great diminution in these prosecutions indicates that the necessity for proceeding against persons who wilfully and malignantly bring false charges is being generally overlooked, and the subject demands the special attention of the Magistrates. It is satisfactory to observe that the percentage of convictions in the cases which were

tried is better than in 1894; but on comparison of the returns district by district, the percentage both of prosecutions and of convictions is seen to vary greatly. Jessore and Nadia show success in 71 and 54 per cent. respectively of the prosecutions undertaken, while in Dacca, out of 280 cases declared false, only 16 prosecutions were instituted, and only one of these ended in conviction. In Darbhanga 191 cases were declared false, in only 7 of which prosecutions were instituted, and none of these ended in conviction.

25. *Abstention from enquiry in burglary and theft cases.*—In paragraph 20 above, the degree to which the police used their power of refusal to enquire has been noticed. The Inspector-General has, in accordance with the practice followed during the past four years, furnished figures separately for house-breaking and ordinary theft. The returns for 1895 show somewhat less tendency than in the previous years to refuse enquiry, and are to this extent satisfactory, the percentage of burglary cases not enquired into being 28·5, and of theft cases 15·1, as compared with 29·3 per cent. and 16·0 per cent., respectively, in 1894. The difficulty, however, of attaining uniformity of practice on the part of different officers in giving effect to such orders as these is strikingly exemplified by the diversity of the returns from different districts. In Dinajpur, for instance, 41 per cent. of burglaries and 50 per cent. of thefts were not investigated; in Bhagalpur 43 per cent. of burglaries were not investigated, while in Saran and Monghyr in no less than 56 per cent. of such cases no enquiry was made. These figures undoubtedly disclose inefficient supervision, and the Magistrates should look into the matter and see that the action of the police is more carefully watched. Mr. Henry himself is of opinion that too much advantage has been taken of the power of refusal in burglary cases, where the offender may ordinarily be presumed to have had some previous experience in crime, or to have the boldness which is likely to harden him into a professional criminal. The Lieutenant-Governor agrees with him that enquiry is advisable in many of these cases even when the chance of success appears very remote. The contention of many experienced officers which he quotes is sound, namely, that, whether the enquiry proves successful or not, the visit of the police to the spot makes the bad characters realise that the authorities are on the alert, and that they might suffer on a recurrence of crime. It is incumbent on the District Superintendents, therefore, to see that their subordinates do not make it a practice to refuse enquiry in all cases in which success seems hopeless. Especially is it desirable that enquiry should take place when the recurrence of attempts at burglary or reported thefts shows that bad characters are active in any particular locality.

26. *Results of trial, convictions, and acquittals.*—The following table shows the number of persons convicted and acquitted, and the percentage of convictions and acquittals in police cases for the whole Province during the past seven years:—

Year.	Convicted—		Total.	Acquitted—		Total.	Total disposed of.	Percentage of convictions.	Percentage of acquittals.
	By Magistrate.	By Sessions.		By Magistrate.	By Sessions.				
1	2	3	4	5	6	7	8	9	10
1889	60,997	1,318	62,315	32,634	1,305	34,999	103,314	66·1	33·9
1890	68,073	1,230	69,903	33,771	1,041	34,812	104,715	66·8	33·2
1891	73,559	1,463	75,022	34,552	1,223	35,774	110,796	67·7	32·3
1892	84,008	1,668	85,676	34,444	1,348	35,792	121,468	70·5	29·5
1893	79,922	1,463	81,385	32,644	1,100	33,744	115,129	70·7	29·3
1894	76,443	1,364	77,807	32,534	817	33,351	111,158	70·	30·
1895	72,831	1,357	74,188	31,707	1,080	32,787	106,975	69·3	30·7

The highest proportion of convictions is again shown by Howrah, the percentage having risen from 91·2 in 1893 and 93·3 in 1894 to 94·5 in 1895. The only other districts showing more than 80 per cent. of convictions are Darjeeling (85·4), Murshidabad (82·8), and Patna (80·4). Noakhali (53·8), Dinajpur (53·2), and Lohardaga (52·8) stand last.

The results of trials before the Sessions Courts during the year show that 36·3 per cent. of cases tried ended in conviction, and that 55·6 per cent. of persons tried were convicted, as compared with 70·6 and 62·5 per cent., respectively, in 1894. The results in Champaran, Hazaribagh, Cuttack, Balasore, and Noakhali are good, but in Dinajpur, Bankura, Birbhum, Manbhum, Burdwan,

and Mymensingh they are very unfavourable, and lead to the conclusion that proper enquiry was not always made in cases committed to the Sessions. There was a marked improvement in Backergunge, which is attributed in part to the care and interest taken in the prosecution by both the Senior and the Junior Government Pleaders. The Lieutenant-Governor must again call the attention of Magistrates to the remarks made in Sir Charles Elliott's Resolution on the Report for 1893 that "one of the chief causes of the breakdown of cases at the Sessions is the failure on the part of Magistrates to sufficiently realise that it is a duty they owe to the accused to thoroughly sift cases before commitment, carefully scrutinising police diaries, and clearing up discrepancies in cases where the accused are ultimately committed for trial." In important cases more use should be made of the services of the Government Pleader in the Magistrate's Court, and the record of every case committed should always be laid at once before that officer in order that he may have an opportunity of indicating any flaw in the evidence which it might be possible to supplement.

Sir Alexander Mackenzie has found reason to doubt whether the District Magistrates nowadays are sufficiently in touch with their District Superintendents, and police work generally. They seldom themselves try cases, and there is therefore no reason, even on the strictest theory of separation of judicial and executive functions, why they should not control and direct, more actively than they often do, the investigation of serious crime. They are also bound to exercise a close supervision over the work of their subordinate Magistrates of all grades. They can and ought to do this without in any way interfering improperly with the judicial independence of their subordinates in individual cases. But it is their clear duty to point out mistakes in procedure, flaws in judicial enquiries, and inefficiency in dealing with crime of every description. The District Magistrate is, in short, responsible for the whole standard of criminal work in his district, and the returns show that much has to be done in Bengal to bring that standard up to a satisfactory level.

27. The total value of property stolen during the year is returned at Rs. 14,58,618, as compared with Rs. 14,31,191 in 1894, and the percentage recovered as 17·2 against 17·9 in the previous year. These figures are, as the Inspector-General remarks, lamentably low, and compare very unfavourably with those of other Provinces. In 1894, the percentage in the North-Western Provinces and Oudh was 31·47, in the Panjab 37·0, and in Bombay and Sind 44·0. Not only is the percentage extremely low as compared with other Provinces, but it appears to have fallen in a very unsatisfactory manner during the past twenty years in this Province. In 1870-75 it was over 30 per cent. on the average, but since then it has fallen with various fluctuations till it has reached the lowest figure (17·2) during the past year.

28. The subjoined table shows class by class the number of true cases reported during 1894 and each of the seven preceding years :—

Analysis of crime by classes.

True cases.

		1888.	1889.	1890.	1891.	1892.	1893.	1894.	1895.
Class I ...		2,872	2,818	2,874	2,765	2,817	2,843	2,892	2,772
„ II ...		4,622	4,702	4,940	4,824	4,666	4,568	4,794	5,146
„ III ...		25,247	27,824	25,085	28,288	33,325	31,453	34,094	33,570
„ IV ...		2,405	2,384	2,210	2,220	2,268	2,082	2,412	2,627
„ V ...		38,881	41,032	38,078	39,841	44,870	43,098	45,393	41,423
„ VI ...		30,159	33,950	38,439	43,903	51,986	47,748	44,684	38,116

There has been a small increase under classes II and IV; while a considerable decrease has occurred under classes V and VI, chiefly under the serial "Ordinary theft" and "Public and local nuisances."

29. *Class I.—Offences against the State and public tranquillity.*—Offences under this class show a net decrease of 120 cases. Of 132 cases relating to coins, stamps, &c., only 29 were of importance, the remainder being chiefly cases of passing quicksilvered pice. Of these 29 cases, 28 were detected, ending in acquittal or discharge, and 19 in conviction. The most important cases occurred in Khulna, Faridpur, Tippera, Noakhali, and Monghyr, all of which ended in conviction, and one in Jalpaiguri, which was pending before the Sessions at the close of the year. The Inspector-General believes that false coining continues in Dacca, Mymensingh, Tippera, Khulna, and Noakhali, while a number of spurious coins discovered in the Cuttack Treasury indicate that

counterfeiting is being carried on in that district as well. Vigorous efforts must be made to trace the parties concerned in these offences.

The number of cases of rioting fell from 2,337 to 2,229, the Burdwan and Chota Nagpur Divisions alone showing an increase. There has been very little fluctuation in the figures under this heading during the past 10 years. Several important cases of rioting occurred in the Hooghly, 24-Parganas, and Howrah districts, in which the mill employés were concerned. The gradual increase of industrial centres along both banks of the Hooghly and the outbreak of these disturbances called for the adoption of further measures for police protection; and as a result of an enquiry made by the Inspector-General in conference with the Indian Jute Manufactures Association, Government sanctioned an additional police establishment for the riverine municipalities. The Dacca Division, as usual, shows much the largest number of rioting cases, but there is a satisfactory decrease from the figures of the preceding year, due to a great falling off in Mymensingh, where rioting cases fell from 204 in 1894 to 95. The following districts of Eastern Bengal, in which agrarian disputes resulting in violence have long been most prevalent, show the largest number of cases attended with loss of life:—Faridpur (11), Khulna (10), Backergunge (7), Mymensingh (7), and Dacca (6). In the district of Mymensingh no less than 4,196 persons were bound down to keep the peace, as compared with 1,090 in 1894. These measures appear to account for the great reduction in cases of rioting, but they can have at best but a temporary effect, and do not prevent the recrudescence of agrarian disputes. The Lieutenant-Governor agrees with the Inspector-General that in most cases information regarding pending riots ought to be more generally forthcoming than is now the case, and Magistrates must use effectively the powers given them by law, and insist on landholders and their agents and on panchayats and chaukidars doing their duty. It is also important, as Mr. Henry points out, after the original case is disposed of, to persevere in following up persons implicated who abscond and are not arrested at first. It was represented to His Honour on tour that the provisions of section 145, Criminal Procedure Code, are not sufficient to enable Magistrates to deal with the most common causes of riots in the Eastern districts, where a valuable *char* becomes the subject of dispute between rival claimants, neither of whom can establish the fact of actual possession. It was urged that the Magistrate should have power after summary enquiry to put one or other of the contending parties in possession. This is a point which may well be considered in connection with the revision of the Code.

30. *Class II.—Serious offences against the person.*—An increase of 352 true cases occurred in this class, chiefly under the head "Hurt by dangerous weapon." Of 7,106 persons sent up for trial, 1,123 were committed to the Sessions Courts, 50·8 per cent. of whom were convicted, as compared with 56·5 per cent. in 1894. The number of true cases of murder rose from 362 to 389, while the percentage of convictions to persons tried fell from 25·5 in 1893 and 20·7 in 1894 to 18·0. Of 365 cases of murder returned as true by the police, 231 were detected, and 118 undetected, and in 16 the murderers committed suicide. Of the 231 cases sent up for trial, 176 were committed to the Sessions, 79 ending in conviction and 81 in acquittal. The percentage of cases ending in conviction to cases tried at the Sessions was 38·3 against 37·9 in 1894, and the percentage of persons convicted to persons tried 44·7, against 35·9.

Of the 5,146 true cases reported during the year under this class of crime, no fewer than 1,358, or more than one-fourth, are returned from the Dacca Division, the majority of these again occurring in the districts of Backergunge (480) and Mymensingh (429). Mr. Henry dwells at some length in his report upon the marked increase of murders in recent years in the Backergunge district, where in 1894 there were 63 true cases, 13 being by gunshot, and in 1895, 73 true cases, 22 of which were by gunshot. Of these 73 cases, the police failed to detect 38; but of the latter, 21 were gunshot assassinations committed at night and under circumstances which in the opinion of the Inspector-General precluded the possibility of successful investigation, unless the residents of the neighbourhood had co-operated vigorously. The condition of this district has engaged the anxious attention of the Government for some time. In October last, the late Lieutenant-Governor sanctioned the addition of four Inspectors to the investigating staff in the hope that a marked improvement would

result in the detection of the numerous murders, especially those by gunshot, but no appreciable success has been attained, and measures of a stringent character have become indispensable. No less than 50 murders have been committed in the past half-year, of which 12 were by gunshot. The Lieutenant-Governor fully enquired into the situation and conferred with the local officers recently, and he is satisfied that the withdrawal of all licenses for guns and for the sale of ammunition, and the adoption of other steps which will tend to secure the co-operation of the landholders and other classes with the authorities, are the measures most likely to have speedy effect in suppressing this very serious outbreak of homicidal crime. It is, at any rate, necessary that they should be tried. The use of guns at night during the past few years appears to be mainly due to the immunity which it affords from detection, and the conviction of a few offenders will doubtless have the best deterrent effect. There can be no doubt that the judicial immunity which has followed on murder in Backergunge has been the chief cause of its increase. A copy of the Lieutenant-Governor's orders in regard to Backergunge is attached to this Resolution. The results generally in murder cases are, as the Inspector-General remarks, worse in Bengal than in any other Province of India. "To what extent" (Mr. Henry writes) "responsibility for this state of things should be divided between the police, Magistrates, Judges, and the general public who, through lack of public spirit or dread of reprisals, either do not assist, or thwart the executive in their endeavours to bring murderers to justice, it is not easy to determine. Coincident with a gradual increase of murders in this Province there has been a decrease in the number of capital sentences carried into effect, the figures for the five years ending 1895 being 37, 32, 30, 20 and 11, respectively." The Lieutenant-Governor would suggest that some good might result from placing a selected Inspector or Sub-Inspector on special detective duty, to work out any serious case that presented at the outset exceptional difficulty, relieving him of all other duty and rewarding liberally successful detection. Experience does not warrant recourse to the device of a central detective establishment: but every District Magistrate and Superintendent should endeavour to stimulate and develop detective ability among the local investigating staff. For the rest, closer supervision by the superior staff, Police and Magistracy, and more careful enquiry in the Committing Court, must be constantly kept in view.

Of 14 persons sent up for trial in drugging cases during the year, 7 were convicted. The Inspector-General refers to one case in which the accused, an old offender, was identified through the medium of anthropometry, and was convicted in three cases in Dacca, receiving a cumulative sentence of eight years' imprisonment, and was under trial at the close of the year before the Sessions Court at Darbhanga on a similar charge of drugging at Samastipur in that district. Three cases occurred of murder by dacoits, the worst being one reported from the Purnea district, in which dacoits to the number of 40 or 50 burnt their victim to death with the object, probably, of forcing him to disclose where his property lay concealed. No satisfactory evidence was obtainable, and the case fell through.

31. *Class III.—Serious offences against property.*—This class shows a net decrease of 524 cases, due to the smaller number of cases of lurking house-trespass and house-breaking. The only important increase was under the head "Serious mischief and cognate offences." The number of cases of dacoity rose from 236 to 260. Of these, the police detected and sent up for trial 102 cases with 546 persons. The percentage of cases ending in conviction and persons convicted to cases and persons tried are the best on record, being 65·6 and 52·3, respectively, against 63·9 and 47·7 in 1894, and 48·6 and 36·7 in 1893. Although the number of persons convicted of dacoity during the five years ending 1895 is larger than the total number convicted during the decade ending 1890, the crime appears to be steadily increasing, and, with the exception of the year 1892, has reached a higher figure than in any year since the year 1874. Part of the increase, however, is probably due to the inclusion under this class of many offences which are not really of a very serious character, but are technically "dacoity" because committed by five or more persons. The Lieutenant-Governor fears that there is truth in the theory that the lenient sentences passed nowadays in dacoity cases have something to say

to the increase of this crime. Crime is naturally and equally stimulated when convictions cease to be secured and when sentences cease to be deterrent. During the year three cases under section 400, Indian Penal Code, were instituted against some 80 persons for being habitually associated to commit dacoity, and one case has been disposed of since the close of the year, 20 accused being sentenced to transportation for life. The Inspector-General describes the special measures which have been taken for dealing with this crime, and they appear to the Lieutenant-Governor judicious and useful. They should be strictly adhered to by all officers concerned. The districts from which most true dacoities are reported are—Midnapore and Gaya (20 each), Bogra (18), Pabna (17), Purnea (16), Backergunge (13), and Hooghly (12).

The total number of cases of robbery was 238, against 225 in 1894 and 184 in 1893. This crime also has increased considerably during the last five years, and in the past year has reached a higher figure than it has done since 1874. The Patna Division returns the largest number of cases (41), and then come Dacca and Rajshahi (32 each). Mischief by fire accounts for 561 true casest against 458 in 1894 and an average of 391 during the ten years 1885—94. It does not appear from the report in what districts the increase chiefly occurred.

32. *Class IV.—Minor offences against the person.*—The number of true cases in this class fell from 2,412 to 2,387. The largest number of cases is reported from the Dacca Division, and the smallest from Orissa. The percentage of persons convicted to persons brought to trial was 27·4 against 27·6 in 1894, the best results being obtained in the Chittagong Division and the worst in the Patna Division.

33. *Class V.—Minor offences against property.*—A decrease of 4,808 true cases is shown under this class, chiefly under ordinary theft (3,227) and lurking house-trespass, &c. (869). Of house-breaking cases, the police detected rather less than 10 per cent., and under 5 per cent. ended in conviction. In theft cases some 27 per cent. of those reported were prosecuted to conviction. Of the total number of true burglary cases reported (31,972), 9,427, or more than one-fourth, are returned from the Patna Division, where this crime continues to be more prevalent than elsewhere, owing no doubt to the congested population and the hereditary proclivities of certain castes which are most largely represented in that Division. While the number of cases reported in the Division decreased, the percentages of persons and cases convicted were lower than in the previous year. The results in the Rajshahi Division are again the worst in the province. Mr. Henry ascribes this partly to inefficient police administration, especially in the districts of Dinajpur, Bogra, and Pabna, and partly to the unsatisfactory condition of the village watch. The attention of the local officers will be drawn to these remarks.

True cases of ordinary theft fell from 30,453 to 27,226. Including cattle theft, the number of cases reported was 32,276 against 35,423 in 1894, and the percentage of convictions to cases reported fell from 26·2 to 23·7.

34. *Class VI.—All other cases.*—The total number of cases under this class was 44,851, or very nearly the same as last year. The number of bad-livelihood cases increased from 2,806 to 3,289. Judicial results were satisfactory, 76 per cent. of the cases decided ending in security being demanded, as compared with 76·5 per cent. and 72 per cent. in 1894 and 1893 respectively. More than half the total number of cases were instituted in the Patna and Dacca Divisions. In Murshidabad, Pabna, Dacca, Tippera, and Noakhali great delay occurred in the disposal of these cases. The Government has on previous occasions drawn attention to the results of such delay, and the Lieutenant-Governor expects the cases to be more expeditiously dealt with in future. His Honour also considers that a larger proportion of the cases should be enquired into in the villages of the accused. The Patna Division especially shows badly in this respect. An excellent effect is produced on the bad characters when these enquiries are made locally by the District and Subdivisional Magistrates in the course of their tours. In the Rajshahi Division, where the total number of cases of burglary (including attempts) and theft reported was only exceeded by that in the Patna Division, sufficient recourse was evidently not had to the preventive sections of the law. In Jalpaiguri and Pabna the results are particularly bad, only 14 and 20 prosecutions for bad livelihood having been instituted, respectively, and of these only 5 and 7 ended in conviction. There

can be no doubt that section 110 of the present Criminal Procedure Code is defective in the omission from its purview of the dangerous characters whose cases were met by sections 505 and 506 of the Code of 1872. The number of persons shown on the registers as under surveillance at the close of the year was 42,080 as compared with 40,773 at the close of the previous year.

35. *Railway Police.*—The number of cognizable and non-cognizable cases reported during the year was 3,575 against 3,390 in 1894. Of 3,076 persons sent up for trial, 2,699, or 87·7 per cent., were convicted, against 85·0 per cent. in the previous year. In cognizable cases 85·3 per cent. of persons tried were convicted, against 84·9 per cent. in 1894. These results are very satisfactory and reflect credit upon the working of the Railway Police. There were 388 accidents with 214 deaths, as compared with 380 and 196, respectively, in 1894. True cases of obstruction numbered 33 against 25 in 1894 and 31 in 1893: 17 cases were sent up for trial, of which 13 ended in conviction. Most of these cases are reported to have been petty. One serious case which occurred in 1894 was successfully detected during the year, and the accused was sentenced to transportation for life.

36. *Working of the Arms Act.*—The orders passed by this Government in 1894 to facilitate the renewal of licenses are shown to have worked well in the Dacca Division. During the year, instructions were issued directing that all guns for which licenses were granted should be marked by punching consecutive numbers on the stocks to enable identification. Attention should be constantly given in all districts to the systematic working of the Act in accordance with these orders and instructions. The returns received would show that diversity of practice exists. Prosecutions were more resorted to during the year, the number of persons fined for breaches of the Act, including the figures for Calcutta, having risen from 1,276 to 2,308, more than half of this number being returned from the three districts, Purnea, Mymensingh, and Rangpur. The Lieutenant-Governor is not sure that judgment has always been shown in ordering prosecutions. Compliance with the law and rules must be insisted on, but it should ordinarily be sufficient to deal with petty omissions, such as neglect to apply in time for renewal of licenses, by a few prosecutions as a warning to licensees generally. In the Backergunge district 11 sentences of imprisonment were passed, against 25 in the preceding year. The increase in gun-shot murders in this district during recent years has rendered severe measures imperative.

37. *Non-cognizable crime.*—The total non-cognizable crime under the several classes for the year 1895 is compared with that of the previous year in the following table:—

	Number of cases.		Increase.	Decrease.
	1894.	1895.		
Class I ...	9,239	9,665	426	...
„ II ...	31	28	...	3
„ III ...	898	882	...	16
„ IV ...	54,825	59,361	4,536	...
„ V ...	10,677	10,369	...	308
„ VI ...	13,996	14,312	816	...
Special laws ...	28,404	31,068	2,664	...
Total ...	118,070	126,685	7,942	327
		Net increase	7,615	

There has been a net increase of 7,615 cases, chiefly under Class IV and "Special laws." Under the former the increase is in "Criminal force" (3,115) and "Voluntarily causing hurt" (1,457). The police were employed in 4·2 per cent. of non-cognizable cases, against 5·0 per cent. in 1894. Of 87,321 persons actually tried during the year, 50,780, or 58·2 per cent., were convicted, and 36,541, or 41·8 per cent., acquitted. The worst results are shown in the Orissa and Chota Nagpur Divisions, where the number of acquittals exceeded the number of convictions. In the Patna Division there has been an improvement over the figures of the preceding year, but in Champaran and Muzaffarpur acquittals again preponderate. The preponderance of acquittals indicates, as a general rule, insufficient care in examining the complainants for the purpose of eliciting the true facts, and, in consequence, the improper issue

of process against the accused; and it is not, therefore, creditable to the Magistrates concerned. In the following districts less than 70 per cent. of persons summoned actually appeared:—Noakhali (69·8), Birbhum (66·8), Murshidabad (65·2), Dacca (65 2), Purnea (61·3), and Tippera (55·3.)

38. *Remands.*—The following table shows the percentage of remands in Magistrates' Courts in police cases sent up for trial during the past three years:—

	Percentage of cases disposed of at first hearing.	Percentage of cases remanded once.	Percentage of cases remanded twice.	Percentage of cases remanded thrice.	Percentage of cases remanded four times.	Percentage of cases remanded five times.	Percentage of cases remanded six times.	Percentage of cases remanded more than six times.	Pending.
1	2	3	4	5	6	7	8	9	10
1893	30·8	24·5	15·8	9·1	5·3	2·6	1·3	1·8	2·4
1894	35·7	24·1	15·0	9 4	5·5	3·1	1·8	2·1	2·8
1895	34·8	22·4	15·1	9·0	6 0	3·5	2·2	3 0	2·7

The Lieutenant-Governor regrets to notice a steady decrease during the past three years in the number of cases disposed of at the first two hearings. The worst returns in this respect are from the Shahabad, Rangpur, Backergunge, Monghyr, and Lohardaga districts, in all of which the percentage of cases disposed of at the first two hearings was under 40. The Darjeeling and Hooghly districts again show the best returns, with over 86·2 and 84·3 per cent. of cases disposed of at the first two hearings. The general percentage for the province has fallen from 59 8 to 57·3. This matter of remands is one of those points in which the supervision of the District Magistrate over the work of his subordinates should be unremitting. The Inspector-General draws attention to a difference of practice in registering remands; some officers considering that when a case goes on *de die in diem* for several days there is no remand until it is adjourned over a specific period to some future date. On the whole, the Lieutenant-Governor thinks it safest, looking to the character of most cases, to treat each day under trial after the first as a remand, explanation being given of the number of cases which were tried on consecutive days. The percentage of previous convictions proved against persons convicted under Chapter XVII of the Penal Code has risen slightly from 9·9 to 10·0 per cent. Excluding Calcutta Police and Railway Police figures, 159 previous convictions were established by means of anthropometry against 110 in 1894.

39. *Anthropometry.*—During the year 1895 the Central Police Office was able to furnish the criminal history of 207 ex-convicts whom the local police had failed to identify. Of these successful cases, 1 was from Assam, 44 from the area under the jurisdiction of the Commissioner of Police, Calcutta, and 162 from the districts of Bengal. Of 641 persons in Bengal districts whom the local police were unable to identify after full enquiry, 162, or 25 per cent., were recognised by means of anthropometry. During 1894 the total number of persons identified by this means was 143, or 21 per cent. of the total number registered as unidentified, and during 1895 it was 207, or 27 per cent. These figures afford further testimony of the success with which the system has been worked in this province. Mr. Henry anticipates that the substitution of finger impressions for measurements, if a satisfactory system of classifying them could be devised, would yield even better results, and the subject is receiving his attention. He has since the close of the year issued a circular, illustrated by diagrams, explaining the details of the patterns which appear in finger impressions, with instructions for their decipherment.

40. *Character of Officers.*—The Inspector General again records his obligations to Messrs. Giles and Pratt, the Deputy Inspectors-General, for the zeal and energy with which they performed their duties during the year. Of Mr. Showers, his Personal Assistant, Mr. Henry also again speaks very highly. The names of the District Superintendents, Assistant Superintendents and Inspectors favourably mentioned in paragraph 41 of the report will be noted in the

Appointment Department. The thanks of Government are due to Mr. Henry himself for his zealous and efficient administration of the department during the year.

ORDER.—Ordered that copies of this Resolution be forwarded to the Inspector-General of Police, the Commissioner of Police, Calcutta, and to all Commissioners of Divisions, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Offg. Chief Secretary to the Govt. of Bengal.

No. 4770J., dated Calcutta, the 22nd August 1896.

From—C. W. BOLTON, Esq., Offg. Chief Secretary to the Government of Bengal,
To—The Commissioner of the Dacca Division.

I AM directed to acknowledge the receipt of your letter No. A, dated the 8th instant, reporting on the subject of the murders in Backergunge, which has for some time past engaged the anxious attention of the Government. You submit copies of reports from the Magistrate of the district and the District Superintendent of Police, with statements showing the number of gun-shot and other murders committed in the past half-year and how the cases had been dealt with up to the end of that period, and furnishing particulars on other points. The Lieutenant-Governor visited Barisal recently, the chief object of his visit being to confer with yourself and the local officers on the great increase of murders in the district; and the decisions arrived at on various matters discussed at the conference held on the 7th instant will be noted in the following observations and orders, which I am now to communicate to you.

2. The Lieutenant-Governor has read with interest Mr. Beatson Bell's account of crime in Backergunge. He agrees with you that neither the spread of education, nor the introduction of the Tenancy Act, nor the suppression of rioting, will account for the present epidemic of murder. The district has, as Mr. Bell shows, always been notorious for its lawlessness, and there can be little doubt that it is the impunity which has of late years unfortunately attended the commission of serious crime that has been the chief cause of the present state of things.

3. The Lieutenant-Governor regrets to find that there are as yet few or no signs of improvement. An analysis of the statement of murders committed in the past half-year gives the following results:—

MURDERS IN WHICH GUNS WERE USED.

Connected with riot—

1 case. In this case the accused persons were sent up by the police under section 326, Indian Penal Code (voluntarily causing grievous hurt by a dangerous weapon), but were discharged by the Magistrate.

Unconnected with riots—

11 cases. In six cases the police obtained no evidence. In the remaining five accused persons were sent up. They were discharged by the Magistrate in two cases, and in three they were committed to the Sessions. It is understood that in one case the accused has since been convicted and sentenced to death, and that the sentence awaits the confirmation of the High Court. The other cases are pending.

MURDERS IN WHICH GUNS WERE NOT USED.

Connected with riots—

9 cases. In two cases the investigations had not been completed by the police. In the remaining cases accused persons were sent up, and they were all committed to the Sessions. There was a conviction by the Judge in one case under sections 147, 148, and 326, Indian Penal Code, and the other cases were

Unconnected with riots—

29 cases. One case was still under investigation by the police. In six cases no evidence was obtained. Accused persons were sent up in the remaining 22 cases, but were discharged by the Magistrate in three cases. Nineteen cases were committed to the Sessions, five of which were disposed of within the half-year, the accused being convicted in two and acquitted in three. Fourteen cases remained pending.

It appears that there were also 10 attempts to murder with guns, but particulars of those cases have not been furnished. The motive for the majority of the murders is found in land disputes and quarrels about women.

The number of cases pending before the Sessions at the close of the half-year was large, this being partly attributable to the temporary absence of the Additional Judge at Dacca, where his services were required, but the Lieutenant-Governor was informed that many cases have since been disposed of at Barisal, and that the two Judges expect to finish the rest by the end of September. A report of the result of the trials should then be submitted.

4. Compared with the figures for the year 1895, the number of gunshot murders in the half-year shows a decrease of 5. The number of attempts to murder with guns also fell off by 2. The decrease under both heads is satisfactory, but the number of cases was still very great, and it would be unwise to assume that the tendency to diminish will continue. The number of other murders, again, was very large, and the total of all murders (including gunshot) rose to 50 for the half-year against 73 for the entire year 1895. These figures bear deplorable evidence of the slight regard for human life which exists in the lower classes of the population, and of the state of terror which must prevail in certain parts, if not throughout the district. Crimes of violence have always been very common in Backergunge, and the number of murders committed has at various times led to proposals for special measures, including the disarming of the district. The present increase of murders is perhaps more serious than any on record, and the use of guns within recent years is a feature which seriously aggravates the situation. It would seem that this weapon has been resorted to as affording at night the best chance of escape from detection. In such cases evidence is rarely procurable, and in the very few cases in which convictions have been obtained the accused have been acquitted on appeal. Save in the two cases mentioned by the District Superintendent, no assistance has been received from the landholders and their servants or the people generally. The people have not manifested that readiness to co-operate with the authorities which the Government has the right to expect and which would have been so helpful. The appointment of Special Inspectors to the district has been attended with some degree of success, especially in the imprisonment of bad characters, but the Lieutenant-Governor is satisfied that the very serious state of things still prevailing demands further and more stringent action.

5. After the fullest consideration His Honour has been constrained to accept the view, which you support, that all licenses for firearms now current in the district should be recalled and cancelled. In one case, at least, a licensed gun was found to have been used for committing a murder, and it is probable that such guns have been used in other cases. The withdrawal of all licenses will, it is anticipated, simplify the detection of guns which are at present held, it is believed in large numbers, without license. The measure has been strongly urged by the Inspector-General of Police and other authorities, and the Lieutenant-Governor considers that the time has come to give it a fair trial. It is obviously necessary to withdraw also licenses for the sale or repair of firearms and for the sale of ammunition. A notification under section 8 of the Indian Arms Act, XI of 1878, will accordingly be issued, with effect from the 1st September. The Magistrate of the district will, with reference to section 16, fix such time as may be necessary for the depositing of the guns at the nearest police-station. When all have been deposited, the arms should be brought into Barisal and there stored, arrangement being made for keeping them clean and safe from damage. You suggest that licenses may be allowed for guns which are kept at zamindars' cutcherries for self-defence and for forwarding treasure from place to place. The Lieutenant-Governor thinks it

unnecessary to allow any such exception. It will suffice if cutcherry and treasure guards are armed with swords and spears. The cancellation of licenses will not, it must be remembered, affect the exemptions under the rules in force. It is desirable, however, that some guns should be allowed for protection against wild animals. For this purpore it was decided at the conference, as a condition attaching to the withdrawal of licenses, that, if practicable, Government rifles with suitable ammunition, being of a kind that could not be supplemented by private purchase, should be supplied to the collecting members of the Chaukidari Panchayets under the conditions proposed by the Magistrate in his report. You recommend also that licenses for the manufacture of fireworks be withdrawn on the ground that they provide facilities for the supply of gunpowder. These licenses have, it is assumed, been granted under the Indian Explosives' Act IV of 1884, and a notification under section 18 of the Indian Arms Act would not apply to them. I am to request that a further report may be submitted on the question of withdrawing them. It should be considered whether they might not be granted for special occasions, under restrictions which will prevent any gunpowder passing into other hands than those of the manufacturer.

6. The other measures which you propose are that the regular police of the district should be strengthened, that more Muhammadan officers should be employed for the investigation of crime, and more boats should be supplied, that the patrols should be better organised, and that the rural police should be increased to the maximum statutory number. It was decided at the conference that the Inspector-General of Police should be requested to reconsider the whole question of patrols and of supplying boats to the police, and that the Magistrate of the district should be authorised to raise the number of chaukidars to the maximum, especially in those villages in which serious crime has occurred. The Magistrate should be informed that he is at liberty to take such action whenever he deems it necessary. The question of increasing the regular police and having more Muhammadan investigating officers will be referred to the Inspector-General of Police for report. The Lieutenant Governor observes, however, that in September last both Mr. Ryland and Mr. Henry were of opinion that the police force was adequate and the number of investigating officers has since then been greatly strengthened. The attention of the Inspector-General of Police will be also drawn to the extraordinary increase in reported serious crime of all kinds, and he will be desired to submit his remarks on the subject. The Government cannot at present undertake operations, as suggested by Mr. Bell, under section 112 of the Tenancy Act, nor is the Lieutenant-Governor satisfied that they are called for, or would be effectual in stopping homicides.

7. It was further decided at the conference that punchayets and chaukidars should have persistent pressure brought to bear upon them to induce or compel them to perform the duties imposed on them by the law, and that those rendering material assistance to the police in the detection of crime should be liberally rewarded, and that zamindars who assist the police should be thanked by special letter. These decisions should be acted upon. The zamindars can be formally thanked by the Magistrate of the district, and in the more conspicuous cases by yourself, all such instances being reported periodically for the information of Government. It was further decided that a circular notice to the zamindars and their principal servants should be prepared, intimating that the lawlessness prevailing in the district is receiving the serious attention of the Government, calling on them to give to the Magistrates and the police all assistance possible to facilitate the detection of crime and the conviction of offenders, and warning them, that, unless such assistance is received, it may become necessary to adopt further measures of an exceptional and very stringent character for the suppression of crime. This circular will be in the vernacular and will bear the Chief Secretary's signature. Copies will shortly be forwarded for issue by the Magistrate in cases where this appears to him desirable.

8. The Lieutenant-Governor has above stated that he concurs in the view that the chief cause of the rapid increase of murders in the district has been the judicial impunity which has attended their commission. No doubt

this has been due in large measure to the inadequacy of the police investigation; but it is the duty of the Magistracy to correct this as far as practicable, and to see that all available evidence is supplied, and commitments to the Sessions made in a complete and satisfactory form. To this end it would seem to be desirable to employ the Government Pleaders more freely in the lower Courts. Any professional assistance that may be required to enable them to undertake this duty will be sanctioned on your recommendation. One probable cause of the failure of cases at Sessions has been the long delays between commitments and trial; but, as stated in paragraph 3 above, it is hoped that these will not recur. If, however, there is the same failure of justice in the future, as has unfortunately been the case in the past, it will be a question whether power should not be taken to appoint a special Commission to deal finally with these offences on the spot while the evidence is fresh, and to give it the powers required to enable it to stamp out such crimes. It may also be necessary to adopt those provisions of the Burma Village Acts which make the community responsible for undetected crime and for failure to assist the police in its detection and suppression. An early opportunity will be taken of urging upon the Government of India the amendment of section 110 of the Criminal Procedure Code, with a view to restore the power of the Magistracy of dealing preventively with "dangerous characters" and "village ruffians" known and recognised as such by their neighbours. Meantime the District Magistrate must make the best use he can of the powers given him by the law as it stands. He must closely supervise and direct the work of the police, and give as much of his personal attention as practicable to the suppression of crime and restoration of order. The Lieutenant Governor is satisfied that both Mr. Beatson Bell and Mr. Ryland are fully alive to their responsibilities and doing their best.

9. I am to request that a further report similar to the present one may be submitted for the entire year as early as possible after the end of December next, and that in the meantime the action taken upon the orders now issued may in due course be reported.

WORKING OF THE LICENSED WAREHOUSE AND FIRE-BRIGADE ACT I OF 1893, IN THE HOWRAH MUNICIPALITY DURING THE YEAR 1895-96.

No. 3774M., the 1st September 1896.—The following report is published for general information, in accordance with the provisions of section 41 of the Licensed Warehouse and Fire-Brigade Act, I of 1893.

H. H. RISLEY,

Secretary to the Government of Bengal.

No. 632M., dated Burdwan, the 24th August 1896.

From—G. STEVENSON, Esq., Offg. Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit a printed copy of the Annual Report on the working of the Jute Warehouse and Fire Brigade Acts within the Howrah Municipality during the year 1895-96.

ANNUAL REPORT FOR 1895-96 UNDER THE LICENSED WAREHOUSE AND FIRE-BRIGADE ACTS, IV AND I OF 1883 AND 1893, RESPECTIVELY.

No. 676, dated Howrah, the 10th August 1896.

From—H. F. T. MAGUIRE, Esq., Chairman, Howrah Municipality,
To—The Magistrate of Howrah.

I HAVE the honour to report that 319 warehouses were licensed in 1895-96 as against 283 in the previous year—

	1894-95.	1895-96.
Jute	24	29
Cotton	41	36
Straw	80	85
Wood	136	167
Rag	1	1
Hay	1	1
Total ...	283	319

2. The income from license-fees on these warehouses for the year under report amounted to Rs. 4,230, and Rs. 180 were collected on account of arrears for 1894-95. Appendix A gives the collections under these heads, and Appendix B is a detailed statement of the licensed Cotton and Jute warehouses.

3. Similar details of the 254 warehouses licensed for the storage of straw, wood, rags, and hay, owing to their comparative unimportance, are not given. These warehouses, previous to the year 1893-94, were licensed under section 261 of Act III (B.C.) of 1884, but in July 1893 were brought under the provisions of Act I (B.C.) of 1893.

4. The amount of fines from prosecutions instituted during the year under section 14 of the new Act was Rs. 408 as against Rs. 24 in the previous year.

5. The expenditure incurred in assessing and collecting the license-fees amounted to Rs. 822-12-3.

	Rs.	A.	P.
(1) Salary of General Supervisor and Assessor ...	579	7	3
(2) Ditto Clerk	240	0	0
(3) Contingencies	3	5	0
Total ...	822	12	3

6. The Fire-brigade establishment, as hitherto, remained under the control of the Commissioner of Police, Calcutta. The Fire-brigade station in Howrah is most centrally situated, standing next to the Municipal Market, and from a platform raised over it the whole town can be overlooked. There were seven fires during the year, the details of which are given in Appendix C, and besides these there were ten other petty fires, at eight of which the fire-brigade attended. Two were extinguished by the residents of the localities. The average value of property destroyed at each of these fires was Rs. 17.

7. The total amount remitted to the Commissioner of Police, Calcutta, during the year was Rs. 3,954.

APPENDIX C.

Statement showing the value of property destroyed by fires which occurred in Howrah during the year 1895-96.

1	2	3	4	5	6
Number.	Date.	Locality.	Duration of fires.	Approximate value of property destroyed.	Remarks showing nature of damage done, &c.
				Rs.	
1	3rd July 1895 ...	Bataitala, Shibpur	1 hour and 30 minutes ...	50	1 thatched hut, not insured.
2	19th November ,, ...	Old Ghusri Road	6 hours and 15 ,, ...	60	2 hay stacks, insured.
3	20th December ,, ...	Bamungachhi, Golabari	1 hour and 20 ,, ...	60	3 golpatta huts, not insured.
4	22nd ,, ...	Shibpur	2 hours	50	Ditto ditto.
5	21st January 1896 ...	Guzdar's Jute Press	13 ,, and 40 minutes ...	60,000	2 tiled sheds and 1 corrugated godown, 2,000 bales of jute cuttings and 500 bales of jute. Insured for Rs. 60,000.
6	1st March ,, ...	Babudanga Lane, Ghusri ...	2 ,, and 20 ,, ...	2,000	2 golpatta sheds and 6 golpatta huts with property, not insured.
7	25th ,, ,, ...	Mallik's Lane, Howrah	1 hour and 35 ,, ...	300	5 golpatta and 1 tiled huts with property, not insured.
			Total ...	62,520	

In addition to the above statement there were 10 other petty fires, at eight of which the Fire-brigade attended. Two were extinguished by the residents of the localities. The average value of property destroyed at each of these fires was Rs. 17.

CALCUTTA,
The 30th July 1896.

H. PAGET,
Deputy Commissioner of Police.

WEATHER AND CROP REPORT.

For the week ending the 31st August, 1896.

Burdwan.—Rainfall at Sadar 2·87, Kalna 0·75, Katwa 1·43, Raniganj 0·46. Weather hot. No good rain during the week. More rain is required for the *aman* crop. Harvesting of *aus* is being carried on and *aman* is being transplanted. Jute and sugarcane are doing well. Condition of cattle good. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	c.	
Sadar	11 to 15	0	per rupee.
Kalna	12 to 13	0	
Katwa	12	14	
Raniganj	13	8	

Midnapore.—Rainfall at Sadar 0·77, Contai 0·23, Tamluk 1·05, Ghatal 0·90. Weather seasonable. Transplantation of paddy is going on. Prospects of paddy, sugarcane, and jute good. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Contai	17	
Tamluk	14	
Ghatal	14½	

24-Parganas.—Rainfall at Sadar ·97. Weather hot and cloudy. Prospects of standing crops favourable. Transplantation of *aman* and harvesting of jute continue. No cattle-disease. Fodder and water sufficient. Common rice sells as follows—

	Srs.	c.	
Sadar	10 to 13	0	per rupee.
Barasat	10	0	
Basirhat	11	10	
Diamond Harbour	11	6	

Murshidabad.—Rainfall at Sadar 3·32, Kandi 2·02, Jangipur 2·19. Weather hot. More rain wanted for *aman*. Harvesting of *bhadoi* going on. State of sugarcane and mulberry fair. Fodder and water sufficient. Common rice sells at 13 seers per rupee.

Khulna.—Rainfall at Sadar 0·33. Weather hot and cloudy. More rain urgently wanted for transplantation of *aman* paddy. No cattle-disease. Fodder sufficient. Common rice sells as follows:—

	Srs.	c.	
Khulna	9	0	per rupee.
Bagirhat	9	8	
Satkhira	10	8	

Dinajpur.—Average rainfall 2·36. Weather hot. More rain wanted for the transplantation of *haimanti* rice and for steeping jute. *Bhadoi* and jute are still being cut. No cattle-disease. Fodder and drinking-water sufficient. Rice selling from 10 to 12 seers per rupee.

Rangpur.—Average rainfall 1·95. Steeping and washing of jute going on. More rain urgently needed. Common rice selling from 9 to 12 seers per rupee. Fodder sufficient.

Pabna.—Rainfall *nil*. Weather hot and cloudy. Prospects of standing crops not promising. Fodder sufficient.

Dacca.—Rainfall ·43. Weather hot. Prospects of standing crops not favourable. Fodder available. No cattle-disease. Common rice sells at 8½ seers per rupee.

Chittagong.—Rainfall *nil*. Weather hot. Rain badly wanted for transplantation of *aman*. Harvesting of *aus* nearly completed; 10 annas outturn expected. Water and fodder sufficient. Rice sells at 11 seers per rupee.

Patna.—Rainfall at Sadar 2·86. Transplantation of paddy progressing. *Bhadoi* crop doing well. Slight damage done to both *bhadoi* and paddy by flood in Asthanwari outpost. Fodder and water for cattle sufficient. Prices stationary except in Sadar and Barh. Common rice selling as follows—

	Srs.	
Sadar	14½	per rupee.
Barh	12	
Dinapore	13	

Gaya.—Sufficient rainfall. Prospects of crops good. Transplantation of rice nearly completed. Common rice selling at 12 seers per rupee.

Champaran.—Rainfall at Motihari ·03. Scattered showers in the district. More rain wanted to complete transplantation of rice, otherwise prospects fair. Price of common rice 13½ seers per rupee, which is the normal rate. Fodder and water ample.

Darbhanga.—Rainfall at Sadar 2·30, Madhubani ·94, Samastipur 3·07. *Bhadoi* crops attaining maturity. More rain needed to complete transplantation of paddy in Madhubani.

Bhagalpur.—Rainfall at Sadar 0·14. Weather hot and cloudy with occasional local showers. Recent rain has done much good throughout the district. Standing crops doing fairly well. Transplantation of winter crops going on, but more rain wanted. Water and fodder sufficient. Cattle-disease reported from Pratapganj and Daparkha outposts of Supaul. Common rice sells at an average of about 13 seers per rupee.

Purnea.—Rainfall 0·88. More rain badly wanted for transplantation of *aghani* paddy. Harvesting of *bhadoi* paddy and jute going on. Indigo manufacture nearly finished. Cattle-disease still in Raniganj. Fodder and water sufficient. Common rice 11 to 13 seers per rupee.

Cuttack.—Rainfall 2·57. Weather seasonable. Early *beali* in places not affected by floods is being reaped. Transplantation of *sarad* going on in parts not affected by the flood. Paddy is also being sown for replantation in some of the flooded tracts. Fodder sufficient. Condition of cattle generally good. Common rice sells as follows:—

				Srs.	c.	
Cuttack	...	...	...	17	1	per rupee.
Jajpur	...	...	...	21	0	
Kendrapara	...	...	...	26	0	
Banki	...	...	...	24	0	

Hazaribagh.—Rainfall at Sadar 5·73. Weather seasonable. Prospects of all crops very good. Rice sells from 9 to 12 seers per rupee.

General Summary.—Rain fell during the week in all the reporting districts except Pabna and Chittagong. More rain is wanted for the transplantation of winter rice in many districts, especially in the northern and eastern districts of Bengal. In Bihar the prospects of crops have been generally improved by the recent heavy rainfall, but more rain is still required in some districts. In Cuttack transplantation is going on in parts not affected by the flood, and paddy is being sown for retransplantation in some of the flooded tracts. The harvesting of early rice and jute is going, on, but for steeping and washing the latter more water is still required in some districts. No cattle-disease is reported, except from Bhagalpur and Purnea. The price of common rice is reported to have risen in Dacca and Chittagong; elsewhere no important changes are reported.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 1st September, 1896.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

The following Statement shows the Quantities of the Principal Staples of Traffic imported into Calcutta from the Interior by Rail, Road, River (Country-boat and Steamer), and Canal during the month of April, 1896.

The extreme variation of temperature	12·6
The maximum temperature	89·8
	Miles.
The highest velocity of the wind in one hour	8
	%
The mean relative humidity	85
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	86
	Inches.
The total fall of rain from 23rd to 29th August 1896	1·69
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·71
The total fall from 1st January to 29th August 1896	44·12
The average fall of the corresponding period for 24 years, Surveyor-General's Office	47·86

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; t, thunder; ≤, lightning; ⌓, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 31st August 1896.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met at the Council Chamber on Saturday, the 15th August, 1896.

Present:

The Hon'ble SIR CHARLES PAUL, K.C.I.E., *Advocate-General, presiding.*
The Hon'ble W. H. GRIMLEY.
The Hon'ble J. PRATT.
The Hon'ble C. W. BOLTON.
The Hon'ble H. H. RISLEY, C.I.E.
The Hon'ble M. FINUCANE.
The Hon'ble J. G. H. GLASS, C.I.E.
The Hon'ble RAI DURGA GATI BANERJEA BAHADUR, C.I.E.
The Hon'ble NAWAB SYUD AMEER HOSSEIN, C.I.E.
The Hon'ble SURENDRANATH BANERJEE.
The Hon'ble MAULVI MUHAMMAD YUSUF, KHAN BAHADUR.
The Hon'ble A. M. BOSE.
The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR.
The Hon'ble GURU PROSHAD SEN.
The Hon'ble MAHARAJA BAHADUR SIR RAVANESHWAR PROSHAD SINGH, K.C.I.E., of Gidhaur.
The Hon'ble M. S. DAS.
The Hon'ble A. H. WALLIS.

THIRD CLASS PASSENGERS AT SEALDAH STATION.

The Hon'ble MR. A. M. BOSE asked—

Has the attention of the Government been drawn to the letters of Babu Asit Chandra Chaudhari in the *Sanjibani* of the 11th and 25th July, in which, after personal investigation, he describes the many serious inconveniences to which third class passengers are subjected at the Sealdah Railway station?

Will the Government be pleased to hold an enquiry into these allegations and adopt such of the measures suggested by the writer, and others, as may commend themselves to Government as likely to remove or mitigate the evils complained of?

The Hon'ble MR. GLASS replied:—

"The Administration of the Eastern Bengal State Railway is not vested in the Government of Bengal, but rests with the Government of India, and this Government is not therefore in a position to order the enquiry asked for by the Hon'ble Member. At the same time it is the desire of the Lieutenant-Governor that the convenience of all passengers by Railway should receive every attention that is possible, and the matters brought to notice by the Hon'ble Member will therefore be referred to the Government of India for consideration."

GRANT-IN-AID RULES FOR MEDICAL INSTITUTIONS.

The Hon'ble MR. A. M. BOSE asked—

Are there any grant-in-aid rules for Medical Institutions? If so, will the Government place them on the table?

Having regard to the fact that the Government has been recently obliged to limit the number of admissions to the Calcutta Medical College, owing to want of sufficient accommodation in its class-rooms, will it be pleased to render liberal help to any fairly equipped and well-organized Medical Institution, which may be started by private effort, to impart superior medical instruction?

The Hon'ble MR. RISLEY replied:—

"There are no grant-in-aid rules for Medical Institutions.

"As no applications for admission to the Medical College have yet been refused, and the more crowded class rooms are about to be enlarged, the question of subsidizing other Medical Institutions seems hardly likely to arise. The Lieutenant-Governor is not prepared to sanction such grants."

BENGAL MUNICIPAL ACT, 1884, AMENDMENT BILL.

THE HON'BLE MR. RISLEY moved that the consideration of the Bill to further amend the Bengal Municipal Act 1884, be resumed.

The Motion was put and agreed to.

The Hon'ble Mr. M. S. Das moved that the following be substituted for the proviso to clause (*a*) of section 85 of the Bengal Municipal Act, 1884:—

Provided that the amount assessed upon any person or persons, in respect of the occupation of any holding, shall not be more than eighty-four rupees per annum.

He said:—"It was no doubt the intention of the Legislature, in framing the proviso to section 85 of the Bengal Municipal Act, that the maximum assessment on any single holding, whether it is in the occupation of one person or of more than one person, should not exceed Rs. 84, but to this intention a sufficiently clear explanation is not given, and the result is that this clause

has been differently interpreted in different Municipalities. I shall better explain myself by taking a concrete example. Suppose the case of a father and two sons each having a monthly income of Rs. 500. In a Municipality where the assessment is on persons, and according to the circumstances and property of such persons, if the assessment is at the rate of 1 per cent., these three persons will be taxed at Rs. 60 per head per annum if they occupy separate holdings, and if they live in one and the same house, they will not be charged with more than Rs. 84. That, I think, was the intention of the legislature."

The Hon'ble THE PRESIDENT SAID:—"I do not see what this amendment means. The word 'person' is used in the Act, and 'person' includes 'persons.'"

The Hon'ble MR. M. S. DAS, continued:—"If that word had been explained in the Interpretation Clause, or if it meant two or more persons, then a different construction would not have arisen in different Municipalities. As a matter of fact I may mention, that in the Faridpur Municipality, where two such persons were living in the same house, they would pay Rs. 84, whereas in Cuttack they would pay Rs. 160; so that the proviso is actually interpreted in different ways in different Municipalities, and it is necessary that a clear interpretation should be put. The proviso should be so worded as to unmistakeably point out the intention of the Legislature. It is for the Council to say whether or not they will apply the maximum rate to a case where more than one person, having separate incomes, occupy one and the same holding. That is a question for the Council to decide, but I submit it is absolutely necessary that there should be a uniform interpretation of the proviso, which hitherto has not been the case. I think that by inserting the words 'or persons' this ambiguity will be removed. We have now introduced what is called a lodger franchise, or in other words, a franchise in favour of persons who have an income of Rs. 50, but do not pay any Municipal rate. But Municipalities, where the assessment on the person is in force, will not have the benefit of that concession, unless the construction I contend for is put on the proviso; for if every person occupying a holding, or any number of persons occupying one and the same holding, are to be taxed according to their circumstances and property, then a person with an income of Rs. 50 would be entitled to vote as a rate-payer. Consequently this concession will not be extended to Municipalities, where the assessment is on the person and not upon holdings. On these grounds I submit that my amendment ought to be accepted."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If the amendment of my hon'ble friend will help to remove an ambiguity, and I think there is considerable ambiguity from what I have heard myself of the procedure adopted in certain Municipalities, and if there is no further objection than that under the General Clauses Act, the word 'person' includes 'persons,' I think the amendment should be accepted."

The Hon'ble MR. A. M. BOSE said:—"It is just possible that the proviso may be open to the construction to which the Hon'ble Mover of the amendment has referred, and, as he has informed us, it has actually been so construed in some cases. Under the circumstances I think, in the interests of the Municipalities themselves, it may be well to remove that temptation from their path. If two or more persons occupy one holding, let not the tempting possibility of such a construction arise. I would therefore support the amendment."

The Hon'ble THE PRESIDENT said:—"I do not think this amendment is necessary. It is a tax upon persons occupying holdings; that means different persons occupying different holdings, not several persons occupying one holding."

The Hon'ble MR. M. S. DAS, in reply said:—"This is not an ambiguity

what doubtful whether each could be assessed up to the maximum of Rs. 84, or whether the total assessment upon all the occupiers of the holding must be within that amount. Probably the latter view is the correct one?

"The difficulty has suggested itself to different Municipalities, and different interpretations have been put upon it; and the same difficulty suggested itself to Mr. Collier, and he has annotated upon it."

The Hon'ble MR. RISLEY said:—"I do not think the Council should amend an Act to correct a mistake made by a commentator."

The Motion was put and lost.

The Hon'ble Mr. M. S. Das also moved for leave to withdraw the following Motion standing in his name:—

"that in section 14 the following be substituted for the proposed new section 351B:—

'Fees may be charged at such rates as may be fixed by the Commissioners at a meeting and sanctioned by the Commissioner of the Division, for the use of music by processions in the streets on the occasion of festivals or ceremonies.'

"The said fees should be levied by the Officer of Police who regulates such processions."

The Motion was, by leave of the Council, withdrawn.

The Hon'ble MR. M. S. DAS also moved that in section 14, for the proposed new section 351 B (*1*), the following be substituted:—

'351B. Fees may be charged at such rates as may be fixed by the Commissioners at a meeting and sanctioned by the Commissioner of the Division, for processions in the streets attended with music, for which a license has been issued under clause (3) of section 30 of Act V of 1861 of the India Council.'

The Hon'ble THE PRESIDENT said:—"The objection to this section is that people have a perfect right to have religious processions in the streets; and under the Indian Council's Act, section 43, this Council has no right to interfere with them. Under that section this Council has not the power to legislate on any subject affecting religious rites, except, with the sanction of the Governor General in Council previously obtained. From time immemorial Her Majesty's subjects have had the right to have religious processions in the streets, and we cannot interfere with that right. The amendment should therefore be withdrawn."

The Hon'ble MR. M. S. DAS said:—"My amendment is the only way out of the difficulties, under the section as it now stands. Religious processions are exempted from taxation under the section, and therefore the question whether a particular procession is of a religious character or not, will have to be decided by the Municipal Board. From my experience of mufassal Municipalities, I think if we were to convert Municipal Boards into Ecclesiastical Boards, we shall be doing something absurd. It will be for Municipal Boards to decide what is a religious procession and what is not a religious procession. In our Boards we have members of diverse religious persuasions. We have followers of Hinduism, Muhammadanism, and many other *isms*, and we are going to introdnce the worst of all *isms*; which is *schisms*. What is proposed to be done is to convert Municipal Boards into tribunals of an ecclesiastical character, which would have the right to decide what is a religious procession and what is not a religious procession—tribunals—where the Hindu will have the right to decide what is or is not a part of the Moslem faith, and *vice versâ*."

The Hon'ble MR. RISLEY said:—"I think the Hon'ble Mover of the amendment has said enough to show the serious difficulty which will arise in connection with the working of this proposed new section 351B, and as the

learned Advocate-General is of opinion that the amendment will be *ultra vires*, I will ask the Council for leave to withdraw section 14 of this Bill."

Section 14 of the Bill was, by leave of the Council, withdrawn.

The Hon'ble MR. M. S. DAS thereupon withdrew his Motion.

The Hon'ble MR. RISLEY, by leave of the Council, withdrew the Motion of which he had given notice, that the words and figures "when an Officer of Police either has issued orders under section 30 of Act V of 1861 (*an Act for the Regulation of Police*) for regulating the use of such music or has refrained from issuing such orders" be inserted after the words "religious character" in the new section 351B, which it was proposed by section 14 of the Bill to insert in the Act.

The Hon'ble MR. RISLEY, by leave of the Council, also withdrew the motion of which he had given notice that sub-section (2) of the said section 351B, and the figure "(1)" before the words "Fees may" in the same section, be omitted.

The Hon'ble MR. A. M. BOSE, also by leave of the Council, withdrew the motion of which he had given notice that in section 14, the following words be added at the end of the proposed new section 351B, sub-section (1):—

'Such rates shall be communicated by the Commissioners to the District Superintendent of Police of the district in which the municipality is situated.'

The Hon'ble MR. A. M. BOSE, by leave of the Council, also withdrew the motion of which he had given notice that in section 14, for the proposed new section 351B, sub-section (2), the following be substituted:—

'The said fees shall be deposited with the Officer of Police to whom application is made under section 30 of Act V of 1861, at the time when the application is made, and intimation thereof, as well as the amount so deposited, shall be sent by him to the Commissioners.'

The Hon'ble MR. M. S. DAS also, by leave of the Council, withdrew the motion of which he had given notice that in section 14 the proposed new section 351B (*2*) be omitted.

The Hon'ble MR. RISLEY moved that the following be substituted for clause (*iii*) in section 3 of the Bill:—

'(*iii*) being a graduate or licentiate of any University, or having passed the First Arts Examination of the Calcutta University or the corresponding standard of any other University, or holding a license, granted by any Government Vernacular Medical School, to practise medicine, or holding a certificate authorising him to practise as a pleader or as a mukhtar or as a revenue-agent—occupies a holding, or part of a holding, in respect of which there has been paid, during the year aforesaid, in respect of any rates, an aggregate amount of not less than three rupees.'

He said:—"Clause (*iii*) of section 3 of the Bill stood thus:—

'(*iii*) being a member of a joint undivided family, one of the members of which has, during the year aforesaid, paid, in respect of any *rates*, an aggregate amount of not less than three rupees—is a graduate or licentiate of any University, or holds a license, granted by any Government Vernacular Medical School, to practise medicine, or holds a certificate authorising him to practise as a pleader or a mukhtar or a revenue-agent.'

"In order to make the present proposal clear it is necessary to recall what happened at a previous meeting of the Council. The Hon'ble Member for the Calcutta Corporation then moved an amendment to insert after the word 'University' the words 'or having passed the First Arts Examination of the Calcutta or any other University,' and subsequently in the course of the discussion it appeared that the Council were in favour, for reasons upon which I need not dwell, of some such addition to the clause, and I agreed to accept it, provided it was altered so as to remove the difficulty that it proposed to confer upon undergraduates who pass the First Arts Examination—a privilege which is now given only to graduates of the elder Universities. My hon'ble

friends on my left were under the impression when this amendment was brought forward that it would in some abstruse way be good for members of the Muhammadan community, but obviously it is impossible for Muhammadans to be members of a joint undivided family, and therefore the amendment as it was then framed have left Muhammadans out in the cold. I might have left the section there, but I am not sorry to have the chance of amending it in the manner now proposed. It is exceedingly difficult to understand why this joint undivided family clause, which governs the entire section, was ever introduced. It produces the absurd result that a pleader or mukhtar or revenue-agent who is a member of a joint undivided family has a vote as being a pleader, mukhtar or revenue-agent, irrespective of any rateable qualification, but a pleader who is not a member of a joint family has no vote. The history of the section is extremely obscure. I have looked through a mass of old papers, and I have been unable to discover why this clause was imported into the Act of 1884. As far as I can make out, it came from some very tentative and nebulous suggestions made in connexion with the Local Self-Government Act which was under discussion at the time, and apparently in the course of the proceedings of the Select Committee this clause somehow got imported into the Municipal Bill out of the discussions relating to the other Bill. I confess I have always found it difficult to understand this provision, and it must equally have puzzled the municipalities who have had to deal with it. I suspect that they ignore the limitation to members of a joint family and allow all pleaders and mukhtars to vote as such. By making the change which I now propose, we shall thus merely legalise what I believe to be the present practice of municipalities, and also combine educational qualifications with a certain amount of property qualification. You have in the amendment which I now propose an educational qualification in that a man must be a graduate or have passed the F.A., and a property qualification in that he must occupy a holding in respect of which rates amounting to Rs. 3 have been paid by some one. I think it is reasonable to combine the two qualifications. We want to recognise intelligence as giving a right to vote, but every one will feel that intelligence dissevered from responsibility is a dangerous thing, and therefore the amendment which I now move brings in a property qualification and will put Hindus and Muhammadans in respect of this qualification on equal terms. It merely cuts out the portion about a joint undivided family and adds to the end of the section a provision about occupying a holding in respect of which a certain amount of rates has been paid."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"I submit this amendment ought to be supported and no objection whatever raised to its acceptance. The amendment is the outcome of what passed in Council at a previous sitting in connection with this Bill. An amendment was then proposed by the Hon'ble Member for the Calcutta Corporation in favour of extending the franchise to those who had passed the First Arts Examination. My hon'ble friend exhausted his eloquence without making much impression: Other gentlemen spoke in favour of the amendment, but not apparently with much greater effect. It, however, occurred to me that the amendment would promote the interests of the Muhammadans, and I advanced additional argument, and threw the weight of the Muhammadan community in favour of the amendment. The result was that the Hon'ble Member in charge of the Bill was kind enough to accept the principle of the amendment chiefly because it was believed that it would advance Muhammadan interests. I did not bind myself to the wording of the amendment, neither did the Hon'ble Member in charge of the Bill do so. The result was that with the intimation of the favourable opinion of the Hon'ble Member in charge of the Bill, the matter was allowed to stand over for further consideration how to give effect to the amendment consistently with the claims I had advanced on behalf of the Muhammadan community. The wording of the clause in the Act is very cumbrous, and it is difficult to ascertain its precise meaning: there is one thing certain and that is, that the clause does not favour the claims of the Muhammadans. The present amendment is expressed in very apt and appropriate language, and says precisely what it means. In fairness to what passed in the Council on the last occasion, this amendment ought to be accepted without much discussion."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am hardly in a position to accept this amendment. The Hon'ble Member in introducing this Bill said it was far from his object to introduce anything like a restrictive measure which would take away the franchise which has hitherto been enjoyed by any section of the people. In the clause now before the Council, the provision regarding joint undivided families is entirely omitted; therefore as far as this clause is concerned it is inconsistent with the pledge which the Hon'ble Member in charge of the Bill gave to the Council. Then the Hon'ble Member has introduced another little change in the clause; he has introduced the qualification of 'occupying a holding.' That is a provision which is restrictive in its character. Formerly any person who was resident in the municipality and who had the educational qualification was entitled to the franchise, and we know perfectly well that being resident and occupying a holding are two different things. 'Residence' let in a large class of people who are not residents in the strictest sense. I do not object to the comprehensive meaning of the word 'residence.' It is an index of the liberality of the Government in this respect; but when the occupation of a holding is introduced as one of the qualifications, it does restrict the franchise, and is inconsistent with the promise made in introducing the Bill. I hope the Hon'ble Member in charge of the Bill will see his way to accept the clause as it stands in the Bill, modifying it so far as to give the franchise to those who have passed the First Arts Examination. I ask the Hon'ble Member to accept this suggestion, having regard to the promise which was held out that it was far from the intention of the Government to restrict the franchise, and that if anything the franchise was to be broadened rather than restricted. The effect of the omission of the words 'joint undivided family' will not, I submit, benefit the Muhammadan community in the slightest degree."

The Hon'ble BABU GURU PROSHAD SEN said:—"I think a compromise might be arrived at. I propose to eliminate the words at the end of the Hon'ble Member's amendment from the words 'or occupies a holding or part of a holding in respect of which there has been paid, during the year aforesaid, in respect of any rates, an aggregate amount of not less than three rupees,' and to let the section end at the words 'revenue-agent.' It has been said that the proposed amendment combines both the educational and property qualifications. I submit, as far as this idea of combining the two qualifications goes, the property qualification laid down does not mean much. The introduction of the word 'occupation' in the present form appears perfectly immaterial. Occupation may be that of a tenant on payment of rent, or it may be permissive without payment of rent, or it may be that of a trespasser. It is not provided that the rates must be paid by the individual exercising the franchise under this clause. Rates have to be paid, but it may be paid by the rightful owner, and certain persons fulfilling the previous conditions may be occupying the premises wrongfully, still they would have the franchise. The nature of the occupation therefore is perfectly immaterial, and it does not matter where the intention is to give the franchise to persons fulfilling certain educational qualifications, whether they live in a hut or in a palatial building which may not be their own. My friends, the Hon'ble Members who represent the Muhammadan interests in this Council, are under an impression that if the section be left as in the Bill, the Muhammadan population will not have the benefit of the Hon'ble Babu Surendranath Banerjee's amendment, inasmuch as there are no joint families amongst the Muhammadans. Whatever may be the right view with regard to this question, when such an impression prevails, I for one would eliminate the words 'being members of a joint undivided family' out of deference to their wishes, especially as nothing is lost by the elimination of these words; but at the same time, in order to render the sense clearer, I would eliminate the words 'occupies, &c.,' which have now been added, and have it simply as a franchise given for educational qualifications. This would meet with the wishes both of the Hon'ble Muhammadan Members and of the Hon'ble Babu Surendranath Banerjee who would retain the words 'being members of a joint undivided family,' and at the same time this will broaden the basis of this franchise.

As for residence and age, we have the provisions elsewhere. As I have said before, the restrictive property qualification which the Hon'ble Mover of the amendment proposes to add means nothing and should be excised. As a matter of fact the property qualification is not combined with the educational test. I have a word also to say with respect to the word 'graduate,' which I consider is superfluous when the standard of the First Arts has been accepted, for those who are graduates must have passed the First Arts Examination. Perhaps the word 'Licentiate' too is now redundant, for there are only Licentiates of Medicine and Licentiates of Civil Engineering. So far as Licentiates of Medicine are concerned, they must have passed the First Arts Examination; and if this be the case with regard to Licentiates of Civil Engineering also, the words 'Licentiate of any University' might also be eliminated as superfluous. I therefore move that the motion before the Council be amended by the omission of all reference to graduates and licentiates, and the omission of all the words at the end of the clause beginning with the words 'occupies a holding.'

The Hon'ble THE PRESIDENT said:—"As no notice of this amendment has been given, it cannot be moved."

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR said:—"I do not see why the words 'joint undivided family' should be omitted. The members of such families have enjoyed the privilege of voting for several years."

The Hon'ble THE PRESIDENT said:—"It seems to have been taken for granted that a Muhammadan cannot be a member of a joint family, but in point of fact I know many such instances—not in the Hindu sense of the word, but in practice there are Muhammadan joint undivided families."

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR said:—"I submit that I do not see why the words 'joint undivided family' should be omitted. There are undoubtedly joint families among Muhammadans as well as among Hindus. If the object of the amendment is simply to see that the franchise of Muhammadans is not curtailed, the retention of the words 'joint undivided family' would not affect it. But the omission of those words will not advance the interest of Muhammadans. As has been observed by the Hon'ble Babu Surendranath Banerjee, I do not see any reason why these words should be omitted now after the members of joint undivided families have enjoyed the privilege for years. It is a very important question—more important than that of taking away the franchise from cart-drivers. Members of joint families are very respectable and make very good voters, and they also make very good Commissioners. I shall certainly oppose the amendment moved by the Hon'ble Member in charge of the Bill."

The Hon'ble MR. GRIMLEY said:—"My hon'ble friend Rai Eshan Chundra Mittra Bahadur has stated that the effect of this amendment will be to take away the franchise from persons who have enjoyed it for several years, and if he can prove that proposition, I for one will associate myself with him on this question. But I think I shall be able to show that the amendment put by the Hon'ble Member in charge of the Bill does not take away the franchise from a single person who now possesses it. The law confers the franchise on three classes of persons who are members of a joint undivided family, one of whom has paid rates to the amount of not less than three rupees. Under the amendment now before the Council, the franchise is given to those classes of persons, but it is no longer necessary to impose the condition of being a member of a joint undivided family. They have only to show that some person has paid a tax of Rs. 3 in respect of the holding in which they live. So that not a single person who now enjoys the franchise will lose his vote."

The Hon'ble MR. RISLEY in reply said:—"The only remark I have to make in answer to what has fallen from the Hon'ble Member for the Corporation and the Hon'ble Member who last spoke to the effect that in the Bill as it stood no restriction whatever as to the payment of rates was put upon members of

joint undivided families, I have to point out that the restriction as to the payment of an aggregate amount of rates not less than three rupees is already in the Act, and was put into it in 1894 at the instance of the member for the Corporation. As for the suggestion that members of a joint undivided family will be deprived by the amendment of a privilege which they have hitherto enjoyed, I say that on the contrary the amendment will let in all graduates and undergraduates who have passed the F.A., whether they are members of a joint undivided family or not, and all pleaders, mukhtars, and revenue-agents. I think it is impossible to devise a section which could be more comprehensive."

The Hon'ble THE PRESIDENT said:—"Under the present law 'residence' is necessary, and there is nothing more than that it means residence, and I think that the omission of the words 'joint undivided family,' to which I was supposed to attach some weight, has been explained away by the Hon'ble Mr. Grimley in a satisfactory manner."

The Motion was then put to the vote and agreed to.

The Hon'ble MR. A. M. BOSE moved that after section 4, the following be inserted:—

"4A. At the end of the first paragraph of section 38 the following shall be added, namely:—

'or when a meeting is called, under section 39, by persons signing a requisition.'"

He said:—"Under the law as it stands at present, meetings of the Commissioners may be called only by the Chairman, or in his absence by the Vice-Chairman. The Select Committee proposes, and very properly proposes, that that state of the law should be altered by an amendment in section 39 providing another method of calling meetings; namely, that when the Chairman or the Vice-Chairman fails to call a special meeting within thirty days after a requisition has been sent, the meeting may be called by the persons who signed the requisition. Under these circumstances I beg to point out that alterations in certain other sections of the Act are rendered necessary by reason of this change. One of these sections is section 38. At present, under that section, the legal obligation of the Commissioners to attend meetings arises when meetings are called by the Chairman or, in his absence, by the Vice-Chairman. I propose to add to that section the words 'or when a meeting is called under section 39 by persons signing a requisition.' This will meet the requirement in all cases as may be readily seen by reference to these two sections. I believe it was the Magistrate of Howrah who, in giving his opinion, says that he is not aware whether this Bill is part of a scheme for the periodical revision of the Municipal Act, or whether it is intended to give finality to the law. Perhaps the remark was intended to be satirical. But I submit that the best way to prevent this periodical revision of the Act will be to see that it incorporates other changes that are made necessary or desirable in consequence of changes which have already been adopted."

The Hon'ble MR. RISLEY said:—"I have no objection to the principle of this amendment as far as it goes, but it seems to me to be unnecessary. The Hon'ble Member proposes to add certain words to section 38 which deals with the ordinary meetings of the Commissioners, but the words he proposes to add to that section relate only to the addition made by the Bill to section 39, which deals with special meetings, and it will be exceedingly inconvenient and undesirable to insert in a section which deals with ordinary meetings a reference to a procedure which can only come into force on extremely rare occasions when the Chairman or Vice-Chairman may be called upon under section 39 to convene a special meeting and refuses to do so. The provision which now stands in the Bill is intended to meet such cases as that of the Chairman of the Dacca Municipality, who has for the last three months refused to call a meeting, the object of which is to depose him from office. The provision in the Bill has reference solely to section 39, and has nothing to do with section 38, and I am confident that my hon'ble friend the mover of the amendment will see that."

The Hon'ble MR. A. M. BOSE in reply said:—"I did not enter into the matter fully when moving my amendment, as I confess I expected that it would be accepted as a matter of course. What I wish to point out is this, that under section 39, power is proposed to be given to requisitionists to call meetings by themselves under certain circumstances. That proposal has been accepted by the Council, and it being now a provision in the law as much as any other provision, it imposes on the Commissioners an obligation to attend the meeting so called. The Legislature thought it necessary to impose that obligation by express provision of the law, viz., by section 38, which enacts that the Commissioners shall meet for the transaction of business 'at least once in every month and as often as a meeting shall be called by the Chairman or, in his absence, by the Vice-Chairman.' In spite of the authority of the marginal note to the section ('the Commissioners to meet ordinarily once a month'), I wish to point out that this section 38 refers not only to ordinary meetings, but to all meetings of the Commissioners, whether ordinary or special, which may be called by the Chairman. If, for instance, under section 39, in response to a requisition, the Chairman calls a special meeting, then the provisions of section 38 will apply, and the Commissioners are under legal obligation to attend the meeting. But, as has been pointed out, it is now proposed to add another method of convening a meeting, viz., on the authority of the requisitionists. It becomes necessary, therefore, to extend the scope of section 38. If the Hon'ble Member in charge of the Bill, however, objects to add the clause which I propose to section 38, he might have proposed some addition to section 39, which would have that effect; but somewhere or other some such provision ought to be introduced. To put the matter briefly, section 38 applies to all meetings, whether ordinary or special, called by the Chairman or the Vice-Chairman; and it imposes an express obligation upon the Commissioners to attend them. All that I ask is that the same obligation may be extended to meetings called by the requisitionists, which it is now proposed to recognize. I hope the Hon'ble Member will see that there really is occasion for some provision, imposing an obligation upon the Commissioners to attend when called upon to do so under the addition to section 39, which was made in Select Committee. I quite agree with the Hon'ble Member in charge of the Bill that such occasions will be few and far between, but when they do arise, provision should be made to meet the contingency."

The Motion was put and lost.

The Hon'ble Mr. A. M. BOSE also moved that, after section 5, the following be inserted:—

"5A. (*1*) After the words 'or Vice-Chairman,' in the first paragraph of section 42, the words 'or under section 39 by persons signing a requisition' shall be inserted.

"(*2*) For the words 'Chairman or Vice-Chairman,' in the last paragraph of section 42, the word 'President' shall be substituted."

He said:—"These amendments are of a similar character to the last, and are rendered necessary by the alteration introduced by the present Bill in section 39, to which I have already referred. I need not repeat the arguments I have used."

The Motion was put and agreed to.

The Hon'ble MR. A. M. BOSE also moved that, in section 6, after clause (*vii*), the following be inserted:—

'(*vii a*) the acquiring and keeping of open spaces for the promotion of physical exercise and education.'

He said:—"I venture earnestly to hope that this amendment will commend itself to the sympathy of Hon'ble Members of the Council. By the Bill it is proposed—and the proposal has been accepted—to enable a Municipality to spend money for improving the breed of horses and cattle, and of mules and asses. I submit improving boys and men is an object at least as important as any

of these, and Municipalities should, at the same time, be empowered to spend a little money, if they find it necessary, to help in carrying it out. We are adding to the number of our examinations, and to the burden laid on our young men; if we have not quite succeeded in making two blades of grass grow where one grew before, we have at least succeeded in imposing two examinations where one sufficed before, as we found the other day from an answer given to one of my questions in regard to the Upper Primary Examination. I think the physical education of boys and of men of larger growth is a matter upon which the Municipality may legitimately, and with advantage, be allowed to spend some little money. With regard to the importance of keeping open spaces, I think I need not say much. The improvement of health and sanitation is one of the primary objects of Municipal legislation, and the preservation of open areas will be an important means for promoting this object. These will be the lungs, or breathing spaces, of growing centres of population, and will afford room for exercise and recreation to all classes of rate-payers; and by this means we shall be able to materially improve the health of the people. It is not necessary for me to refer to the legislation on this point in England. There, in spite of all—and it is indeed a great deal—that is done by private enterprise and private benevolence, the Acts of 1877 and 1881, the Metropolitan Open Spaces Acts, were passed by Parliament to enable such spaces to be acquired on behalf of the public; and by the Statute of 1887 these Acts have been extended to all urban sanitary districts, and even to certain rural sanitary districts throughout the country. And the necessity for such open spaces is even greater in this country with its climate than it is in England. They will not only benefit the rising generation, but be of benefit to all classes. It cannot be objected, as was objected the other day in regard to libraries, that this will be a luxury which will only benefit the few; on the contrary it is a necessity for all and even more for the poorer classes than for the rich. One matter to which I would specially invite the attention of the Council in this connection is the necessity which exists for the early acquiring of such spaces. Some years hence in many cases they will cease to exist, and no money may then buy them. It is not necessary to give many instances. I know of a municipality in which within the last twenty years great changes have been introduced; open spaces which were within and outside the municipality are being bought in and built upon, and ten years hence it will perhaps be too late to make any attempt of this kind. Brick and mortar, when once they have invaded a place, do not retreat so easily. In fact, putting it even on the lowest ground of speculation, I do not say it is right to look upon it in that light; if a municipality were to acquire such open spaces they would probably get a very good return for them if they wanted to dispose of them hereafter. With regard to the question of physical education, when I was connected with a municipality, I tried to get up a sort of athletic competition at the end of the year. Even the sum of Rs. 20 in prizes—and that is not a ruinous figure—would have answered the purpose. But the municipality was powerless to take any steps in the matter. Possibly it may be said that in the present law there is power to provide gardens and squares. That is recognised as coming within the purview of section 69, clause (*i*) of which provides, amongst other things, for the construction, maintenance and improvement of squares and gardens. But play-grounds and open spaces, which may not come under that category, would, whenever funds are available and there is a clear demand for such things, be of great benefit to the people. I might give many examples of play-grounds and open spaces not coming within the definition of squares and gardens, which would nevertheless be of great benefit to the municipality, but I do not anticipate that objection. I do not think I need add anything more to commend this amendment to the consideration of the Council, and I trust Hon'ble Members will accept it. I would appeal to the representatives in this Council of the Muhammadan community as the representatives of a manly race, and I trust a proposal of this kind, which will enable the rising generation as well as the older generation to have the full advantage of such open spaces, will commend itself to them. In conclusion I would add one word of appeal to the Hon'ble Member in charge of the Bill. As the first President of the Society for the higher training of young men, the Hon'ble Mr. Risley was the means of giving a strong impulse

to the cause of physical education, an impulse which, with Municipal and Government help, has now resulted in the opening of the Marcus Square grounds in Calcutta, and I trust that what he has been able to do in connection with the Metropolis he will also enable municipalities to do, if funds are available and the requirements of the people make it necessary that such a step should be adopted in their interest."

The Hon'ble MR. RISLEY said:—"I have listened with great attention to the Hon'ble Member's ingenious exposition of his amendment; but I regret I am not in a position to accept it. The matter of open spaces is covered as fully as it need be by clause (1) of section 69, which empowers municipalities to construct, maintain and improve squares and gardens. That appears to me to cover every conceivable case which would otherwise fall under the proposal of the Hon'ble Mover of the amendment. As regards the question of physical education, section 69, clause (5) empowers municipalities to provide for the establishment and maintenance of schools, and I conceive that physical education in some form or other is a recognised part of general education and is therefore already provided for. It is certainly provided for in all Government schools and colleges and there is no reason why it should not be equally provided for in municipal schools. As regards English precedents, I am not entirely disposed to adopt them. I doubt if you can find any municipality in Bengal—certainly very few—where the people are cooped up and unable to get to the open in the way they are in English towns. The provisions of the English law in regard to open spaces are of an entirely different kind, and I think the precedent is practically inapplicable. I think, therefore, that in as much as the two objects in view are included in the Act, this amendment is unnecessary. If it is proposed to go beyond the Act and to add something to the provision relating to squares and gardens in the direction which has already been mentioned, then I think the amendment should be very carefully considered, and I doubt whether it should be brought forward at so late a stage, when the municipalities concerned have no means of stating their views. It is no doubt right to encourage municipalities which have shown a disposition to advance, but I do not think municipal funds should be devoted to provide football and cricket grounds. If the municipalities had been consulted and there was a general desire on their part to have such power confided to them, it would have been a different thing, but I do not think the Council should take the responsibility of introducing anything of this kind. As it is I think these objects are well met and are likely to be well met by private liberality, and we should hesitate before we put the burden on local authorities; and if we do so the probable result will be that the sources of private liberality will be dried up once and for all."

The Hon'ble BABU GURU PROSHAD SEN said:—"Even if these objects were already covered by the law as it is, the present amendment will, after what has just fallen from the Hon'ble Member in charge of the Municipal Administration of the Province, be necessary. That is one of the reasons why, if the object is good, the object should be well defined as an object for which municipal funds can be expended. We have shewn, so far as the application of municipal funds is concerned, enough of good will towards the inferior animals, and it will not be creditable to this Council if we were not to show a similar amount of good will towards our fellowmen. Of course the matter is to be left entirely to the discretion of the municipal bodies, and I support the amendment, or rather this addition to the various clauses of section 6, by the same arguments as were used by the Hon'ble Mr. Risley, the Hon'ble Mr. Finucane and the Hon'ble Babu Surendranath Banerjee with regard to the veterinary clauses. With the Hon'ble Mr. Risley, my hon'ble friend Mr. Bose in support of his amendment will say 'municipalities are noble institutions, but if you drive them they will not do so, particularly if you wanted to drive them to do something which the law leaves optional with them.' Using the Hon'ble Mr. Finucane's arguments, with reference to veterinary clauses, my friend, the mover of the present amendment, will say:—'Whether open spaces or play-grounds should be opened, maintained and established, is a question for

each particular municipality to decide. Surely it is not too much for me to ask that municipalities be given the option of coming to a decision on that point?'

With the Hon'ble Babu Surendranath Banerjee he will say:—'The section is not to stand unqualified and no pressure can be put on the local authorities.' Turning to the last resolution of the Government on the administration of municipalities, you will find that the revenue proper of all the municipalities taken together amounted during the year under review to Rs. 21,84,000, and the expenditure under those heads which are not matters of discretion was Rs. 21,72,600, excluding public instruction, which, under the Bill as amended by the Select Committee, has now been made a subject of compulsory expenditure. Therefore, assuming that the discretion of the municipality will be wisely used and not abused, I do not think any money will be available for any other purposes whatever. But this is quite a different matter with which perhaps, according to my hon'ble friends, this Council has nothing to do. They seem to argue, if no money be forthcoming, the clauses will remain inoperative—that is all; but they asked, in the matter of the veterinary clauses—and this was the sum total of their arguments, why should not the Legislature provide for an option, when the municipalities ask for it? I ask now, why should not the Legislature provide for an option in this matter also? The only advantage which under the circumstances of the case will be derived from the enactments of the clauses providing for additional expenditure will be the display of good intentions by the Legislature towards a number of objects, and I do not see, why the Legislature should be chary of showing its good intentions to our fellowmen, when it could show enough of it to inferior animals. We have already authorised the expenditure of money in providing free libraries, and I do not see why provision should not also be made for the expenditure of money upon the acquisition of land for keeping open spaces and play-grounds. A strong appeal was made by the mover of the amendment to the Founder of the Higher Training Society. I hope this appeal will not be in vain. My hon'ble friend, Rai Eshan Chundra Mittra Bahadur, has told us that the present is the time when land can be obtained at a small cost, and that a few years hence it will not be possible for Municipalities to acquire land for the purpose of providing open spaces, except at a prohibitive cost. As to the stock argument of the Hon'ble Member in charge of the Bill that this proposal has been brought forward too late, I do not see how, if the question cannot be raised now, it can be raised at all. If the point was attempted to be discussed when the Bill was introduced and referred to a Select Committee, my hon'ble friend, the mover of the amendment, would have been told that at that stage we can only discuss the principle of the Bill, and not the details. My hon'ble friend was not a member of the Select Committee, and he could not have brought forward this proposal before, and therefore I maintain that this is the only stage at which he can bring forward amendments to the Bill. It may, however, be said that it was open to him to have written to the Secretary of the Legislative Department, but how was my hon'ble friend to know what treatment his proposal would receive at the hands of the Select Committee. Moreover, so far as the plea is concerned that this proposal has been brought forward too late, I may point out that the objection was overlooked in respect of several amendments which have been already considered, and some of which have been accepted by the Hon'ble Member in charge of the Bill, although they had not been before the Select Committee or the several Municipalities."

The Hon'ble Mr. Finucane said:—"As my hon'ble friend who has just sat down has made reference to me personally, and intimated that on the grounds on which I advocated the appointment of veterinary assistants, I ought to vote also for the present amendment, I wish to explain briefly why I intend to vote against the amendment. The main reason I advanced at the last meeting of the Council for voting in favour of the veterinary clauses which were before us then, was that they had been referred to the several Municipalities for their opinion, and that an overwhelming majority were in favour of them and only an insignificant minority were against them. I then appealed to the Members of this Council and to the friends of Local Self-Government to say whether we should ignore the wishes of 102 Municipalities in Bengal. But the

particular proposal now before the Council has not been referred to the Municipalities who are concerned, and has not been considered by them. It is not therefore on all fours with the motion for the appointment of a veterinary assistant, and unlike that motion is not accepted by the responsible member in charge of the Bill, and I must therefore vote against it in its present form."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"If the observations which have been made by the Hon'ble Member in charge of the Bill are to be accepted, then a large number of the amendments on the agenda paper should not find a place there at all, for a great many of them have reference to matters in respect of which the Municipalities were not consulted. The very fact of these amendments being allowed to appear on the agenda paper, shows that it was intended they should be considered, and not summarily rejected. I do not think the Hon'ble Member in charge of the Bill seriously means to take his stand on this objection. That objection was brought forward on previous occasions, and has been effectually disposed of. The real *crux* of the matter is, whether or not this amendment is covered by the objects set forth in the Bill, and to which Municipal funds may be applied. Is this amendment necessary or is it not? The Hon'ble Member in charge of the Bill is of opinion that it is not necessary, because it is included in the provisions of the Bill which have been already accepted. His contention is that, having provided for the construction and maintenance of squares and gardens, that provision includes the leaving of open spaces. But if we have provided for squares and gardens, we should also provide for open spaces for the promotion of physical education. And if there is an element of doubt as to whether the objects contemplated by this amendment are included in this provision relating to squares and gardens, and that there is this element of doubt, the fact of the amendment being brought forward by my hon'ble friend, who is a distinguished lawyer, is sufficient evidence—it seems to me to be the plain duty of the Council to set this doubt at rest by accepting the amendment. The question is—do squares include open spaces? The Hon'ble Member in charge of the Bill says 'yes'; the Hon'ble Mover of the amendment says 'no.' There is thus a difference of opinion between persons whose opinions are entitled to weight. How often does the word 'said' occur in legal phraseology: it is a piece of unnecessary surplusage. The law is full of unnecessary surplusages which are put in, in order that the meaning may be made clear. If it is mere surplusage, what possible objection could there be to the acceptance of this amendment? We ought to take a common-sense view of the matter. There may be a doubt as to whether open spaces are included in the word 'squares,' and if there is this doubt, this amendment will set it right. I hope the Council will rise above legal technicalities and take a broad view of the situation, and accept my hon'ble friend's amendment."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"In moving this amendment the Hon'ble Member has, in kind, courteous and flattering terms, appealed to me as the representative of a manly race in this Council. I have considered his appeal, and I have to respond to it according to the best light in which the question presents itself to me. There can be no doubt that the objects which my hon'ble friend has in view are, in the abstract, very laudable, and are in every way commendable, so that no possible objection could be taken to them, considered apart from their connection with Municipal administration. But the question arises, in what light are they to be considered in relation to their bearing and connection with the Municipal Bill? The position which the Hon'ble Member has assigned to his amendment is to place it after clause (vii), and that clause is not included in the clauses which are covered by the proviso, and upon which the proviso operates. [The Hon'ble Mr. A. M. Bose:—"I have no objection to let it be included with the other clauses mentioned in the proviso."] It is with reference to the amendment, as proposed, that I make my observations. A question has been raised whether 'open spaces' intended for physical education within the meaning of the contention of my hon'ble friend the mover of the amendment, are included in clause (*i*) under the terms 'squares and gardens' or in clause (*r*) within the language used, viz., 'estab-

lishment and maintenance of schools." This question is somewhat different from the one now raised. The Hon'ble Member, who has last spoken, has argued that if the substance of the amendment is included in these other clauses, then why not remove all doubt by giving to the requirements of physical education, a substantive place in the Bill? To me the matter occurs in this wise: assuming that what is required in the amendment is included in the existing clauses, it is quite clear that the inclusion is in a most remote and indirect way. The primary and direct object of clause (*i*) is the construction and maintenance of squares and gardens: no doubt it may be the indirect result of having squares and gardens that health might be improved; but the squares have only a remote bearing on the question of promotion of health as the result of physical education which is raised in the amendment; so also as regards schools: the primary and main object of a school is to impart intellectual education, and physical education is only a subordinate idea.

"We must therefore take it that the objects for which it is the intention of the Legislature that clauses (*i*) and (*v*) should provide, are something different from the 'promotion of physical education.'

"The amendment therefore raises a new and important question. It proposes to give to the means of physical education a separate heading, and it is contended that legislative sanction and recognition should be given to physical education as such, without its being made subordinate to other purposes. The result of the contention raised will be that Municipal funds *must* be found for the object in view; in other words, the result of the amendment will be that that object *must* find a necessary place in Municipal administration, and Municipalities *must* find funds for it, as they must find funds for other objects included in the preceding clauses. Is it desirable or expedient that this should be so, consistently with a due regard to Municipal interests?

"With our knowledge of the state of the Municipal funds, it is clear that it is next to impossible that we should ask the Municipalities to devote funds for this particular purpose. Want of funds is the great objection against the amendment as it stands, and on account of want of funds it is impossible to vote for it. My hon'ble friend, Mr. Bose, has referred to the expenditure of money for veterinary purposes, and has said that in regard to legislative necessity, a provision for physical education stands at least on an equal footing with the provision for the treatment of cattle. I say it does not necessarily follow, because it is expedient to legislate for the treatment of cattle, it is also necessary to legislate in the matter of physical education. The two cases, as matters at present stand, are not parallel. We legislate according to the circumstances of the people and their wants and necessities. If people generally had sufficient knowledge of the use of drugs in the treatment of cattle, and had evinced intelligence on that subject, then this Council would not have been driven to legislate on it. The necessity of legislation on the subject arises from the general ignorance of the population which requires to be taught in this respect and instructed by more skilful people. The same could not be said of physical education: it cannot be said that people do not appreciate its benefits, and are incapable of providing funds for that purpose, or are not possessed of sufficient opportunities: there are plenty of open spaces in mufussil Municipalities at no inconvenient distance. The necessity for legislation has not therefore been shown."

The Hon'ble Mr. M. S. Das said:—"The real question at issue between the Hon'ble Member in charge of the Bill and the Hon'ble Mover of the amendment, as far as I understand it, is whether it is the legitimate province of Municipalities to devote a portion of their funds to acquire open spaces for the purpose of promoting physical education. There is no difference, I understand, as to the meaning to be attached to squares and gardens. Squares are open spaces, and no particular legal knowledge or legal education is necessary to interpret the amendment. The real question is whether Municipal funds should be devoted to purposes of physical education. I think this ought not to be allowed, and my reasons for saying so are these. If the Hon'ble Mover of the amendment wishes to make provision for more physical education than is included in the clause for the establishment and maintenance of schools, I am sorry I cannot

vote for him. Physical education is a thing which the people have now learned to appreciate, and if it is the duty of Municipalities to promote physical education, it is much more the duty of parents to do so. Parents should be made to contribute towards the expense of keeping up institutions for the purpose of imparting physical education. Under the provision for the maintenance of schools this object is attained, to a certain extent, by fees which come from the pockets of parents; but, by this amendment, open spaces for the promotion of physical education are to be kept up entirely at the cost of Municipalities. For these reasons I shall vote against this amendment."

The Hon'ble MR. PRATT said:—"I think there is very little difference of opinion as to the desirability of empowering Municipalities to carry out the objects of the amendment, and I should not have troubled the Council with one word, were it not that I understand these objects are sufficiently provided for in the Bill. Physical education may be provided for by schools, aided and subsidized by Municipalities; and I consider also that clauses (*i*) and (*xiii*) cover the ground of the amendment, as the first mentions 'squares and gardens,' while the latter authorizes the expenditure of Municipal funds on 'other works of public utility calculated to promote the health, comfort or convenience of the inhabitants.'"

The Hon'ble MR. GRIMLEY said:—"The amendment proposes to make two ditions to the objects on which Municipal funds may be legitimately pended, namely, the acquiring and keeping of open spaces and the promo- n of physical education. They are both very desirable objects, and strongly sympathise with the Hon'ble Mover of the amendment in his desire at means should be provided for the physical exercise and relaxation of ıe people; but it seems to me—and I have had some experience in considering ıd interpreting the provisions of the Bengal Municipal Act—that the first ɔject is already included in clause (*i*), section 69 of the Bill under the words he construction, maintenance and improvement of squares.' In like manner hysical education seems to fall under the head of schools. The necessity for hysical exercise is recognised in connection with schools in the Central rovinces (the Hon'ble Mr. Glass will correct me, if I am wrong), where ıere are village schools in which physical exercises and drill (*kasrat* and *hawayat*) form part of the ordinary curriculum, and the sturdy appearance of ıe boys in such schools seems to justify the measure. But there appears ɔ me to be no necessity for a change in the law, as the object which is desired ıay be obtained by an order emanating from the Director of Public Instruc- ion, changing the course prescribed for schools in Bengal, and if Municipal- ies choose to make provision for physical education in their schools, all hat is necessary will be for the Commissioners to express their desire, by ıcluding the amount required in the Budget, and to satisfy the Commissioner f the Division that the increase is desirable. No more than that is necessary. think the wording of the present law is quite sufficient for the purpose."

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR said:—"The real ques- on before the Council is whether this amendment is included within clause (*xiii*) f section 69, which empowers Municipalities to spend money upon 'other orks of public utility calculated to promote the health, comfort or convenience f the inhabitants.' If the objects contemplated by the Hon'ble Mover of the mendment are included in these words, or in the provision for the construction nd maintenance of schools, then I have very little to urge. But the question s whether 'open spaces for the promotion of exercise and physical education' re so included? If they are included, then I, as Chairman of a Municipality, vill undertake at the very next meeting of the Commissioners of that Munici- ality to have a Resolution passed for the acquisition of a plot of open land ufficient for the purpose, but the Commissioners of Municipalities apprehend that hey are not so included. But taking into consideration the fact that taste for ootball and other manly games is now growing in the mufassal, and that friendly ompetition in manly games is carried on between the residents of different laces, as also the fact that the acquisition of open spaces for this purpose in the

vicinity of mufussal towns is not expensive, I think the amendment of my hon'ble friend, the mover of the amendment, ought to be accepted. What will be the expense of acquiring a few bighas of land in mufussal municipalities? They are not Calcutta, where the value of land is so very great. Take the case of any neighbouring Municipality; take even Howrah, Serampore, Hooghly. You can get plenty of land at such places at a very little cost. A few acres of land would not cost very much in such places, and the up-keep would not cost much. I submit, therefore, that this amendment ought to be accepted."

The Hon'ble MR. RISLEY said:—"I have a personal explanation to make. I find that a certain speech I made at the first meeting of the Society for the higher training of young men, four years ago, as President of that Society, has been alluded to. I did say that the first thing to do was to get a good play-ground, but I put it that we must look for that to a 'benevolent founder', and I said no word whatever about the expenditure of public money for the purpose."

The Hon'ble MR. A. M. BOSE in reply said:—"The first objection, which has been taken to this amendment, is that it has been brought forward too late. I submit that it has been, on the contrary, placed before the Council at the earliest period when it is possible for any Member, who was not on the Select Committee, to have done so. As this argument has been used frequently in the course of these proceedings by the Hon'ble Member in charge, I think I should point out that it has been held over and over again that on the occasion when a Bill is referred to a Select Committee, Hon'ble Members can only speak upon the principle of the Bill Then if that is so, Hon'ble Members who are not on the Select Committee can only give notice of amendments and bring forward proposals when the Report of the Select Committee has been laid before the Council with the Bill, as recommended to be passed. We have heard in the course of these debates of disfranchising. But if the contention of the Hon'ble Member in charge of the Bill is correct, then it will disfranchise most of the Members of this Council, all in fact who are not Members of the Select Committee upon a Bill. But I submit with regard to this and other amendments which are before the Council, and also with regard to the constitutional rights of Hon'ble Members, that the contention of the Hon'ble Member is not tenable. This particular amendment, I may add, has been before the Council for the last three weeks. Passing on to the next argument of the Hon'ble Member that provision for the acquisition of open spaces is included in the clause relating to the construction, maintenance and improvement of gardens and squares, and with reference to other observations of a similar character which have fallen from some other Hon'ble Members, I venture to say that if that is so, there is no reason why we should wait for an expression of opinion from municipalities, and there is no substantial ground for the Hon'ble Member to oppose my motion. But if there is any room for doubt, I submit it is desirable and proper to remove that doubt by accepting the amendment. And there is ample room for doubt and more than doubt. It is perfectly true, as was observed by my hon'ble friend Mr. Das, that all squares are open spaces, but unfortunately the converse does not hold good, and it is not true that all open spaces are squares. I will give one or two instances. The other day I was at a mufassal station where I was shewn an extensive play-ground placed at the disposal of the public by the courtesy of the proprietor. That ground could not certainly be described as a square. I was told that the municipality could now acquire it on extremely easy terms, but that a few years hence it would be very costly to do so, and the probability is that it would be impossible. The same argument applies to the next objection that clause (*v*) regarding the establishment and maintenance of schools also includes provision for physical education. I think strong doubts may be entertained on that point; and in all probability, if any municipality were to expend money for the promotion of physical education under the authority of the clause which empowers it to provide for the establishment and maintenance of schools, the Commissioner of the Division would be down upon

it for having gone beyond the powers given by law. I hope it will be perfectly clear that I am prepared to have this provision so included within the section, that it will come within the purview of the proviso, and the provision for physical education shall be placed on the same footing as that for the improvement of the breed of horses, asses and the like. I trust this arrangement will remove the doubts which my hon'ble friend Maulvi Muhammad Yusuf Khan Bahadur has felt in regard to this matter. Then with regard to the objection on the ground of a multiplicity of objects to which municipal funds may be devoted, it should be remembered that this particular provision is purely optional and permissive. All that you will do is to give the Commissioners the power to give effect to it, if at any time funds are available and they find it necessary or desirable to do so. It has been said by the Hon'ble Member in charge of the Bill that in the case of Bengal municipal towns there is not that necessity for open spaces which exists in regard to English towns; that they are not overcrowded and cooped up as many English towns are. That, I submit, is an argument in favour of accepting my amendment. Let us take steps early, at a time when the small means at the disposal of municipalities may be able to provide what is wanted and prevent difficulties arising hereafter. It would not be the part of statesmanship or wisdom to wait till municipal towns become cooped up and are placed in the position of the English towns to which the Hon'ble Member in charge of the Bill has referred. Now when things can be easily done, if the object is a desirable one, let us enable municipalities to spend a portion of their funds to make provision for the open spaces which are really necessary and desirable, and let us take warning from the sad state into which many English towns have fallen."

The Hon'ble THE PRESIDENT said:—"Before putting this motion to the vote I wish to say a few words. Various objections have been taken to this amendment, the first of which is that it has been brought forward too late and at a time when municipalities cannot be consulted. That would have been a formidable objection with regard to the passing of a measure upon a matter which had not been referred to municipalities, and with regard to which they are to be left no option. But inasmuch as the Hon'ble Mover of the amendment wishes to place this provision under the proviso so that it will be entirely optional with municipalities to adopt the project contemplated by the amendment. I think the question which they might otherwise previously have answered, they will answer by-and-bye according to their own wishes and desires. Therefore I think that the objection which has been taken to the amendment having been brought too late is really no objection. Then it is said, however laudable this object may be—and not a single Hon'ble Member has attempted to suggest that it is not a laudable and useful object—it has already been provided for. Of course if it has been already provided for, the Hon'ble Mover of the amendment would not think of pressing his motion. I think it has not been provided for in the Bill. It is said that it will come under clause (xiii) of the section, which provides for 'works of public utility calculated to promote the health, comfort or convenience of the inhabitants.' I think that the object the Hon'ble Member has in view will not be such a work as that contemplated under clause (xiii), which refers to works of a structural character, or things of that description. Then it is said it will come under clause (v), which provides for the establishment and maintenance of schools. There is no doubt that works for the promotion of physical education may be undertaken by schools, but what is contemplated by the amendment is the acquisition of open spaces for the benefit of the people living in the municipality who may not be schoolboys and may not attend schools; therefore the objects which are contemplated by this amendment do not fall within the scope of clause (v). Then there is a more difficult question than those which I have been considering, and that is that under clause (i) power is given for the construction, maintenance and improvement of squares and gardens. No doubt under that clause municipalities can construct and maintain squares. It has also been said that municipalities may under this clause turn a square into a playground. I do not think that is the ordinary meaning of the word [illegible]

intention that people should use a square for the purpose of playing such a rough game as football or cricket. Squares are intended for the purpose of recreation and usually for every quiet people to congregate in and walk about, and not for the playing of games of this description. And then the object contemplated by the amendment, namely, 'the acquisition of open spaces and the promotion of physical education,' cannot be split up into two parts. What is meant is that open spaces might be kept for the promotion of physical education. The argument that the amendment might be split up into two parts and that those parts are provided for by individual clauses of section 69 is not in my opinion a correct view of the matter. We must therefore face the amendment as it stands, namely, to make provision for the acquisition of open pieces of land for the purposes of exercise and the promotion of physical education. A great many objects are covered by section 69, and I can see no possible objection to municipal funds being spent also in the way contemplated by the amendment, to the great advantage of people living in the municipality. In countries like France and Belgium municipalities provide for gardens and bands and all sorts of amusements for the people, and in this country are we not to spend money in providing open spaces for the promotion of physical health when we find that native boys are now taking a liking to manly sports and pastimes. The only reason that can possibly be urged against this amendment is that matters of this description do not come within the scope of the objects upon which municipal funds should be spent. I am plainly of opinion that they do. I think when you are providing for veterinary establishments for the benefit of the people so as to have their cattle looked after, I do not see why you cannot provide for the physical education of the people if you wish them to grow up a manly race, able to undergo fatigue and labour. I cannot conceive a higher object towards the accomplishment of which Municipal funds may be devoted. I have not heard a single word against the object of this amendment being a useful and most laudable one. The Hon'ble Maulvi Muhammad Yusuf Khan Bahadur expressly said that it is a most laudable object, and yet, bearing that in mind, he takes a very narrow view, and contends that this amendment should not be allowed. The Hon'ble Member in charge of the Bill suggested that we should look to the liberality of private individuals for such things. Suppose you do; there will be no means for keeping up the liberal gift. If you obtain a boon from a charitably disposed person, you cannot spend even a few rupees to keep it up. Honb'le Members have heard from the Hon'ble Rai Eshan Chundra Mittra Bahadur that lands outside Calcutta are not so valuable that Municipalities will not be able to acquire a few acres. Therefore under all these circumstances, as far as I can judge, I think the Council should consider well before they disallow this amendment. As far as I am concerned, if the amendment is put to the vote, I shall vote in favor of it."

The Hon'ble MR. RISLEY said:—"In view of the law as expounded by the Hon'ble the President, I will accept the Motion, provided it is passed as an additional clause (xiii), falling within the purview of the proviso to section 69."

The MOTION was put and agreed to, on the understanding that the new clause should be numbered (*viii*), the remaining clauses of the section being altered accordingly, and that the new clause should be mentioned in the proviso to the new section 69(i).

The Hon'ble MR. A. M. BOSE applied to the Council to withdraw the Motion of which he had given notice that in section 6, in the proviso to the new section 69 (1), for the words after "both inclusive" to the end of the proviso, the following be substituted:—

'unless such application be sanctioned by the consent of two-thirds of the Commissioners present at a meeting specially convened for considering such application, or held after special notice has been given that such application will be considered at such meeting.'

He said:—I am glad to find that the legal difficulty to which I had the honour of drawing the attention of the Council at its last sitting has

been fully recognized; and in order to obviate the inconsistency in certain cases, which I pointed out, between the proviso as drafted by the Select Committee and the provisions of section 70 of the Act, an amendment is to be moved by my hon'ble friend, Babu Surendranath Banerjee, which will no doubt be accepted by the Hon'ble Mr. Risley. There is one other remark I wish to make with regard to my amendment, and it is this. The position of affairs in respect of it at the present moment is materially different from what it was when I gave notice of it. At that time the proposed proviso related practically only to veterinary matters. But since then, on the motion of my hon'ble friend, Rai Eshan Chundra Mittra, Bahadur and on my own motion, which the Council has been good enough just now to accept, such matters as libraries and the acquisition of open spaces have been brought within the scope of the proviso. Under these circumstances I do not think the proviso need be made stricter than it is at present in the Bill. I would therefore ask leave to withdraw my amendment."

The Motion was, by leave, withdrawn.

The Hon'ble BABU GURU PROSHAD SEN moved that in section 6, in the proviso to the new section 69 (1), the words "two-thirds" be substituted for "majority"; and also that in the same proviso the words "at a special meeting to be convened for the purpose" be substituted for the words "at the meeting."

He said:—"This simply comes to the same thing as the amendment which has just been withdrawn, only that in the place of 'majority' I would have 'two-thirds present at a special meeting.' I think the necessity for fettering the discretion given to the Municipal Commissioners has been admitted by this Council, by providing that certain expenditure shall not be made 'unless a majority of the Commissioners present at the meeting are satisfied that the other purposes, specified or referred to in this sub-section, or such of them as the majority consider it necessary to carry out, have been sufficiently provided for.' But the question is whether by this provision that discretion has been sufficiently fettered. If you give the Commissioners the fullest discretion, I would not object; but when notwithstanding all the fine talk we have heard regarding the expenditure under certain heads being left to the discretion of the Municipal Commissioners, we have by the Select Committee's Bill provided for fetters to that discretion, and when once you recognise the necessity of fettering their discretion just as by the provision which I have read, instead of a majority of one I would make it a majority of two-thirds, and instead of a vote being taken at an ordinary meeting, I would have a special meeting. Some of the money might have to be spent outside the municipality. A legal objection was taken by my hon'ble friend Mr. Bose that in order to do that you require under section 70 a majority of two-thirds and the sanction of the Local Government. I think these are very necessary conditions, and that they are more necessary when you examine the state of the funds of mufassal municipalities. I have just stated that the utmost resources of 146 municipalities amount to Rs. 21,84,000, which gives an average of about Rs. 15,000 for each municipality. The expenditure under necessary heads, excluding education, absorbs almost the whole of this income, except about Rs. 10,000 or Rs. 12,000, not only to provide for education, but several other purposes. It is therefore absolutely necessary that the discretion of the Commissioners be used wisely. If the discretion is exercised wisely, probably all these clauses will be inoperative. But if the discretion is likely to be abused, it ought to be fettered more stringently than is provided for in the Bill. I submit therefore that to guard against abuse instead of measures of this kind being carried by a bare majority, there should be at least a majority of two-thirds of the members present at the meeting, and that that meeting ought to be a special meeting, so that the attention of the Commissioners may be specially drawn to the subject. Another reason for the necessity of fettering the discretion of the Commissioners in the way I propose is to be found in an amendment to be moved by my hon'ble friend Babu Surendranath Banerjee, under which the further restriction provided by section 70 is proposed to be removed in respect of expenditure incurred outside the municipalitity for certain objects. [The Hon'ble THE President:—"It is irregular to refer to a notice of motion which

is not now before the Council."] Then I shall confine myself to my own motion, in connection with which I think the conditions imposed by section 70 ought to apply."

The Hon'ble MR. RISLEY said:—"I have only to say that I hope the Council will reject the amendments which have now been moved, and will accept the amendment which will be moved by the Hon'ble Babu Surendranath Banerjee, and which covers the ground better."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"Let us for a moment leave out the amendment of which I have given notice and consider the amendment to the proviso of section 69 which my hon'ble friend has moved. He says the majority under the proviso should be a majority of two-thirds, and that that should be the majority of the Commissioners voting at the meeting in respect of expenditure, some of which may be incurred outside the limits of the municipalities concerned. But section 70 of the Act provides that when municipal expenditure is to be incurred outside the limits of a municipality, not a majority of two-thirds of the Commissioners attending the meeting, but two-thirds of the whole number of Commissioners must make a statement in writing in support of the proposal, and the recommendation must receive the sanction of the Local Government, and only under these conditions can any expenditure be legally incurred outside any municipality. A part of the expenditure which may be incurred under section 69 may be outside the municipality; therefore under the amendment of my hon'ble friend, the Commissioners will labour under a legal difficulty which the amendment which I propose to move later on will remove. But over and above this legal objection I have another objection based on practical considerations. Does my hon'ble friend really believe in his heart of hearts that if a majority of two-thirds is imposed this section will be at all operative? Moreover, the amendment will re-open matters which have already been discussed and decided. If my friend's amendment be accepted, the veterinary clauses will be rendered inoperative. I have not the slightest objection to introduce the necessary safeguards, but we should not fetter the discretion of the Commissioners so as to render it impossible for them to devote municipal funds to these purposes."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"I think this amendment should not be accepted. The obvious tendency of the amendment is to render those clauses of the section to which the proviso relates, more difficult of operation, if not absolutely impossible and nugatory. Several amendments have been accepted by the Council, on the ground of their importance, although their importance, being only secondary in degree, as compared with other objects, they have been thrown into the proviso: but it is quite clear that the proviso should not be so clogged and hampered by the introduction of conditions, as to render the clauses a dead-letter. The proviso should not, therefore, be made more stringent than it is."

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR said:—"I wish to oppose the amendment which has been moved by my hon'ble friend Babu Guru Proshad Sen. It appears to me that, if we require the votes of a majority of two-thirds of the Commissioners at a meeting, it will render these provisions absolutely inoperative. I have some experience in the working of Municipalities, and I know that, in the first place, it is difficult to get a very large number of the Commissioners to attend. We have had bitter experience of the way in which things are managed, when some particular questions are to be brought up; some will not attend, and others have an undignified way of reserving their votes. It will always be within the power of particular Commissioners, who wish to be obstructive, simply to say—we will not attend and we will not vote; I submit, therefore, that this amendment should not be passed. If the sense of the Council be that these matters should be considered at a special meeting, in order that the Commissioners may receive special notice of the importance of the subject, I have no objection, but the votes of a majority of two-thirds should not be required."

The Hon'ble BABU GURU PROSHAD SEN in reply said—"This amendment consists of two parts, one of which has reference to a majority of two-thirds, and the other, to the convening of a special meeting for the consideration of these matters. My hon'ble friend who spoke last agrees that special notice should be given of these meetings, but with respect to the question of majority, both he and my hon'ble friend Babu Surendranath Banerjee seem to think that, if a majority of two-thirds is required, these provisions will be wholly inoperative, and that section 70 insists on an impossibility. That section 70 of the Municipal Act is the work of that Select Committee of all the talents, for which we have the greatest amount of admiration here. [The Hon'ble MR. RISLEY:—"Not at all, it was in the original Bill of 1884."] Well, then, it was one of the sections, the impossibility of which they did not see. Then my hon'ble friend Babu Surendranath Banerjee sees a motive. He seems to think that I have moved this amendment in order to prevent the veterinary clauses from being operative. [The Hon'ble THE PRESIDENT:—"No: the Hon'ble Member said the effect of the amendment would be to render those clauses inoperative."] Well, I shall say then that the effect of passing these amendments according to the Hon'ble Babu Surendranath Bánerjee would be the amendment regarding the veterinary clauses having been lost: if the present amendment were to be passed, the application of Municipal funds to veterinary purposes would be rendered impossible, and thus the veterinary clauses would be inoperative. I did not know that he was so fond of these veterinary clauses, but I shall tell him once more what I have told before, that it is not the fetter which I seek to impose, but the scanty nature of the Municipal revenues, which will render the application of any money out of that fund to these purposes impossible. The total amount of Municipal revenue proper is Rs. 21,84,000 for 146 Municipalities, and the expenditure under those heads, to which there is no option left, is Rs. 21,72,600, excluding public instruction (I like to be corrected if I am wrong); therefore there will be no money to spend, and the clauses, if the discretion, which we now leave to the Municipal Commissioners, is not to be abused, but rightly used, are bound to be inoperative, and they will remain as dead-letters in our law, and all the time the Council has spent in providing for a class of expenditure which cannot be met from the scanty revenues of Municipalities has been spent in vain. It is all very good to hear of Municipal Commissioners being vested with discretion, but at the same time you do not leave them unfettered. It is true that the effect of my amendment is to make the fetters a little stronger. I say do not allow them the opportunity of abusing their discretion, and therefore I say do not leave the decision to a bare majority of one or two, but to a majority of two-thirds. It has been pointed out that, for expenditure outside Municipalities, a majority of two-thirds of the whole number of Commissioners, plus the sanction of the Government, is required under section 70. If that suits my hon'ble friends better, I will not have the slightest objection."

The Motions were severally put and lost.

The Hon'ble MR. A. M. BOSE moved that in section 6—

(*i*) the proposed new section 69B be omitted, and

(*ii*) for the first paragraph of the proposed new section 69A (*1*) the following be substituted:—

'Subject to such rules as the Local Government may from time to time prescribe, the Commissioners shall cause to be kept, for each hospital and dispensary vested in them, accounts showing—'

He said:—"Except for one small consideration, which I shall presently notice and for which my amendment provides, I find it difficult to understand why the Select Committee thought it necessary to propose this new section (69B). With regard to the proposed provision empowering the Local Government to make rules prescribing the qualifications of candidates for employment as veterinary practitioners, my first point is that it is wholly unnecessary. If we refer to section 69 as it stands, and as it is proposed to re-enact it, we find the following words 'and may, except as is otherwise provided in this Act and subject to such rules and restrictions as the

Local Government may from time to time prescribe, apply the Municipal fund to any of the following purposes,' one of which is the training and employment of female medical practitioners and of veterinary practitioners, &c. Therefore the power to make rules prescribing the qualifications needed is there provided for, and the proposed new section 69B is unnecessary. My second point is that it is more than unnecessary, because it presupposes the existence of doubts. [The Hon'ble THE PRESIDENT :—" It is under my advice that this section has been put in to make matters safer. "] My reason for moving the omission of section 69B is this, that it will by implication throw doubt on the construction of section 69 and on the exercise of powers which are now exercised by the Local Government. Let me give a concrete case. Under the present law the entire section 69 is governed by the clause ' subject to such rules and restrictions as the Local Government may from time to time prescribe.' In the Manual for the management and maintenance of dispensaries, it is stated that it is under this provision that the Local Government makes rules as to the qualifications of the Doctors to be employed, and so forth; and if that provision is sufficient for this purpose, then it is also enough for the purpose of defining the qualifications of veterinary practitioners. It applies as much to clause (*iv*) regarding the establishment and maintenance of hospitals and dispensaries, as to clause (*x*) regarding the appointment of qualified persons to prevent and treat diseases of cattle. Therefore, by enacting section 69B, which specially refers to clause (X) of section 69, doubt will be thrown by implication upon the power which the Government at present possess of laying down the qualifications of persons to be appointed as doctors, &c. This provision should therefore, I submit, be either omitted or extended in scope. Then coming to the next part of the new section 69B, ' generally for the guidance of the Commissioners in all matters connected with the carrying out of the purposes of section 69,' that also is, I submit, provided for in the saving and regulating clause of section 69, not simply as a matter of theory, but as a matter of practice, and not the slightest complaint has been made that the Lieutenant-Governor is exceeding his powers. Why then still further extend those powers as now proposed? The only reason I can understand for the introduction of section 69B arises from its referring, not only to section 69, but also to section 69A, which provides for the keeping of separate accounts of hospitals and dispensaries vested in the Commissioners. The governing clause of section 69, while it will sufficiently apply to the making of rules for the establishment and maintenance of dispensaries for veterinary matters, will not apply to the hospitals and dispensaries mentioned in section 69A. Therefore in the second part of my amendment I propose to put in the new section 69A the words which now exist in section 69, and thereby extend them to the matters mentioned in section 69A. If I have been able to make myself clear, I submit that there is no necessity for anything like section 69B by way of safeguard, and moreover it may lead to a doubtful interpretation, and to a result just the reverse of that which is wanted. This amendment raises no question of principle, but only refers to the proper way of laying down what we all want to provide."

The Hon'ble MR. RISLEY said:—"I have only to say that this is what may be called a lawyer's question. It was pressed upon me by the learned Assistant Secretary to the Legislative Department, who is an extremely accomplished and experienced drafter, that something of this kind is necessary to make clear the power which the Government has of making rules, and on this point the learned Advocate-General, who is the highest legal adviser of the Government, has concurred with the Assistant Secretary and has taken the same view of the matter."

The Hon'ble THE PRESIDENT said:—"I think the new section 69B very necessary, and I approve of it. I do not propose to discuss a legal question here."

The Motion was put and lost.

The Hon'ble BABU SURENDRANATH BANERJEE moved that for section 7 of the Bill the following be substituted:—

"7 (1) For the words 'the last preceding section' in section 70, the words and figures 'section 69, sub-section (1)' shall be substituted.

"(2) To the said section 70, the following shall be added, namely:—

'Notwithstanding anything in this section, the Municipal Fund may be applied, by the vote of the majority referred to in the proviso to section 69, sub-section (1), and without the consent and sanction mentioned in this section, to meeting expenses incurred beyond the limits of the Municipality in the training of female medical practitioners, or of veterinary practitioners.'"

He said:—"This amendment is divided into two parts: section 70 deals with the expenditure of money outside the limits of Municipalities, and in such cases the section requires 'the consent of two-thirds of the Commissioners obtained in writing and the sanction of the Local Government to such expenditure.' Two sub-sections have been added to section 69, which do not in the smallest degree refer to the expenditure of Municipal money outside Municipal limits. Sub-section (2) of section 69 provides as follows:—

'(2) The Municipal Fund shall also be applicable to the payment, at such rates as the Local Government may from time to time direct, of travelling expenses incurred by any of the Commissioners in attending meetings convened under the rules made by the Local Government in pursuance of sub-section (4) of section 1 of the Indian Councils Act, 1892, for the purpose of recommending a person to be nominated as a member of the Lieutenant-Governor's Council.'

"It is very obvious that the money to be spent under this clause will be spent within the limits of the Municipality; therefore it cannot come within the purview of section 70, which deals with the expenditure of money outside Municipal limits. Further, sub-section (3) of section 69 is of wider application, and empowers the Commissioner to do all things not inconsistent with the Act which may be necessary be carry out the purposes of the section. I have also to point out that the words 'last preceding section' in section 70 may now be held to apply to section 69B, which has nothing to do with the subject-matter of section 70. As the Hon'ble Mr. Bose observed with great force, the new proviso to section 69 of the Bill is in conflict with the provisions of section 70 of the Act. The object of my amendment is to remove this legal defect, while maintaining the necessary safeguards imposed by the proviso. But at the same time I think it will occur to most people, that when a Municipality desires to spend a few rupees a month on such paltry objects as the training of female doctors, or the training of veterinary students at Belgatchia, they ought to be allowed to do so without the elaborate formalities provided by section 70, namely, the consent of two-thirds of the whole body of Commissioners obtained in writing, such consent being afterwards ratified by the Local Government. That seems to me to be a waste of administrative energy. Therefore, having regard to the changes which have been introduced in the proviso to section 69, this seems to me to be a necessary amendment. For the more important purposes involving expenditure outside the limits of Municipalities, such as the establishment of hospitals, &c., beyond Municipal limits, the elaborate safeguards provided by section 70 will be operative. The object of my amendment is to cure a defect in the law, which was referred to by my hon'ble friend Mr. Bose, and also to promote the purposes of administrative convenience."

The Hon'ble MR. RISLEY said:—"I accept this amendment. When the question as to the provisions of section 70 was raised in Council the other day, I did not reply to what was then said. I was not prepared on the spur of the moment to pronounce on a question, the solution of which is by no means easy. We have now what seems to me to be a satisfactory section, but it was not the work of two minutes. It seems unnecessary that these small items of scholarships and the like should come within the purview of section 70, which was intended to apply to the cases of large payments made to other Municipalities by way of contributions to important works of drainage and the like in which both the Municipalities are interested."

The Hon'ble MR. A. M. BOSE said:—"I rise to make one suggestion, namely, that the words 'the proviso to' in the second line of the second part of my hon'ble friend's amendment be omitted, and my reason for doing so is this. In section 69 there are two majorities referred to—one in the opening part of section 69 (1) for the application of Municipal funds to the purposes described, in which the votes of a majority will be necessary, and in addition to that a second majority is required in regard to the clauses specially mentioned in the proviso. If the amendment proposed by my hon'ble friend, Babu Surendranath Banerjee, is accepted as it is now drafted, then the necessity for a two-thirds majority and the sanction of the Local Government, which section 70 requires will be obviated only in the case of a division under the proviso. But that will not obviate the necessity for a majority of two-thirds under section 70 in regard to the second or other division which will be required for the grant of any help in training female and veterinary practitioners. The amendment only refers to the majority mentioned in the proviso. It does not refer to the majority which is necessary under section 69 itself. The acceptance of my suggestion will, on the other hand, meet the whole difficulty."

The Hon'ble MR. RISLEY said:—"I would advise the Council to accept the amendment of the Hon'ble Babu Surendranath Banerjee, and leave the difficulties referred to by the Hon'ble Mr. Bose to be considered before the Bill is finally passed."

The Motion was put and agreed to.

The Hon'ble Mr. A. M. Bose moved that, in sub-section (*1*) of section 8 of the Bill, for the words and figures "in section 142" be substituted the words and figures "in section 131 and section 142."

He said:—"The expression 'habitually used' is a very vague expression. It has formed the subject-matter of a reference to the High Court, where the interpretation has been not only narrowed, but left about as uncertain as before. The Select Committee propose to remove that uncertainty in regard to section 142. But the substantive portion of section 142 of the Municipal Act has been copied from section 131, with this difference that section 142 applies to taxation in the case of carts, and section 131 relates to the imposition of a tax upon the use of carriages and horses which are kept or 'habitually used' within the Municipality. The one is as vague as the other, and therefore to avoid a further reference to the High Court, I have brought forward this amendment."

The Hon'ble MR. RISLEY said:—"I accept this amendment. A reference to the judgment of the High Court supports the Select Committee in the interpretation they have put upon the word 'habitually.' The High Court decided in the case which was referred to them, that a cart cannot be said to be habitually used, unless it is used in pursuance of the owner's occupation."

The Motion was put and agreed to.

The Hon'ble MR. A. M. BOSE also moved that the following words be added at the end of sub-section (*1*) of section 8:—

"and after the words 'or habitually used within,' in those sections, the words 'the Municipality' shall be added."

He said:—"I have often considered the wording of this section and have been puzzled. It is a mere question of drafting. Section 142 provides that 'the Commissioners at a meeting may make and publish an order that every cart which is kept or habitually used within, or which is let for hire within or without the Municipality and habitually used within it, shall be registered, &c. My difficulty comes in after the word 'within.' What is it that 'within' governs? Does it govern the word 'Municipality' in the next clause? If so, it means 'which is kept or habitually used within the Municipality and habitually used within it.' That would bear no meaning. Putting in the

word I suggest after 'within' would remove the difficulty. I therefore propose this amendment."

The Hon'ble MR. RISLEY said:—"I have not the slightest objection to this amendment, but I am not prepared to say that it is necessary. I am told that the section as it stands is good legal grammar."

The Motion was, by leave of the Council, withdrawn.

The Hon'ble MR. A. M. BOSE also moved, that after sub-section (*2*) of section 8, the following be inserted—

"(3) To section 147A the following shall be added, namely:—

'When carts not kept within any Municipality or Cantonment are so used in more than one of them, on the application of any one of such Municipalities or Cantonments, the Local Government may apportion the amount of registration fee between them.'"

He said:—"Section 147A contains a very salutary provision which protects carters from having to pay fees to more than one Municipality. My amendment does not affect the carters at all. They are not to be required to pay more than one tax, but it is a question which relates to the different Municipalities, the roads of which are used by these carts; it is extremely desirable that the difficulty which is now experienced between these Municipalities in regard to the collection of the cart registration fee should be removed. One concrete case will perhaps illustrate the necessity for my amendment, better than any amount of abstract exposition as to the difficulty which the amendment is intended to remove. There are two Municipalities, the circumstances of both of which I happen to know. I shall call them A and B. A large number of carts which are kept in rural areas pass through Municipality A, using a short extent of its road; they do not stop there or transact any business there. Then they enter Municipality B, passing through several miles of its roads. Some of them come on to Calcutta, but a great many of them stop at B and transact business there. There are two Railway Stations in B, and a large jute business is also transacted there. But it so happens that the carts having to enter A in the first instance, the tax is realized there and B gets no portion of it. That does not seem to be fair or just. But that is not all, for this state of things sometimes leads to Municipal demoralisation; before the date of cart registration comes on, there is a regular system of coaxing going on, and even worse than that—it may lead to what may be called a war of tariffs between different Municipalities. The rates for cart registration are not subject to the sanction of the Commissioner of the Division, but are entirely within the discretion of Municipalities, and there will be a temptation or competition amongst neighbouring Municipalities to fix the rates, irrespective of the merits of the case, so as to induce as many carts as possible to be registered within their limits. Therefore I submit there should be a power vested in the Local Government, if it thinks fit, on the application of any Municipality, to apportion the proceeds of the taxation upon carts between the several Municipalities entitled to them. In section 96 of the Calcutta Municipal Consolidation Act there is such a provision. It is there provided that the net proceeds of the tax shall be divided between the Municipalities of Calcutta and Howrah, and such other Municipalities adjacent to Calcutta or Howrah as the Local Government shall declare to be entitled to a share in the receipts. Therefore what I propose is not a novel procedure. In the Calcutta Act the Local Government *shall* apportion. My proposal does not go so far. All I ask is that the Local Government may, if it think it necessary in any case, apportion the fees which have been realized between the several Municipalities in order to prevent injustice to the Municipalities, harassment to the carters, and the other evils to which I have referred."

The Hon'ble MR. RISLEY said:—"I sympathise strongly with the principle of this amendment. The only difficulty is how we shall give effect to it. The precedent which has been quoted from section 96 of the Calcutta Act is one way parallel and in another way it is not. Under that section we do

declare that certain municipalities are entitled to certain fractions of these fees; but there all the fees are collected by one municipality, the municipality of Calcutta, and put into a separate fund, so that there is something tangible to divide. But here the carts do not all pay to one municipality, and there is great confusion, as they pay fees sometimes in one municipality and sometimes in another, and I do not see how we are to apportion a lot of individual fees which are paid here, there and everywhere, at different places at different times. It seems to me to be an impossible state of things. Then I have another objection to the amendment of a technical character. I believe it is the case that this Council is not entitled to introduce into this Bill any provision relating to Military Cantonments, the municipal affairs of which are governed by an Act of the Imperial Council of the year 1889. Every one admits that the difficulty which the Hon'ble Member has pointed out does exist, and I am very much afraid that in certain cases it leads to unhappy controversies between neighbouring municipalities regarding the payment of two or three rupees by way of registration fees, and it possibly also does lead to some oppression on carters. As I have already said, I fear a proper solution of the difficulty is impracticable, and the Government would have the trouble of deciding upon separate applications each claiming the fees paid by individual carters, and there might be two or three hundred such applications to decide upon. The Government would in such cases decline to pass any order, and the municipalities would be left to their own resources. The only solution I can suggest is one of two arbitrary ways. Either the fees may be apportioned with reference to the expenditure upon the repair of roads in each municipality, an apportionment which might be left to the Commissioners of Divisions. Or you might be more arbitrary and say that the fees shall be divided equally between all the municipalities concerned in which carts have been registered. I am not prepared to say which of these methods is the best, but I am quite certain that the amendment as it stands will not answer."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am afraid that whichever of the two ways of solving the difficulty suggested by the Hon'ble Member in charge of the Bill is adopted, great injustice will be done to some municipalities. Take the case of the Baidyabatty Municipality. It is opposite the North Barrackpore Municipality with which I happen to be connected. A large portion of the income of that municipality is derived from fees for the registration of carts. They get about Rs. 6,000 a year from cart registration out of a total revenue of about Rs. 18,000. They have a great *hât* held there twice a week, and if it were not for that *hât*, carters would not go there. A town which has a *hât* of that description to which a large number of carts resort is legitimately entitled to the fees for the registration of those carts. But if you adopt a rule such as that proposed by the Hon'ble Member in charge of the Bill, I think a municipality like Baidyabatty would have cause to complain. I confess that the question is attended with serious difficulties, and therefore the Legislature for years together refused to define the word 'habitual.' The question came up before the Select Committee of 1894, and they set their faces against defining the word; they thought it would be best not to attempt a definition. We have attempted a definition this time, and I think we should stop at that point. If further difficulties arise, they might be dealt with later on. It may be that our inaction may lead to hardship and perhaps injustice, but I do not know that it is possible by any act of the Legislature to deal with the matter so as to do justice to all interests concerned. Our efforts in this Council really produce very little results. I am therefore inclined to leave things alone. 'Sufficient unto the day is the evil thereof' is a maxim which the practical administrator may sometimes conveniently adopt."

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR said:—"I do not agree with the Hon'ble Member who has just spoken, though I admit that this is a matter of great difficulty. In the Hooghly Municipality there is a *hât* from which the Municipality derives an income of Rs. 2,000. In going to that *hât*

carts travel through roads in different municipalities and sometimes also through the Grand Trunk road. It is difficult to adjust on what principle cart-fees are be to apportioned in such a case, and there is constant contention between the employés of neighbouring municipalities. Between the municipalities of Serampore and Bansberriah, a distance of 14 miles, there are several municipalities, with intervening distances of two or three miles. Several carts come to the *hât* or bazar in the Hooghly Municipality, and the roads within it are to a certain extent used by such carts. Under section 142 of the Municipal Act the Bansberriah Municipality imposed a fee of Re. 1-8, and all the carts got themselves registered there. The Municipal Commissioners referred the matter to the Commissioner of the Division, and he declined to sanction the budget of that municipality unless they raised the fee to Rs. 2, and thus the matter was set at rest. The officers of the several municipalities try to seize the carts as early as they can, and there is an unhealthy competition which should be put a stop to. Although the task is a very difficult one, still some attempt should be made to divide the proceeds of cart-fees in such a way as to meet the requirements of the several municipalities. Some attempt should at any rate be made to prevent the unhealthy competition which is now going on."

The Hon'ble MR. A. M. BOSE in reply said:—The Hon'ble Member in charge of the Bill has been good enough to express his great sympathy with this amendment, and to admit the hardship and the difficulties which result under the existing law. I would appeal to him to carry his sympathy a little further and accept my proposal. All that my amendment asks is that power may be left in the hands of the Government to take up the matter and apportion the proceeds of cart-fees if they think there is a practical difficulty which ought to be dealt with by the Government. If they think that in certain cases it will be best to leave matters alone, they will do so. If in other cases they find difficulties of serious proportions, and that there is a way in which these can be met, they will exercise the power which my amendment proposes to confer on them and remove those difficulties. I may point out that it is altogether premature to discuss at this stage what particular solution it would be best to apply in any particular case. That would depend upon the nature of the case itself. Therefore I hope there will be no objection to the acceptance of the amendment. I have no objection to the omission of the reference to Cantonments, as there is the technical difficulty to which the Hon'ble Member has referred. My only reason for putting in the word Cantonment was that it occurs in the section of the present Act to which my amendment proposes an addition.',

The Motion was then put and agreed to in the following amended form:—

"(3) To section 147A, the following shall be added, namely:—

'When carts not kept within any municipality are so used in more than one municipality, the Local Government, on the application of the Commissioners of any such municipality, may, if it thinks fit, apportion between all such municipalities the registration fee paid under this Act in respect of such carts.'"

The Council adjourned to Saturday, the 22nd instant.

CALCUTTA;
The 8th September, 1896.

F. G. WIGLEY,
Offg. Assistant Secretary to the Govt. of Bengal,
Legislative Department.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE STATIONERY DEPARTMENT FOR 1895-96.

FINANCIAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 31st August 1896.

RESOLUTION—No. 4866Mis.

READ—

Letter No. 689B., dated the 29th July 1896, from the Board of Revenue, submitting the Report on the Administration of the Stationery Department for the year 1895-96.

THE following statement compares the value of the stocks, receipts, and issues of the Stationery Office for the past two years:—

	1894-95.	1895-96.
	Rs.	Rs.
Value of stores at the beginning of the year	6,87,473	7,39,840
Gain (+) or loss (—) by revaluing the opening balance at the issue rate of the year	(—)24,019	(+)71,537
Corrected value of stores	6,63,454	8,11,377
Value of stores received during the year ...	23,57,947	25,56,706
Total ...	30,21,401	33,68,083
Value of stores issued during the year ...	22,81,561	25,97,305
Value of the balance in stock at the close of the year	7,39,840	7,70,778

2. Compared with the figures of 1894-95, there was an increase of Rs. 1,98,759 in the value of stores received, and of Rs. 3,15,744 in that of stores issued during the year. The value of the stores in stock at the close of the year also rose by Rs. 30,938. The advance in the receipts was mainly due to an increase, amounting to Rs. 1,93,252, in the value of country-made paper, of country-made miscellaneous articles, and of English articles purchased locally. This increase is attributed to the higher rates charged for paper by the local mills; to a greater demand for paper made by the printing presses directly under the Governments of India, the North-Western Provinces and Oudh, and the Central Provinces, and also by the Postal Press at Aligarh; and to an enhanced expenditure on China ink, miscellaneous articles, and binding materials, which were largely indented for by the Military Officers with the Chitral Relief Force and by the presses. English articles obtained from the India Office show a falling off in value of Rs. 30,852, if calculated at 2 shillings per rupee on their invoiced prices, but this decrease would diminish to Rs. 309 if the percentage to cover exchange, freight charges, &c., is included in the prime cost of the stores. In the Resolution reviewing the report for 1894-95, it was laid down that the value of imported stores should be calculated on their invoice value at the official rate of exchange for the year, *plus* 15 per cent. on the converted value for freight, packing, and other incidental charges. This method of valuation has been adopted with effect from the current official year, but could not, it is stated, be applied to the valuation of imported stores received during 1895-96, as the order was received late in the year, when most of the stores had been already valued on the old plan. The official rate of exchange for 1895-96 was 1*s.* 1½*d.*, against 1*s.* 1 1/16*d.*, the average rate for the preceding year; and, calculated at these rates, with 15 per cent. added for freight, incidental charges, &c., the total value of imported goods would amount to Rs. 4,57,886, against Rs. 5,05,463 in 1894-95, showing a decrease of Rs. 47,577.

3. The value of stores issued to departments and officers under Local Governments rose by Rs. 2,01,575 as compared with the figures of the preceding year. The largest advance, viz. Rs. 1,61,033, occurred in the North-Western Provinces and Oudh, but all the other Local Governments, except the Punjab and Assam, contributed to the increase. The increase in Bengal amounted to Rs. 17,037, while the value of stationery used by officers and departments under the Government of India rose by Rs. 1,13,687. The largest decrease occurred in the supplies to State railways, which show a falling off of Rs. 28,493. These fluctuations have not been explained in the report under review, and it is stated that they will be noticed in the reports on the consumption of stationery, which the Superintendent submits to the several Local Governments and to the Government of India.

4. The value of the stores in stock at the end of the year was Rs. 7,70,778, or Rs. 30,938 in excess of that at the end of 1894-95. This high figure is said to be due to the inability of certain officers to gauge their requirements accurately, to the fact that certain consignments of goods from England were not received till late in the year, to the higher rates charged by local mill-owners for country-made paper, and to the fall in exchange. The last cause accounts for no less than Rs. 30,543, so that the increase only came to Rs. 395. It must be remembered, however, that the balance of the preceding year was unusually high, and considerably exceeded the average consumption for three months, which is the proper standard to observe. The necessity for keeping the balance within reasonable limits has often been pointed out, and the Lieutenant-Governor desires that special attention may be given to this important matter.

5. The quantity of water-marked paper issued for use with court-fee stamps rose by 1,406 reams, and its value by Rs. 4,570. The increase occurred chiefly in Bengal and the Hyderabad Assigned Districts, while the Punjab, the Central Provinces, and the Native States in Orissa show a decrease. This paper has recently been introduced into the North-Western Provinces and Oudh.

6. The income and expenditure of the Stationery Department amounted to Rs. 4,655 and Rs. 1,04,483, respectively, against Rs. 94,262 and Rs. 1,05,136 in the preceding year. The falling off in the receipts, amounting to Rs. 89,607, is due almost entirely to the exclusion from the accounts of the commission of 5 per cent. on the value of locally-purchased articles, which is a book entry and had been improperly mixed up with cash transactions. The items of expenditure which show an increase are freight and miscellaneous charges. An increase of Rs. 4,860 under the former was due to freight and bailing charges incurred in despatching packages of stationery by steamer to the State railways in Burma and to the East Coast Railway in Madras, and in sending papers direct from the mills to the presses in the North-Western Provinces and Oudh and the Central Provinces, while under the latter Rs. 4,271 was expended on the payment of municipal rates and taxes for the Stationery Office.

7. The total value of the different articles of stationery issued, exclusive of deficiencies in stock-taking and miscellaneous adjustments, shows an advance of Rs 3,14,129. This increase is partly attributable to the fall in exchange and the consequent rise in the rates of locally-manufactured articles, but there were other reasons, among which the following may be mentioned:—An increased supply of drawing paper, drawing materials, and tracing cloth to the Public Works Department and the Commissioner of Settlement and Agriculture, Central Provinces; the consumption of a larger quantity of writing, printing, and coloured papers, and of binding cloth and materials by the Government presses; the issue of a larger supply of carbonic, papyrographic, and other kinds of paper to the Telegraph and Postal Departments, and to the Military Officers with the Chitral Relief Force; the demand for Chubb's padlocks and box-locks throughout India. The principal increases occurred under "Writing paper" (Rs. 60,114), "Printing paper" (Rs. 1,45,657), "carbonic, papyrographic, and other kinds of paper" (Rs. 33,306), "Paste, mill and straw boards" (Rs. 9,366), and "Other articles" (Rs. 11,480). The only noticeable decrease was in the consumption of quill pens, which shows a falling off of 300,000 in number and Rs. 4,954 in value.

8. The substitution of country-made for imported articles effected a net gain of Rs. 1,47,358 in paper and Rs. 7,997 in other articles. The use,

however, of country-made white printing, white cartridge, coloured mottled grey, and cream-wove paper resulted in a loss, which the Superintendent states at Rs. 36,861; but, seeing that the samples of English-made paper, with which the comparison is made, were very inferior in quality to the country-made paper actually purchased, this figure cannot be taken to represent the true state of the case. In 1894-95 a loss of Rs. 5,260 was incurred by the use of country-made white cartridge and coloured mottled grey paper, and in paragraph 9 of the Resolution reviewing the report for that year, it was observed that, unless the local mills were prepared to reduce the rates for these two kinds of paper, they should in future be obtained from England. The system of procuring paper appeared also to the Lieutenant-Governor to admit, in some respects, of improvement, and, with the consent of the Government of India, a standing Committee was appointed to consider the questions that might arise in connection with the substitution of country-made for English stationery, and with the settling of contracts for Indian-made stationery. It is satisfactory to notice that mill-owners have reduced their rates for certain descriptions of country-made paper, and that no loss is expected to arise from the use of locally-manufactured paper of any kind during the current year.

9. For the purpose of determining the relative prices of paper made in England and in India, samples of country-made paper have hitherto been sent to England by the Superintendent of Stationery three months before calling for tenders, and the Director-General of Stores has furnished him with samples of English-made paper of similar quality, with their English prices. A difficulty has now arisen in obtaining samples and prices, owing to the refusal of English manufacturers to supply samples which cost money and bring in no orders, and the Director-General has therefore suggested that one-tenth of the annual requirements of paper for the Stationery Office should be obtained from England. The question is now under the consideration of the Government of India.

10. The system of supplying newspapers and periodicals through the Stationery Office appears to be working satisfactorily. The number of periodicals supplied during the year fell off by 72, while that of newspapers and books rose by 241 and 1,743, respectively, as compared with 1894-95. The total payment for the newspapers, &c., amounted to Rs. 1,06,671, against Rs. 90,366 in the preceding year. The excess expenditure was incurred mainly by the Finance and Commerce Department of the Government of India, the Military Education Department, and the Government of Bengal.

11. The details of the administration of the Form Branch of the Stationery Office, which relates almost entirely to Bengal, will be embodied in the report on the consumption of stationery by the various offices under the Government of Bengal, and will be reviewed when that report is received. Here it is sufficient to say that the total number of standard and special forms received from the press and issued during the year shows a considerable decline. The Lieutenant-Governor observes with satisfaction that the decrease in the consumption of forms is said to be mainly due to the active co-operation of the District and Subdivisional Officers with the Superintendent of Stationery in adopting every possible method of economy in this direction. In paragraph 12 of the Resolution on the Annual Report for 1894-95, it was stated that the rule directing that no form should be revised nor any new form introduced, except at or before the time of the annual indent, save with the sanction of Government, had not been carried out in the case of forms prescribed by the High Court or the Accountant-General, Bengal, and the Comptroller, Assam. It has since been arranged that the Comptroller-General and the Accountant-General, Bengal, will inform the Superintendent of Stationery, when they prescribe new forms, whether these must be introduced at once or whether they may be held over until the existing stock is exhausted; that the Comptroller-General will issue a circular requesting all Account Officers to ascertain, before issuing orders for the introduction of a new form, what stock exists of the form which is to be superseded, and that the Superintendent, when he has a large stock of any form which it is proposed to condemn, should bring the fact to the notice of the Account Officer concerned. In similar cases, the High Court have nearly always ordered the old forms in stock to be used up before a new supply was indented for. These measures form a sufficient safeguard

against the loss which may be caused by superseding a large stock of existing forms.

12. The receipts and charges of the Form Branch amounted respectively to Rs. 37,084 and Rs. 47,746, against Rs. 34,957 and Rs. 48,109 in 1894-95. The increase in the receipts, amounting to Rs. 2,127, was mainly due to the sale of a larger number of forms and service-books to the public in Bengal and Assam, while the decrease in expenditure is the necessary consequence of the despatch of a smaller number of forms.

13. The thanks of the Lieutenant-Governor are due to Mr. Beames, who held the post of Superintendent of Stamps and Stationery during the greater portion of the year, for his economical administration of the Department.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Board of Revenue for information, and that their special attention be invited to paragraph 4.

Ordered, also, that a copy of the Resolution, with a copy of the report, be submitted to the Government of India, in the Department of Finance and Commerce, for information.

Ordered, also, that a copy of the Resolution be forwarded to the Superintendent of Government Printing, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE WORKING OF THE CALCUTTA SHIPPING OFFICE AND OF THE SHIPPING OFFICES AT THE OUTPORTS FOR THE YEAR 1895-96.

No. 1468Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 5th September 1896.

RESOLUTION.

READ—

Letter No. 676B., dated 28th July 1896, from the Secretary, Board of Revenue, Lower Provinces, submitting the Annual Report on the working of the Calcutta Shipping Office and of the Shipping Offices at the outports for the year 1895-96.

The number of seamen of all nationalities shipped and discharged through the Calcutta Shipping Office was 21,644 and 20,515 respectively, as compared with 21,555 and 19,724 in the previous year:—

	1895-96.		1894-95.	
	Shipped.	Discharged.	Shipped.	Discharged.
British ...	1,184	1,052	1,545	1,346
Europeans, Continental ...	428	431	648	632
Americans and West Indians ...	189	124	266	183
Australians ...	10	10	19	15
Asiatics other than Indians ...	236	307	245	294
Indians proper ...	19,183	18,181	18,466	16,787
Eurasians and Goanese ...	414	410	366	467
Total ...	21,644	20,515	21,555	19,724

These figures show that the decrease in the number of British seamen shipped and discharged, which was noticed in the reports of the last two years, still continues, and also that this decrease continues to be accompanied by a much larger increase in the number of Indian seamen. The lascar appears to be gradually supplanting the European sailor in the Indian Trade.

2. The number of seamen of all nationalities shipped in and discharged from foreign vessels through their Consulates, and not included in the figures given above are—

Shipped	92
Discharged	54

The number of deserters fell from 62 in the previous year to 46, the decrease being ascribed to the reduction in the number of European seamen arriving at the Port as crews of British ships.

3. The receipts of the shipping office amounted to Rs. 39,462, as compared with 39,823 during the previous year, showing a decrease of Rs. 361. The largest falling off was under "shipping fees," and this was due to the more extensive employment of lascars. Under discharging fees there was a small increase due to the fact that some native crews which were engaged in Bombay were discharged through the Shipping Office on the termination of their engagement and sent back to that port by rail. The expenditure amounted to Rs. 24,124 against Rs. 23,711 in 1894-95, the cause of this small increase being satisfactorily explained.

4. The following table shows the receipts of the funds held in trust by the Shipping Office for the past two years:—

	1895-96. Rs.	1894-95. Rs.
Ticket money	430	322
Deposit money of British seamen	40,661	38,797
Deposit money of Native seamen	6,614	1,867
Estates of deceased native seamen	4,720	3,675
Total ...	52,425	44,661

As explained in last year's report, the amount of "deposit money" is dependent on the number of seamen discharged or left behind in jail or hospital. During the year there was an increase in the number left behind, the majority

of whom were foreigners, who deposited a portion of their wages in the Shipping Office in order to secure the rights of British seamen, especially in the matter of relief and passage home at the expense of the British Government. The number of deposits made was 375.

The large increase of Rs. 4,747 in the deposits of native seamen was principally due to the remittances from Singapur of the crews of two steamers, who were sent on as passengers to Calcutta.

Hitherto the head of account "Estates of British seamen" has been included in the funds held by the Shipping Master in trust, but under the orders of the Board of Revenue this account has now been separated and shown as a separate item under the heading "Account current with the Board of Trade." The receipts credited to this fund were Rs. 9,928 against Rs. 5,765 during the previous year.

The amount remitted on account of seamen's money-orders was Rs. 11,079. The increase is ascribed to the more favourable rate of exchange, which made it an easier task to pursuade seamen to remit their wages home.

5. The number of distressed seamen sent home was 102 against 26 in the preceding year. Of this number 66 arrived in Calcutta from other ports in search of work, but as there was no reasonable prospect of their obtaining employment, they were deported at the expense of Government. This large influx of unemployed seamen was a source of considerable anxiety to the authorities, and the Government of India, as well as the Colonial Governments, have been addressed on the subject with a view to prevent its recurrence.

6. Two cases of imposition on seamen, and one of ill-treatment were reported. In the first case the serang and lascars of a steamer complained that they had not been supplied with food according to the scale of provisions sanctioned by Government. The charge having been proved, compensation was awarded. In the second case the master of a ship was prosecuted for presenting an incorrect account of one of his crew who had applied for his discharge. The Master was acquitted by the Chief Presidency Magistrate, but the High Court set aside the order for discharge, on the ground that an offence had been committed against the statute, though the master was not actuated by dishonest motives. The charge of ill-treatment was found to be without foundation.

7. At Chittagong the number of seamen shipped and discharged was 28 and 50 against 46 and 33 in the previous year. The decrease in the shipments is stated to be due to the smaller number of men who sought employment at Chittagong, while the increase in the number of discharges is attributed to the paying off of the whole of the crew of a native vessel on the termination of her agreement during the year. The strictness which was observed in sanctioning the discharge of seamen on the ground of mutual consent, though tending to reduce the number of discharges on that ground, is held to have been the cause of the increase in the number of desertions, which were seven as compared with one in the previous year. One of these deserters was arrested and eventually treated as a vagrant, but the other six escaped.

The receipts on account of Trust Funds amounted to Rs. 2,677 against Rs. 4,075 in 1894-95.

The Shipping Master visited 69 ships in port, and no complaints of bad or insufficient food were made.

8. At False Point 4 seamen were shipped and 75 discharged. Of the number discharged one was a European and the remainder natives and all were discharged by mutual consent. These men were replaced by other seamen from Calcutta.

The Shipping Master paid 11 visits of inspection to vessels in port. No complaints were made by any of the crews of the ships visited.

9. At Balasore 15 seamen were discharged. Of these, 6 were prosecuted and sentenced to six weeks' rigorous imprisonment for continued wilful disobedience of orders and neglect of duty.

10. No transactions under the Merchant Shipping Acts are reported to have taken place at Puri.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Col.*, R.E.,
Secretary to the Government of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CHITTAGONG FOR THE YEAR 1895-96.

No. 1481Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 8th September 1896.

RESOLUTION.

READ—

The Administration Report of the Commissioners of the Port of Chittagong for the year 1895-96.

Financial. The financial position of the Chittagong Port Fund for the past two years is shown in the following statement:—

1	1894-95.			1895-96.		
	2			3		
	Rs.	A.	P.	Rs.	A.	P.
Opening balance of the year	55,291	10	7	70,134	3	0
Receipts during the year	99,928	8	8	89,080	15	4
Total ...	1,55,220	3	3	1,59,215	2	4
Expenditure during the year	85,086	0	8	1,02,257	8	9
Balance at the close of the year	70,134	3	0	56,957	9	7
Total ...	1,55,220	3	3	1,59,215	2	4

2. Shipping. The subjoined table shows the number and tonnage of the vessels which visited the port during the year as compared with the figures of the two previous years:—

		1893-94.		1894-95.		1895-96.	
		Number.	Tonnage.	Number.	Tonnage.	Number.	Tonnage.
1		2	3	4	5	6	7
European vessels trading with foreign ports.	Entered ...	17	30,272	32	50,861	21	38,655
	Cleared ...	15	26,694	20	20,637	19	33,787
British Indian vessels trading with foreign ports.	Entered ...	17	2,572	7	1,205	3	569
	Cleared ...	.....	.....	.....	.....	.....	.....
Vessels trading with home ports.	Entered ...	626	202,030	595	210,834	600	211,882
	Cleared ...	617	208,885	563	219,942	620	217,873

In paragraph 8 of the report under review, the number of vessels which cleared for foreign ports during the year 1895-96 is shown as 20. From the statement given in paragraph 12 it appears that this number includes one vessel which sailed for ports situated in the Maldive Islands; but those ports come under the category of home ports, and not of foreign ports, under the provisions of Act I of 1859. The figures in the table above have been corrected accordingly.

A similar mistake was made in last year's report, and was pointed out in the Resolution reviewing it. The Lieutenant-Governor trusts that steps will be taken to avoid such errors in future.

Foreign trade.

3. The total value of the foreign trade during the year is stated to be Rs. 1,10,44,712, of which Rs. 32,48,453 is under imports. There is an increase in the value of this trade of Rs 3,12,766, as compared with that of the previous year.

Coasting trade.

4. The total value of the coasting trade is stated to be Rs. 1,66,38,770 against Rs. 1,63,35,492 of the previous year the increase being chiefly in jute and cotton.

5. The principal articles of trade are shown in the following statement:—

			1894-95.	1895-96.
Exports	Jute ...	... Tons	37,395	45,128
	Rice ...	... „	37,835	25,797
	Tea ...	... lbs.	107,948	966,929
Imports	Salt ...	... Tons	10,142	13,564
	Mineral oil	... Gals.	114,875	10,45,491

Port appliances.

6. The appliances of the Port and the light-houses at Norman's Point and Kutubdea are reported to have been kept in good order during the year. New moorings have been ordered with the aid of a loan applied for from Government, and it is hoped that the long pending question of the provision of a jetty will shortly be settled.

Earnings and expenditure of the *Gekko*.

7. The earnings of the steam-tug *Gekko*, maintained by the Port, amounted to Rs. 12,279, whilst the expenditure on maintaining that vessel, exclusive of Rs. 16,294 for interest and sinking fund, aggregated Rs. 18,622. The net loss was therefore Rs. 6,343, but as a set off against this loss should be placed the estimated value of services performed for the port amounting to Rs. 5,000, for which no charge was made.

Health of the shipping.

8. The health of the shipping was good. Thirty-eight seamen were admitted into hospital, among whom there were no deaths, and 35 are said to have been completely cured before discharge.

Pilotage Fund.

9. The state of the Pilotage Fund is shown in the subjoined table:—

Pilot service.

10. The working of the pilot service is stated to have been satisfactory. There was one accident to a vessel under pilotage charge, but the pilot was not to blame for it.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Col.*, R.E.,
Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 7th September, 1896.

Burdwan.—Rainfall at Sadar 4·86, Kalna 1·75, Katwa 0·91, Raniganj 1·42. Weather hot. Passing showers. More rain wanted in Katwa and Kalna. *Aus* being harvested. Prospects of jute and sugarcane satisfactory. *Aman* suffering in parts for want of rain. In the west of thana Manteswar *aman* has not been transplanted for want of rain. Condition of cattle good. Fodder and water sufficient. Price of rice has risen owing to large purchases by outside merchants. Common rice selling as follows:—

	Srs.	c.	
Sadar	11 to 13	4	per rupee.
Kalna	12 to 13	0	
Katwa	11	12	
Raniganj	12	8	

Midnapore.—Rainfall at Sadar 1·44, Contai 2·60, Tamluk 1·88, Ghatal 1·88. Weather seasonable. Transplantation of *haimanti* paddy is still going on. Prospects of sugarcane and jute good, and of paddy fair. Common rice sells as follows:—

	Srs.	
Sadar	15	per rupee.
Contai	15 to 18	
Tamluk	14	
Ghatal	14 to 15	

24-Parganas.—Rainfall at Sadar 2·62. Weather hot and clear. Prospects of standing crops favourable. Transplantation of *aman* finished. Harvesting of *aus* and jute continues. No cattle-disease. Fodder and water sufficient. Common rice sells as follows—

	Srs.	c.	
Sadar	10 to 12	8	per rupee.
Barasat	10	0	
Basirhat	11	10	
Diamond Harbour	11	6	

Murshidabad.—Rainfall at Sadar 1·44, Jangipur 2·29, Kandi 2·26. Weather hot. The late rain has done some good to the transplantation of *aman* and to the other standing crops. Harvesting of *bhadoi* going on. State of sugarcane and mulberry fair. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Kandi	12	
Jangipur	11½	

Khulna.—Rainfall at Sadar 3·51, Bagirhat 3·63, Satkhira 7·25. Weather hot and cloudy. The recent rain has improved prospects, and has facilitated the transplantation of *aman* rice. More rain wanted. Harvesting of *aus* and jute going on. No cattle-disease. Fodder and water sufficient. Prices of common rice—

	Srs.	c.	
Sadar	9 to 11	8	per rupee.
Bagirhat	9	8	
Satkhira	10	8	

Dinajpur.—Average rainfall 3·17. Weather seasonable. Transplantation of winter rice is going on, but is impeded in places for want of rain. *Bhadoi* and jute are being cut. More rain wanted. No cattle-disease. Fodder and drinking-water sufficient. Common rice selling from 9 to 10 seers per rupee.

Rangpur.—Average rainfall 9·20. Transplantation of *aman* and steeping and washing of jute going on vigorously. The rainfall of the week has been beneficial to the crops. More rain wanted. Prospects appear hopeful. Water and fodder sufficient. Common rice selling from 8 to 12 seers per rupee.

Pabna.—Rainfall at Sadar 3·22, Sirajganj 3·25. More rain wanted for the standing crops. Fodder available.

Dacca.—Rainfall 5·61. Weather seasonable. Prospects of standing crops not favourable, but the recent rain has done some good. Fodder available. No cattle-disease. Common rice sells at 8 seers per rupee.

Chittagong.—Rainfall 4·34. Weather hot. Harvesting of *aus* nearly completed. More rain wanted for transplantation of *aman*. Water and fodder sufficient. Rice selling from 9 to 11 seers per rupee.

Patna.—Rainfall at Sadar ·09. Transplantation of paddy going on. *Bhadoi* being harvested. Prospects favourable. Prices stationary. Common rice selling at 14¼ seers per rupee at Patna. Fodder and water for cattle sufficient.

Gaya.—Prospects of crops fair. Transplantation of paddy finished. *Marua* and *makai* being harvested. More rain wanted. Rice selling at 12 seers per rupee.

Champaran.—Rainfall at Sadar ·84. More rain wanted for winter rice, some of which is still not transplanted. Price of common rice at Sadar 14 seers, against normal 13½ seers per rupee. Fodder and water sufficient.

Darbhanga.—Rainfall at Sadar ·56, Madhubani 3·50, Samastipur 2·51. Indian-corn is ripening. *Marua* attaining maturity. More rain urgently needed, otherwise west wind will dry up *marua* and weaken the growth of paddy.

Bhagalpur.—Rainfall at Sadar ·24. Weather hot and cloudy. More rain urgently required. Harvesting of *bhadoi* going on. Transplantation of winter rice nearly completed. Water and fodder sufficient. Cattle-disease reported from thanas Madhipura and Pratapganj. Common rice sells at an average of 13 seers per rupee.

Purnea.—Rainfall ·63. More rain badly wanted for the transplantation of winter rice. Harvesting of *bhadoi* paddy and jute still going on. Cattle-disease at Kasba. Fodder and water sufficient. Common rice sells from 10 to 12 seers per rupee.

Cuttack.—Rainfall 4·74. Weather seasonable. Early *beali* in places not affected by the flood is being reaped. *Sarad* is being replanted in places in the flooded tracts. Agricultural prospects in tracts not affected by the flood are generally good. No cattle-disease. Common rice sells as follows:—

	Srs.	c.	
Cuttack	14	7	per rupee.
Jajpur	21	0	
Kendrapara	22	5	
Banki	21	0	

Hazaribagh.—Prospects of paddy, sugarcane, and *bhadoi* crops good. Transplantation in progress. A little more rain wanted. Rice sells from 9 to 12 seers per rupee.

General Summary.—There was general and in places heavy rain during the week except in Bihar, where only light scattered showers are reported. The rain has greatly aided the transplantation of winter rice, which was very backward in some parts. In Bihar the want of rain is again beginning to be felt. In Cuttack the agricultural prospects in the tracts not affected by the flood are good, and in some of the flooded tracts winter rice is being replanted. The harvesting of early rice and jute is generally going on, and *bhadoi* crops are being gathered in Bihar. Cattle-disease is still reported from Bhagalpur and Purnea. The price of common rice is generally high, and is said to be rising in some districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT, M. FINUCANE,

The 8th September, 1896. *Offg. Secy. to the Govt. of Bengal.*

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of August 1896.

	Inches.	Date.	Hour.
The mean pressure of the month	29·572		
The average pressure of August from 24 years' registers ...	29·598		
The highest pressure in the month	29·722	30th	22
The lowest pressure in the month	29·280	1st	16
The range of pressure	0·442		
	Hours.		
The total number of hours of bright sunshine during the month	162·3		
The maximum possible number of hours of sunshine ...	398·4		
	°		
The mean temperature of the month	83·2		
The average temperature of August from 24 years' registers ...	83·1		
The highest temperature in the month	89·8	28th	
The lowest temperature in the month	75·6	3rd	
The range of temperature during the month	14·2		
The mean daily range of temperature	8·9		
The greatest range of temperature in one day	10·7	7th	
	Per cent.		
The mean humidity of the month	88		
The average humidity of August from 24 years' registers ...	86		
	Inches.		
The mean vapour tension of the month	1·004		
The average vapour tension of August from 9 years' registers ...	1·002		
The mean cloud proportion of the month	6·82		
The average cloud proportion of August from 19 years' registers	7·94		
	Inches.		
The total rainfall of the month	11·02		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	10·64		
The average fall of August from 48 years' registers ...	13·94		
The greatest fall in 24 hours	1·22	3rd	
	Days.		
The number of rainy days in the month	27		
The average number of rainy days in August from 24 years' registers	25		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	146·8		
The mean difference of sun and air temperatures	59·2		
The greatest sun temperature	156·3	18th	
The greatest excess of sun over air temperature	68·0	16th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	76·8		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·0		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	2·9	12th	
	Miles.		
The mean movement of the wind per day	88·8		
The greatest movement of the wind in one day	286·0	2nd	
The greatest movement of the wind in one hour	17·0	2nd, 9 to 10	A.M.

The number of hours with winds from each of the 8 points—
N. 3, N.E. 28, E. 157, S.E. 195, S. 200, S.W. 95, W. 6, N.W. 2, Calm 58.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 7th September 1896.

Abstract of the Results of the Barometric and Thermometric Observations taken at 10 a.m. at the Meteorological Office, Chowringhee, in the month of August 1896.

	Inches.	Date.
The mean pressure at 10 A.M during the month	29·612	
The mean temperature at 10 A.M. during the month	86·2°	
The highest temperature during the month	94·0	8th.
The lowest temperature during the month	76·8	21st.
The absolute range of temperature during the month	17·2	
The mean daily range of temperature during the month ...	10·5*	
The greatest range of temperature in one day during the month ...	12·9	28th.
The mean 10 A.M. humidity during the month	83%	
The mean 10 A.M. vapour tension during the month	Inches. 1·042*	
The total rainfall of the month	9·25	
The greatest fall in 24 hours	2·02	19th.
The number of rainy days in the month	Days. *18	

* Mean of 26 days.

The average fall of the corresponding period for 24 years, Surveyor-General's Office		50·11

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the ermometers are verified and the readings have been corrected to a standard constructed and verified at the ew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet ove the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, merly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers; lightning.

The Hon'ble W. B. GLADSTONE.
The Hon'ble A. H. WALLIS.

INSANITARY CONDITION OF GARDEN REACH WARDS.

The Hon'ble MR. GLADSTONE asked—

Has the attention of the Government been drawn to the dangerously insanitary condition of the Garden Reach Wards of the South Suburban Municipality, and in particular to the almost impassable condition of the Garden Reach Road which connects an important district of the Suburbs with Calcutta? Will the Government be pleased to state what steps it is proposed to take to compel this Municipality to discharge its ordinary duties in respect of these Wards?

The Hon'ble MR. RISLEY replied:—

"The attention of Government was called to the insanitary condition of the bastis in the Garden Reach Wards of the South Suburban Municipality in 1894 by a report in which Surgeon-Lieutenant-Colonel Dutt, then Civil Surgeon of the 24-Parganas, described them as 'wanting in the very rudimentary conditions of health,' and complained that the Municipal Commissioners 'could not be roused to make any serious efforts to improve the condition of these bastis.' Since then repeated attempts have been made to induce the Commissioners to improve the sanitary arrangements of Garden Reach, but the Magistrate states that little has been done, and that the conservancy of the locality is still carried on by a Contractor under a system which the Commissioners have admitted to be unsatisfactory. Some drains have been cleared and levelled, and the streets are said to be better swept; but as there is only one Overseer for the whole Municipality, covering an area of over thirty square miles, and the conservancy staff in Garden Reach consists of two sweepers and six coolies with three conservancy carts, no real improvement can be looked for. The Commissioners have admitted that the Municipality is too large and scattered for efficient management and have applied to Government to subdivide it. Orders will be passed on their application as soon as certain inquiries have been completed.

"The Garden Reach Road has been much neglected for many years, and is now in a very bad state. An officer of the Public Works Department has been deputed to report upon it, and as soon as his report is received, the Lieutenant-Governor will consider whether an order should not be passed under section 64 of the Municipal Act requiring the Commissioners to repair the road within a fixed time, failing which the work will be done by the Magistrate and the cost recovered from the Municipal Fund."

BENGAL MUNICIPAL ACT, 1884, AMENDMENT BILL.

The Hon'ble MR. RISLEY moved that the consideration of the Bill to further amend the Bengal Municipal Act, 1884, be resumed.

The Motion was put and agreed to.

The Hon'ble MR. A. M. BOSE moved that after section 8 of the Bill, the following be inserted:—

"8A. After section 141A, the following shall be inserted, namely:—

'141B. A carriage, horse or other animal shall be deemed to be used in the ordinary course of business, within the meaning of section 131, if it is used, on an average, twice a week.'"

He said:—"I may explain that the Council has already amended section 131, so as to substitute for the words 'habitually used' which were in that section, the words 'used in the ordinary course of business.' That being so, it

becomes necessary to define these latter words, so as to prevent ambiguity and indefiniteness; and in fact this is exactly what has been done in regard to the use of these words in the section relating to carts. I therefore propose that what has been done in the one case be also adopted in the other. In fact, the amendment I now propose, necessarily follows in principle the alteration in section 131, which has already met with the approval of the Council."

The Hon'ble MR. RISLEY said:—"It does appear at first sight that the amendment now proposed is the logical sequence of the amendment, which was introduced in a similar section relating to the registration of carts, but I am disposed to think that it is really not parallel, and that it would be dangerous to act on the assumption that the two sections should be dealt with in precisely the same manner. To make this clear, I must refer to the amendment in the section relating to the registration of carts (section 142). That section is based upon, and is justified by, what is known as the Chanduria cart case, a place which is a small municipal town in Khulna. It has lived to the twelfth year of its existence on the revenue derived from the registration of carts, and in fact has no other income worth speaking of. Certain orders of the High Court had the effect of killing the municipality, and it is now dead. Certain carters, who resided outside the municipality and kept their carts outside the municipality, used their carts within the municipality regularly during two days in the week (Wednesdays and Sundays) for the purpose of attending a very large *hât* held there, and the chief staple of trade in that *hât* was date sugar. It was alleged that over 700 carts went to the *hât* regularly on those two days of the week, and of course cut up the roads to pieces. The particular case to which I referred was against certain carters who were prosecuted for not taking out a license from that municipality. The Deputy Magistrate held that those carts did not fall within the purview of section 142, and then the Chairman of the Municipality set Mr. Monmohan Ghose in motion, and he applied to the High Court for a decision in the matter. The High Court said it was not authorised to interfere in cases of acquittal, except upon application made by the Local Government, and they referred to the Dinapore case, which was referred to at the last meeting of the Council, as a case which would be of use in any application which might be made to the Government. Application was accordingly made to the Government to order the institution of an appeal against the decision of the Deputy Magistrate. An order was issued, and the case went to the High Court, who, in their judgment interpreted the words 'habitually used' to mean practically 'in the ordinary course of business.' In the amendment which has been introduced in section 142, we have gone a good deal beyond the principle laid down in this judgment; we extend the law and no doubt we make it more stringent, but as far as carts distinguished from carriages are concerned, the Select Committee held that we are justified in what we have done on certain grounds—*firstly*, by the great damage which carts, with their narrow tires and wide axles and heavy loads, do to the roads which they pass over, particularly to municipal roads in the mufassal, which are made of brick metal and not of stone; *secondly*, by the fact that carts, which are not kept within a municipality, are brought in on particular days for purposes of profit arising out of operations connected with the arrangements of the municipality; *thirdly*, and this is important, that the carts used in this way are used regularly. As the Chairman of one municipality very forcibly said, in most municipalities to which the section applies, *hât* days are well known days, and these carts come in regularly on those days; they do not come in casually—sometimes on one day and sometimes on another; moreover, the fact of the days being regular and known to everybody beforehand, renders it possible to have some systematic check over the number of times on which a cart is used, and a municipal officer may be deputed regularly or occasionally to take stock of the number of carts and the number of times each cart makes its appearance, and whether they have municipal tickets or not. Applying these rules to the case of carriages, it will be seen that none of them can be applied to carriages and not even to hackney carriages. Carriages do not do anything like the special damage to roads that carts do;

they are not exclusively or mainly used in connection with any arrangements which would give the municipality a claim to license fees from carriages; and *fourthly*, they are used casually and not regularly. You cannot say that carriages use the roads of the municipality on two or three days of the week and on no other days, as you can in the case of carts. I submit, therefore, that the cases are not parallel; and I further submit that if they are treated as parallel cases, and practical application is given to it in the case of carriages, it will operate with great inconvenience both to natives and to Europeans. Take a case which occurs to me at once, and has practical application to the impecunious South Suburban Municipality—the case of a native gentleman who lives in Calcutta, and who has a garden house within that municipality. There are a good many garden houses there. Suppose this gentleman goes twice a week to his garden house in that municipality for a *nach* or other amusement, would it not be hard that he should be pounced upon by the municipality and compelled to pay a carriage-tax when he has already paid it in Calcutta? This is a typical case in regard to native gentlemen. Then, as regards European gentlemen, there is a certain club in Tollygunge; suppose a gentleman goes there twice a week in pursuit of physical education, would it not be hard that he should pay a second carriage-tax? The cases which I have instanced are not, I think, cases in which it can be said that the carriages are used in the 'ordinary course of business.' You will introduce enormous difficulties; you will not be able to distinguish between carriages used for business and carriges used for pleasure, and I think we can safely venture to say that the rule which has been accepted for carts will not be applicable to carriages. It would not be safe to apply the same rule to both. There is a provision in the Act that no cart shall pay more than one registration fee, and possibly there should be a similar provision for carriages. Either you must sweep away the registration fee in Calcutta, or the South Suburban Municipality will be unable to obtain fees within their area. Two fees there cannot be."

The Hon'ble MR. A. M. BOSE in reply said:—"I confess I have heard with some little surprise the arguments which have been used in regard to this amendment, possibly owing to my not having been able to follow the Hon'ble Member, and also perhaps because I thought this amendment so much a matter of course that in moving it I did not think it necessary to take up the time of the Council. But I wish to point out now that no portion of the speech of the Hon'ble Member in charge of the Bill is applicable to the present amendment, which simply seeks to define and make intelligible what we mean by certain terms which we have already adopted in regard to carriages. This is the history of the matter. There came before the Council a proposal from the Select Committee that in section 142 of the present Act the words 'habitually used' should be struck out, and the words 'used in the ordinary course of business' be substituted for them. The phrase 'habitually used' is vague and undefined, and incapable of proper construction, and one of the fundamental requirements of legislation is that those affected by it ought to be in a position to understand with certainty what the law means and what their liabilities and obligations under it are. On those grounds the words 'habitually used' were struck out. Then I pointed out that the same words were used in section 131, which relates to carriages, and that if the words 'habitualy used' are so difficult of definition, then it is desirable that they should be struck out of section 131 also. That suggestion was adopted, and the Council has acted upon it. The speech which the Hon'ble Member in charge of the Bill has now delivered might have been delivered in regard to that amendment. However, those words have been struck out, and therefore, in section 131, which relates to carriages, the words we find in the Bill are 'kept or used in the ordinary course of business.' Now what is the meaning of the expression 'used in the ordinary course of business'? It has already been defined by this Council, in accordance with the suggestion of the Select Committee that it should mean 'used on an average twice a week.' But that definition occurs not among the general definitions of the Act, but in the Chapter under the special head of

'registration of carts.' If that definition had occurred, as in the new drafting of a Bill it would naturally have occurred, at the beginning of the Act, there would have been no necessity for a further amendment, because the definition would be applicable wherever the words 'used in the ordinary course of business' occurred in the Act. But owing to the way in which the Council has proceeded, the definition which has been accepted occurs, as I have pointed out, in the Chapter of the Act headed 'On the Registration of Carts.' Therefore, I submit, it is absolutely necessary that that definition should be repeated in connection with section 131, where the words 'used in the ordinary course of business' also occur. If you do not do so, what will be the position of affairs? In order to do away with the uncertainty and vagueness which attach to the words 'habitually used' in section 131, the Council has substituted certain other words, namely, 'used in the ordinary course of business,' and is it not necessary to define what we mean by using those words there? Is our mind, in regard to the application of these terms, the same as in regard to the definition of that term in section 147, or is it different? I fail to understand that there can be any objection to defining the term. The Hon'ble Member has referred to certain cases and difficulties which members of the public may be put to. For my own part, I would prefer to know whether I am in the clutches of the law or not; what it is the Legislature mean by saying that carriages used in the 'ordinary course of business' are liable to the tax, rather than have my liability ascertained in each case by the far more costly and troublesome process of litigation. And it is better for municipalities also to know what it is that will make carriages liable to the tax within their respective jurisdictions. As I said before, I had taken it so much as a matter of course that the words would be taken to mean in section 131 what they are defined to mean in section 142, that the possibility of any opposition had not entered my mind. As to the ground of inconvenience and the ground of making a distinction between carts and carriages, such grounds have no sort of reference to the necessity that exists of defining words. If twice a week be not thought enough in the case of carriages, make it three times, and I will accept the change; but by all means define the expression. If you deliberately leave it undefined, you will open a door to all the difficulties and inconvenience, to all the harassment and uncertainty which the Hon'ble Member in charge of the Bill is so anxious to avoid."

The Motion was then put and carried in the following amended form:—

"8A. After section 141A, the following shall be inserted, namely:—

'141B. A carriage, horse or other animal shall be deemed to be used in the ordinary course of business within the meaning of section 131, if it is used on business on an average thrice a week.'"

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR moved that the following be inserted at the end of section 8 of the Bill to form an addition to the clause, which it has been decided to add to section 147A of the Act:—

'Provided that the municipality or cantonment within which any cart is kept, shall have the right to levy the fee in preference to any other municipality or cantonment.'

He said:—"After the amendment which has just been passed, I do not know whether this amendment will not appear to be still necessary: that I shall leave the Council to determine. The object of this amendment is simply to remove a difficulty which has long been felt."

The Hon'ble MR. RISLEY said:—"I am willing to accept the amendment with the omission of the words 'or cantonment.'"

The Motion was put and carried in the following amended form:—

'Where a cart is registered under this Act in more than one municipality, the Commissioners of the municipality within which the cart is kept shall have a right to levy the registration fee in preference to the Commissioners of any other municipality.'

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR also moved that after section 9 of the Bill, the following be inserted:—

"9A. In section 238, sub-section (1), the words 'or without waiting for the orders of the Commissioners for six weeks from the date of his giving notice in writing under section 237,' shall be inserted after the words 'as aforesaid.'"

He said:—"It appears to me that there is a clear flaw in section 238. Section 237 provides what a person is to do when he asks for permission to build or to rebuild a house; he has to make an application and to supply plans and give certain other information. Then, under section 238, should any person commence to erect or re-erect any house not being a hut, the Commissioners may require the building to be altered or demolished as may be necessary. It sometimes happens that after a party has made an application and furnished the Commissioners with plans, &c., he proceeds with the work without waiting for sanction. In such a case the Commissioners have no authority to demolish the building or to do anything in the matter. The law provides that when a person commences to build without giving notice to the Commissioners, or without submitting the necessary plans, &c., they can demolish the building or cause it to be altered. But suppose that after making the application and supplying plans, &c., the party commences to build, and goes on building, without waiting for the six weeks prescribed by the law, the Commissioners have no authority either to demolish the building or to impose any penalty. I find that in the Calcutta Act, section 241, a penalty is provided for commencing to build without submitting an application or before the expiration of the time prescribed for the Commissioners to give or to withhold their sanction; that is to say, the Commissioners can demolish or alter the building as they may think fit. But under section 238 of the Bengal Municipal Act, there is no authority for the Commissioners to interfere in any way whatsoever. I understand that this question has actually been raised in the municipality of Howrah, and such cases are possible elsewhere, and therefore unless some such amendment as I propose is accepted, there will be no remedy whatever against commencing to build before the grant of sanction. The intention of the law evidently is to impose a penalty in the same way as in the case where a plan is not submitted."

The Motion was put and agreed to.

The Hon'ble MR. WALLIS moved that clause 1 (*a*) in section 10 of the Bill be omitted.

He said:—"That section reads as follows:—

'With the sanction of the Local Government, the amount of water-rate imposed under this section may vary with the distance of houses or lands from the nearest stand-pipe or other source of water-supply, and the amount may be higher in the case of premises to which communication pipes are attached than in the case of other premises.'

"I have ventured to bring this amendment forward, as it seemed to me to be one of the most important additions which had been made in the Bill by the Select Committee since it was first introduced into Council, and I think I am not mistaken in saying that Mufassal Municipalities, Commissioners of Divisions, and Public Associations have not had an opportunity of stating their opinions on this important addition. The new sections ought to introduce several varying rates which I fear would lead to considerable difficulty and danger to the success of any scheme of water-supply which might be put forward. It would be admitted that the health of the inhabitants of a town depended very largely on the sources of water-supply, and recent events had shown very conclusively that this all-important question of pure water-supply was one which must be taken strongly in hand. This being so, it would be undesirable to introduce into the Act any clause which was likely to weaken the hands of those who had to bring forward such schemes, and he feared the proposal to vary the rates more than was provided in the Act would tend to have this undesirable effect. The new clause, taken as it must be in conjunction with section 279 of the Act, referred only to houses and lands within the town, and

ıot to the outside radius, the limits of which were to be fixed by the Local Government under proviso (*a*). Section 279 of the Act reads as follows:—

'In any municipality to which the provisions of this Part shall be extended in the manner provided in section 222, it shall be lawful for the Commissioners at a meeting to impose a water-rate not exceeding 7½ per cent. on the annual value of holdings when the houses and lands are situated in any road supplied with water, and not exceeding 6 per cent. when the houses and lands are situated in any road not so supplied.'

"Here were two rates, but the new clause introduces two more varying rates: I may say several more varying rates; for it first provides that houses which are situate beyond certain distances from a stand-pipe or source of supply should pay another rate, and further that the rate shall be higher in the case of premises in which communication pipes are laid than in the case of other houses. To illustrate my meaning we will suppose water-pipes are laid in Dalhousie Square, North. The section provides that all the houses in that street should pay not more than 7½ per cent. We will take it that pipes are not laid in Dalhousie Square, South: there the residents would have to pay a rate not exceeding 6 per cent.; then in Esplanade Row, where also pipes are not laid, the rate might be 5 per cent.; in Lindsay Street, which is further off, 4 per cent., and in Park Street, which is furthest, 3 per cent. These differential rates will, I fear, cause great difficulties and will hamper the introduction of schemes for pure water-supplies. Before Municipalities could formulate any scheme for the introduction of water-supply, it would be necessary for them to be in a position to estimate to some degree the returns they are likely to receive from the outlay which they may incur, but if those living in roads where the water is laid down can decline to have their houses connected with the main, and then claim a reduction in rates, this would be next to impossible. It seems to me that the proposals set forth in the new section are contradictory to the existing law, which provides that houses situated in roads where the pipes are laid down shall pay the maximum rate. If the Municipal Commissioners in any town consider that the requirements of a pure water-supply exist, and the Local Government agree, the scheme should be carried through, and all residents made to pay a fair share of the tax. Under the Calcutta Act all the inhabitants are called upon to pay the same rate of water-tax, and those who live in third stories of houses have not only to pay the water-rate, but have also to employ bhisties to carry the water for domestic purposes. I have not referred to the provisos to section 279, which will be found in the existing law. Proviso (*a*) provides that water-rate shall not be levied on any house or land which is within the radius to be fixed by the Local Government, and the latter portion of proviso (*b*) gives the Commissioners power to make special arrangements consistent with the Act with persons living beyond the radius. Therefore, I submit that all residing within a town, where it has been considered necessary to introduce a scheme for the supply of pure water, should be called upon to pay their fair share towards the cost. In Calcutta we are all content to pay the water-rate, although some of us do not get the water without incurring additional expense, still we are all willing to pay our share for the benefit we get in an indirect way by the supply of pure water to the town. I hope I have succeeded in showing that it will not be desirable to vary the rates to be paid more than is provided for in the existing Act."

The Hon'ble MR. RISLEY said:—"I agree with the Hon'ble Mover of this amendment in considering this section of the Bill an important one, and that it was unfortunate that all municipalities were not consulted about it. It is a section which was introduced at a late stage on a representation made by the Chairman of an important municipality while the Bill was in Select Committee. As regards the two rates in the existing section, it is not clear to me that they affect the question at all. Those are maximum rates, and whatever the section of the Bill provides must be subject to the provisions contained in the Act as to the maximum rates. It will probably be simplest to explain precisely how this section in the Bill came to be drawn up in order to enable a municipality, with the sanction of the Local Government, to impose differential water-rates varying with the distance of the houses and lands from the nearest hydrant, and

also with the circumstance whether the house is connected with the water-supply or not; but, as I have said before, whatever rate may be fixed in any case must be subject to a maximum of 7½ or 6 per cent., as the case may be. The first impetus to the introduction of pure water in mufassal towns was given by the Chairman of the Bhagalpur Municipality, one of the most efficient Chairmen of Municipalities in Bengal—a man who has done more to advance Municipal Government in Bengal than anyone else, and it is to his exertions that the Bhagalpur water-works are mainly due. The Chairman of that Municipality, in a letter recently received, said:—

'* * In our municipality a rate of 3 per cent. is levied * * *'

"In a subsequent letter, in support of the proposal to levy differential rates, he says, in regard to house-connections: —

'A system of that kind is in force in Mymensingh.'

"And I find that since 1891, from which time water-rates have been enforced in that municipality, the following rates have been introduced, namely, 4 per cent. on all holdings within 300 yards from the nearest hydrant, 3 per cent. on holdings over 300 yards, but within quarter of a mile from the nearest hydrant, and 7½ per cent. on holdings with house-connections. The rate is levied on the valuation of holdings.

"That is precisely the state of things which is contemplated by the section in the Bill, and the object of the section, which was unanimously agreed to by the Select Committee, is to legalise the state of things which already exists in Mymensingh, and to enable the Bhagalpur Commissioners to introduce similar arrangements in Bhagalpur for reasons which I have read to the Council in the Chairman's letter. It seems to me that the proposal is in the interests of both classes; in the interests of the poor, because, with a differential system in force, they will not have to pay at the rate calculated with reference to the allowance for house-connections. I understand that the granting of house-connections not only leads to a great waste of water—as everybody knows it does—but it also necessarily enhances the cost of maintaining the scheme of water-supply. And as it may be said with reference to a municipality starting a scheme of water-supply that a rate of 3 per cent. on the value of holdings will not enable you to give house-connections, though a rate of 5 per cent. would, I may fairly ask why should poor people pay a higher rate for water by reason of the necessity to allow richer people house-connections? Poor people cannot afford the cost of house-connections; therefore, to be equitable in a case of this kind, instead of imposing a rate of 5 per cent. all round, you may fairly provide for a rate of 3 per cent. on people who have not house-connections, and 6 per cent. on richer people who have house-connections; for, in that case, as the Chairman of the Bhagalpur Municipality has pointed out, they will be able to dispense with the employment of bhisties to carry the water from the municipal hydrants. It is to the interest of the rich, not only because they will be able to dispense with bhisties, but the fact of levying the higher rate will make all the difference to the municipality being able to grant house-connections. In that way it will be distinctly to the interest of both classes; to the rich, because they will get what they want, and to the poor, because they will not be charged a rate which they cannot afford. There is, however, one object which I admit neither this amendment nor any other will effect, namely, the great waste of water caused by house-connections."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I am sorry I cannot support the motion which has been made by the Hon'ble Mr. Wallis. It will be seen that the provision in the Bill is entirely permissive. The Hon'ble Mover of the amendment has stated that the operation of the section will be attended with serious administrative inconvenience. I think that argument is met by the terms of the section, which says that, 'with the sanction of the Local Government, the amount of water-rate imposed under this section may vary with the distance of houses or lands from the nearest stand-post, &c.' Whether in any case there will be administrative inconvenience or not, the Municipal Commissioners will always be the best judges. If they find serious

inconvenience, they will not make a recommendation to that effect; and even if they did, the Local Government would not accept the recommendation; therefore, as far as the Hon'ble Member's argument is based upon the question of administrative inconvenience, it is practically demolished by the permissive character of the section. Then the Hon'ble Member stated that the Commissioners will not be able to obtain a correct statement of the income to be derived from the water-rate by reason of the varying rates to be imposed. I confess I am not able to follow the Hon'ble Member in this line of argument. I presume the Commissioners would fix the varying rates according to distance; they would say that for houses and lands within a distance of 300 yards the rate would be so much, for houses within 600 yards so much, and 900 yards so much, and they can easily count the houses within those distances, and arrive at an approximately-correct estimate of the proceeds of the rate. My hon'ble friend has further observed that in Calcutta we have no varying rate. In this view of the matter he is mistaken; we have it in the suburbs, which are now included within Calcutta. There is one water-rate there, and a different rate in the town. For all these reasons I do not think the motion before the Council ought to be accepted. I entirely sympathise with the remark of the Hon'ble Member in charge of the Bill that the effect of this section in the Bill will be to make the law more elastic, and that municipalities will be in a better position to introduce water-supply schemes and with less pressure upon the poorer classes, and it is because the section will have this effect that I have no hesitation in saying that it ought to commend itself to the acceptance of the Council."

The Hon'ble MR. GRIMLEY said:—"If I understand the matter correctly, the Hon'ble Mover of the amendment seemed to see some contradiction between the terms of the section in the Bill and the provisions of the existing Act. The provisions of section 279 (1) say that the rate shall not exceed 7½ per cent. in the case of people who reside in houses situate on streets in which water-pipes have been laid, and that it shall not be more than 6 per cent. in the case of people who live at a distance from such roads. That is the substantive law. But it does not say how the rate shall be regulated. The amendment in this Bill lays down a reasonable rule for measuring the differential rates, and says that the measure shall be by distance. What can be more reasonable? Where there are communication pipes, the rate is to vary directly with the distances of the houses from the main; the greater the distance the water has to be carried by the pipe, the greater the amount of payment. In other cases, where there is no communication pipe, the rate is to vary inversely, so that people who live at a distance and have to carry their water a long way, will have to pay less than those who live close to a hydrant. That, I think, is a very reasonable rule. The section in the Bill merely provides this rule for measuring the differential rates, and therefore I can see nothing inconsistent in the Bill with the Act itself. With this explanation, the Hon'ble Member will, I hope, be able to withdraw his motion."

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR said:—"The difficulty which the Hon'ble Mover of the amendment feels seems to be that under this new section the Municipal Commissioners will be able to levy water-rate from persons who are beyond reach under the existing law. I think all difficulty in this direction will vanish if the new section were to be read along with section 279; the new section must not be read alone by itself. The Act lays down the maximum and minimum rates of 7½ and 6 per cent., with reference, respectively, to houses situated in streets which have been piped and which have not been piped; but the Act does not lay down how the rates are to be worked out with reference to the area and how they are to be distributed over the area. The new section lays down such rules, and shews how the rates are to be worked out and distributed. The new section has no independent action and operation: its operation is subject to section 279, and is confined to the case which comes under section 279; so that where section 279 has no operation, the new section has none. If my hon'ble friend apprehends that whereas under the existing law all who live in the street where the

pipes are laid pay the maximum rate, whether they have got the connection or not, the amendment provides that those who have no connection shall pay less, although living in the same street then I say that this apprehension also is not justified from a correct and careful reading of the new section."

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR said:—"I welcome this section as a great improvement upon the provision in the existing law. Although I did not succeed in introducing a scheme of water-supply into the Hooghly Municipality, I have had some experience in connection with water-supply schemes, and I say that the great obstacle is that the provisions of the Act are not sufficiently elastic to enable a distinction to be made between the rich and the poor in the amount of rates to be paid by them respectively. Those who get the great advantage of house-connections ought certainly to pay a higher rate, and poor men who live at a distance from streets in which water-pipes have been laid should pay comparatively less. And unless the provision introduced by the Select Committee is passed, I can assure the Council that it will not be possible to introduce water-works into municipalities generally. It is injudicious to impose one uniform rate on the rich and the poor: we must make a distinction."

The Hon'ble MR. WALLIS in reply said:—"I regret to find myself in the position of having moved an amendment which has met with no support from any of the Hon'ble Members who have spoken. My idea is that it having been once decided that it is necessary to introduce a scheme for the supply of pure water in a municipality, and the Local Government being of opinion that it should be done, the scheme which has been approved should be introduced, irrespective of the considerations which have been urged by the Hon'ble Member in charge of the Bill and other Hon'ble Members. The section of the Act, as it stands, provides for two rates of charge, and the proviso which already exists is sufficient to enable the Municipal Commissioners, with the permission of the Local Government, to impose any rates which they may think fit with those residing at a distance from the source of supply. The argument on which I base my motion is that only two maxima rates should exist for those residing within the limits of the town, namely, 7½ per cent. in the case of houses and lands in streets in which water has been laid on, and 6 per cent. in the case of houses and lands not so situated, and that the fact of a person not choosing to have communication pipes introduced into his house should not entitle him to pay a lower rate than those whose houses have been so connected. However, as I find that my motion has not met with the approval of the Council, I ask leave to withdraw it."

The Motion was, by leave of the Council, withdrawn.

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR moved that after section 10 of the Bill, the following be inserted:—

"10A. After clause (*b*) of the first proviso to section 279, the following shall be inserted, namely:—

'(*c*) any garden without dwelling-houses or any holding consisting only of tanks.'"

He said:—"To speak of gardens without dwelling-houses may be looked upon by some as a contradiction in terms, but I have so worded the amendment in contradistinction to gardens which have houses within them. In the General Clauses Act [V (B.C.) of 1867] 'land' has been defined to include houses and buildings and hereditaments and tenements of any tenure unless there be words to exclude houses and buildings or to restrict the meaning to tenements of some particular tenure. So it is quite clear that tanks and gardens will come under the definition of 'land'. Now in section 279 of the Municipal Act, an exemption (*b*) has been made in favour of any land used exclusively for purposes of agriculture; and my amendment is for the exclusion of tanks and gardens which are exclusively used for purposes of horticulture. I submit that only such land ought to be charged with the water-rate which derive some benefit from the water-supply and the question for consideration

is whether tanks and gardens can be in any way so benefited. An exemption has been made in the matter of latrines, the section imposing the latrine-tax being confined to buildings or dwelling-houses only where services are performed by the municipality. Therefore, this principle of exemption has been recognised by law; that is to say, that when a particular property is not benefited by the service for which any particular rate is levied, that rate is not to be imposed upon that particular property. I ask whether tanks and gardens can be said to be benefited by the introduction of a water-supply scheme within a municipality. If you can levy a water-rate on tanks and gardens, you can as well levy latrine fees upon them. Again, vacant holdings are exempt from taxation. I submit, therefore, that taking the principle of rating to be that the property upon which a particular rate is to be imposed is to be benefited, tanks and gardens cannot properly be called upon to pay a water-rate. And in the fitness of things, there is no reason why agricultural holdings should be excluded and horticultural holdings and tanks should be subjected to the water-rate. I therefore submit that the amendment which I now move should be accepted."

The Hon'ble THE PRESIDENT said:—"Gardens may be benefited by a water-supply, as they may be used for garden-parties and the like; but I agree with the Hon'ble Mover of the amendment that holdings consisting of tanks only should not be called upon to pay a water-rate."

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR said:—"I accept the suggestion made by the Hon'ble the President, and agree to confine my amendment to the exclusion of holdings consisting only of tanks."

The Hon'ble MR. RISLEY said:—"This is an amendment distinctly in favour of the richer classes and adverse to the interests of the poorer classes. It has in every case been difficult to get water-works introduced into municipalities, as they put a very severe strain upon their resources, and I think it is not fair to introduce behind the backs of municipalities any change in the law which will reduce their income without consulting them. I know on what narrow margins municipalities are working, as the municipal rates barely cover the expenses. It seems to me, in particular in regard to gardens, that water-rates should be imposed upon gardens, as the owners of gardens certainly derive a personal benefit from water-works. I have no special objection if the amendment is confined to tanks."

The Motion was then put and carried in the following amended form:—

That after section 10 of the Bill, the following be inserted:—

"10A. After clause (*b*) of the first proviso to section 279, the following shall be inserted, namely:—

'or

(*c*) any holding consisting only of tanks.'"

The Hon'ble MR. A. M. BOSE moved that before section 11 of the Bill, the following be inserted:—

"10B. In section 321, after the words 'dwelling-houses,' the words 'or privies' shall be inserted."

He said:—"Section 321 provides for the levy of fees for cleansing latrines in holdings consisting of dwelling-houses. The history of this section is curious. In the Act as it originally stood, a latrine-tax could be imposed on *all* holdings; then at the last revision of the Act, the imposition of the tax was restricted to holdings containing dwelling-houses. This in some measure represented the swing of the pendulum to the opposite extreme. My amendment is to add the words 'or privies,' that is to say, to make all holdings containing dwelling-houses or privies subject to the tax. To give a concrete example: There is within a neighbouring municipality a large piece of open ground enclosed within masonry walls and containing no dwelling-houses, the land being used twice a week regularly for the purpose of holding a large cattle market. On those days from 8 or 9 o'clock in the morning until evening, there are hundreds of people within that land. There is a privy on that land, but the land cannot

be taxed because it does not contain any dwelling-house, though the necessity for proper latrine arrangements is manifest on the face of it. Take the case of a holding which contains only privies used by people living in the neighbourhood; the necessity for latrine service and for taxing the land may be far greater than in the case of a latrine in a dwelling-house, yet it cannot be touched under the present law. I think, therefore, that the omission which my amendment is intended to supply must have been due to oversight. This will be made still more clear by a reference to section 332, which shows that the Legislature intended that there should be latrines constructed not only where there are dwelling-houses but on lands as well; therefore the Act itself recognises the fact that not only holdings containing houses but lands also require latrine services. This is an amendment which will add to the income of municipalities, and very properly so where services are required."

The Motion was put and agreed to.

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR, by leave of the Council, withdrew the Motion of which he had given notice that after section 13 of the Bill the following be inserted:—

"14. In the fifth Schedule to the said Bengal Municipal Act 1884, the following shall be inserted after the words and figures:—

	Rs.
'For every camel	2'

namely:—

'For every dog	1'"

The Hon'ble MR. RISLEY moved that after sub-section (*3*) of section 8 of the Bill, the following be inserted:—

"(*4*) The words 'or Cantonment' in sections 141A and 147A are hereby repealed."

The Motion was put and agreed to.

The Hon'ble MR. RISLEY also moved that section 5A of the Bill be numbered 6, and that all necessary changes be made in the numbering of the remaining sections, and in the reference thereto in section 2 of the Bill.

The Motion was put and agreed to.

The Hon'ble MR. RISLEY also moved that in clause (*i*) of the new section 69B, which it is proposed to insert in the Act, "(*xi*)" be substituted for "(*x*)."

The Motion was put and agreed to.

The Hon'ble MR. RISLEY also moved that in sub-section (*2*) of section 10 of the Bill, the words "in the first place in which that word occurs" be inserted after the word "amount."

The Motion was put and agreed to.

The Hon'ble MR. RISLEY also moved that the Bill, as settled in Council, be passed.

The Hon'ble MR. A. M. BOSE said:—"I am extremely sorry to have to oppose this motion. The reason for my opposing it is this: that as a matter of general convenience, it is desirable that when there have been amendments made in a Bill in its passage through the Council, the Bill, with the amendments, should be printed and circulated, so that in case there are verbal alterations to be made, numberings to be corrected or any obvious imperfection, oversight, or inconsistency to be remedied, this may be done, and Hon'ble Members may have an opportunity of finally considering the language and mutual bearing of the various sections of the Bill. I submit that as a matter of principle this is a desirable procedure to follow. We have been reminded this

very session of examples in the past of inconvenience caused by this procedure not having been adopted. But apart from that, in this particular case there are strong and special reasons why the Bill should not be passed at this sitting of the Council. Several of the amendments have been further amended and settled at the table, and in the case of some of them we have not been able to follow the wording as thus settled. Even this very day we have had some amendments, and especially the amendment passed at the instance of the Hon'ble Mr. Risley in the place of that moved by the Hon'ble Rai Eshan Chundra Mittra Bahadur in section 8 of the Bill, the language of which it was not possible to follow; and other amendments were moved and passed without any notice, the language of which had not been before the Members at all. Then, again, there have been two amendments made in section 147A, one of which was passed at the last meeting of the Council on my motion, and another to-day on the motion of the Hon'ble Member in charge of the Bill, and it would have to be seen how these amendments are placed; because if my amendment is placed second, it will be necessary to make an alteration in the language. Then, again, there is a matter specially reserved for consideration from the last meeting which would also require consideration."

The Hon'ble THE PRESIDENT said:—"The Assistant Secretary has gone through all the amendments carefully, and the amendments which have been moved by the Hon'ble Mr. Risley to-day are the outcome of the careful examination of the Bill which Mr. Wigley has made. There seems, therefore, to be no necessity for postponing the passing of the Bill."

The Hon'ble MR. A. M. BOSE said:—"I think that as a matter of principle the Members of this Council ought to have an opportunity of seeing the Bill after all the amendments have been included in it. The responsibility for the Bill is after all on them. Under Rule 44 of the Rules for the Conduct of Business, this is a matter which is not to be put to the Council, but when any Member objects to the motion which has just been made by the Hon'ble Member, the passing of the Bill stands over unless the President thinks the objection ought not to prevail."

The Hon'ble THE PRESIDENT said:—"I cannot say that your objection is wrong as a matter of principle, but considering the season of the year, and that we all have our own avocations to pursue, I do not think I can adjourn the motion for the passing of the Bill."

The Motion was then put and agreed to.

The Council adjourned *sine die*.

F. G. WIGLEY,

CALCUTTA; *Offg. Assistant Secretary to the Govt. of Bengal,*

The 14th September, 1896. *Legislative Department.*

RESOLUTION ON THE REPORT OF THE ADMINISTRATION OF THE STAMP DEPARTMENT DURING THE THREE YEARS ENDING THE 31st MARCH 1896.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Darjeeling, the 10th September 1896.

RESOLUTION—No. 233T.—F.

READ—

The Report of the Board of Revenue on the Administration of the Stamp Department during the three years ending the 31st March 1896.

During the triennial period with which the report deals, the Acts under which the stamp revenue was collected were the Indian Stamp Act I of 1879 and the Court Fees Act VII of 1870, as modified by subsequent enactments. The former Act was amended, in respect of policies of sea and fire insurance and sale certificates, by the enactment of Act VI of 1894. The opinion of the Local Government was also furnished to the Government of India on various points connected with the general revision and consolidation of the Indian Stamp Act, and the whole question is now engaging the attention of the Supreme Government.

Stamp revenue.

2. The financial results of the administration of the Stamp Department during the past three years, with the average for the previous triennium, are shown in the ollowing table:—

Year.	Stamps under Act I of 1879.			Court fees under Act VII of 1870.			Total.		
	Receipts.	Refunds and other charges.	Net revenue.	Receipts.	Refunds and other charges.	Net revenue.	Receipts.	Charges.	Net revenue.
	2	3	4	5	6	7	8	9	10
Average of three years 1890-91 to 1892-93.	Rs. 42,04,928	Rs. 1,62,784	Rs. 40,42,144	Rs. 1,07,79,033	Rs. 2,65,791	Rs. 1,05,13,242	Rs. 1,49,83,961	Rs. 4,28,575	Rs. 1,45,55,386
1893-94	44,77,594	1,81,731	42,95,863	1,14,98,551	2,78,943	1,12,19,608	1,59,76,145	4,60,674	1,55,15,471
1894-95	45,33,570	1,86,576	43,46,994	1,21,67,577	2,87,877	1,18,79,700	1,67,01,147	4,74,453	1,62,26,694
1895-96	46,07,386	1,80,161	44,27,225	1,21,89,926	2,92,652	1,18,97,274	1,67,97,312	4,73,813	1,63,24,499
Average of three years 1893-94 to 1895-96.	45,39,517	1,82,823	43,56,694	1,19,52,018	2,86,490	1,16,65,528	1,64,91,535	4,69,313	1,60,22,222

The gross average annual revenue collected under both the Indian Stamp Act and the Court Fees Act during the three years under review was Rs. 1,64,91,535, against Rs. 1,49,83,961 in the previous corresponding period, showing an increase of Rs. 15,07,574. Both judicial and non-judicial stamps contributed to the increase.

Stamp sales.

3. The receipts from sales of the different descriptions of stamps are shown in the table below. The figures differ from those given in the last paragraph, as they do not include miscellaneous receipts under the Indian Stamp Act, or receipts from the sale of plain paper used with court-fee stamps. There is also a discrepancy of Rs. 41,803 between the total average sales as reported by the Superintendent of Stamps and as shown by the Accountant-General, which is under adjustment:—

Year.	Sales of non-Judicial stamps used under the Indian Stamp Act.										Sales of judicial stamps or stamps used under the Court Fees Act.			Total of both kinds of stamps.
	Impressed sheets, including certificate stamps, bail bonds, bills of lading and kabuliyat form stamps.	Impressed labels.	Receipt or one-anna revenue stamps.	Share-transfer stamps.	Foreign bill stamps.	Hundi or bills of exchange stamps.	Notarial stamps.	Advocate, vakil, and attorney stamps.	Impressed one-anna stamps for cheques, bills, &c.	Total of non-judicial stamps.	Adhesive and impressed court-fee stamps.	Stamps for copies.	Total of court-fees stamps.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Three years 1890-91	Rs. 28,37,005	Rs. 6,59,961	Rs. 2,83,036	Rs. 39,574	Rs. 40,155	Rs. 1,06,393	Rs. 2,815	Rs. 15,583	Rs. 57,342	Rs. 41,09,764	Rs. 1,00,32,658	Rs. 5,32,686	Rs. 1,05,65,344	Rs. 1,46,75,108
.. ..	31,72,420	6,54,507	3,33,612	24,786	42,436	1,24,339	2,799	17,750	58,610	44,31,859	1,06,79,076	5,90,175	1,12,69,251	1,57,01,110
.. ..	31,99,811	6,65,280	3,41,539	48,200	37,766	1,06,446	2,598	15,250	64,178	44,91,002	1,12,51,318	6,05,055	1,18,56,373	1,63,47,485
.. ..	31,10,355	7,68,414	3,56,372	50,239	39,051	1,27,920	2,008	17,250	71,926	45,43,535	1,13,88,604	6,01,049	1,18,92,653	1,64,36,188
Three years 1893-94	31,60,862	6,96,067	3,43,841	41,075	39,751	1,19,706	2,468	120,083	64,905	44,88,818	1,10,72,909	5,99,760	1,16,72,759	1,61,61,577

All classes of stamps with the exception of "Foreign Bill" and "Notarial" stamps contributed to the increased sales of the last three years. The average receipts were again highest in Calcutta (Rs. 25,04,731), where nearly one-seventh of the entire stamp revenue was collected and lowest in Singhbhum (Rs. 17,629). Mymensingh contributed more than 9¼ lakhs, Dacca over 7½ lakhs, the 24-Parganas nearly 7 lakhs, Backergunge over 6½ lakhs, Tippera nearly 6 lakhs, Midnapore over 5½ lakhs, and Chittagong, Muzaffarpur, Faridpur, Jessore, and Hooghly over 4 lakhs each. The same districts also showed large receipts in the previous three years. The general incidence of stamp revenue was 3 annas and 6 pies per head of the population. The revenue from the sale of stamps of all classes has increased from Rs. 87,88,026 in 1874-75 to Rs. 1,27,76,907 in 1884-85 and to Rs. 1,64,36,188 in 1895-96.

Non-judicial stamps.

4. The growth of revenue was most marked under "impressed sheets," the average receipts from which came to Rs. 31,60,862 for the three years, being an increase of Rs. 2,92,957, distributed over 40 districts. The largest increases were at Mymensingh (Rs. 47,149), Tippera (Rs. 20,315), Dacca (Rs. 17,900), Muzaffarpur (Rs. 14,589), and Rangpur (Rs. 11,732). No more definite cause can be assigned than the general expansion of trade, the increased value of land, and the desire of people, when doing business, to have their transactions recorded in documents which can be used for litigation. Impressed labels, which are in use only in Calcutta, show an increase of Rs. 6,106, or ·8 per cent., the improvement being attributed to the issue of debenture bonds on loans taken by several joint-stock companies and zamindars, as well as to the transfer of several tea estates for large sums of money. The sale of one-anna revenue stamps, commonly known as receipt stamps, shows an improvement of nearly Rs. 56,000, an increase of Rs. 36,272 being contributed by Calcutta alone. The latter increase is ascribed by the Collector to "the action taken by his office on unstamped receipts and brokers' notes, and partly to large transactions in jute." Generally speaking, the increased revenue from this source is due to the provisions of the law being better known, and to the working of the arrangement by which the public can buy receipt stamps at post-offices. The cause that affected the sales of the other classes of non-judicial stamps, which are of minor importance, do not call for special notice.

Judicial stamps.

5. The average income of the past three years from the sales of judicial stamps was Rs. 1,06,86,090 under court-fee stamps Rs. 6,000 under High Court service stamps Rs. 3,80,909 under Calcutta Small Cause Court stamps, and Rs. 5,99,760 under stamps for copies, making a total of Rs. 1,16,72,759, or an increase of Rs. 11,07,415, or 22·8 per cent. over the income from the same sources in the preceding triennium. The largest increases were in Calcutta (Rs. 1,67,443) Mymensingh (Rs. 1,18,556), Tippera (Rs. 51,268), Noakhali (Rs. 50,866) Dacca (Rs. 50,753), Muzaffarpur (Rs. 44,865), Backergunge (Rs. 39,026) Bhagalpur (Rs. 37,093), Midnapore (Rs. 36,737), Chittagong (Rs. 32,382), and the Sonthal Parganas (Rs. 30,131); the chief decreases being in Patna (Rs. 14,611) and Shahabad Rs. 9,522). The fluctuations in the sales o

court-fee stamps depend on the increase or decrease in the number and value of the suits. Taking each denomination of court-fee stamps sold during the period under review, there was an increase of over 4½ lakhs in the sale of eight-anna stamps, nearly 4⅛ lakhs in that of one-anna stamps, nearly 3 lakhs in that of one-rupee stamps, and over 1⅔ lakhs in that of four-anna stamps, while, on the other hand, there was a decrease of nearly 1⅛ lakhs in that of two-anna stamps, and Rs. 12,289 in that of twelve-anna stamps.

Levy of penalties.

6. The number of cases in which deficient stamp duty and penalty were levied by Civil and Revenue Courts, and the amount realized during the period under review, are shown in the following table :—

Year.	Number of cases.		Amount of duty and penalty realized		Total.	
	Civil Courts.	Revenue Officers.	By Civil Courts.	By Revenue Officers.	Cases.	Amount.
1	2	3	4	5	6	7
			Rs	Rs.		Rs.
Average of three years 1890-91 to 1892-93.	1,335	2,241	11,380	25,2 8	3,576	36,678
1893-94	1,449	2,872	11,871	25,608	4,321	37,479
1894-95	1,518	2,999	12,111	27,254	4,517	39,365
1895-96	1,317	2,755	10,098	2[illegible],773	4,072	37,871
Average of three years 1893-94 to 1895-96.	1,427	2,875	11,360	26,878	4,302	38,238
Average increase in the three years under review compared with the preceding three years.	92	634	...	1,580	726	1,560
Average decrease in the three years under review compared with the preceding three years.	...	...	20	...	...	...

Prosecutions.

7. The average number of prosecutions instituted for various breaches of the stamp law was 1,005, against 646 in the previous triennium. The average number of persons brought to trial was 1,238 against 740, of convictions 1,009 against 584, and of acquittals 160 against 125. The average amount of fines imposed by Magistrates was Rs. 7,524 against Rs. 5,440, and of rewards paid Rs. 2,197 against Rs. 1,339. The Board bring to notice the fact that no rewards were given in the districts of Howrah, 24-Parganas, Jessore, Khulna, Jalpaiguri, Darjeeling, Patna, Shahabad, Champaran, Muzaffarpur, Bhagalpur, Purnea, and in six districts of the Orissa and Chota Nagpur Divisions. This points to laxity of administration in the districts named, for the judicious use of rewards is almost the only means of detecting evasions of the law.

8. Several cases of fraud and defalcation were detected, the most serious of which occurred in the Bankura Treasury, where one-rupee court-fee labels of the aggregate value of Rs. 13,140 were fraudulently abstracted from a consignment received from the Superintendent of Stamps. The thief could not be traced, but the Treasury Officer and Treasurer, who had failed to observe the rules and had neglected all ordinary precautions, were made jointly responsible for the loss. In Calcutta a waste-paper dealer was convicted for cleaning and reselling at a reduced rate one-anna receipt stamps abstracted from old documents.

9. The Lieutenant-Governor's acknowledgments are due to the Board for their careful administration of the Stamp Department. The Board mention Messrs. Barnes and Beames, the Superintendent and Officiating Superintendent of Stamps; Rai Durgagati Banerjee Bahadur, Collector of Stamp Revenue, Calcutta, and Mr. Girard, his assistant, as specially deserving of credit.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,
Secretary to the Govt. of Bengal.

DARJEELING,
The 10th September 1896.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE CUSTOMS DEPARTMENT FOR THE YEAR 1895-96.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

RESOLUTION—No. 247T.—F.

Darjeeling, the 11th September 1896.

READ—

The Report on the Administration of the Customs Department for the year 1895-96.

During the first 10 months of the year under review, duties were collected under Act XVI of 1894, which modified the tariff values fixed by the Tariff Act, VIII of 1894, and imposed a duty of 5 per cent. on cotton goods. From the 3rd February 1896, duties have been collected under Act III of 1896, which amended the previous Tariff Act of 1894, by abolishing the import duty on cotton twist and yarn including sewing thread, and by reducing the rate of duty on cotton piece-goods from 5 to 3½ per cent. The working of the Cotton Duties Act in Bengal has been described in detail, in a separate Report submitted by the Collector of Customs, Calcutta.

2. *Customs Duty.*—The following statement compares the gross and net customs duty, inclusive of the duty on imported salt, collected during the past five years and in the years before and after the remission of the import duties in March 1882:—

	1880-81.	1881-82.	1882-83.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Import duty (excluding duty on salt).	72,72,428	61,72,991	14,87,018	28,08,900	31,06,025	35,94,860	87,46,193	1,48,97,056
Ditto on salt	2,27,44,383	2,37,15,928	1,74,72,613	2,39,34,018	2,40,16,651	2,36,63,961	2,44,40,899	2,46,81,578
Export duty	17,99,354	20,46,899	21,28,492	22,43,551	18,97,330	17,54,901	20,36,109	20,96,811
Total gross duty ...	3,18,16,170	3,19,35,818	2,10,88,123	2,89,86,469	2,90,20,006	2,90,13,722	3,52,23,201	4,16,75,440
Refunds and drawbacks—								
Imports	3,37,096	3,04,426	3,20,636	3,32,736	2,63,270	2,98,531	3,12,540	3,58,764
Exports	71,979	1,05,549	1,16,840	1,02,850	72,886	57,433	53,842	65,321
Total ...	4,09,075	4,09,975	4,37,476	4,35,586	3,36,156	3,55,964	3,66,382	4,24,085
Total net duty ...	3,14,07,095	3,15,25,843	2,06,50,647	2,85,50,883	2,86,83,850	2,86,57,758	3,48,56,819	4,12,51,355

The total net duty collected during the past year rose from Rs. 3,48,56,819 in the previous year to Rs. 4,12,51,355, an increase of 18 per cent., to which import and export duties alike contributed. The increase of Rs. 63,45,313 under imports is mainly due to larger receipts from cotton piece-goods and twist and yarn, which increased by Rs. 61,40,306, the remainder Rs. 2,05,007, being accounted for by the rise in receipts from salt duty. The export duty increased by Rs. 49,223, owing to larger shipments of rice to foreign Ports. The charges of the year under review, inclusive of refunds and drawbacks, amounted to Rs. 12,81,266 against Rs. 10,82,456 in the previous year. The increase occurred mostly at Calcutta, and is due partly to the payment during the year 1895-96 of certain establishment charges relating to the previous year, and partly to the cost of the additional establishment sanctioned for the Calcutta Customs House. The total net revenue of the year, including receipts other than duty, was Rs. 4,07,44,170 against Rs. 3,44,21,806 in the previous year, and thus showed an improvement of Rs. 63,22,364, or 18 per cent.

3. The following table shows the collections of import and export duty at the different Ports in the past two years:—

Import duty.

	Calcutta.		Chittagong.		Orissa Ports.		Narayanganj.		Total.	
	1894-95.	1895-96.	1894-95.	1895-96.	1894-95.	1895-96.	1894-95.	1895-96.	1894-95.	1895-96.

Orissa Ports	1,67,926	2,36,662
Narayanganj	.....	.....
Total ...	20,36,109	20,96,811

The increase of Rs. 63,91,537 in import duty occurred mainly under the following heads:—cotton goods (Rs. 45,43,792), oil (Rs. 11,82,654), metals Rs. 1,60,691), liquors (Rs. 97,146), and hardware and cutlery (Rs.66,062).

4. *The value of trade.*—The following table compares the value of the import and export trade of the province, both foreign and coasting, in the past two years under the three main heads of merchandise, treasure, and Government transactions:—

	Merchandise.		Treasure.		Government transactions.		Total.		Increase.	Decrease.
	1894-95.	1895-96.	1894-95.	1895-96.	1894-95.	1895-96.	1894-95.	1895-96.

Total trade of the Province.	82,35,40,114	87,92,76,295	3,54,35,855	2,80,07,284	1,96,81,936	2,19,86,444	88,46,57,005	92,97,84,884	1,62,11,368	.....

There was an increase of Rs. 54,51,503 in the total value of the foreign import trade in merchandise, but the advance took place in dutiable goods only, there being a decrease of Rs. 11,00,96,369 in free goods owing to the operation of the tariff of 27th December 1894. The imports of treasure, which have been declining since 1890-91, rose by 25 per cent. owing to larger imports of gold from the United Kingdom and Hongkong. The improvement of Rs. 18,97,976, or 13 per cent. in Government transactions is due to larger importation of railway materials by the East Indian Railway. The increase of Rs. 59,54,084, or 1·3 per cent., in the total value of the foreign export trade in Indian produce, is ascribed to larger shipments of raw cotton to Germany, Italy, China, Belgium, and the United Kingdom, of indigo and wheat to the United Kingdom, of saltpetre to the United States, and of tea to Australia. In the coasting trade, the increase in imports is accounted for by larger receipts in Calcutta of rapeseed, flour, cotton twist, and grey piece-goods of Indian manufacture, English grey and white cotton piece-goods, metals and cloves from Bombay, and of raw cotton, rice and paddy from the Bengal outports; while the improvement in exports is due to larger shipments of coal and tea to Bombay; of rice, pulse, gram, jute manufactures and raw silk to Madras; of coal and jute manufactures to Burma, and of cotton yarn, jute manufactures and betelnuts to Bengal outports. Including Government transactions, the total value of the trade of the Province stood at Rs. 92,92,04,859 against Rs. 91,38,16,945 in the previous year, showing an increase of Rs. 1,53,87,914, or 1·6 per cent.

5. *Trade of Calcutta with Foreign Countries.*—More than half of the foreign trade of Calcutta is carried on with the United Kingdom, but during the past year the proportion again fell from 57·44 to 56·24. Under imports, the value of cotton goods fell from 15 to a little over 13 crores, while the exports of treasure were less by nearly 38 lakhs than the abnormal figures of 1894-95. The United States comes second, with a percentage of 7·14 of the entire trade, against 7·05 in the previous year, the increase in imports being due to larger receipts of kerosine oil and tobacco. The exports, on the other hand, show a decrease of Rs. 5,14,391, the result of restricted trade in raw jute, indigo, and oilseeds. Germany still holds the third place, but her share in the trade stood at 6·35 against 6·43 in 1894-95, owing to a falling off in the exports of raw jute, rice and oilseeds. In consequence, however, of the very large imports of beet-sugar, the import trade advanced. China comes fourth, with a percentage of 5·69 against 5·61 in the previous year. The trade with Hongkong increased during the past year, an improvement occurring under exports on account of the higher price of opium, of which 20,200 chests were exported during 1895-96 against 20,049 chests in the previous year. The trade with the Treaty Ports of China consists almost wholly of opium, the exports of which declined by more than twice the amount of the increased exports to Hongkong. The Collector remarks that the import duty of 5 per cent., coupled with the closing of the Indian Mints, appears to have extinguished the imports of silver from China, which, for some years past, had been gradually declining. The Straits Settlements, Ceylon, France, and Australia maintained the positions they occupied in the preceding year. The trade with the Straits Settlements shows a decrease in imports, due to a smaller trade in spices and stick lac, while reduced shipments of opium and oilcake account for the decline in exports. The trade with Ceylon improved during the year, owing to larger imports of merchandise and treasure, and to heavier shipments of rice. France shows a net decrease of $1\frac{2}{3}$ lakhs in the value of her trade with Calcutta, while the Australian trade improved in imports, under treasure, horses, and raw wool, but fell off in exports mainly under jute manufactures, of which the value declined from 90 to 70 lakhs. The value of the trade of Austria-Hungary with Calcutta rose but little, as compared with the previous year. Italy, on the other hand, shows an increase of more than five and a half lakhs, and the export of raw cotton is stated to have risen from 55,460 cwts. to 117,452 cwts., representing an increased value of more than 14 lakhs. The trade with Belgium increased by more than 29 lakhs, or nearly 38 per cent., steel, copper and matches being the chief imports; while under exports, raw cotton and jute manufactures showed an appreciable increase.

The Mauritius trade decreased both under imports and exports: the decline under the former is attributed to the reduced dealings in sugar, and in the latter to the smaller shipments of rice during the year.

6. *Shipping in Calcutta.*—The proportion of the foreign trade of Calcutta carried through the Suez Canal stood at 74 per cent. against 72 per cent. in the previous year. The table below compares the total shipping entering inwards and clearing outwards without touching at any other ports and the aggregate tonnage in the past two years:—

	1894-95.		1895-96.	
	Number.	Tonnage.	Number.	Tonnage.
1	2	3	4	5
Steam vessels ...	678	1,424,574	642	1,407,604
Sailing „ ...	321	533,788	229	373,194
Native crafts ...	26	3,855	24	4,789
Total ...	1,025	1,962,217	895	1,785,587

There was thus a falling off of 36 steam vessels, 92 sailing vessels, and 2 native craft representing a decline in tonnage of 176,630 tons. The trade with the United Kingdom, France, Germany, and the United States shows a total decrease of 74, 6, 18, and 15 vessels respectively due to the falling off in the trade of Calcutta with those countries.

7. *Imports into Calcutta.*—The total values of the principal articles of merchandise imported into the port during the last two years were:—

	1894-95.	1895-96.
	Rs.	Rs.
Cotton goods	14,47,35,956	12,63,00,058
Twist and yarn	74,54,630	86,28,857
Metals	2,08,58,890	2,74,15,489
Mineral oil	1,00,01,981	1,84,99,500
Machinery (excluding railway plant) ...	95,18,775	1,41,97,238
Woollen goods	72,35,464	56,38,567
Sugar	54,50,009	59,09,872
Liquor	49,23,576	53,65,028
Salt	67,94,392	47,54,262
Hardware and cutlery	39,59,682	45,50,712

Twist and yarn show an increase, while cotton goods declined by Rs. 1,84,35,898. Metals advanced by 31·4 per cent., owing to larger importations of unwrought copper, wrought copper, iron, lead, steel and zinc. The improvement of 70 per cent. in mineral oils is due to larger shipments from the United States and Russia, especially the latter. For the first time in the history of the trade, the receipts of Russian oil have been larger than those of American, which is ascribed, partly to the cheapness of the former kind, and partly to the energy and enterprise of those who carry on the Russian trade. Machinery and mill-work showed an increase of 49 per cent., owing, it is stated, to a larger importation of machinery for jute, flour and paper mills, and of electric plant. Woollen goods show a decrease of 22 per cent., the heaviest fall being under piece-goods. The advance of 11½ per cent. in the trade in sugar is attributed to larger shipments from Germany, Hongkong and the Straits Settlements, while the imports from Mauritius and Java were smaller. The importation of ale, beer and porter increased by 2 per cent., of spirits by ·5 per cent., and of wines and liqueurs by 19 per cent. Both brandy and gin decreased, but whisky increased by 1·4 per cent. The Collector remarks that the importation of cheap German spirit for the manufacture of spurious brandy and whisky continues to increase. This spirit is cheap and very strong, and the trade in it is believed to be profitable. An improvement of 19 per cent. occurred under wines and liqueurs, the advance being

most marked under champagne and claret, which increased by 31 and 29 per cent., respectively. The decline of 24 per cent. in the trade in salt is attributed to a large quantity having been left in stock at the close of the preceding year. The imports of hardware and cutlery from the United Kingdom, Germany and Austria-Hungary increased, while the imports from Belgium declined. The trade in these articles with the United Kingdom is said to have been promoted by the rise in exchange, by credit on a larger scale having been given by agents to importers, and by the fact that competition has reduced commission, freight, and other charges. The increase in the trade with Germany is said to be due to the energy with which it is pushed, and to the action of commercial travellers, who come out regularly and call upon the principal native dealers in the large towns. Among other items, it may be observed that improvements occurred in agricultural implements (20 per cent.), apparel (3 per cent.), and matches (13½ per cent.), while the trade in umbrellas and spices declined. On the whole, the total value of the imports, including treasure, but excluding Government transactions, rose from Rs. 27,44,43,275 to Rs. 28,18,46,990, showing an increase of Rs. 74,03,715, or 2·7 per cent. The increase occurred both under merchandise (Rs. 46,42,117, or 1·8 per cent.) and treasure (Rs. 27,61,598, or, ·9 per cent.).

8. *Exports from Calcutta.*—The total value of exports from Calcutta to foreign countries, including treasure, but excluding Government transactions, declined from Rs. 45,80,59,114 to Rs. 45,69,38,422, showing a falling off of Rs. 11,20,692. The values of the trade in the principal exports in 1894-95 and 1895-96 are given below :—

	1894-95. Rs.	1895-96. Rs.
Jute, raw	9,89,89,311	9,27,61,410
Jute gunny-bags ...	3,13,00,321	3,46,68,939
Opium	5,29,68,740	5,04,63,935
Tea	7,11,57,590	7,15,63,397
Oilseeds	8,50,31,068	2,32,33,966
Rice	3,67,87,929	3,34,83,049
Indigo	3,47,75,823	3,72,38,471
Hides and skins ...	2,72,63,795	3,12,75,285
Wheat	8,51,526	37,14,489
Raw cotton	43,15,840	97,03,885
Lac	1,39,57,703	1,83,02,320
Silk, raw	48,24,330	61,67,336

The exports of raw jute declined by 7·05 per cent., owing to smaller supplies having been taken by Germany and the United States, as the shipments to those countries in the preceding year had been excessive. The increase of 17 per cent. in jute gunny-bags is attributed to increased exportation to Egypt, the United States, Hongkong, the Straits Settlements and other countries, against decreased shipments to the United Kingdom and Australia. The fall of 9 per cent. in the value of opium exports is due to the smaller number of chests offered for sale. In tea there was an advance of 6·1 per cent. in the exports, the most noticeable increase being in the case of the United States, the exports to which rose by no less than 155·1 per cent. There was also an increase in the direct shipments to Canada, and in the exports to Persia through Bombay and Turkey in Asia. The actual outturn of the season's crop was about five million pounds below the original estimate; and the average price per pound in Calcutta fell from 9 annas 3 pies in 1894-95 to 8 annas 9 pies. The exports of linseed, and rapeseed declined owing to short crops, while that of poppy seed increased. The United Kingdom, Germany, the East Coast of Africa, Mauritius, Natal, Réunion, South America, and Arabia all took smaller supplies of rice, and although larger quantities were exported to Ceylon, Cape Colony, and the West Indies, this accounts for the decline of the article by 1·8 per cent. in comparison with 1894-95. Indigo shows an advance of 4·5 per cent. and the exports are the highest for many years past. This was due to increased shipments to the United Kingdom, Austria-Hungary, France and Russia, while the exports to the United States declined considerably. The exports of raw hides fell by ·68 per cent., but the value of the trade stood at a larger figure, as the prices were higher. Large speculative purchases

were made for America, and there was a considerable increase in the exports of dressed hides to the United Kingdom. The remarkable increase of 320·7 per cent. in the export of wheat, arose from the advance in the trade with the United Kingdom, where the crop was even shorter than in the preceding year. Small shipments of wheat, were also made to Belgium, France, and Germany. The advance of 124 per cent. in the export of raw cotton is ascribed to the increased out-turn of the crop in India, and to the fact that the American production fell short, and the price of raw materials rose. Germany, as usual, was the largest consumer, but the exports to the United Kingdom rose by 97 per cent., and larger quantities were also taken by Austria-Hungary, Belgium, and Italy. The exports of lac show an advance of 23·8 per cent., due to higher prices and larger production. There was an improvement of 33 per cent. in the exports of raw silk. The Collector of Customs writes:—

"The consumption of silk depends very much on the freaks of fashion in Europe. For some years, silk goods have not been specially in favour, but last year there was a change, and a demand sprang up, resulting in increased requirements of the raw article. Bengal silk participated in this demand in the London market."

9. *Treasure.*—Both gold and silver show an increase under imports, and a decrease under exports. The imports improved by Rs. 21,66,318 and Rs. 5,95,280, while the exports declined by 37¾ and 26¾ lakhs respectively. Gold was principally obtained from the United Kingdom, China and Victoria, while the imports of silver came mostly from the United Kingdom.

10. *Subordinate Ports.*—The total value of the foreign trade of the Port of Chittagong rose from 107 to 110 lakhs in the past year, an advance of nearly 3 per cent. This took place in imports only, and was caused by a more extensive importation of cutlery and salt from the United Kingdom, and of kerosine oil from Batoum and the United States. There was a fall of Rs. 1,72,825 in the value of exports, which is attributed to a short crop of rice in Chittagong, Noakhali, and the neighbouring districts. There were no imports or exports of treasure. The coasting trade generally decreased, but the amount of customs-duty collected at the Port rose from Rs. 6,86,331 in 1894-95 to Rs. 7,00,824. At the Orissa Ports the total value of the trade, both foreign and coasting, as compared with 1894-95, rose at Balasore from Rs. 94,73,701 to Rs. 1,16,44,198, at Cuttack from Rs. 21,52,418 to Rs. 33,08,365, and at Puri from Rs. 3,73,238 to Rs. 7,03,656. The value of the foreign trade advanced both in imports and exports at Cuttack and Balasore, while Puri showed an improvement in exports only. Rice was exported in larger quantities from all the Orissa Ports to Mauritius; and from Cuttack and Puri alone to Ceylon. The net amount of customs-duty, inclusive of the duty on imported salt, collected at the Orissa Ports, amounted to Rs. 4,88,479 against Rs. 1,69,015 in the previous year. The trade at Narayanganj, which is carried on with Coast Ports only, rose in total value from Rs. 67,14,087 to Rs. 69,46,931, the amount of duty collected on salt alone standing at Rs. 1,41,962 against Rs. 72,022 in 1894-95. Besides salt, kerosine oil was the only other dutiable article imported here, but the supplies of both of these increased, owing, it is said, to the low prices they fetched at Chittagong. The exports were of rice only and diminished during the year.

11. The Lieutenant-Governor's thanks are again due to the Board of Revenue for their supervision of the Customs Department during the year, and to Mr. Baker for the clear and interesting Report submitted by him. The names of the Officers who are favourably noticed by the Board, with the remarks recorded, will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 14th September, 1896.

Burdwan.—Rainfall at Sadar ·44, Kalna ·27, Katwa ·71, Raniganj 1·21. Weather hot. Steady rain since yesterday (13th). Harvesting of *aus* and jute progressing. Prospects of sugarcane good. More rain wanted everywhere for *aman* paddy. Heavy rain since yesterday (13th) will do much good. Condition of cattle good. Fodder and water sufficient. Common rice selling as follows:—

	Srs. c.	
Sadar	11½ to 15 0	per rupee.
Kalna	11½ to 13 0	
Katwa	12 10	
Raniganj	12 0	

Midnapore.—Rainfall at Sadar 1·40, Contai ·74, Tamluk 1·54, Ghatal 2·35. Weather seasonable. Prospects excellent. Indigo is being sown. *Aus* is being reaped. Transplantation of *aman* nearly finished. Some damage from floods in Ghatal and Dantun. Cattle-disease reported from Binpur and Garhbeta police-stations. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Contai	15 to 18	
Tamluk	14	
Ghatal	14 to 15	

24-Parganas.—Rainfall at Sadar 1·31, Basirhat 2·97. Weather cloudy with rain. Prospects of standing crops favourable. Harvesting of jute and *aus* continues. No cattle disease. Fodder and water sufficient. Common rice sells as follows—

	Srs. c.	
Sadar	10 to 12 8	per rupee.
Barasat	10 0	
Basirhat	11 10	
Diamond Harbour	11 6	

Murshidabad.—Rainfall at Sadar ·48, Kandi 1·25, Jangipur ·44. Weather hot. Sugarcane and *aman* doing well. More rain wanted for *aman*. Harvesting of *bhadoi* still going on. State of jute and mulberry fair. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Kandi	12	
Jangipur	11½	

Khulna.—Rainfall at Khulna 1·28, Bagirhat 1·39, Satkhira 1·20. Weather hot and sultry with occasional showers. Transplantation of *aman* continues. More rain wanted. Harvesting of *aus* nearly over, and that of jute going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs. c.	
Sadar	9 0	per rupee.
Bagirhat	9 8	
Satkhira	10 8	

Dinajpur.—Average rainfall ·83. Weather very hot. More rain is wanted. Transplantation of *aman* still going on. Outturn of *aus* and jute estimated to be 8 and 10 annas respectively. A flight of locusts has appeared, but no report about the destruction of crops has been received yet. No cattle-disease.

Rangpur.—Average rainfall ·87. Transplantation of *aman* and steeping and washing of jute continue. More rain wanted. Prospects more hopeful. Water and fodder sufficient. Common rice selling from 8 to 12 seers per rupee.

Pabna.—Rainfall at Sadar ·11, Sirajganj ·68. Weather hot and cloudy. River falling off fast. Prospects of *aman* paddy not good. Fodder available.

Dacca.—Rainfall 4·64. Weather seasonable. Prospects of standing crops not favourable. Fodder available. No cattle-disease. Price of common rice varies from 8 seers per rupee at Narayanganj to 9½ seers per rupee at Manikganj.

Chittagong.—Rainfall 3·72. Weather hot. Harvesting of *aus* still continues. Recent rain has been beneficial to transplantation of winter rice crop. Water and fodder sufficient. Rice sells from 8 to 10 seers per rupee.

Patna.—Rain fell at Sadar, Bihar, and Dinapore to-day (14th). Indian-corn being harvested. Transplantation of paddy nearly completed. More rain urgently wanted. Prices rising in Patna. Fodder and water for cattle sufficient. To-day's (14th) heavy rain will be very beneficial. Common rice sells at 12 seers per rupee.

Gaya.—Prospects of crops fair. *Bhadoi* harvesting continues. Rain wanted for paddy. Some rain last night and to-day (14th). Common rice selling at 12 seers per rupee.

Champaran.—No rain except a small shower. Rain urgently wanted, as the westerly winds have dried the soil. Prices rising again. Common rice sells at 12½ seers, against average of 15½ seers per rupee. Fodder and water sufficient.

Darbhanga.—No rain in the district during the week. Rain is urgently needed. West wind is drying moisture. Indian-corn is harvested. *Maruá* ripening. Paddy transplantation is about to be given up.

Bhagalpur.—Weather fair. Rainfall at Sadar yesterday (1·09). No rainfall reported from Madhipura and Banka. Crops suffered much from drought. Rainfall yesterday will do some good. Cattle-disease reported to prevail in all the subdivisions. Fodder and water sufficient. Average price of rice 13 seers 7 chitaks per rupee.

Purnea.—Rainfall ·12. Transplantation of winter rice stopped for want of rain. Harvesting of *bhadoi* paddy and jute still going on. Cattle-disease at Kasba. Fodder and water sufficient. Common rice sells from 11 to 12 seers per rupee.

Cuttack.—Rainfall 2·00. Weather seasonable. Early or *beali* rice in parts not affected by the flood is being reaped. Transplantation of *sarad* or winter rice in some places in the flooded tracts is going on. Prospects in tracts not affected by the flood are generally good. Cattle-disease reported from thana Jagatsingpur. Fodder sufficient. Common rice sells as follows:—

	Srs.	c.	
Cuttack	15	12	per rupee.
Jajpur	21	0	
Kendrapara	21	0	
Banki	21	0	

Hazaribagh.—Drought succeeded by favourable rainfall. Prospects of crops excellent. Rice sells at 9 to 12 seers per rupee; other food-grains also at scarcity rates.

General Summary.—There was general rain during the week except in parts of Bihar. More rain is still generally required for the winter rice crop, especially in the north of Bihar, where the westerly winds are said to have dried the soil. The harvesting of early rice and other *bhadoi* crops and the steeping and washing of jute are proceeding. Some damage is reported to have been caused by floods in parts of Midnapore. In Cuttack paddy is being replanted in parts of the flooded area. A flight of locusts is reported to have appeared in Dinajpur. No cattle-disease is reported except from a few places in Bhagalpur, Purnea, Midnapore and Cuttack. The price of common rice is reported to have again risen in some of the Bihar districts: elsewhere no important changes are reported.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT, M. FINUCANE,

The 15th September, 1896. *Offg. Secy. to the Govt. of Benga*

Results of the Meteorological Observations taken at the Alipore Observatory from 6th to 12th September 1896.

The mean relative humidity	%	81
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		86
The total fall of rain from 6th to 12th September 1896	Inches.	0·09
The average fall of the corresponding period for 24 years, Surveyor-General's Office		3·03
The total fall from 1st January to 12th September 1896		46·83
The average fall of the corresponding period for 24 years, Surveyor-General's Office		53·14

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, nd from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the hermometers are verified and the readings have been corrected to a standard constructed and verified at the ew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet bove the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, ormerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in he Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; ⌓, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
